The increase in the population and taxable real estate of the city of Sherbrooke since 1891 is given by the Gazette as follows:

	Population.	Real Estate.
1891	10,110	$3,552,333
1896	9,746	3,901,062
1901	11,452	4,354,668
1901	13,064	4,951,793

The census as taken by the city valuators for 1905 gives a population of 13,307.

Mercantile Summary.

A new electric light system is being installed at Indian Head, Sask.

The Atikokan Iron Company are engaged in earnest in laying the foundations for their blast furnace and docks at Port Arthur, Ont. The concrete work is expected to be completed before the winter sets in.

Gowans, Kent & Co., Limited, total capital stock $500,000, and chief offices in Toronto, have received a Dominion charter authorizing them to carry on a wholesale glass and crockery business in Toronto and Winnipeg, and to manufacture and deal in the same.

The Dominion Coal Company has started work on a new foundry at Glace Bay, Cape Breton. It will be 90 by 100 feet, and cost about $25,000. The output at the big colliery at Glace Bay, Dominion, No. 2, was last month the largest in its history. Some days the output ran up to 3,000 tons per day on single shifts.

The Land, Log & Lumber Company, Limited, of Winnipeg, has received a Dominion Government charter. It will carry on business as a manufacturer of and dealer in logs, lumber, and all articles into which wood enters as a material; it proposes also to assist settlers by way of bonus; acquire steam, electric, pneumatic, or hydraulic power; construct and buy steam and sailing vessels, etc. Among the charter members mentioned are J. S. Lovell, R. Cowans, etc., Toronto. The capital is $300,000.

Some time ago, the charter for the Pacific, Omineca, & Northern Railway was purchased by the Grand Trunk Pacific Railway for the sum of $63,000. Now it is stated that construction work will be started on the line next May. The plans call for construction from the head of Kitamaat Arm, on salt water, to the Skeena River at or in the vicinity of Hazelton. It is said to be the intention of the G.T.P. to utilize the road for the forwarding of construction material from the coast to the interior. With the railway in operation from Kitamaat to Hazelton supplies can readily be placed inland some two hundred miles and distributed from there.

It is believed that the Nova Scotia Steel and Coal Co. are likely to beat all records this season in the production of coal. Up to the end of July a quarter of a million tons had been shipped, showing a substantial increase over any previous similar period. The Point Acconi property, which has been undergoing the preliminary work of getting ready for business below the surface, is at present all but ready to begin the taking out of coal. All the modern apparatus in coal mining will be put in at this new pit. A thorough system of electricity will be installed. It is stated by some that the output for the whole year will show an aggregate double that of last year.

The Meyer-Thomas Company, Limited, Montreal, has been granted a charter by the Dominion, authorizing it to make, sell, and deal in boxes and wooden packages of all kinds. The capital, $100,000.

A despatch to the Halifax "Chronicle" states that there is considerable activity in shipping lumber there at present, there being no less than three barques, several tern and other schooners now loading, some for Buenos Ayres and the West Indies.

During the navigable season just closing up to the end of October, 742 vessels entered the port of Montreal, having a total tonnage of 1,740,640, as compared with 741 last season, with total tonnage of 1,717,027. The last ocean steamships are scheduled to leave that port on or before November 23, the mail boat to sail being the Allan liner "Tunisian," on Friday, November 17.

The Major Manufacturing Company's premises at Montreal, full of paints, oils, and varnishes, became a prey to the flames on Friday night last, and were completely destroyed. The loss is estimated at from $60,000 to $80,000, only partially covered by insurance. Much difficulty was found in fighting the fire because of electric wires.

News arrives of the discovery of a large number of mineral strikes on Portland Canal, most of them on the Canadian side of the waterway. A good number of claims have been already staked, on some of which development work has started. The principal discoveries are of galena, with some of silver, lead and copper. Glacier Creek in particular seems to be full of mineral wealth.

The counties of Durham and Northumberland sent a deputation to the Ontario Ministers a few days ago urging them to grant the asked-for lease of water-privileges to the Healy Falls Power Syndicate, but limiting the supply of power to those two counties. The Falls are on Trent River, and afford the only considerable source of water-power for electric purposes for the industrial concerns of Cobourg, Port Hope, and thereabout. They are said to have a capacity of 6,000 horsepower. The request of the petitioners seems likely to be granted, though perhaps without the limiting clause suggested.

EXECUTION OF Trusts

An individual may die, he may abscond, he may be guided by favoritism in administering your estate.

A Trust Company endures for generations—carries out the very letter of your bequests. 3

Vancouver Debentures

Tenders marked "Tenders for Debentures" will be received by the undersigned up to Friday, 24th November, 1905, at 4 p.m., for the purchase of $500,000.00 Debentures of the City of Vancouver. These debentures will bear interest at 4 per cent. per annum, payable half yearly. Principal repayable as follows:—

As to	$46,500	at the expiration of	12 years
"	$25,000	"	10 "
"	$157,500	"	20 "
"	$17,500	"	30 "
"	$253,500	"	40 "

The highest or any tender not necessarily accepted.

Tenders will be received for the whole or any part of the different issues.

Debentures payable at par, Toronto, Montreal and New York.

For further particulars address,

A. McEVOY, City Clerk,
Vancouver, B.C.
Vancouver, B.C., 6th Oct., 1905.

WANTED.

A few copies of the issue of the Monetary Times for October 15th, 1905. Address Monetary Times Office, 62 Church Street, Toronto.

The Norwegian Steamer "Hero" is this week taking from Montreal one of the largest cargoes of grain ever shipped out of Canada. She has about 225,000 bushels, of which 110,000 bushels are wheat and the remainder corn. She is sailing for Norway.

Six millions increase in a city's budget in one year sounds like a striking figure, but the city is New York. A despatch of last Tuesday says that the budget of the City of New York for 1906, as approved by the board of estimate on that day, provides for an expenditure of $116,805,490. This is an increase of $6,987,897 over the previous year. Enlargements of the police and fire departments and provision to pay higher wages in street cleaning department are responsible for some increase.

* * *

THE TEXTILE MARKETS.

Market conditions in raw silk are so varied with reference to specific producing centres that general irregularity continues to be reported. The different markets are still more or less uncertain, and no one is willing to predict that bottom has been reached. Advices from Yokohama this week lead certain optimistic factors to believe that the decline has been stopped, at least in that centre, but others point to the amount of unsold silk, and base their arguments for continued irregularity on the presence of this stock. For this time of year it would seem as though between 17,000 and 18,000 bales of Japanese silk were too much of a load to insure the stability of the market in that section. What other centres may do is a question, but buyers are influenced largely by this stock in Yokohama to proceed very cautiously on all grades and qualities of silk. As long as the silk salesman is unable to secure free business from his customers the manufacturer is not likely to speculate on the future.

A resumé in the "New York Dry Goods Economist" on fashions states that with the pattern hat business at an end, and the call for trimmed hats pretty well over, the millinery business has now resolved itself principally into a demand for shapes together with trimmings and materials of various kinds. There are three styles that stand out prominently. One is a small turban, almost a toque; another is a larger turban, and the third a French sailor. There are various other styles called for, naturally, but the three mentioned are easily leaders. It looks, too, as though the demand had settled down more to the quiet colors. Some bright effects are wanted, but though staple and in regular demand, the request is not heavy. Smooth felt shapes lead. Scratch felts are called for in the derby shape only. White beavers are in rather marked demand. With these, as in the case of colored felts, the call is steady, but not large. Velvet bodies, particularly black, receive a fair amount of attention, while silk and plush shapes are called for to some extent.

A report from Chemnitz says that not for many years has the hosiery business been so lively as it is this season. All foreign markets have placed much larger orders than usual, and the domestic trade are taking far more goods than usual. The result is a scarcity in nearly all lines made in this district. In coarse grade goods so great is the demand that manufacturers find it very difficult to obtain the few hundred dozen needed for their customers in the United States.

There is little change to report in the linen market of Belfast. Business continues steady in nearly all departments, and rates generally are well maintained. Spinners have plenty of orders on hand, and prices are steady. In the brown cloth market there is a quiet expansion, and the demand for dress goods power-loom linens for bleaching, damasks, and cloth for dyeing, and hollands shows an improvement. The home warehouses are ordering more freely, and shipping trade keeps active. A fine trade has been done with the United States throughout the year, and is brisker than ever.

One of the marked features of the present state of our staple industry, says a Manchester correspondent of the "Drapers' Record," is the increased activity of our home trade in cotton goods. During the last few weeks an extensive business has been done in the way of orders being given out by distributors to makers, the completion of which will take several months. It is a long time since stocks were so low amongst wholesale houses. Retail establishments are pressing for delivery. It comes to this—that after a rather long spell of depression in the North shopkeepers have run very low in stocks. The vacuum thus created is now being filled up by the increased demand from manufacturers. Nearly all kinds of goods are affected. It is needless to refer to any one description in particular. It may, however, be said that fustian producers are very busy, the looms being now on full time, a state of affairs that has hardly been experienced for some time. It is interesting to note that during the last half dozen years or so not far off 10,000 looms that usually made such goods have gone out of existence. Of course, this is the season. Speaking broadly, the prospects of the home trade are brighter than for some years back, and perhaps it is not too much to say that this should mean fuller employment than for some time back, owing to the iron and smaller industries being very well fortified with orders. Coming now to the shipping trade, it may be briefly said that China has again been in the market. Last week and this a fairly large business has been done in heavy cloths and shirtings. Lancashire manufacturers have still plenty of work. Very few are seeking orders. American yarns are dragging, and have this week lost a good share of their margin, owing to the upward spurt in the raw material.

From one market day to another there is very little change in the Bradford wool trade, says an English textile paper. Prices for all kinds of both home and colonial wools continue extremely firm, and there is no pressure on the part of sellers to force any stocks they may hold on to the market. There are few large transactions passing, but this absence of business is accounted for by the fact that the amount of wool in stock or in sight is still very small, and consumers are only buying to meet their actual requirements, as they prefer to wait until the new Australian season's clip is here in great bulk. At the sales which are now being held in Australia merino and fine crossbred sorts of a merino character are realizing full prices, and the opinion is growing, both there and in this country, that the real consumptive demand of the world may be sufficient to prevent any decline in the prices of merino wool, even when the situation is relieved by the marketing of the largely increased production, which will probably reach 150,000 bales. The demand for worsted yarns (or, in other words, the requirements in worsted yarns of the continental manufacturers) is certainly more steady than it was. Although few new orders of moment are being placed at to-day's extreme rates, particulars on earlier-placed contracts are coming to hand freely, and spinners, as a rule, are now so well employed that they are not prepared to sell worsted yarns except at a fair price, in proportion to the cost of the raw material.

⁂

TORONTO MARKETS

Toronto, Nov. 9, 1905.

Chemicals, Drugs, etc.—The market locally is unchanged, and prices for the most part remain steady. The staples, opium and quinine, are not in particularly keen demand. Carbolic acid is easy, with little business passing. Menthol, however, is better. Payments are good. British chemical markets show some improvement according to latest reports.

Dry Goods.—A very good trade is passing in seasonable goods. All prices are still very firm, and there would appear to be little likelihood of any decline of an appreciable character for some time to come. Dress goods are in active demand, and the fillip given by a few seasonably cool days has resulted in a brisker enquiry for goods of a heavier character.

Flour and Grain.—Deliveries of Ontario grain are very light, the farmers apparently still being busy with their roots, etc. Prices for the same meantime are very firm. Prices for Manitoba grain are easier in sympathy with Chicago, but high freights keep up values. Deliveries continue heavy. Flour is unsettled owing to foreign markets and light deliveries of grain to millers. There is a good local demand for bran and shorts. Rolled oats are unchanged at easy quotations.

Groceries.—Sugar declined again during the week, since which it has been fairly steady. All lines of general groceries are in good request. Canned goods are asked for in considerable quantities. In teas and coffees the features are few. Dried fruits are in seasonable request. Payments are fairly satisfactory.

Hides and Skins, etc.—The effect of the recent decline of prices seems on the whole to have been good. The supplies are very little curtailed, and business offers are brisker on the part of the dealers. Moose and deer skins are coming in in fair supply. Leather is firm at the recent advance.

Provisions.—Prices for butter and especially cheese are better owing to improved export demand. There is now some export enquiry for eggs. Poultry receipts are dwindling a little, with an improved effect on prices. Provisions, such as hams, bacon, etc., are in strong request.

Seeds.—A greater demand for alsike and one or two other seeds has set in from abroad, and prices are firmer, though so far but few large transactions have been reported.

Wool.—Practically no business is being done in wool. Prices keep steady.

IN view of the great interest now being shown as to the cost of Life Insurance it is well for those interested to note that the dividends paid to Policyholders by the Great-West Life Assurance Company reduce the premiums charged BELOW NET COST on the basis adopted by the Government of Canada.

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, 8th November, 1905.

Ashes.—Values are barely as strong as they were, because English buyers do not seem disposed to meet the rise in price, and the demand from that quarter has declined. Stocks here, however, are very light, and we quote $5.50 to $5.60 for first quality of pots, and about $7.50 for first quality of pearls per cental.

Cements and Firebricks.—With the advancing season outside construction work is being curtailed, and the volume of business in cements, therefore, shows decline. Prices are steady, and will be subject to the usual advance towards the end of the month, when the wharves have to be cleared, and everything put in store for the winter. We quote Belgian cement, $1.80 to $2; English, $1.90 to $2.10; Canadian, $1.90 to $2.10; firebricks, $17 to $22 per thousand.

Dairy Products.—Since this day week there has been a further amelioration in values of cheese, some holders of fine Ontario asking 12½c., though this is an extreme figure; probably from 12¼ to 12⅜c. fairly represents the market. The butter market is also a very firm one, and higher prices are talked of as likely to develop in the near future. We quote 23 to 23½c. for fine to choice creamery; fancy grades, 23 to 23¾c. Last week's exports of cheese aggregated 84,748 boxes, and of butter, 10,323 packages.

Dry Goods.—Improvement is reported in collections from city retailers, indicating that sales have been more active in this direction, but general sorting business is only moderate in volume. Spring commands for prints, etc., are coming in well. Under date November 7th, the Canadian Colored Cotton Co. gives notice of an advance in tickings, cotton blankets, napped sheetings, yarns, etc. Apart from this nothing new is reported in values.

Furs.—There is nothing of moment doing yet in raw furs, and local buyers have not thus far determined prices for new catch; but prices generally are likely to rule higher. As high as $6 has been paid for mink of only fair quality. Persian lambs are advancing, being reported in great demand in France, and a pronounced rise is predicted in seal. The London October sales of the 25th, 26th, and 27th, showed advances in rats, mink, marten, ermine, sable, white fox and Australian opossum. American opossum, wolf, lynx, and cross fox sold lower.

Groceries.—Further sagging is noted in the sugar market, and on Monday factory quotations on all lines were again reduced a full ten cents per cental. Present prices are, for standard granulated, $4.30 in barrels; Phoenix, $4.20; bright coffee, $4.10; No. 1 yellow, $3.80; molasses steady at 35c. per gallon in a jobbing way for Barbados. The "Jacona," the last direct Mediterranean steamer, with supplies of dried fruits for this market, put in to Sydney, N.S., for coal on the 6th, and is due in a day or two.

Hides.—Lambskins may be quoted firmer at 95c. each, an advance of about 5c. Hides continue to rule very firm, with offerings well absorbed by tanners, and no stocks in warehouse. No. 1 beef readily brings 11½ to 12c. per pound.

Metals and Hardware.—Trade in these lines is actively maintained, and further stiffening is to be noted in various lines. Domestic bar iron has been put up to $1.95, and $1.97½ in small jobbing lots, and sleigh shoe steel to $2.07½. For No. 1 Carron pig-iron, $21.40 is quoted in car lots, net terms; Summerlee, $20 to $20.25. The general advance noted last week in Canada plates, and sheets of all kinds is fully sustained, and tin plates are firmer at $3.75 for cokes, and $4 for charcoals of standard brands and weight. Lead is again up, $3.90 being asked in an ordinary way, and the discount from list on lead pipe has been again reduced, being now 25 per cent. instead of 25 and 5, as heretofore. Copper is firm at 17¾c. and ingot tin at 36 to 36½c.; spelter, $6.75 to $7; sheet zinc, 7½ to 8c.; antimony, 14 to 14½c.

Oils, Paints, etc.—Linseed oil has at last assumed a firmer tone, and some dealers decline business under 46c. for raw, and 48 to 49c. for boiled, in ordinary lots. Turpentine rules firm at 98c. Window glass has again advanced, and is now held at $4 to $4.25 per 100 feet, for first break, $4.50 being asked in some cases for English glass. In other lines there are no special features.

* * *

Work has begun on the Plymouth (Mass.) Cordage Company's new factory at Welland, Ont. The estimated cost is said to be $600,000.

CANADIAN MANUFACTURES ABROAD.

A report of the Commercial Agent for Australasia, Mr. D. H. Ross, recently stated that a leading furniture warehouse in Melbourne made a magnificent exhibit of Canadian furniture, which attracted great attention. Five furnished rooms were shown, which gave an adequate idea of the requirements of a modern villa residence. The dining-room was probably the most effective, as it was furnished throughout in fumed oak, and comprised the sideboard, dinner waggon, dining table and ten chairs upholstered in buffalo hide. The drawing-room contained a Chippendale suite of inlaid rosewood covered with rich silk, an inlaid rosewood cabinet of exquisite design, overmantel and occasional tables, all perfectly matched, and reflecting a practical illustration of the excellence of high-class Canadian furniture.

The principal importers of Canadian and United States agricultural implements, he says, did not make an exhibit at the Melbourne annual show, but their warehouses in the city attracted many of the farming community, who are now enjoying excellent seasons. The local agents of a well-known firm of St. George, Ont., implement manufacturers, exhibited several leading lines—some quite new to this country—which attracted considerable attention. As these implements have been successfully introduced into New Zealand, where they enjoy an increasing demand, there is every prospect of business being done in Victoria, particularly as the goods have excellent representation.

Through catalogues forwarded to this Canadian Commercial Agency, an order has recently been forwarded from Melbourne to a Peterborough, Ont., company for a sample shipment of farming implements built to Australian specifications. The manufacturers have the advantage of expert representation at this end, and, if the initial shipment turns out satisfactory, permanent business is assured.

The direct representative of one of the largest chair manufacturing industries in Canada has just completed his Australian itinerary and, this week, sailed from Hobart to New Zealand. The extent of the orders secured for Canadian chairs in the principal Australian importing centres was little short of phenomenal, and far exceeded the most sanguine expectations. In securing this gratifying result two essential qualifications were necessary: the comprehensive range and value of the goods, and the undoubted ability and shrewdness of the salesman. With a tariff preference in New Zealand, it can be readily assumed that one Canadian industry will be more than satisfied with their enterprise in so thoroughly exploiting the Australian trade.

The orders recently obtained in Victoria, South Australia and Tasmania for Canadian rubbers and sand shoes have been of a very satisfactory nature in

volume. This business is likely to increase to large proportions, which result is attributable to the excellent quality of the goods and the improved representation the line is receiving.

Owing to the competition of German manufacturers and to the development of the Australian industry, it is rather difficult to secure orders for Canadian mechanical rubber goods. There is always a demand for standard qualities of British make, which were first introduced, and for many years practically held the entire trade, but it appears that rather inferior grades now satisfy the chief Australian demand. The quality of Canadian rubber belting offered in Melbourne is excellent, and much superior to anything produced in Australia, and by persistence an increase in this business is looked for by the local agents.

* * *

REMINISCENCES OF A FAMOUS WIT.

The suicide of William R. Travers at New York will recall stories of his well-remembered father, who was one of the most effervescent and genuine of American wits, and who, though he never wrote a book, will long survive in the anecdotal history of American humor.

The palmy days of the elder Travers were those of the colossi of Wall Street—Fisk, Gould, the founder of the house of Vanderbilt, old Dan Drew and the rest, most of whom have been reposing in Greenwood Cemetery for more than a quarter of a century. Travers had an impediment in his speech, and his jokes were sputtered like jets of seltzer out of a syphon bottle. One day, in the midst of a crowd, he raised a laugh against his friend, Henry Clews, by enquiring: "If you are a s-s-self-made man, wh-wh-why the d-devil didn't you p-put more h-hair on the t-t-top of your head?" Travers died in Bermuda in 1887, and Clews, in his book on Wall Street, which came out that year, devoted a whole chapter to "The Unique Character of Travers."

Here are embalmed not a few of the Travers jokes that were distinctly at the expense of the men of the Street, such as the favorite one about the time when Travers went to Newport, and, being shown a number of beautiful yachts owned by New York brokers, enquired, "W-wh-where are the cu-customers' yachts?" Also the story of "Plunger" Walton's proposition to Travers that they should go into business in Wall Street together. "I've made $350,000 on horse races in the last two years," said Walton, "and if you'll give me points on stocks we can make barrels more." "Y-you've made $350,000 on horse racing? Travers repeated. "Yes." "And you want m-me to g-give you p-points on stocks?" "Yes." "Well, I'll g-give you a first-rate p-point. If you-ve made that much in two y-years stick to your b-b-business. It's a f-first-rate p-point."

Travers did not by any means reserve the arrows of his wit for his friends of Wall Street. Once, when looking out of the window of his club, he saw a well-known lawyer on the opposite side of the street, and called

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

to a cluster of clubmen: "Look across the way, boys. There's B-B-Barlow with his hands in his own p-p-pockets." A. T. Stewart, the great dry goods merchant, was called to preside at an important meeting of citizens during the Civil War period. Travers was one of those in attendance. When Stewart took his gold pencil-case from his pocket and rapped with its head on the table for the meeting to come to order, Travers could not refrain from calling out "C-cash!" which, despite the seriousness of the occasion, caused a roar of laughter. When Travers went with a party to see the Siamese twins, he carefully examined the ligament that had bound them from birth, and then blandly remarked, "B-brothers, I presume."

The wit of Travers bubbled on till the last. While on his deathbed at Bermuda a friend called to see him, and observed: "What a nice place Bermuda is for rest and change!" Travers responded: "Y-y-yes; the w-w-waiters g-g-get th-th-the ch-change, and th-the h-h-hotelkeepers get the r-r-rest.—Milwaukee Wisconsin.

vance over this year, though it is not assured that this price will be maintained. The demand is said to be very heavy. Coke also has been strong. It is stated that the steel corporation has purchased for the first half of 1906 the output of the largest independent coke producer in the Connellsville region, and the open quotation for furnace coke is $3, ovens. There has also been good buying of pig iron, the week's business being led off with by the purchase of about 50,000 tons of Bessemer by the steel corporation for November and December deliveries, thus cleaning up all the accessible pig iron surplus in sight for the year. There has been excellent buying of pig iron throughout the country, and the market to-day looks stronger than at any time this year. The enquiry is alert and for goodly tonnage, but lacks that impetuosity, which, if indulged in, forced values to an unwarranted height. However, there have been some increases in pig iron this week, and the outlook is for still farther improvement. In finished iron and steel the same vigorous conditions prevail that have existed for months. Buying centres still among the railroads, which are providing themselves with vast quantities of supplies in metal product for 1906 deliveries. It is not only the purchase of large tonnages by the principal lines, but small roads and electric roads particularly are everywhere active. And in rolling stock and bridge work there is no end of the season's activity. The conclusion is inevitable that the transportation systems of the country are in all their divisions worked to the limit to take care of the present business, and that the carriers see as the only relief possible the large extension of their facilities, to provide which the recent and present buying is conducted. Machine shops of the various manufactories throughout the land are also running at maximum speed, with unimportant exceptions, and the consumption of metal there is also extremely heavy. These manufacturers have been contracting for material on an enormous scale and for extended periods in the future.

* * *

The first County of Essex tobacco of the season, says the "Amherstburg Echo" was delivered to Geo. Jasperson here on Saturday of last week, a portion coming from Colchester and some from Pelee Island. It was in good condition.

The Beaver Hat gold mine, at the famous Goldboro camp in Nova Scotia, makes a remarkable return. Last week, so a local paper says, Percy White, of that mining company arrived at Sydney, bringing with him the last brick mined. The brick weighed 139 ounces, and is the output of thirty days' crushing, with a five-stamp mill.

The thirty-first annual meeting of the Sherbrooke Loan & Mortgage Company was held on Tuesday, 7th November. The annual statement is said to be the best that was ever submitted. The directors of the previous year were re-elected as follows: Messrs. James Davidson, Wm. A. Hale, M. Read, N. Dinning, and A. M. Greenshields. Mr. Jas. Davidson was re-appointed president, and Mr. W. A. Hale, vice-president.

The Quebec Government is stubbornly adhering to its tax on commercial travellers in spite of all the agitation against the measure. On Tuesday, before Judge Choquette, N. P. Hamilton, residing on Metcalfe Street, Montreal, a traveller, representing a firm in London, Eng., was fined $50 and costs for neglecting to pay the provincial travellers' tax. This is the first case of the kind that has appeared under the new enactment.

In an address the other day, H. J. Pettypiece, M.P., scored the railways for some of their inequitable methods, he dwelt upon the excessive freight rates charged by our railroads. And he instanced a striking case of wilful overcharge. A friend of the speaker had occasion at one time to ship a printing press from Montreal to Kamloops, B.C. He was told the freight rate would be $1.47 per hundred. He did some figuring and sent his press through from Montreal to Vancouver, thence to Sydney, Australia, back to Vancouver, then to Kamloops. After this circuitous route the charges were only $1.35 per hundred.

A man "who knows it all" was not in the least surprised when he heard of a motor car which could be turned at will into a bedstead or grand piano. He said he knew a man who turned a motor car into a telegraph pole, a ditch, a fence, and a horse all within a few hours.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

Workman's Rights

In Canada a workman may proceed against his employer under the Workman's Compensation for Injuries Act, and at common law. That means untold annoyance and inconvenience to an employer. An employer is even liable for damages to an employee for injury resulting from the negligence of a fellow employee. Oft-times a workman will get back at an employer in this way. The employee may or may not win. Whether he does or not it means a great deal of anxiety to you as an employer. Let us relieve you of all this. Our liability policies are designed to do this very thing.

Will be glad to explain our plan.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY TH STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

THE TARIFF ON TEXTILES.

The Tariff Commission cannot complain of lack of interest in its proceedings or that all sides of a question have not been presented for its consideration. This week it has been sitting in Toronto, and various branches of the dry goods trade have been "on the stand." Each of these branches was represented by a speaker who read a paper on his individual subject.

The item of silk was dealt with, for instance, by Mr. J. P. Watson. This gentleman argued that when all silks were imported at one rate of duty the wholesaler could sell to manufacturers. But now, with a general tariff of 30 per cent. and a special tariff on neckwear silks of 10 per cent., the trade of neckwear silks passed into the hands of wholesalers in London and New York. The chief difficulty is that manufacturers making neckwear and making also belts, blouses and skirts, into which silk also entered, used in the manufacture of these latter articles, not only silk which paid 30 per cent. duty, as they should, but also used silk paying 10 per cent. duty, and which should only be used for neckties. Even with the greatest care it is almost impossible to keep neckwear silk in a factory wholly for making neckwear, and where there was dishonesty it was difficult to detect it. Mr. Watson suggested that either all silks should have a flat tariff rate of 10 per cent., or should the Government see fit to raise the rate above 10 per cent., then the duty on finished articles of neckwear from England be placed at a reasonably higher rate than on the raw material silk from Germany.

No doubt a uniform rate on silk would be a great convenience, but, as Mr. Fielding pointed out, it would mean a ten per cent. duty on luxuries, while at the same time many necessities bear a duty of 25 per cent., a state of things which would certainly "make the public balk." A diversion from the argument immediately in hand came from Sir Richard Cartwright, who discovered in the Government bluebook of imports that last year about $500,000 worth of silk was imported under the 10 per cent. duty. Could this, he asked, have been really and honestly all turned into neckties? The reply was "no," that without doubt much of this silk imported into Canada under the low rate of duty was in reality used in the manufacture of other articles. Whereupon Mr. Fielding remarked that there was scope for a little penitentiary work here.

The attempt to prove that a higher duty on manufactured neckwear from England would not increase the cost to the consumer brought forth some expressions of doubt from the Ministers.

Mr. J. D. Allan argued that, as a fur manufacturer, he was entitled to get his silk for linings at the 10 per cent. rate, as well as the neckwear manufacturers.

The Commissioners evidently thought they had struck rich ground as to new impressions about the tariff requirements of the country, when Mr. J. W. Woods, of Gordon, MacKay & Co., took the stand. Near the outset of the enquiry he startled the Commissioners by a statement that cotton operatives in England received almost as much wages as in Canada, and that prices for piece-work were actually 10 to 20 per cent. higher in Lancashire than in America. Mr. Wood's contentions were all against any increase in the cost of textiles. He acknowledged that manufacturing was an important part in the commercial life of Canada, but considered distribution fully as much so. His specific suggestions were as follows: That white cotton embroidery be 15 per cent., instead of 25 per cent. That white cotton laces be 25 per cent., instead of 35. That women's and children's underwear be 40 per cent., instead of 35 per cent. That blouses and waists be 40 per cent. instead of 35.

Upon woollens he held that the tariff should be a moderate one, as the great bulk of these could not be manufactured in Canada. Four times as much was spent in Canada in wages to those manufacturing woolen goods into clothing as there was in making wool into cloth. The increase in the amount charged under the British preference of 6 2-3 per cent. cost the people of Canada, he alleged, $577,000 last year. Upon men's underwear, the duty was sufficient, the duty on ribbons should be put back from 30 to 35 p.c. Thrown silk and silk for textile smallwares should be put on the free list.

* * *

THE LIVE STOCK TRADE.

At both the Toronto city and the Union Stock yards, the supply of cattle coming forward of late has been light and the quality, with some exceptions, of an inferior order. It is this fact that brings about the low prices, and this in turn tends to discourage the shipping of animals by farmers who own a higher class of the same. Indeed, there can be little doubt that the promiscuous sending to market of unfinished stock is the worst thing that can happen to the live-stock interests of this or any other country. It must not be imagined for a moment that there is nothing good whatever coming into the Toronto markets in the way of export or butcher cattle; on the contrary, there have been one or two examples, particularly at the Union yards, which point conspicuously to the fact that our farmers and ranchers know how to turn out good stuff.

In conformity with a rule which prevails in practically all lines of industry in Canada and the United States at the present time, the demand in beeves is for the better-class types and for these the prices offered still remain good, though, as we have intimated, even the best stock suffers in value from the quantity of poorer class with which it finds itself displayed.

Of course poor quality is not the only factor which is keeping the prices of stock down. The condition of the Old Country markets is poor, the demand being very dull and the prices quoted small. Considering these prices, those realized recently in Toronto cannot be said to be very bad. A few of the very choicest lots fetched as high as $4.60 per cwt., but the average good to medium realized from $3.50 to about $4 or $4.10, while ordinary lots fetched $3.75, or but slightly more. Bulls sold at $3.50 to $4.

As to butchers' cattle, the highness of demand was more apparent and the result, at the western market, was an advance of 10c. to 15c. per cwt. for picked loads. These sold at $4.25 and in some cases at $4.35 per hundred. Fair to medium, however, only brought $3.25 to $3.75, while for common not more than $3 to $3.25 was the ruling quotation, with as low as $2 or $2.50 for culls.

Thoroughly good stockers and feeders have been in request at fair values, which situation has been intensified by the light run. Short keep feeders are quoted at $3.60 to $3.75, good feeders at $3.50 or a little more or less; mediums at $2.50 to $3.25. Good stockers are held at $2.80 to $3.30, and rough to common at $2 to $2.70. Milch cows fetch $35 or $40 up to as high as $60 apiece, and really good specimens would bring almost any reasonable price.

In calves, trade is on the dull side and prices are easy at 3 to 5½c. per lb.

In sheep, somewhat similar conditions prevail. Export ewes fetch $4, or $4.25 in some cases, while culls are difficult to sell at more than $3.50 at the utmost. Lambs are about steady.

MONEY AND THE STOCK MARKET.

A rather exciting period was passed through on Wall street in the earlier part of the week, ensuing upon the announcement of a deficit in the United States bank reserves. There was immediately a sharp advance in the call money rate from 15 per cent. to 18 and 20 per cent., and for a while to 25 per cent. This rate, which was reached on Monday, is said to be the highest since October, 1902, when call money went to 35 per cent. Even time money, as well, felt the stringency, and it is said to have been loaned in New York as high as 9 per cent. for sixty days.

Naturally the stock markets speedily began to feel the effects of the tightness of money. Stocks broke sharply and a good deal of liquidation was indulged in. However, they rallied more speedily than might have been expected; it seems that they were persistently supported on the decline by strong interests. The Secretary of the U. S. Treasury seized the opportunity to state that he would not use his official powers to help speculators, but would reserve them until such time as he should be convinced that legitimate business interests were jeopardized.

On the local stock exchanges of Toronto and Montreal, the highness of money and the fall in stocks resulted in a considerable degree of weakness, and there were recessions in some shares. But on the whole the market has been well supported, so that it resumed a tone of fair steadiness in somewhat remarkably quick time.

According to the "New York Journal of Commerce" the stock market in that city "has acted more logically with basic conditions, there being a decided downward movement with a readjusting tendency which conservative interests have long been expecting. It has been evident for some time that manipulative tactics in the face of the extraordinary demand for money for crop-moving purposes must eventually give way before the inevitable higher rates, though few expected any stringency until December. Current opinion attributes the rise in money during the past week to a preconcerted move of banking interests designed to check pool operations."

* * *

AN UNDESIRABLE PROPOSAL.

The latest proposal made to the Associated Underwriters by the insurance committee of the Canadian Manufacturers' Association is virtually that this committee or its employees shall become agents for the placing of risks with the companies belonging to the Canadian Fire Underwriters' Association, and shall receive the commission usually paid by these companies to their regular agents. It is also proposed by the C. M. A. to appoint inspectors of the risks of its members; and it seems to be suggested that fire insurance companies to whom risks may be given by its members shall be governed by the opinions of these inspectors as to rates and conditions. These are the main features of a circular which has been sent by the C. M. A. insurance department to the various companies composing the C. F. U. A.. And it is requested that all companies so addressed shall take part in a conference to be held some time in November between the C. F. U. A. and the insurance committee of the C. M. A. on these and other matters affecting the fire insurance placed by members of the latter body.

While it is very desirable, as the circular says, that any steps should be taken which can be taken to lessen the fire-waste, and to arrive at equitable rates and conditions of insurance, we doubt if such a proposal as this is likely to effect what its signatories appear to desire. Assuredly it is not likely to be palatable to the tariff companies among fire underwriting bodies, whatever may be thought of it by the mutuals or other non-tariff companies. It seems to say to these organizations: "We have just formed an insurance bureau which has a staff of managers, inspectors and clerks, and we need additional revenue to maintain these. Now, instead of paying commission to your regular agents for any business our members may send you, if you will pay that commission to us, we in return will inspect our members' premises, correlate your policies and attend to the collection of your premiums and the adjustment of losses."

Supposing such an unlikely thing as a general acquiescence in this proposal by all the tariff companies, could the insurance bureau of the manufacturers handle such an enormous burden of work and responsibility? It would take years to provide the machinery to do what is so jauntily proposed in this circular to set at once at work. And must the insurance companies lessen or do away with their own machinery of the same sort to accommodate the manufacturers' bureau?

But putting the supposition aside as out of the question it strikes us as a very bold proposal indeed to make, that companies which have for ten years, twenty years, fifty years, been educating agents and employing expert electricians and inspectors to do their business in a manner adapted to the altered conditions of modern industrial life and later building methods, shall consent to put aside all this laboriously prepared machinery or subordinate it to a newly-formed experimental fire insurance bureau.

It will be found, we venture to think, that the C.F.U.A. companies either as a body or the majority of them, individually, will take the ground, and quite properly, that they prefer to do their own business in their own way rather than entrust its vital management to persons whom they either do not know or in whose competency to conduct it they have not confidence. As to a conference, such as is proposed, let as many conferences be held as will tend to harmony and the betterment of fire-protecting measures. But much of what is proposed by the manufacturers' insurance committee is of the nature of covering the same ground twice over—overlapping effort which is only likely to result in confusion.

FIRE INSURANCE AND CREDIT.

Editor Monetary Times:

Sir,—We noticed yesterday in R. G. Dun's Bulletin a quotation from an article of yours under date October 13th referring to a merchant in the Province of Quebec who was insufficiently insured, and in consequence of a fire which took place was obliged to seek indulgence from his creditors, and asked them to accept fifty cents on the dollar on the amount of their claims.

From our own, we may almost say bitter, experience we look upon your remarks as particularly well timed, and only hope the notice will come before the attention of many merchants who are altogether too careless about this important matter. We are continually at our customers all through the country, reminding them of their insurance, and pointing out the fact that from an honorable standpoint alone it is their duty to carry at all times at least sufficient insurance to cover the amount of their liabilities. We have on several occasions been practically told that it was none of our business to interfere, but there have also been numerous instances where our advice has been "seed falling upon good ground."

We hope you will keep up the good work, and do all you can to keep the wholesale houses from suffering losses of this kind.

Very truly yours,
John Macdonald & Co.

Toronto, November 11, 1905.

The letter of Messrs. John Macdonald & Co., in our columns to-day expresses, we feel confident, the feelings of many other wholesale merchants and manufacturers on the subject of fire insurance carried by retail dealers who are buying on credit. In the article referred to we mentioned two instances of traders or firms, one in Ontario and one in Quebec, burned out with inadequate insurance, who at once asked their creditors for a compromise settlement. This is as much as to say to their creditors: "I have been foolish, negligent, niggardly—and now I want you to suffer for it. Cut your account in two." Too many wholesale dealers fall into this spider-web and are done out of a third, a half, two-thirds of what is due them. A united effort should be made to stand up against such propositions of genteel robbery. No trader who buys on credit and will not insure has any right to ask for sympathy if he is burned out. As we have already said: No merchant deals fairly with those from whom he buys, if, having little or no means of his own, he seeks to make a livelihood by their crediting him, while he makes no adequate effort to provide indemnity in case of fire for them and himself.

BIASSED INSURANCE CRITICS.

That the contention is well-based that the present investigation in New York into life insurance methods, necessary as it undoubtedly is, may easily lead the public into a reactionary and absolutely false view of the whole business, is evidenced already in many a newspaper article and parliamentary speech. Usually the "Political Science Quarterly" abounds in well-informed statements and discussions. But even that journal seems now to have fallen under the spell of the sensationalist in insurance matters. Prof. Willett, of Columbia University, had an article in a recent issue of that quarterly which is so full of misconceptions of the whole subject that protest is needed, for, if its thesis were acted upon, it would be likely to lead to the establishment of life insurance companies charging premiums so insufficient that they must come to grief, with sad results to both share and policy holders.

He starts off with the contention that the present cost of life insurance is from 20 to 25 per cent. too great and then tries to prove his assertion by hook or by crook.

He says, for instance, that the reserve of a life insurance company upon each policy increases each year up to a point near the middle of the probable term. After that the company credits itself each year with so much of the reserve on the policy as is necessary to make up the difference between the natural premium and the premium the company is receiving. This seems rather involved, but it is a specimen of much of the Professor's writing. We had imagined that the reserve, instead of diminishing during the latter part of a policy-holder's life, continues to increase until the end. Upon what else, one may ask, are surrender values based?

There are several other assertions in the Professor's lucubrations on insurance that strike an unbiassed reader as strange and unsound, but the above remarks will be sufficient for the present.

⁂

A BUSINESS MAN'S DISEASE.

This is not a medical lecture. It is intended to be an object lesson by way of warning to hundreds, possibly thousands, of Canadian business men who are daily overworking their brains and hearts and stomachs. What is commonly called neurasthenia, that is to say nervous debility, exhaustion, prostration, is styled by Dr. Pritchard, of New York, the American Disease. He quarrels at great length and in a lively way with the application of the word neurasthenia to many forms of nervous trouble which it does not properly characterize, but into these we do not need to enter. Of the prevalent disease, he says, the chief and essential symptom is "an irritable quick exhaustion of nervous function in many or all directions." And to apply to this the definite term, The American Disease, he declares is both accurate and appropriate. It affects the cleverest and most energetic of men, business men particularly. "It is a disease of bright intellects, its victims are leaders and masters of men, each one a captain of industry." For, "neurasthenia never occurs in fools—the idea constitutes a paradox. Neurasthenia may make a fool but you cannot make a fool a neurasthenic."

The Doctor illustrates his description of the disease—we are quoting now from the Canada Lancet his paper read before the Ontario Medical Association last June—by histories of several of 50 selected patients (a Canadian or two among them) 42 of whom were American born, the bulk of them residents of large cities. The average age of these was 37; the oldest person among the number being aged 62 years and the youngest 26. Fourteen of them were unmarried.

Here is a clinical history of one of the instances. Born of good, healthy stock, American parentage, the only handicap being parental poverty. Driven by necessity and by that subtle factor, temperament, to early effort in extraordinary degree, he acquired the strenuous, ambitious, high tension, keenly-sensitive habit. He could not afford a liberal or broadened education, because his own dollars paid for it. At the age of 19 he was in business as apprentice in a large establishment making mechanical engineering appliances. At 26, with a capital of $500, he organized a company, had it incorporated, was president, secretary, treasurer, superintendent, salesman, and chief stockholder, entering into competition with established and lavishly capitalized rival corporations.

Awake at seven in the morning, says the record, he "hurried through breakfast a few minutes later, mixing an omelet with an order or a countermand, assimilable sometimes with the former, always incompatible with the latter, taking in with his coffee the London market or the Paris Bourse, dividing the steam supply between brain and stomach when it should have been all turned on at the point of physiological demand. A hurried walk to the train, possibly a delusional constitutional in this very wal the steam being still turned on to the top floor. the office a pile of mail to look at, interviews wi clerks, orders, directions, instructions, detail wo in every department. Just here *en passant* is la the immediate foundation of the breakdown. It a man of detail, the man great in everything exce the qualities which make the general, who becomes neurasthenic. It is the crime of attending to mi utiae which makes the nervous derelict. The gener is never a neurasthenic. It is the one flaw in th statue of true greatness. That quality, the highes which helps us to select our lieutenants, is alway lacking. The neurasthenic is the archetype of th Poohbah. He is not only General, but also Colone Major, Captain and Private. The penalty is inevit able. No man can do the work of four along highe lines without paying for it."

After four hours in the office this man goes t lunch, tired, nervous and with preoccupied mind. H takes his secretary, or manager, and again the attemp is made to mix a steak or an omelet with a busines problem. "The steam is still turned on at the top our patient eats fast and drinks a lot of water, o other fluid, *prematurely flushing the contents of th stomach into the intestine.* Already by nervous inhibition he has interfered with biliary and other secretions. The intestine, the duodenum, cannot take care of the albumenoids—the proteids—properly. It cannot take care of its own. The alkaline reaction of duodenal secretion has been upset by the flushed overflow of acid gastric juice, the secretion of bile has been inhibited by the state of mental tension and the diversion of energizing agencies from digestive viscera to brain. Fermentative decomposition with resulting ptomaine and toxine formation follows, deficient nutritional assimilation plus chemical irritation are added to cell fatigue along a routine line, without rotation.

"Notices of protest from the central begin to come into first subconscious recognition, but are disregarded. They may come from any one or from many sources. Headache of the cincture or helmet type, vertigo, a sense of irritable weakness, mental and physical, follows; vague mysterious messages in a strange language, never heard before, are received but not understood. This patient "has always been well" and has had no training along the lines of familiarity with symptoms. These messages at first ignored, sometimes hushed with a cocktail or a high-ball, perhaps many of both, become more and more continuous and imperative. The habit of almost mechanical activity of mind projects itself into the hours of sleep.

"Insomnia develops, at first as dreamful, anxious sleep, then with fitful broken sleep, and later with an allowance cut by more than half from the normal. He awakes tired, irritable. The pneumogastric nerve is one of the first and often the most emphatic of the aggrieved protestants. Palpitations, overaction, an irregularity partly toxic, lay the foundation for what later has become an obsession of fear of sudden death—*precordlangst*—heart anguish. He fears to be alone, to walk alone, to sleep alone. To this other fears have been added. A perfectly legitimate dizziness has laid the foundation for an almost hallucinatory persistence of this impression. Rapid motion, as in the cars or a carriage, high places, sudden changes in the visual perspective, originate as many phobiæ. Every nerve gets "on edge" and this hyperesthesia of auditory, or visual or olfactory, or gustatory, or pneumogastric (lung and stomach) nerve, varying as it necessarily does, in degree, gives explanation for the proteid system picture."

Leaving aside the Doctor's technical and highly ornate language and using every-day terms, the man is at this stage a temporary wreck. His system has lost its balance. Not only is his digestion impaired but his brain has begun to be affected; he has "lost his grip," physical and mental, through neglect of physical laws, through overwork of mind and body. His whole nervous organism is strained to collapse, he is in "a veritable delirium of anguish," and the pity is that his condition is all a mystery to him. Well for such a man if he finds at this stage a physician who can take him out of his health-destroying habits and surroundings and guide him back to a normal habit of life.

* * *

CANADIAN BANKERS' ASSOCIATION.

The annual meeting of this body was held in Montreal on Thursday, 9th November. There was a good attendance. Besides the Montreal members of the Association there were present: Messrs. Wilkie, Coulson, Laird, Schofield, Strathy, O'Grady, Brough, and Jemmett, of Toronto; Mr. McKinnon, of Sherbrooke; Mr. Stavert, of St. John, and Mr. E. L. Thorne, of Halifax; Mr. Balfour, of Quebec; Mr. Burn, of Ottawa.

The report of the executive council dealt with the failure of the Bank of Yarmouth in March last, and the steps taken for its winding-up; correspondence with the Government about American silver; a revision of the form of money orders; the destruction of the plates of failed or amalgamated banks, or the plates of solvent banks from which issues are not now being printed. No fewer than 412 plates have been destroyed, it appears, in the presence of an official of the American Bank Note Company, and the secretary of the Association. The report stated that several banks had reported the demand for circulation to have been earlier and heavier than in former years, but that the expected stringency has not been serious. The amount of new notes ordered from engravers during the year ended Sept. 30th was $28,782,311, and the total value of notes destroyed by directors, $24,622,225.

After a discussion of the matter of circulation it was decided to be inadvisable to ask for any change in the present Banking Act regulating same. A report was received from the committee appointed to consider the formation of a Bankers' Institute. It was referred to the incoming council with power to obtain the legislation necessary to form such a body. Mr. E. S. Clouston was re-elected to the presidency of the Association. In the room of Messrs. Stavert and Clarke who resigned their positions on the Council of Management, Messrs. H. C. McLeod and E. L. Thorne were elected members of the council. The annual dinner was a most enjoyable affair.

* * *

"A WORD TO AMERICAN BANKERS."

The "United States Investor" speaks thus disparagingly of the action of American bankers at their recent important convention in devoting attention to the proposed subsidy to shipping interests and neglecting more pressing matters nearer home: Highly creditable as is the management of the great majority of our national banks, the fact that most of their officers give little or no attention to the improvement of the system in general shows an absence of a sense of public duty that is deplorable. It is not exhibited only in the indifference respecting the reform of the currency to which we have already referred, but in as great a degree in the treatment of other equally serious questions affecting our financial institutions. This disposition was shown in their recent convention in the manner in which the members permitted themselves to be dragooned into an endorsement of the ship subsidy scheme, ignoring, meanwhile, those grave questions brought to their attention which really concerned them. The Secretary of the Treasury, who had been going up and down the land preaching the dangers of the present currency system, found it politic to switch off to the subject of a bounty to our merchant marine, and the bankers quiescently followed him. Individually, perhaps, most of them would have admitted that the subjects of "dummy directors" and thorough bank examinations were of vastly greater importance to bankers than the subsidizing of shipping; they would have agreed very readily with Comptroller Ridgely that theirs is the duty of "upholding the reputation and character of the banking institutions," which depended upon "each man doing his full duty." The record shows no action upon these matters, however; and but for the scandalous failure following so soon thereafter, the Comptroller might, like his predecessors, ask in vain for remedial laws from Congress, so far as help from the bankers went.

* * *

BANKING AND FINANCIAL.

We are informed by the Quebec Bank that it has opened a branch at Ville Marie, county of Pontiac, Que.

The Canadian Bank of Commerce have purchased a corner site in the centre of the business district of Halifax for $60,000, and will erect a modern bank building.

It is the intention of the new Northern Bank of Canada to open a branch at Brandon on 1st December. This when done will make the number of chartered banks represented in that city eight.

We are told that the new branch of the Traders Bank of Canada, corner of King and Spadina Avenue, opened for business on Wednesday last. It is under the management of Mr. F. B. Bennett, late manager at Prescott.

The figures of the budget of the island of Cuba are considerable, as submitted by President Palma to the Congress. For the year beginning 1st July next it is estimated that the receipts will be $23.000,000 and the disbursements $21,500,000.

The civic tax in Winnipeg this year will total $1,584,393, or $15.45 per head; that is, estimating the population of the city at 80,000. The amount raised during the present year was $809,329. Of the sum to be raised this year no less than $210,000 will be for school purposes.

The handsome figure of $130,000 is mentioned as the probable cost of the new and striking building to be erected by the Bank of Toronto, for a branch office on Yonge Street, above the new Bank of Commerce building, near Shuter Street. The building is to be of stone and steel.

At a meeting of the directors of the Home Bank of Canada, held on Wednesday, November 15th, Lt.-Col. John I. Davidson, president of the Davidson and Hay Company, Limited, and the Western Brokerage Company, Limited, was elected a director to fill the vacancy in the board caused by the death of the late Mr. Thos. R. Wood.

The Montreal Street Railway has been declared by the Judicial Committee of the Privy Council in London to be not liable for a percentage to the city on the earnings of suburban lines. The case has been decided on the terms of the agreement with the city of Montreal, and does not affect the issue of suburban lines in relation to other cities. By the decision the Montreal Street Railway stands to be the gainer of something like half a million dollars.

Our Saint John correspondent tells us of a legal case of some general interest which is now before the Supreme Court of New Brunswick. The late Mr. George H. Lovitt, of Yarmouth, Nova Scotia, left as part of his estate some $90,000 of deposits in the St. John branch of the Bank of British North America. The Governments of Nova Scotia and New Brunswick each claim the right to collect succession duties on this money, and the reference to the courts is to decide which has the right.

A cable comes from London on the 13th giving, on the authority of the Associated Press, the information that the Japanese Government has decided to issue immediately a new foreign loan of $250,000,000 at 4 per cent., which will be used partly for converting the external 6 per cent. loan. and partly for the redemption of the internal loans. It is understood that France will participate to a considerable amount in this loan, the Rothschilds' Paris house being the issuing house there.

We learn with interest that Mr. Robert C. Jennings, for twelve years manager of the Toronto Junction branch of the Canadian Bank of Commerce, retires from that position on the 15th inst. He is severing his connection with the bank after thirty-five years' service. He joined it in 1869 as teller in Toronto office, was in September, 1872, appointed manager at Barrie, returned to Toronto for six years and was then appointed manager at Paris, which position he retained till his appointment in February, 1893, to the charge of Toronto Junction branch. After a brief holiday Mr. Jennings intends to be associated with a Toronto financial institution.

Hon. A. J. Matheson, treasurer for the Province of Ontario, who has just returned from a visit to England in connection with the Temiskaming and Northern Ontario Railway loan, states he is well satisfied with the outcome of his negotiations in that matter. The loan of £1,200,000 has been renewed through the Bank of Montreal for another period of six months at a rate of 4 per cent. Some criticism has been made on the fact that the honorable colonel had not made an issue of provincial bonds to cover this loan, but to this he replied that, while bonds could have been floated at a better rate than was offered last year, the advice of the highest financial authorities had been to the effect that it would be much better to renew the loan at the present time.

Optimistic reports are issued concerning the Grand Trunk Pacific Railroad. The several bond issues already made are said to have resulted in a sum being placed to the company's credit in London of no less than $30,000,000, which is certainly good as a starter, even for a transcontinental railroad. Reports received from Mr. F. W. Morse and from the engineers have been of an encouraging character. The directors claim they will have the best grades of any of the transcontinental roads, and that it all goes well the Grand Trunk Pacific will be an important factor in moving the crop of 1907. Messrs. McMillan and McDonald, the contractors for the Portage la Prairie and Touchwood Hills section, are even making better headway than expected. The route has about been determined upon all the way to Edmonton, and were it not for the Government's delay this section would also be placed under contract immediately. The statement is made, however, definitely that the Grand Trunk Pacific will be in the hands of the contractors from Lake Superior to the River Saskatchewan before the end of the year, a possible exception being made for the Government section on account of the delay of the Government commissioners. The company announce that they have secured a direct line from Winnipeg to Edmonton, a distance of 775 miles, comprising 59 from the Manitoba capital to Portage la Prairie, 275 from Portage la Prairie to Touchwood Hills, now under contract, leaving 441 miles to Edmonton. The directors believe that this will be completed by midsummer of 1907.

* * *

INSURANCE NOTES.

Judging by the mortality tables, says the Springfield "Republican," automobiling is a far more dangerous sport than football. It's a rare week that does not have a death list from "autoing."

Press notices and despatches, as collated by the Fidelity Department of the Fidelity Casualty Company, of New York, for the month of September, 1905, indicate defalcations as follows in the United States: Banks, $425,380; benevolent societies, $1,887; building and loan associations, $71,000; Federal and State, $677,454.65; firms and corporations, $239,758.64; insurance companies, $1,200; transportation companies, $394.50; miscellaneous, $161,402. Total, $1,578,476.79.

A special despatch of Sunday to the "Gazette" states that after a fight lasting several months the Halifax City Council on Saturday night decided, by a vote of 10 to 5, to purchase a new engine from the Canadian Fire Engine Company, of London, Ont. The price is $7,000.

"When our clothes are dirty, in the American field of commerce, we wash them. Do you do as much in England?" remarks Bishop Potter, of New York. The United States insurance companies are at present enjoying a terribly long washing day, which, it is to be hoped, is thoroughly appreciated both by the worthy bishop and the participants. The difference of opinion on this side of the Atlantic as to what constitutes commercial morality may be relied upon to act as a safeguard against such a regrettable exhibition of dirty linen washing here as is now taking place on the American continent.—Insurance Record, London.

A life assurance man is not like an artisan (says Mr. J. Redman Ormerod, manager of the Pioneer Life Assurance Company), for the capacity for output of the life assurance man increases year by year the more he learns of the business, the more he cultivates tact and all those qualities which go to win success. A manual laborer is limited by physical strength, and cannot materially increase his output; therefore he cannot materially increase his pay. Not so the insurance man: he can increase his pay to an unlimited degree, just according to his power to increase his energy, brain capacity, and business-getting ability.

The following on a postcard has been circulated by an insurance company in England:

"Do you know him?

"A man who does not travel, who never rides in a carriage, tram-car, omnibus, motor-car, or upon a bicycle, who never walks the streets, who cannot slip upon the pavements, who does not go near horses, who can never have sprains, dislocations, broken bones, cuts or bruises, whom fire will not burn, and water will not drown, whom even a dog will not bite nor lightning strike, who cannot fall from anything?

"Such a man does not need accident assurance.

"Others should apply to the —— Insurance Company."

It has been rumored persistently of late in England that there was to be an amalgamation of the Phœnix Assurance Company with various other companies. We now learn from London journals that the management has determined to put an end, once and for all, to such unfounded statements. In a letter to the press he says that at the board meeting held on October 19th instructions were given to deny that any negotiations whatsoever had been initiated, undertaken or entertained by any person or persons acting with the authority, consent or knowledge of the board having for their object the amalgamation, absorption, fusion or merging of the company with or into that of any other company, corporation or institution. This statement is surely comprehensive enough.

The Underwriters' Salvage Company, of Canada, Limited, is the name of an enterprise which the Canada Gazette tells us has been started with E. E. Wallace, Reginald W. Eyre, Jas. W. Curry, J. T. Eastwood, and Olive B. Clarke, all of Toronto, for the following comprehensive purposes. We quote only part of the voluminous description in the Gazette:—To buy, sell, deal in, and own outright all kinds of salvage; to act as salvage adjusters, salvage brokers, salvage agents and valuators; to act as valuators and adjusters of marine loss; to manufacture, purchase or otherwise acquire, and deal in salvage goods, to carry on a wholesale or retail mercantile business, and to make and improve said salvage goods, "to buy, sell, manufacture and deal in all goods, stores, implements, provisions, chattels and effects for the purpose of furthering the sale of salvage goods belonging to the company," and to erect shops, mills, and other buildings. The company proposes also to carry on several other lines of business incidental to or subsidiary to its main objects such as the acquisition of stocks, debentures, etc. The total capital stock is placed at $500,000, and the chief place of business is to be in the city of Toronto. The man who got up this notice must have fairly revelled in legal lingo.

When a man sets out to steal money from his employer in order to account for a shortage, and professes that he himself has been robbed, he needs to have a good memory and abundance of nerve if he would confront with success a shrewd detective. Guy M. Graham, of Galt, a sub-insurance agent for the Metropolitan Life Insurance Company, claimed to have been the victim of a brutal hold-up and robbery on Wednesday night last, and was found on a neighbor's lawn about 7.30 p.m. at night apparently unconscious, and with a wound on his temple. Graham lay in a stupor for some time, but finally told of being struck from behind while he was about to enter the neighbor's house. He said he had been robbed of $50, some $20 of which belonged to the Metropolitan Company. He has now confessed that he bruised his head with a small stone and faked the robbery story to cover up some debts. The man's family and his doctor were successfully deceived by his story, but the detective was suspicious, and his persistent questionings caused the culprit's break-down and confession. It appears that Graham was in some financial difficulty.

Among other sights of Buffalo shown to the three hundred students of the Toronto School of Practical Science on Saturday last was the fire tug "Grattan," one of three maintained by the city for the protection of the harbor front and the shipping. It is a screw steamer, 118 feet long, and can throw 11,000 gallons of water per minute into the air by its sixteen outlets. Four of these are big stationary nozzles, fixed to the boat, and controlled by wheels similar to an automobile steering gear. "We can throw a four-inch stream of water over the top of the highest elevator in Buffalo," said Commissioner Potter; "that is, about 250 feet high. We can send a stream about 400 feet horizontally. When attached to the fire-service mains, we can create a pressure at the end of 6,200 feet of pipes in 6½ minutes. We do this by attaching our pumps to the end of the main which comes to our dock." While in shipping importance Toronto can in no wise compare with Buffalo, it would be of immense service towards saving the increasing factory structures along Toronto Esplanade to have a fire tug to send streams over them should a gale from the south handicap the fire brigade in fighting a sweeping fire from the landward side of the wharves and buildings.

⁂

FOR GROCERS AND PROVISION DEALERS.

The Robitaille Eureka Distillery, Limited, head offices at Beauport, P.Q., and with a capital stock of $1,200,000, has been granted a charter by the Dominion Government. It purposes purchasing the distilling and malting business of Alfred Robitaille at Beauport, and making and selling beer, malt and hops, buying and fattening cattle, etc.

The report of the United States Bureau of Statistics just issued indicates a bumper corn crop. It places the year's yield at 2,707,993,540 bushels, as compared with 2,453.000,000 bushels a year ago. The acreage this year was estimated at 94,011,000 and "condition" at 90.6, with the yield as aforesaid. Last year the acreage was 2,467,480,934, and the "condition" was 86.2.

A despatch from Winnipeg states that A. P. Stevenson, of Morden, has again successfully demonstrated that apples of several varieties may be grown in Manitoba, and this year secured off his 300 bearing trees seventy barrels. The oldest of his trees is twenty-eight years of age, and has produced six barrels in a season. Summer and fall apples have been more successful than winter varieties.

A rumor comes from St. Paul, Minn., but the truth of which we have no present means of judging, to the effect that Liverpool business men are forming a project to build a flour manufacturing centre at that place to outrival Minneapolis, and using Canadian and not Minnesota wheat. Whatever degree of truth the story may contain, it appears to be a fact that Englishmen are awakening to the vast potentialities of the Canadian West as a wheat producer; potentialities, which are rendered of still greater importance when the very probable decrease in exportable supplies from the United States is borne in mind.

⁂

DRY GOODS NOTES.

A feature of the local dry goods business trade is the strong demand for ladies' neckwear for the Christmas trade, especially that of the fluffy description is eagerly wanted. Costume linens are also in keen request, and so are handkerchiefs.

A writer in the London Drapers' Record points out that crossbred wools sold four years ago at 4d., and now at 14d., while fine merinos have doubled in price since the lowest point in July, 1900. Buyers have their eyes fixed upon the fact that the increase from Australasia during the last wool year was no less than 230,000 bales. The season in Australia has been so good that another increase of 300,000 bales is expected during the ensuing year; hence, with half a million more bales available than two years ago, supplies look like being adequate to meet the wants of the world. It is well to remember that before the drought the exports from Australia never reached 1,600,000 bales, and if the present season gives the increase that is generally expected we shall have a wool production not much below the record year of 1894-5. Big clips brought about somewhat low values for merinos, prices falling at the beginning of 1905 to as low as 17½d. for a super 60's top. It is impossible to shut one's eyes to the fact that in times of prosperity wool values have certainly shrunk; and this phenomenon is deterring men from committing themselves heavily during the near future.

⁂

OUR SAINT JOHN LETTER.

A transaction of considerable local importance has just been put through by which the St. John Railway Company has secured control of the Carleton Electric Light Company, which lights the streets and supplies private lights on the west side of the harbor. The St. John Railway Company operates the street railway and also owns the gas and electric lighting plant on the east side of the harbor. The purchase of the Carleton plant gives it a monopoly of the lighting business in the whole city. New contracts must be made next summer for the east and west side street lighting, and there is in some sections a pretty strong demand that the city undertake this work. The city now operates a plant which runs the lights in the north end and there is a growing feeling in favor of extending this to do all the street lighting work. The municipal reports show that the lights run by the city cost about $75 each per year, while the street railway gets $85 for its lights, and the Carleton Company $105. The city chamberlain contends that the city reports do not allow sufficient for interest, depreciation, etc., and that the municipal plant actually costs about as much as the lights supplied by the street railway company. The city plant does not supply any lights for private use.

The province of New Brunswick has quite a windfall in succession duties this year. It got upwards of $30,000 from the estate of the late Mr. W. H. Murray, and will derive a large amount from the estate of the late Wm. Fisher, of Woodstock, although a good part of the money of the latter is left to charitable and benevolent purposes, and so is free of the Government tax. No statement has yet been made of the value of the estate of the late Mr. Kilgour Shives, the Campbellton lumberman, who accidentally shot himself a few days ago, but it will be large enough to give the Government a substantial sum. Mr. Shives was a very worthy man and his untimely death was a great shock to hundreds of friends.

The New York syndicate, who recently arranged for the purchase of the Wm. Richards lumber lands on the north shore, are preparing to operate on an extensive scale, and to introduce methods new to the lumber industry in New Brunswick. It is stated, for instance, that the saw will be used in the woods instead of the axe. This will be an innovation and is expected to save a considerable amount of wood that is now wasted. The concern will erect a mill at Chatham in which the tops of trees now cut off and left in the woods will be converted into material for the pulp mills in that vicinity. By these means the new owners expect to make much greater profits than ever the Richards people secured. There are rumors of other sales of timber lands to American syndicates, but no definite announcements have as yet been made.

St. John had a visit last week from Baron Gustav De Coriolis, of Montreal, representative of the Credit Foncier, of Paris. His visit was in connection with the proposed dry dock in St. John harbor. He called on the Mayor and offered to place to the credit of the city money sufficient to build the dock provided the city would agree to act as trustee, and would give some assurance that the dock will be kept in repair. No action on the Baron's offer has yet been taken, but it will be discussed at an early date, and may receive favorable consideration as the city is interested to the extent of giving the site and a bonus of $2,500 for forty years.

A syndicate of Maritime Province capitalists are negotiating for the purchase of the St. John opera house, and it is said, want to secure the amusement halls in Halifax, Sydney, Glace Bay, and other Maritime cities, the idea being to run a series of companies in the different cities.

The grist mill of Senator Poirier at Shediac was burned a few days ago. The mill was one of the most modern and best equipped in the province and its destruction represents a loss of upwards of $20,000. It will be rebuilt at once.

A meeting was held here on Monday evening to consider the establishment of a plant to engage in the manufacture of gelatine from sea moss. A number of local capitalists are considering the matter and the company may be organized.

In some ways the most interesting business announcement made here in a long time is that a syndicate of Liberals have about completed arrangements to purchase the "Sun," the leading Conservative paper in New Brunswick.

The work of stripping the spawn from the salmon in the Carleton pond has just been completed. Upwards of 7,500,000 eggs were secured from the salmon caught here during the summer. The eggs have been distributed to the different hatcheries throughout the provinces, and next spring the young fish will be put into the rivers. This work has been going on for some years, and it is worthy of note that last year, for the first time, salmon were caught with a fly in the St. John river. There are now hopes that it will become one of the great salmon rivers of the continent.

* * *

St. John, N.B., 14th November, 1905.

⁂

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, November 16th, 1905, as compared with those of the previous week:—

	Nov. 16.	Nov. 9.
Montreal	$31,029,000	$32,161,904
Toronto	23,905,764	24,180,587
Winnipeg	10,849,503	11,495,762
Halifax	2,010,877	2,277,288
Hamilton	1,549,194	1,817,024
St. John	1,281,466	1,343,706
Vancouver	2,227,705	1,975,031
Victoria	809.369	971,725
Quebec	2,084,587	2,332,254
Ottawa	2,801,047	3,094,876
London	1,132,565	1,144,895

Vault doors in Bank of Montreal and Royal Trust Company, Montreal
Three times larger and beavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

THE C.P.R.'S FUTURE PLANS.

The Canadian Pacific Railway is making a protest to the Dominion Government against the granting of the request of the Allan line for a ten-year Atlantic mail contract, on the ground that such an agreement would seriously interfere with the former's own transportation plans. They express the intention to so improve their services on the Atlantic and on their railway that they will divert the whole of the Oriental mail and passenger business centring at Hong Kong to the Canadian route. It is planned to reduce the time from Hong Kong to Vancouver from 21 to 16 days by increasing the speed of the Pacific steamers from 12 to 17 knots, while the time across the continent is to be cut from six to four days by running trains at an average speed of 45 instead of 30 miles an hour. The vessels which are planned for the Atlantic service, are expected to carry mails and passengers across in between five and six days. To carry out this programme, the C.P.R. state, will entail a large expenditure, and the company feel that the Government should give them all the assistance in its power. They want the Atlantic subsidy for their vessels, and say they should at least have an opportunity of tendering for the preference of service when the Allan contract expires this year. They are using the "Victorian" and "Bavarian" disasters as an argument against the Allans' getting a ten-year contract.

NORTH OF ENGLAND LETTER.

News is to hand that Canadian wool-growers are applying for a tariff on imported raw wool. The step of taxing the raw material of a great industry is an important one before which our own Tariff Reformers shiver. As a friend points out, the Dominion produces less than one-half per cent. of the wool of the world and less than one-tenth as much as do our own insignificant Isles. Her wool is only fit for medium goods and in all human and geographical likelihood a certain proportion must always be needed from over-sea. The United States is believed to be the only wool-taxing country in the world. At any rate Germany, France, Russia, Spain, Belgium, Holland, Italy, and England, which form the chief wool manufacturing countries of the Old World, all pass raw woolen materials through the Customs House free. It is understood in the trade here that not all of the results of wool-taxing in the States have been happy. Certainly large bulks of silk waste, Peruvian cotton, and other substitutes have perforce been used recently in cloths for which wool had become far too expensive. Examination of American official returns does not suggest that Dingleyism has done much to stimulate sheep-raising, and, no doubt, manufacturers and consumers will wish to weigh well such considerations as these.

Any lingering doubt as to the tendency of trade in the Old World to expand is dispelled by the commercial reports received from our neighboring countries. Each industrial centre in this Kingdom has something cheerful to report, and the fundamental industries are all doing well, indeed. In nothing is the movement more pronounced than in iron and steel and no group of trades does so much to line the pockets of wage-earners as that one. Undoubtedly England has more money to spend, and if Canadians do not get their share of the floating profits they have only themselves to blame. From the way in which trade is moving now, one would say that next year should be the best in history, and its special opportunities of forming connections in this country ought not to be allowed to pass.

Despite the commercial revival and the growing wealth of the working and leisured classes the ulcer of unemployment eats into our social system. Thus far the trade improvement has done little to absorb the surplus of chronically workless men. It has found fuller work for those who were only partially engaged in production. What is grimly called the "reserve force" of labor is in a bad way. Winter—probably a hard winter—is coming on and nothing gives more unease to those who think at all, than the cruel plight of the families who have been dispossessed of their up-keep by modern improvements and economies.

Our insurance companies and banks are more willing to erect palatial head-offices than to pay the oppressive local rates upon their annual value. The Norwich Union made a fruitless appeal against the assessed value of their premises in the metropolis of East Anglia. To quote the Recorder who adjudicated: "The clerks sit enshrined among many colored marbles. The building is lavishly decorated, elaborately panelled and embellished." These words have the sound but not the meaning of an indictment. The Recorder declined to believe that the company had lost its usual foresight, he called the office an "asset by no means without its effect on possible assurers."

A Toronto telegram tells of a scarcity of junior clerks in Canada and refers to advertisements—which one has not succeeded in finding—for bank clerks in the Scottish papers. The Emigration Agency knows nothing of the matter. Should it be anything like true that Canada is short of clerks her position is probably unique in the world. We have proportionately fewer than a few years ago. Teaching of carpentery and other handicrafts in elementary schools seems to have quickened the taste for manual work and to have deposed the foolish ambition to drive a pen. Among shop assistants, too, there is a wholesome hankering for "a man's job," which may yet infect the school boy. In days when we are reproached for decadence these, surely, are signs to rejoice on.

Many, in search of work worthy of a man, reach Canada, as well as several who leave their country for their country's good. One of these is a young commercial traveller, guilty of obtaining goods by false pretences here, and liberated from prison to be shipped through to the Y. M. C. A. at Montreal. While objection to the dumping of soiled characters on Dominion soil is to be anticipated it is well to reflect that Old England takes more than her share of outcasts and makes fairly good men of them, too. Canada's chance of regenerating the youthful offender is still greater and she probably gets worse characters—with no ticket attached.

It is remarked that the gold reserve of this country looks singularly small by comparison with the European reserves. At the end of last year the Bank of England held £29,000,000 in gold, the Bank of France £107,000,000, the German State Bank £35,000,000, the Austro-Hungary Bank £49,000,000, and the Russian Imperial Bank £94,000,000. Nobody says that this relatively small balance is dangerous, although all the banks in this country—and who knows how many elsewhere?—rely on the sufficiency of Threadneedle Street resources. But it is claimed that the smallness of the margin leads to needlessly frequent changes in the rate of interest. Between 1844 and 1900 the British Bank Rate changed 400 times, the German 161, and the French only 111. Differences of circumstances, as well as of policy, may help to explain this great discrepancy. On the whole, however, we are all agreed on the general desirability of being able to calculate rates of interest for a long time ahead. When changes are made on slight provocation trade is disturbed and perhaps avoidably.

A weak reliance on precedent has been the undoing of a "fire-bug," who made six claims on insurance companies in three months, and boldly put forward another. The claims were all in respect of private residences, and the salvage was carefully carted about from house to house. These pieces of circumstantial evidences were, in each case, a sewing machine, a bassinette, a dress, a mackintosh, a hat, and a baby's white coat. These were more mellowed than impaired by fire, and they earned their owner at least $400 before they gained for him six months of freedom from any liability to other outbreaks.

NORTH COUNTRY.

Manchester, October 27th, 1905.

INSURANCE VALUES AND PERSONAL VALUES.

As a general rule, the feeling of the insuring public in respect to the way in which the fire companies settle their just claims is one of satisfaction. In regard to the insurance value of certain articles, however, there is quite frequently in existence a doubt as to what line the companies will take. An example of this may be seen in the matter of objects of artistic or personal worth, and the value of which, while not necessarily intrinsic, is doubtless largely enhanced by the difficulties which have attended their acquisition, or by other considerations of a not directly pecuniary nature. The "Insurance Spectator," of London, presents a good discussion of the subject as follows:

A question that an agent is frequently asked is: "Shall I be paid, in case of fire, the full value of my goods, and how am I to prove that value?" For instance, many a householder nowadays is a collector of antique furniture or ornaments, and in many instances would not part with what he has gathered at different times and from various quarters for double the price that he has actually paid for the articles in question. What he is anxious to know is, whether he can cover the value these things are to him with the feeling of security that in case of loss he will be settled with on this basis, or whether he must insure only for the actual amount they have cost him, although he cannot now replace them at anything like that price, even were he to spend the time necessary to search for them, at considerable inconvenience to himself, in quarters analogous to those where he found his in the first instance.

Pictures by well-known artists are tolerably easy to value, but articles of vertu and furniture cannot be so readily dealt with, as so much of the value depends upon

the condition of the article, of which a fire has, of course, obliterated the trace.

The correct answer to such a question is, that the safest plan is to have such articles valued by a competent valuer, and to keep the same with an inventory of the goods in case of a fire happening at any time. This, however, involves expense—probably many times more than the premium on the policy; and unless the insured has other uses for such a valuation he is hardly likely to spend the money necessary to obtain it, merely to provide for the eventuality of a fire which he does not expect will ever happen.

Another reply would be: "You had better insure for what you consider the full value, and trust to the fairness and generosity of the company to give full weight to the arguments you can bring forward, in case of fire, in proof of the value you put upon your goods."

The cogency of this argument on the part of an agent will depend upon the opinion the insurer has of the generosity of the company in meeting claims.

In case of big insurances, the suggested valuation is most necessary, and should undoubtedly be recommended for adoption, but with a policy for several thousands of pounds only it is difficult to press for this.

Whether the offices can do more than point to their past treatment of claimants as an argument in favor of the dismissal of fear as to generous consideration is very doubtful, and probably the maintenance of a policy of urbanity and tenderness in the treatment of this class of claims is the only feasible way of removing misgivings from the public mind in this respect.

⁂

IMPORTANT INSURANCE DECISION.

The Supreme Court of North Carolina has just delivered an opinion in the case of Green against the Hartford Life Insurance Company, which is of general interest. The report of it is sent us by Jno. W. Hinsdale, of Raleigh, North Carolina, who represented the defendant.

The Hartford Life Insurance Company was incorporated many years ago with power of issuing both legal and assessment policies. It issued legal reserve policies until 1899, when it ceased to do that kind of business, and thereafter issued only old line assessment policies. One Green, who was an assessment member, brought suit against the company, alleging that it was part of his contract that the company should continue the assessment business as long as he lived, thus giving him the aid of the "new blood"—the assessments of new and young members; that by ceasing to do so they had put him and the other assessment members in a class by themselves, whose assessments would after a while become so large that they would be prohibitory, and that he would thereby be obliged to abandon his insurance, claiming this to be a violation of his contract. He sued to recover all the assessments which he had paid the company with interest. The court held that there is nothing in the company's charter or in the plaintiff's contract, which obliges it to continue the assessment business after the company should think it advisable to discontinue it. The court said:—

"The annual premiums of assessment companies necessarily grow larger with age of the insured, and the reluctance of young men to come in to prevent by their premiums the increase of rates, which come to an aging and diminishing class. This is the peculiar weakness of that particular kind of insurance. The plaintiff had no right under his contract or under the defendant's charter to require it to continue to struggle for 'new blood,' as it is called, to keep down his assessments. His reliance must be upon the 'safety fund,' created out of the excess on premiums, invested for the purpose of making good the payment of policies, which in a dwindling class would otherwise require assessments too heavy to be carried solely by the survivors. In this case there is no evidence that the defendant arbitrarily increased the plaintiff's assessment, or discriminated in the amount as between him and other assessment members. There was no contract that only an assessment business would be done, but the plaintiff knew from the defendant's charter that it was authorized to issue both kinds of policy."

In this decision the right to change from the assessment to the old line business, which has been exercised by many assessment companies in different States, is fully sustained. There are a great many assessment companies in the United States which will be obliged to transform into legal reserve insurance companies, if they have not already done so. Many of the States have statutes authorizing this to be done. The interest in this decision will, therefore, be widespread.

⁂

INSURANCE INSTITUTE PROCEEDINGS.

We have to thank the Insurance Institute of Toronto for a copy of the proceedings of that body for 1904-05. It is a volume of 275 pages, excellently printed and illustrated. A brief review cannot do justice to its contents, which are as varied as they are interesting, beginning with the report of council and ending with the syllabus of examinations and a list of successful candidates in its classes. Pages 23 to 57 are occupied by an account of the memorable banquet of the Institute a year ago, giving in full the very suggestive addresses on that occasion of Mr. T. L. Morrisey, of Montreal, and Mr. B. E. Walker, of Toronto, on the subject of fire insurance, the former of which was printed in full in The Monetary Times. The very pregnant address of the then president, Frank Sanderson, M.A., F.F.A., succeeds, and then come the papers read before the body: "Sprinkler Equipments," by E. V. Starkweather, B.Sc., of New York; "Analysis of Life Office Accounts," by P. C. H. Papps, A.I.A.; "Building Construction and the Fire Risk," by Edmund Burke, president of the Ontario Association of Architects; "Life Assurance Advertising," by Mr. J. K. McMaster, of the Canada Life staff; "The Conflagration Hazard," by Mr. John B. Laidlaw, an ex-president and known as the father of the Institute. Also the brief address made by S. R. Tarr, M.A., the secretary, before the Montreal Institute describing the scope of the Toronto body and the growth of its work. To some of these, reference has been already made in our pages.

It is not necessary to cite further the contents of this volume, but it is due to the body to remark the elevation of aim that has been shown throughout its career, and the educative value of its work. These characteristics have been recognized by men of eminence in the actuarial and underwriting world abroad; and have resulted in the instruction of the public at home in some needed directions, besides stimulating young men in insurance offices to the study of their profession. For with them, as with many in other

lines of business there is a tendency to let all interest in one's work cease with the afternoon closing of the office. One valuable feature of the Institute is that it animates them to pay attention to the principles of underwriting as well as the minutiae of its working; to read, to study, and to observe.

⁂

DEATH OF R. W. ELLIOT.

On Sunday afternoon last Mr. Robert W. Elliot, head of the firm Elliot & Co., Limited, manufacturers and wholesale druggists, passed away, after an illness of some months, having nearly reached the age of 71 years. Mr. Elliot had a long and creditable business career in Toronto. While still comparatively young he succeeded to the drug business established by his father, the late Wm. Elliot. In the year 1879 he was elected president of the Board of Trade. He was a pronounced protectionist and it was during his term of office that the board took up the question of tariff and made suggestions to the Government on the subject. He was also instrumental in getting the board to suggest to the Government the appointment of a Railway Commission. He took an active part in the work of organizing and pushing to a successful completion the Nipissing Railway, and was for many years a valued member of the board of the Industrial Exhibition. Mr. Elliot was the first president of the Canadian Manufacturers' Association, and being a strong believer in mutual fire insurance, was vice-president of the Fire Insurance Exchange Corporation. He was a capable chemist and a good all-round business man, and from his travel and wide knowledge was able to render valuable services to the community.

⁂

DOMINION COMMERCIAL TRAVELLERS.

On Saturday last was held in Montreal a meeting of the Dominion Commercial Travellers' Association, which was well attended. The president, Mr. J. S. N. Dougall, presented a very satisfactory report, which showed an increase of 380 members during the year, making a total of over 5,000 on the roll.

The following officers were elected: Vice-president, E. D. Marceau; treasurer, R. C. Wilkins, both by acclamation; directors, E. S. Bois, J. B. Gilles, J. A. Thompson, R. Forman, W. J. Cleghorn, J. W. Prescott, Arthur Terroux, C. H. Shaw. The presidency will be decided at a future meeting. The candidates nominated are Fred. L. Cains, of Brophy, Cains & Company, and W. Egan, of the W. R. Brock Company. A vote of confidence was passed endorsing the action of the directors during the past year, and the fixing of a date for the annual dinner was left in the hands of the committee.

⁂

ANSWERS TO ENQUIRERS.

R. G., Chatham, Ont.—There is no exaggeration about it. If you write to Washington you can ascertain the actual figures; but within the recollection of the writer of last week's article the United States Government has spent $20,000,000. Here are the figures, which we take from an American paper, of one year's expenditure on rivers and lake harbors, $3,521,000: "The annual report of the Chief of United States engineers includes the following estimates for continuing contracts on the Great Lakes for the fiscal year 1907: St. Mary's river, at the falls, $6[illegible]0,000; Hay Lake channel, $1,000,000; Detroit river, $700,000; Cleveland harbor, $550,000; harbor at Duluth, Minn., and Superior, $150,000; Holland harbor, $110,000; Sandusky harbor, $175,000; Huron harbor, $200,000; Black River harbor, Ohio, $46,000; total, $3,521,000."

Trader, Montreal.—We have usually based our articles on prices of commodities in the main on the tabulated comparisons of Dun's Review, of New York, and the Economist, of London. You will find an informing discussion of the subject in the article "Prices" in McCulloch's Dictionary of Commerce, pages 1135 to 1141.

A. B. Diplock, Vancouver, writes: Noticing an article in your issue of October 27th headed, "Economy in Wood Waste," I should esteem it a favor if you could put me in communication with the parties who obtain extracts from the wood offal in logging operations. I am heavily interested in clearing land, and any means of reducing the cost of clearing the heavy timbers of our Western country is a step in the right direction.

[Yours is the third enquiry we have had about that article. It was not original with The Monetary Times, but was copied from the Chicago Tribune, to whom credit was given for it. Should advise your applying to that journal, for we are unable to give you the names of the parties who effected the economies mentioned.—Ed. M. T.]

⁂

—The appeal of the Sheet Metal Workers' Union against the recent verdict giving the Metallic Roofing Company the sum of $7,500 damages for a boycott instituted against the company's goods has been dismissed, the judge holding that both the union and the individual members of the union who were sued are liable for that full amount.

—The lumber mills of the Far West have reached a determination to do something definite to cure what they have long contended are the unremunerative prices of sawn lumber. A special despatch to the "Globe," dated 13th instant, states that thirty-five lumber mills in the British Columbia association have decided to advance prices on all kinds of lumber shipped east two dollars per thousand feet.

—A company is being organized in Vancouver, we learn, for the object of utilizing the refuse from the saw mills and obtaining therefrom pitch, turpentine, charcoal and other products. This is a natural and sensible proceeding, for it is high time we began to economize our forest products, which in both the United States and Canada are so generally wasted. This announcement reminds us that letters from three persons in different parts of Canada have come to this office asking for further particulars about an item copied into The Monetary Times from the Chicago "Tribune" a few weeks ago respecting the economical use of wood offal. It gave the experience of a company in that direction.

—A little time ago we expressed the suspicion that our blatant trades unionists, in the resolution at their recent Trades and Labor Congress in Toronto to sympathize with the alleged attitude of their fellow-unionists in the Mother Country against Mr. Chamberlain's fiscal schemes, were talking with more "bigness" than understanding. The confirmation of this now comes to hand in the shape of a long manifesto addressed to the president of the Trades and Labor Congress at Montreal from over 1,500 more or less prominent trades unionists residing in nearly all the leading industrial centres in Great Britain, and in which are stated several cogent reasons why British unionists and British workmen very largely support Mr. Chamberlain in those schemes.

—The somewhat extraordinary announcement is made in Vancouver that, impelled by a desire for the ideal of journalistic independence and fairness, a number of local men have joined together to publish a weekly newspaper presenting both sides of public questions. The new paper will be appropriately named the "Two Voices," and its leading editorials will be written by two men, one a Liberal and the other a Conservative, each giving his own party view, though neither will be absolutely hidebound. To further delineate both points of view the best editorials appearing during the week in the papers supporting both parties will be reproduced, with the best speeches from both sides of the House when the Legislature is sitting. No advertisements will be solicited, and it is a fundamental principle that it is to be free to criticize everybody, even those contributing to its support. Verily, this is a fascinating scheme, which, however, cannot be expected to last. Something very like it was out-lined not long ago in one of Elliott Flower's short stories. And even the novelist could not make it work.

The Bank of Toronto.

Dividend No. 99.

PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as may seem safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

MANAGEMENT.

The Directors of the Corporation have been prominent in the business life of the Province for many years and are thoroughly conversant with local conditions, thus insuring careful and experienced supervision over the investments and business to be transacted by the Corporation.

ADVANTAGES.

This Corporation affords an opportunity for the small investor, by becoming a shareholder, to earn substantial interest on his money, while his security is unquestionably gilt-edged and will enhance in value as the business of the Corporation grows with our rapidly developing country.

Large sums of money are lying in our Savings Banks drawing only 3%. Savings Bank depositors by becoming shareholders in this Corporation are afforded the same opportunity as the large Capitalists for getting their money out at a good rate of interest.

SHARES.

These shares which are of the par value of $100.00 are offered for subscription at ($110.00) one hundred and ten dollars, payable on application, $10.00 for the premium and 10% on the par value of the shares, and thereafter to be subject to a call of not more than 5% per annum until fully paid. The shares may be paid in full at any time after allotment. Five per cent. interest will be allowed on payments in advance of calls, until such time as the subscriber shall elect to receive in lieu of interest such dividends as may be declared by the Corporation. It is not expected that the Corporation will need to call more than the first 20%, as many applicants will voluntarily pay up their shares so as to receive the guaranteed 5%, This will give the business man an opportunity to participate in the speculative value of shares in a first-class financial Corporation without investing a large amount of capital.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1.000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185,149	30 per cent.	1,500
N. Y. Life Insurance & Trust Co.	1,000,000	3,514,863	40 per cent.	1,350
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

6. The organization expenses are limited as will be seen by referring to the contract with the B. C. Finance Company, Limited.

LIMITATION OF EXPENSES.

The Corporation has entered into a contract with the B. C. Finance Company, Limited, whereby that Company has agreed to subscribe for 100 shares in the Capital stock of the Corporation at the price of $105.00 per share, and to advertise the prospectus and act as the broker of the Corporation in selling its shares. The Corporation in consideration of the foregoing has agreed to pay, in cash or fully paid up shares, at the option of the Company, to the said Company, a commission at the rate of 5 per cent. on the par value of all shares in the Corporation, sold by the company at the price of $110 per share. No commission will be paid in respect of the shares subscribed for by the Company, so that the Corporation will net the same amount for the shares subscribed for by the Company as for the shares sold at $110. The Directors and Promoters of the Corporation, other than P. Donnelly, are all Shareholders in the Company, and as such will be entitled to participate in such commission and other assets of the Company *pro rata*. The above commission of five per cent., the Government fees and legal charges of incorporation will be the only expenses of organization. The premium at which the shares are sold will more than cover these amounts, so that the Corporation will be in a position to commence business with its capital unimpaired and a substantial reserve fund.

SUBSCRIPTIONS—Subscriptions for these shares will be received at any B. C. branch of the Bank of Montreal, or at the Bank of Montreal in Quebec, Montreal, Ottawa, Toronto, London or Winnipeg.

The Merchants Bank of Canada

Notice is hereby given

That a dividend of 3½ per cent. for the current half year, being at the rate of 7 per cent. per annum upon the Paid-up Capital Stock of this Institution, has been declared, and that the same will be payable at its Banking House in this city, on and after

Friday, the 1st Day of December next.

The Transfer Books will be closed from the 16th to the 30th day of November next, both days inclusive.

The Annual Meeting of the Shareholders will be held at the Head Office of the Bank at Hamilton on Monday, January 15th, 1906, at twelve o'clock noon.

By order of the Board,
J. TURNBULL,
General Manager.

Hamilton, October 23rd, 1905.

Western Bank of Canada

Dividend No. 46.

NOTICE IS HEREBY GIVEN that a Dividend of Three and One-half per cent. has been declared upon the Paid-up Capital Stock of the Bank for the current six months, being at the rate of Seven per cent. per annum, and that the same will be due and payable on and after

Monday, Oct. 2nd, 1905,

At the offices of the Bank. The Transfer Books will be closed from the 15th to the 30th of September.

By order of the Board,
Oshawa, Aug. 26th, 1905. T. H. McMILLAN, Cashier.

LA BANQUE NATIONALE.

On and after Thursday, the second day of November next, this Bank will pay to its shareholders a dividend of three per cent. upon its capital for the six months ending on the 31st of October next.

The transfer book will be closed from the 17th to the 31st October next, both days inclusive.

By order of the Board of Directors.
P. LAFRANCE, Manager.

Quebec, 19th September, 1905.

EASTERN TOWNSHIPS BANK.

ANNUAL MEETING.

Notice is hereby given that the Annual General Meeting of the Shareholders of this Bank will be held at their Banking House in the city of Sherbrooke, on

Wednesday, Sixth December Next.

The chair will be taken at 2 o'clock p. m.

By order of the Board,
JAMES MACKINNON,
Sherbrooke, Oct. 31, 1905. General Manager.

The Canada Cycle & Automobile Company are building a large addition to their factory at Toronto Junction, to meet the demand of the automobile trade.

Mercantile Summary

A general strike of the Leather Cutters' Union has been declared in Montreal, owing to differences of opinion with respect to wages.

A New Ontario paper states that a Detroit firm are erecting a smelter at Argentite, on property purchased from J. Andrews, and that the company expect to have their plant running by Christmas. They will handle all ore worth from $25 a ton up, so that which is now in the dump can be handled profitably. This is said to be the company which originally intended to locate at North Bay.

A flattering report comes to hand from Australia concerning Mr. Thomas Tait, the Canadian who undertook the management of the railroads of the Commonwealth. The deficit of $2,000,000 has been wiped out, the interest on capital paid out of earnings, while at the same time there has been no increase of rates or reduction in wages. The improvement has been effected chiefly by making the trains fewer, and causing them to haul heavier loads.

The auxiliary cruiser "Neptune" has arrived in St. John's, Newfoundland, after a somewhat perilous voyage to supply winter stores to the remote police posts in the Hudson's Bay region. Twice she struck on rocks, and, on arrival in port she was leaking badly.

W. C. Cummings, general merchant, Doaktown, N.B., has assigned to H. H. Pickett, St. John. He was recently reported as trying to compromise. Liabilities are believed to exceed $10,000, and among his assets are said to be as much as $7,500 in book accounts of questionable value.

The Richelieu & Ontario Navigation Company purpose to build at once a steamer for the Lachine Rapids section of the St. Lawrence, a sister steamer to the "Montreal," for the route between Montreal and Quebec, and also, it is said, a large vessel for the Montreal and Hamilton route.

In paying a tribute last Sunday to the life and work of the late Charles Alexander, of Montreal, Rev. Mr. Pedley said with great discrimination, referring to the philanthropic and generous disposition of the deceased. "Mr. Alexander gave, with each pecuniary gift, a contribution of his soul, a good wish, a hearty word. * * * He did not believe in a philanthropy which was reduced to science or done upon an enormous scale."

The Grand Trunk Railway Company are said to be negotiating for the acquisition of the Central Ontario Railway system, an important link in the short line from Toronto to Ottawa. It is 116 miles in length, and runs through a section of country in which there is a large quantity of Bessemer iron ore. Its route is from Picton on the south to Bancroft on the north, and crosses the Grand Trunk tracks at Trenton, and the Canadian Pacific near Tweed. It is understood to be the intention of the Grand Trunk to build a branch line from the Central Ontario to connect with the main line of the Ottawa division (formerly the C.A.R.), which will considerably shorten the distance between Toronto and the capital.

We have before referred to the plucky fight which was being conducted by the Temiskaming "Herald" against the schemes of a certain Mr. Pindell for putting in water and electric light services in New Liskeard, the ratepayers being asked to put up a good, large, widespread guarantee over a large proportion of the bonds of his company. The proposal came up for the decision of the electors on the 7th inst., and was badly out-voted. We understand that immediately at the close of the poll a council meeting was held, and the promoter was again on hand with another offer, his offer being the same as before, but practically omitting the bond guarantee. In the meantime, it is said, the scheme has never been properly investigated by the town authorities or passed upon by local engineers.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The game commissioners of New Brunswick show the receipts this season from the sale of hunting licenses in that Province are the highest they have ever been, reaching no less a sum than $17,600.

R. Haley, of Lanark, Ont., is a cheese-maker by trade. A little more than a year ago he bought out a grocery stock in the above town. Now his assignment is noted, and his creditors are to meet on the 18th inst.

We have often heard from our St. John, N.B., correspondent about the Mispec pulp mill, lately taken over by Stetson, Cutler & Co. This mill has started operations. The average output, it is intended, will be thirty tons a day, but this can be increased to forty by the addition of a few more driers.

The Canadian General Electric Company has just placed in position for the St. John, N.B., street railway a new 1,200-horse-power engine. It cost $40,000. The latter concern has also, we are told, installed a fire pump with a capacity of 500 gallons per minute, to be used for fighting fire either on their own premises or elsewhere in the city.

It will give pleasure to many in Canada who remember him as one of the representatives of R. G. Dun & Co., years ago, to learn that Mr. Thomas A. Richardson, who has been the manager for that firm in London for many years, has been appointed a Justice of the Peace for the County of Kent, England. Mr. Richardson is not only a valuable and valued business man while in "the city," but occupies a prominent position in connection with various educational and philanthropic societies in Penge and Anerley.

Late failures among Montreal traders are of insignificant character. An east end grocer, named Adelard Chagnon, has failed, owing $1,375.——W. J. Dwyer, in the same kind of retail business since 1903, owes $2,150, and has put his affairs into the assignee's hands.——A third man in the same line, L. Allaire by name, also insolvent, is reported to owe $6,100.——Guenette & Frere, who began business in January, 1904, in hardware on a moderate scale, has assigned to A. Lamarche. One brother of this firm had previously been a painter in the C.P.R. shops, and the other had been a dry goods clerk, so that they had evidently little knowledge of the hardware business.——A demand of assignment has been made upon A. Dufresne & Co., boot and shoe retailers. Dufresne is a veterinary surgeon by profession, who had formerly been unfortunate in the lime-making business, and recently he has been trading under cover of his wife's name.——Romeo G. Paquette, for the past year doing business under the style of the Men's Wear Co., has assigned. His liabilities are estimated at about $5,000, with a deficiency of $3,000 to $4,000.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

OSBORNE & FRANCIS,
54 King Stree[illegible]est, Toronto.

Mercantile Summary.

The British Columbia Mining & Developing Company at Rossland, is said to be meeting with a good measure of success on its properties, grey copper ore having been found assaying $100 to the ton. Operations are to continue all winter.

The Granby mines appear to be making records in the amount of shipments. Last week there were shipped from them to the Granby smelter 17,605 tons, and from the Mother Lode to the British Columbia copper smelter 4,032. The total for the year up to date has been 731,277 tons.

A produce commission merchant of Halifax, N.S., named T. H. Carroll, is reported as embarrassed, and trying to compromise.——J. W. Tidd, long engaged in the fish trade at Whale Cove, N.S., has been obliged to assign, as also has Albert Pugsley, lumber dealer, of Athol, N.S.

Preparations are being made for a speedy construction of the Midway & Vernon Railway, for which the capital has been raised principally in New York and Pittsburg. Work on ten miles out of Midway has already started, and the entire contract is to be given out this fall. It will pass through the highly mineralized West fork of the Kettle River Valley and the growing rich agricultural district of the Okanagan Valley.

We are reminded by a Montreal correspondent that Toronto must not assume all the fame that is going to her because of the honor conferred on Col. H. M. Pellatt, by making him Sir Henry Pellatt on the King's Birthday. It is to be remembered that Sir Henry, among his other privileges and responsibilities, is the esteemed secretary of the Canada Paint Company, Limited, of Montreal, Toronto, and Winnipeg.

The Anglo-American Telegraph Company has brought an action against the Reid Newfoundland Company for $293,550. The facts are said to be as follows: The Reid-Newfoundland Company, it seems, have had the free use of an Anglo wire to Harbor Grace via Whitbourne for operating their railway service. The railway wire extends only from Whitbourne northwards. It is claimed by the Anglo-American Company that the wire to Whitbourne has been used by the Reid-Newfoundland Company to operate its entire railway and steamboat services, instead of being confined to use for the train service between St. John's and Harbor Grace, and for this extra or excessive use the Anglo-American Company is now claiming $293,550.

The annual statement of the Acadia Sugar Refining Company was submitted last week at Halifax. It shows that, including $5,895 brought forward from last year the net profit for the year after providing for depreciation, was $99,458. An interim dividend of 3 per cent. on the preference shares, $40,880, was paid, and a further dividend of 3 per cent. on the preference share, amounting to $40,880, is recommended, and a dividend of 1 per cent. on the ordinary shares, amounting to $13,626. A balance, $4,072 to be carried forward.

Mercantile Summary.

Messrs. Arthur White and John Earls have opened an office in the Aberdeen Chambers, 43 Victoria Street, Toronto, and will carry on a general insurance and freight brokerage business under the name of White & Earls.

Work is being rapidly completed on O. L. Boynton's new mill for the Elk Lumber Company at Fernie, B.C. It will be 50 feet by 140 feet, with a capacity of 75,000 feet, per ten-hour day, subject to be increased later on.

Mr. H. Banwell, of Walkerville, has organized a company under the title of the Banwell, Hoxie Wire Fence Company, with a capital of $100,000, to manufacture, erect and sell woven wire and other fencing. The head office of the concern will be at Hamilton.

The Canadian District Heating Company, Limited, is the name of a new Hamilton concern which has been established to construct and operate works for the production and distribution of electricity, gas, steam and hot water for heat, light and power purposes.

The Dominion Marine Association recently held a conference with the Grand Trunk Railway Company regarding the difficulty which has been experienced by steamship men this season in getting shipments of grain eastward from Depot Harbor after the cargoes have been delivered at that point by water. It was stated that the shortage of cars and lack of despatch was due to the fact that the Grand Trunk were able to move from Depot Harbor only 100,000 bushels of grain a day, and that each of their own four vessels on the lakes delivered that much grain at that point every week, leaving only two days a week for the despatch of cargoes from other vessels, or an actual movement of only 200,000 bushels a week, apart from grain off their own vessels.

The talk of a merger in the drug business would appear to take crystallized form in the notice in last week's Canada Gazette, as to the granting of a charter to the National Drug & Chemical Company of Canada, Limited, having headquarters at Montreal. The capital stock is placed at $6,000,000. The purposes of the company are stated as follows:—To manufacture, import, and deal in drugs, chemicals, medicines, alcohol, paints, oils, dyestuffs, glassware, toilet articles, tobaccos, liquors, cigars, stationery, fancy goods, perfumeries, surgical apparatus, physicians' and hospital supplies, bottles, jars, cans, boxes, containers, labels, and general store supplies; and to acquire and take over as going concerns the undertakings of any persons, firms, or corporations engaged in any such business, and all or any portion or portions of the assets and liabilities of the same. F. G. Lyman, of Montreal; John Jas. Evans, of Liverpool, Eng.; W. W. and D. W. Bole, of Winnipeg, are among those largely interested.

Sarnia, Ont., town council is giving out contracts for the erection of a new waterworks building.

The ratepayers of Roxton Falls, Que., have sustained a by-law granting a bonus of $1,500 to the chair factory.

R. Gregory's furniture establishment at Kingsville, Ont., was burned down last week, at a loss of $5,000 on the building, and $12,000 on stock. The insurance amounted to about one-half. Mayhew's harness shop adjoining was damaged to the extent of about $1,000.

A few days ago the village council of Granby, Que., decided to pass a by-law authorizing a loan of $160,000 to pay off the floating liabilities of the corporation, amounting to $60,000, and to pay for the water works the sum of $100,000; also authorizing the issue of debentures for $160,000, payable in thirty years, and bearing interest at 4 per cent., and imposing a tax of $9,600 to provide for the interest and sinking fund to redeem the debentures. The by-law is to be voted on by the ratepayers on November 29th.

Recent country failures in Quebec Province are chronicled as follows:—P. E. Beaulieu, general dealer, at Lac au Saumon, has put his affairs into the hands of a Quebec accountant. He owes $6,055, and shows nominal assets of $8,100. He is reported to have failed eight or ten years ago as a retail merchant, at Ste. Flavie.——Morris Leventhal, who only recently engaged in the furniture business at Lachine, in a small way, has assigned on demand, and offers his creditors 25 cents on the dollar.——F. Lafortune, general storekeeper at St. Remi d'Amherst has assigned on demand. He has apparently been in uncertain financial shape for some time past, frequent suits having been recorded against him during the past year or so. His regular trade liabilities are reported at $2,800, but his wife has a dower claim of $4,000 to $5,000, which, if enforced, will impoverish the estate greatly.——G. A. Fleury, recently reported insolvent at Scott Junction, is proposing to pay his creditors 60 cents on the dollar.——A compromise has also been arranged, at 75 cents, cash, by James Holiday, general merchant and postmaster at Dewittville, in Huntingdon County.——An assignment has been made by Garneau & Frere, carriage-makers, at St. Apollinaire, not far from Levis.

OUR POLICY

A successful merchant extends to his customers every courtesy and personal attention.

The same policy, combined with conservative management, contributes to the success of financial concerns.

Mercantile Summary.

The J. Y. Griffin Company, of Winnipeg, are about to erect a large warehouse and meat cold storage at Fort William, Ont. It will slaughter, pack, and cure all kinds of meat.

It is believed that the Great Northern Railroad Company, of which James J. Hill is the head, is about to extend its Mohall branch to Regina, and will thus parallel a branch of the C.P.R.

J. J. McLaughlin, Limited, Toronto, has received an Ontario charter empowering J. J. McLaughlin, N. A. Howie, and others of Toronto, to carry on, under that name, the business of manufacturing chemists, and importers, manufacturers and dealers in mineral waters, fruit juices, syrups, creams, and extracts, etc.

The Northern Pacific Railroad is reported to be proposing to run trains through Sumas, and one by the new line to Cloverdale, to connect there with the Great Northern. They would then come into Vancouver by way of the New Westminster bridge and the V. W. & Y. tracks, with joint Great Northern and Northern Pacific terminals in Vancouver.

The Ontario Minnesota Mining Company, Limited, capital $60,000, has been incorporated under Ontario regulations, for the purpose of carrying on the usual operations of a mining, milling, reducing, and developing concern. The head offices are to be at Port Arthur. J. D. Ensign, of Duluth, Minn., and J. F. Piper, of Minneapolis, are the prime movers in the enterprise.

A company with a capital of $500,000 has been formed under Ontario charter with head offices at Kingsville, to carry on a milling, mining, and reduction business in all branches. It will be known as the Cobalt-Canadian Mining and Milling Company, Limited. Among the provisional directors are S. L. McKay, B. Jasperson, and others of Kingsville, Ont.

The new building now completed for the Galt Knitting Co., Limited, is among the most complete mills of its kind in the country to-day, built of cement, covering a space of 125 x 132 feet, four stories and basement. It commands a prominent position in the heart of Galt, within a stone's throw of the principal business corner. The building is of mill construction throughout; contains 85,000 feet of floor space, and is equipped with sprinkler system, fire pumps, etc. Every known device for saving unnecessary handling in the process of manufacture has been adopted, and with convenient elevators raw material enters the premises at one end, and the finished product comes out at the other. The old mill directly across the street is being abandoned, the machinery and equipment being moved to the new premises. This old building will be offered for sale or utilized for some other business.

AGENTS WANTED in every unrepresented District in Canada.

At the third annual meeting of the Canadian Northern Railway Company, held in Toronto last week, a report was presented which showed that the gross earnings for the past year from passenger traffic amounted to $663,935; from freight, $3,061,530; from express, mail, telegraph, dining and sleeping cars, elevators, etc., $464,745, or a total of $4,190,211. The working expenses were $2,664,729 and the net earnings, $1,545,482. The fixed charges amount to $1,128,779, so that the surplus for the year stands at $416,702. The gross earnings show an increase of $947,509.27, or 29.22 per cent. over the previous year's figures, and the net earnings show an increase of $423,552.06, or 37.75 per cent. in excess of the figures for the fiscal year ended June 30th, 1904.

The development of British Columbia and the increased activities in business of all kinds in that province naturally demand and justify the increase of financial facilities. These are in part furnished by the placing of branches of banks all over the province. Other institutions, such as loan and trust companies, can also find their place readily. To meet such a need as we have indicated there is being formed the Securities Corporation of British Columbia, capital, $1,000,000, shares issued at a premium of 10 per cent.; 20 per cent. only expected to be called. This company will carry on a general trust and guarantee business, will lend money on real estate and other security, will issue debentures and administer trusts. The directors include well-known and respectable people in Victoria and Vancouver, such as D. R. Ker, of the Brackman-Ker Milling Co., and Richard Hall, M.P.P., of Victoria; Hon. F. L. Carter-Cotton, and Robert Kelly, of Vancouver. The Bank of Montreal are their bankers, and the manager is to be Patrick Donnelly, formerly manager in British Columbia for the Great West Permanent Loan Co., of Winnipeg.

* * *

TORONTO MARKETS.

November 16th, 1905.

Drugs, Chemicals, etc.—A steady tone pervades the local drug market, both in respect to demand and to prices. At the same time that market presents really very few interesting features. Opium and quinine, also carbolic acid and menthol, are about in the same situation as when last referred to. A report from Manchester states that some improvement in the general position can again be noted, and in fact there is at present a considerable amount of activity in the chemical trade. The home demand is quite fair, and export business is brisk, especially for those ports that will soon be closed for the winter. This is as far as early delivery is concerned, and as regards the future consumers generally are showing their confidence by placing their contracts on a liberal scale. Values of most articles are firm, and some have recently improved, and altogether the satisfactory tone that has for some time been noticeable is more than maintained. In heavy alkalies a good business is being done. Bleaching powder is firm, and the majority of consumers have now covered their next year's requirements. Caustic soda is selling more freely at steady prices. Chlorates of potash and soda have been advanced some 3-16d. per pound for delivery this year or next. Exports of alkalies continue to improve.

Dry Goods.—A steady trade in good volume prevails in practically all lines of dry goods. The Christmas demand is beginning to open up in good shape, and the prospects for the same are said by all concerned to be very bright. Stocks of the heavier woolen goods are believed to be on the light side, so that the probabilities point to a large seasonable business in this line. Cotton staples retain much the same position as before. Raw material is not held so strongly as it was, but no reduction in the price of finished articles is to be expected.

Flour and Grain.— Business in Ontario wheat is very dull, but prices continue good, partly on account of the light deliveries. Manitoba wheat is receiving renewed attention from across the Atlantic, and a firmer feeling is visible. The flour market is unsettled, owing to divergence of view held by buyers and sellers, and the difficulty experienced by millers in getting deliveries. There is a good local demand for bran, and prices for both that and shorts are good and steady. There is an active demand for oats, and prices are considerably firmer. The same may be said as a general rule of the other grains. Oatmeal is somewhat easy.

Fruits.—About the only domestic fruit in plenty on the market just now is apples, which, owing to the small crop, not only in the generality of places in Canada, but in the States and Europe, are very high-priced. Fair to good winter varieties fetch about $2.50, with more for higher grades. Tropical fruits are held at firm prices, and are meeting with average demand.

Hardware.—The volume of business in practically all branches of the hardware trade is large, and wholesalers are very busy filling orders before navigation closes. Skates, cutlery, nails and other building materials have all moved very satisfactorily, and the tone of the market is very good. In metals the same may be said. Advices from England speak of the improvement in the pig iron trade, which, noticeable a month ago, has been maintained and intensified during the current month, and prices of Scotch and Cleveland have since the end of September advanced some 4s. 6d. and 3s. 8d. per ton respectively. The advance in Cleveland iron would no doubt have been heavier but for the considerable quantities at present in public stores. The market continues strong, and the demand good. Copper has had a good market throughout the month, and has advanced some 15s. per ton, but is latterly a little easier. Tin is about 25s. dearer during the month, and is firm. Spelter has advanced 27s. 6d., and is strong. Lead is 15s. dearer, and is steady.

Provisions.—With the exception of bacon, which declined in price a few days ago, there has not been much change recently in farm products. Butter holds pretty steady under normal receipts. Cheese is a little firmer. Eggs are quite firm, and, considering the fewness of absolutely fresh-laid, it is a wonder prices do not go yet higher.

MONTREAL MARKETS.

Montreal, 15th November, 1905.

Ashes.—The market rules dull, with a rather easier feeling as regards values. First quality of pearls are quoted at about $7.50, though there has been really little late actual business on which to base figures. First pots are quoted at $5.45 to $5.60; seconds, $4.75 to $4.90, and thirds at $3.80 to $3.90 per cental.

Dairy Products.—The receipts of cheese last week were 66,850 boxes, and the total for the season to date 2,177,859 boxes, which is almost equal to the 2,204,640 boxes at same date a year ago. Shipments last week were only 41,702 boxes, as compared with 104,919 boxes for the same week of 1904. Exports of butter last week were also exceedingly light, only 774 packages, the higher prices evidently checking British demand. Fancy creameries are held at 23½ to 23¾c. with good to choice ranging from 22¾ to 23½c. Cheese quotations are firm at 12⅜ to 12½c. for fine Westerns, and 12⅛ to 12¼c. per pound.

Dry Goods.—Quite a fair number of buyers from Western points have been in town during the week, making sorting selections for Christmas trade, and looking out for bargains in clearing jobs, which the trade generally offer prior to December stock-taking. General collections from retailers are reported up to the average. The Montreal Cotton Co. have, since last writing, given notice of an advance of about 5 per cent. in foulards, ducks, etc., and the Cornwall and York Mill, at St. John, N.B., has also advised an advance in denims, tickings, flannelettes, etc.

Fish.—There is now quite a good demand for salt fish, and we quote Labrador herrings, $5.50 in barrels, halves, $2.75; mackerel in 20 pound kits, $2; north shore salmon in tierces, $18; ditto in barrels, $13; lake trout, $4.75; smoked haddies, 7 to 8c.; boneless cod, 6c.; dry cod, $6 per quintal.

Groceries.—There is little new to be noted in this line. A week has passed without further decline in sugars, and quotations are fairly steady at $4.30 for standard granulated, with yellows ranging from $4.80 upwards. The Denia market for Valencia raisins still rules weak, and a fair amount of business is being booked on local account at the low prices now ruling. Seeded Malaga raisins are not turning out satisfactorily, both the skin and pulp being much tenderer than the California fruit, of which, however, importations are very light owing to the high price, laid down cost being figured at about 11c. in cartons. The currant market has developed some firmness since the "Jacona" left Patros. New dates are now being distributed at low prices. California prunes are reported high, owing to crop not being up to calculations, besides which there is good demand from Britain. Sultanas are steadily moving upwards, having developed an advance of several shillings since the opening of the market. All kinds of nuts are very firm.

Hides.—No change of any kind is to be noted since last report. No. 1 beef hides are firm at 11½ to 12c. per lb., and lambskins at 95c. each.

Leather.—A strike among the leather cutters is affecting the operations of some of the boot and shoe factories, and is not calculated to improve the demand for leather, but all values are firmly held, and tanners and dealers are not disposed to make any concessions in price.

Metals and Hardware.—Winter freight rates go into effect to-day, and it is not unreasonable to suppose that the long-continued active movement will now show some falling off. There is, however, no weakening of any kind in values as recently advanced. Lead is even higher, $4.05 being now asked for pig-lead in an ordinary way, and the discount on shot has been reduced by 5 per cent.; ingot tin is firmer at 36½ to 37c.; the other lines of general metals are steady at last week's figures. Canada plates are quoted at $2.50 for fifties, and black sheets at $2.25 for 28 gauge; Ternes are advanced to $6.75; galvanized sheets and Canada plates remain as last quoted. Boiler plates are $2.20, and iron pipe $4.29 for inch.

Oils, Paints, etc.—The movement in these goods is still well sustained, but is likely to quieten down somewhat after this week. Ground leads have sitffened up a little, owing to recent advances in pig-lead, and $5.40 is now the lowest figure for fair lots of chemically pure, with $5.50 for small lots. Putty is unaltered at $1.40 in bulk. Window glass is very firm at the advance noted last week. Linseed oil brings 46c. for raw, and 48 to 49c. for boiled, in ordinary lots; turpentine steady at 98c.; fish oils continue very slow of movement.

THE BRITISH MARKETS.

During the week under review the home trade of Manchester has continued active in the wholesale houses so far as cotton goods are concerned. Pressure has been felt from the retail shops for quicker delivery, but it has not been possible to fully supply their wants. The leading houses find considerable difficulty in getting goods round from makers. Manufacturers are doing their best to satisfy the requirements of their customers, but previously they had entered into engagements with shippers. It has been necessary for buyers of home cloths to give out fairly extensive orders so as to secure delivery on a larger scale later on. Not quite so much business has been given out to producers as last week and the week before. The general position is healthier than for some time back.

It may be mentioned that velveteens, as made in Oldham and elsewhere, are in good demand. Manufacturers of such fabrics are fortified with orders for some time to come, and local distributors are pressing for daily deliveries. In other kinds of cloth business is brisk, notably in fustians. All round a healthy feeling prevails for buyers and sellers, and the prospects of the trade for the coming winter and spring are looked upon as most encouraging. The shipping department in the leading Eastern outlets is moving a little better. This applies to India more than any other outlet. The boycott in Calcutta continues, according to the best information here. That is to say, no business worth naming is coming round, though clearances are going on in the bazaars.

Business in the linen market of Belfast continues quietly to improve, and prices are well maintained. The amount of business passing in the wholesale warehouses is considerable for the season, and there is a healthy tone throughout the country. The weather has been rather unpleasant for a few days, and shopping has not been so brisk as before; still, there is a good, steady, business in the retail.

The Bradford wool market is pursuing its uneventful course, and for the past month there has been practically no change in the prices of either the colonial or the home-grown product. Users of pure colonial merino wools profess to think that the great increase in the production of the new season's clip of Australian merino wools must make the prices rather easier in the near future, whilst, on the other hand, importers and holders point to the great expansion there is likely to be in the consumption, and the bareness of stocks all over the world, as strongly precluding the probability of any lower prices for these wools in the near future. It would, of course, be foolish to attempt to say which of these views is right, when any great political upset on the Continent might in a moment change the face of

the situation. At first sight it would seem almost extraordinary that the prices of the lower kinds of crossbred colonial wools should have risen, since 1902, from 4d. per lb. to 14d. per lb., and that this great advance should still be maintained in view of the new season's wool from Australia being due to arrive in bulk within the next two months; but here, again, we have to take into consideration that during the past seven or eight years the stocks of these low colonial crossbred wools have been greatly depleted, and that, in addition, there is probably a greater consumption of them than at any previous time since the importation began on a really large scale. The high price of these crossbred colonial wools is certainly causing a considerable decrease in their use in the Bradford trade, as they are specially suitable for the making of cheap dress and men's wear fabrics, but the high prices have carried them beyond the reach of working-class wearers. It has, however, been found possible by mixing these crossbred wools with a proportion of cotton and shoddy yarns to produce dress fabrics of good appearance of the tweed character, which could be sold at popular prices.

Mercantile Summary.

The St. Catharines Building & Paving Company, Limited, capital $50,000, has received an Ontario charter. It will make and sell brick, stone, flooring, roofing, poles, and products made from cement, marble, gravel, sand, etc. J. T. Petrie and Jos. Johnson, of St. Catharines are among those interested.

An item to the British Columbia newspapers emanating from Kamloops, states that oil and gold are proving great attractions in the neighborhood of Harper's camp in the Horsefly district. A few weeks ago a California expert reported that the prospects warranted the expenditure of $30,000 to ascertain if there was oil in paying quantities, and the Beaver Valley Oil Company has now been incorporated to prospect for oil in Beaver Valley, which is adjacent to Harper's camp, with a capital of $100,000. Opinions of reliable men based on what is now known about the locality, are favorable as to the chances.

We observe that the Canada Chemical Manufacturing Company, Limited, has opened a sales office for Toronto and district in the McKinnon Building of the latter city, Mr. Albert Neighorn being in charge. This is in addition to their distributing warehouse already in existence in Toronto. The company finds the growth of its acid and chemical business in Ontario necessitates dividing the territory into sales districts. It will make acids and chemicals as usual at the London works, but these "divisional points" are for the convenience of the company's customers and for facilitating business.

On Saturday last, part of the Government wharf at Sorel, Que., gave way, and the country sustains a loss of about $200,000. Happily, the accident was not attended with more serious results, but as it was, three hundred feet of wharf, carrying 850 tons of coal, belonging to the R. and O. Navigation Company, is at the bottom of the river. The break is attributed to the undermining influence of water from the river Richelieu. But this structure was only put up in 1903-04. How is it so soon wrecked? Did no one know about this "water from the Richelieu?" Must we still continue to have instances of failure in what is known as Government work?

It is believed by some parties in Montreal that the real purchasers of the South Shore Railway recently were the Delaware & Hudson Railway Company, in which case the Grand Trunk would find a formidable competitor in its own territory. Should this prove to be actually the case, entrance into Montreal would likely be obtained by way of the proposed bridge from Longueuil. It may be stated that the South Shore Company proposes to extend its road from Sorel to Quebec, for which it would be assisted by subsidies to the amount approximately of $200,000.

* * *

KEEPING THE BUSINESS IN HAND.

The New York brokers were walking down Broadway when a man came out of an office building and passed them. His clothes were shabby and he had a nervous, worried look.

"Did you notice that fellow?" asked one of them.

"Yes. Who is he?"

"The usual story. Five years ago he was a rich merchant in Mississippi. He had made $200,000 in the dry goods business. He thought he could make more in New York by becoming 'a general broker.' He got an office and a big safe. The safe is all he has left."

You can meet dozens of failures like this man every day in New York and in every other city. They are men who have made money in the one business that each knew, and who have each taken up another that they did not know and lost everything. Their experiences emphasize the value of single-mindedness in business. They hint at the importance of "a shoemaker's sticking to his last."

The case of one of the most successfull dress goods salesmen in New York is to the point. Fifteen years ago he was an assistant to his uncle who was a salesman in a large notion house. The uncle sold goods in big quantities and got 5 per cent. commission on all his sales. He had an extensive acquaintance among the buyers who flock to New York every year, and in the course of ten years he accumulated $75,000. Then he decided to go into business for himself. Instead of starting a wholesale establishment, the kind of enterprise he knew, he went to a town in Kentucky and opened a retail store. In three years he was bankrupt. He is now working for his nephew, who is making more than $6.000 a year. But the nephew stuck to the job of selling dress goods at wholesale.

Now the uncle had what business men call a "wholesale mind." He knew all about dress goods and other dry goods. He sold big bills and he got 5 per cent. commission on the whole amount. When he went into the retail business he bought dress goods. He knew all about the quality and he made good bargains. But that was not all. For example, he paid eight cents a yard for a bolt of forty yards of cloth and he sold it at retail for ten cents a yard. Two cents a yard was a good profit. But he did not consider that in many cases he sold only five or eight or ten yards out of a whole bolt and that the rest of it rested idly on his shelves, a dead loss. That is why he failed. He did not have the "retail mind." He had gone into a business that he did not know.

On the other hand, the career of one of our great merchants shows how single-mindedness succeeds. He started in life as a small merchant and built up an enormous retail business. He was the father of the department store. He was the kind of man who could walk around his stores, smiling at his customers, asking if they were well cared for, and the people whom he was

solicitous about were pleased and came back. When he had made a large sum of money he decided that it was just as easy to make more by going into the wholesale clothing business. But his retail store methods did not succeed and he almost bankrupted himself. This same man, inspired by his personal success in the retail business, tried politics, but he repeated the failure of the wholesale venture. So he stuck to his department store and is now a multi-millionaire.—The World's Work.

CANADIAN FORESTRY.

The October number of the Canadian Forestry Journal is of special interest, in view of the Canadian Forestry Convention to be held in Ottawa in January next, The first article is a sketch of "The Montreal Forest Congress," held in Montreal in 1882. This meeting gave the impulse resulting in the establishment of the fire ranging service which has saved from destruction large areas of forest throughout Canada. "Woodland Taxation" by Dr. Judson F. Clark, Forester for the Province of Ontario is a practical article of great value and will help materially towards a clearer understanding of the effects of such taxation and of the principles on which it should be based. Other articles are, "Tree Planting in the West," by Norman M. Ross, Assistant Superintendent of Forestry for Canada; "West African

Forests and Forestry," by Dr. A. Harold Unwin; "The Balsam Poplar," "Forestry in Ontario," "Forest Fires in Ontario." two good illustrations of the timber north of Prince Albert, Saskatchewan, demonstrate that the West has good forests as well as fertile fields.

The annual payment of a "ground rent" per unit of area held by the lumbermen is a plan worthy of special consideration, which is discussed by Dr. Judson F. Clark. The payment of any annual tax on woodlands tends to early cutting and discourages holding for a second crop, hence affects the harvest unfavorably from the standpoint of practical forestry. How great will be this unfavorable influence depends on the amount of the tax and the rate of interest demanded by the lumbermen for the capital invested. Wherever there is a ground rent levied it becomes necessary for the lumberman when planning logging operations to consider carefully whether it will pay him to cut with care that he may return again after a period of years for a second crop—reasonable safety from fire being assured—or whether the tax will eat up the profit of any yield that he may hope for over and above what can now be realized by cutting clean without regard to the future. This is the only point of view from which the lumbermen as a business man can regard the logging of the lands under his control, whether they be owned or leased.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

THRIFT OF A WESTERN FARMER.

Andrew Jackson Lumpkin, of Possum Creek, has a novel but still unpatented way of making his children pay for their raising. He has kept, and still keeps, a written account of debts and credits with his five children from their appearance on earth. He charges them for every drop of medicine, food, clothing, and care they cost him and his wife. Mr. Lumpkin allows them fair wages for all the little or big work they do. Jake, the oldest, said: "I still owe $221 to pa; but will get more than even with him when I am 21 years old."—Kansas City Journal.

* * *

—"Are your boys comin' home for Thanksgivin'?" "Oh, yes." "What are they a-doin' of now?" "Well, four of 'em are makin' of a livin', but the fifth—it's sich a puzzle to know what to do with him that I've jest about decided to put him to writin' American literature."—Atlanta Constitution.

MANAGER FOR CANADA:

B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY TH STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00.

Canada Life's Total Business

Think how many people will benefit from the amount of insurance carried in the Canada Life.

At present the Company's total business is

Over $105,000,000.00

The Sun Life of Canada had a triumphant year. Impossible to give the increases in this space—suffice it to say that never has the Company's motto "Prosperous and Progressive" been so magnificently maintained. Ask for leaflet giving the Record of 1904.

AN EXHIBITION FOR MONTREAL.

Several times within the last dozen years public-spirited men in Montreal have organized for the purpose of holding annual exhibitions in that city of a kind similar to those held in Halifax, St. John, Winnipeg, Toronto, and various Ontario cities. These exhibitions, however, in our largest city have not proved remunerative to the projectors, nor, indeed, have their character or their results been such as might have been expected in a city like Montreal, either in the number of persons attending them, the sales of exhibits made at them, or the degree of interest or stimulus they occasioned in industrial or agricultural directions. True, it has proved the case in Halifax that the provincial exhibition left a financial deficit of several thousand dollars in each of successive years, and that other cities further west have had reason to complain in a like direction. But there is to be placed against this the outstanding success and remarkable growth of the Toronto and Winnipeg fairs.

It is possible that the dimensions attained by the last-mentioned two events in recent years have stimulated Montreal public men and business men to make a further effort to establish a yearly exhibition in that city. At any rate an agitation having this object in view has been begun, and it is said that a reorganization of the board of directors of the Exhibition Association will presently take place. Said one of the promoters of the movement: "It is admitted that a good exhibition will bring thousands to the city, and a vast return to the country for the outlay involved. It is also a world-wide advertisement of incalculable value to a country possessing the resources of Canada." A week ago a deputation consisting of Mr. Henry Miles, Hon. J. D. Rolland and Mr. Robert Bickerdike called upon Hon. R. Prefontaine, Minister of Marine, at Ottawa. The Minister of Agriculture, Hon. Sydney Fisher, has also replied to the directors' letter in favor of the scheme, closing with the words: "Anything I can do which will aid the successful establishment of a good exhibition in Montreal I shall be glad to do." It is not a small enterprise, the founding of an exhibition that will attract farmers, artisans, people from a distance, and encourage them by its excellence to become yearly patrons. Men of energy who will sacrifice time and attention in the interest of establishing annual exhibitions must be obtained—there are plenty such in Montreal. And they will have to plan and labor in large hope, and be content to wait a while for success to come.

* * *

A SUCCESSFUL PROFIT-SHARING EXPERIMENT.

Many employers in Canada have been interested in the idea of profit-sharing by their employees; and disappointment is felt by many that more of the experiments which have so far been made in this direction have not proved practically more successful. Before the Canadian Club of Toronto last week Mr. T. C. Taylor, M.P., head of the old established and important woolen manufacturing firm of J. T. & T. Taylor, Limited, of Batley, Yorkshire, gave one of the most lucid and interesting addresses to which that fortunate body has ever listened: his object being an exposition of a plan of profit-sharing which he had himself inaugurated at his mills some twelve years ago, with benefit, he avers, to all concerned.

Mr. Taylor, he told the club, entered into his plans upon no impulse of the moment, but after years of close economic consideration and study of the special problems to be solved. And these plans he unfolded gradually. He began by taking into the business his chief assistants and the heads of the respective departments; then the clerks were included, and finally the firm was formed into a limited liability concern with the express object of including in the scheme all workers who had been employed a year or more. One essential feature of Mr. Taylor's plan should be borne in mind, for it constitutes the rock upon which many another profit-sharing experiment has been wrecked; that is, that the sharing of the profits of the business has been a privilege over and in addition to all questions of wages. The wages and salaries paid in Mr. Taylor's mills have always been at least as large as in other concerns of a similar nature. The result has been that even in bad years financially—and there were two years in particular when the profits were nil—no word of complaint has been heard from the workers. This point of making the profit-sharing feature absolutely distinct from the matter of a fair wage for the employees' work is a very important one. It emphasizes the importance as well of Mr. Taylor's own declaration that the employer who only thinks of the plan as a means for making additional profit for himself is likely to come to grief. There *is* profit from the employer's standpoint; this ensues largely in indirect ways, such as the better results which are bound to evolve from the interests of firm and workmen being identical, in the better class of hands such a system attracts, and so forth. In itself, profit-sharing, as exemplified by such a plan as Mr. Taylor has inaugurated, costs money. But, as that gentleman pertinently remarked, there is more in business, even for a practical business man, than mere dollars and cents; there is the feeling that one is doing some good in the world in the shape of encouraging thrift and happiness among one's workers, and in creating a class of small capitalists who otherwise would have no such chance. Mr. Taylor, we may say, is an idealist, but an idealist who does not for a moment detach himself from plain downright practical business considerations. It gives great satisfaction, therefore, to find that the results of his experiment have been so eminently satisfactory in every way.

The best way to explain the manner in which the division of profits is made is to give an illustration. Thus, if the capital of a firm adopting this method were, say, £100,000, and the wages paid during the year amounted to £50,000, and if the divisible surplus of profit (after allowance for depreciation and the payment of 4½ per cent. interest on capital) were £6,000, capital would be allocated £4,000, or an additional 4 per cent., and labor would be allocated £2,000, representing 4 per cent. on the wages earned. In this way a worker earning, say, £70 a year would receive a bonus from the firm of £2 16s., or 4 per cent. on his wages. As, however, the ultimate aim of the originators of the scheme is not merely to give a bonus, but to interest the workers personally in the company, and, in effect, to transform them into small capitalists, this bonus is given not in cash, but in the shape of fully paid shares in the company. Parts of a pound are carried forward, credited to the worker and added to the bonus of the following year. As the company is constituted as much as possible on the lines of a private firm, these shares are not allowed to be sold to any but employees of the company. Indeed, the great wish and object of the originators of the scheme is that they should not be sold at all. The idea is that the employees should hold their shares, take an interest in their gradual accumulation, and thus, eventually, make the concern one in which every employee is personally interested, from the chairman and the managing director down to the humblest worker in office or mill.

That Mr. Taylor's methods of putting the important principle of profit-sharing by employees into practice were a theme of more than usual interest to the members of the Canadian Club of Toronto was evidenced by the avidity with which many took advantage, after the address, of the permission given them to ask questions. Mr. Taylor's answers to these questions were as full and lucid as the body of his speech had been.

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for October, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.

Canadian Bank Statement.

LIABILITIES.	Sept. 1905.	Oct. 1905.
Capital authorized	$100,646,666	$100,646,666
Capital paid up	83,416,049	83,864,828
Reserve Funds	57,098,426	57,493,307
Notes in circulation	$69,831,259	$76,890,863
Dominion and Provincial Government deposits	10,342,048	8,854,210
Public deposits on demand in Canada	141,228,177	150,868,116
Public deposits after notice	346,232,119	349,822,859
Deposits outside of Canada	50,505,691	47,077,167
Bank loans or deposits from other banks secured	361,890	323,662
Due to other banks in Canada	4,966,864	5,933,696
Due to agencies or other banks in Great Britain	5,024,838	6,097,460
Due to other banks in foreign countries	2,557,990	1,824,646
Other liabilities	11,872,454	10,953,077
Total liabilities	$643,923,351	$658,645,830
ASSETS.		
Specie	$19,467,981	$20,157,280
Dominion notes	38,734,128	39,254,738
Deposits to secure note circulation	3,410,334	3,841,520
Notes of and cheques on other banks	21,641,810	27,578,519
Loans to other banks, secured	364,448	374,900
Deposits with other banks in Canada	6,857,118	8,431,852
Due from agencies or other banks in Great Britain	12,178,826	9,212,549
Due from banks or agencies in foreign countries	22,414,377	19,849,856
Dominion and Provincial Government securities	8,777,701	8,356,672
Other securities	60,269,275	59,493,371
Call and short loans on bonds and stocks in Canada	45,914,453	48,164,851
Call and short loans elsewhere	58,639,592	62,280,939
	$298,670,043	$306,997,047
Current Loans in Canada	$443,011,879	$450,413,017
Current Loans elsewhere	27,460,465	29,125,309
Loans to Dominion and Provincial Governments	1,345,494	1,622,714
Overdue debts	2,008,935	1,836,042
Real estate	643,105	652,566
Mortgages on real estate sold	528,948	524,817
Bank premises	10,914,023	11,059,303
Other assets	10,651,978	9,569,048
Total assets	$795,235,045	$811,800,039
Average amount of specie held during the month	19,292,899	19,266,175
Average Dominion notes held during the month	38,369,563	38,468,630
Greatest amount notes in circulation during month	70,619,102	78,464,648
Loans to directors or their firms	8,615,388	8,665,792

The activity in business still continues, and the bank returns reflect this in various ways. The chief interest is, of course, in the circulation outstanding, which has increased during the month by $7,059,000. This increase is not as large as in October last year, when an increase of $8,431,000 was shown, but this is accounted for by the fact that the crop movement in the West began earlier this year, thus causing a larger increase of circulation in September. Since 31st August the increase in 1905 is $14,393,000, as against $11,999,000 in the corresponding two months of 1904. The greatest amount of notes in circulation during the month was $78,464,000, which is sufficiently near the legal limit to be a pointed reminder that by this time next year a larger amount of paid up capital will be required. However, one or two of the banks, the Bank of New Brunswick, the Bank of Nova Scotia, and the Eastern Townships Bank amongst them, are now preparing to call up new capital, and there is little doubt that in this way the circulation limits will be sufficiently enlarged. By this time the issue has doubtless passed its maximum for the year, and by the end of November the tide will have turned, while the figures for December and January will probably show that several million dollars of the banks' promissory notes have been redeemed.

In public deposits payable on demand there has been an increase during the month of $9,640,000, and during the year of $20,000,000. Most of this increase is probably of a casual nature and will disappear in the course of a month or two. Deposits payable after notice have grown by $3,590,000 since 30th September, as compared with an increase of $1,800,000 in October last year. Banks which have many branches in the West may expect their deposits there to show some improvement, but, on the whole, the result of the good crops will be in the liquidation of indebtedness rather than increase in bank deposits. Next year, if all goes well, should leave the farmer with some surplus, but this will depend very much on the acreage under crop. Reports from different points in the West, indicate that early frosts have interfered with ploughing, although it is not clear to what extent this is the case.

Deposits outside Canada again show a decrease, standing at $47,077,000, as compared with $50,505,000 in September. Total liabilities are $658,645,000, a growth of $14,700,000 during the month. During the last five years the figures of liability have been:

		Percentage of increase over previous year.
1901	$445,439,014	15.6
1902	492,877,507	10.6
1903	520,740,000	5.6
1904	582,905,000	11.9
1905	658,645,000	12.9

Turning to the other side of the statement, we find that $1,200,000 has been added to the cash reserves during the month, the total held being now $59,411,000, or 9 per cent. of the total liabilities. A year ago the banks held $53,096,000 in cash, equal to 9.1 per cent. of the liabilities. Notes of and cheques on other banks have increased from $21,641,000 at the end of September to $27,578,000 in October. A similar increase occurred last year, the figures being: October, $25,357,000; September, $18,725,000. To a considerable extent this is doubtless due to notes of other banks being hoarded by those banks which are up to their circulation limit, so that they may not be caught short of currency. To whatever extent this may be the case, the figures for circulation outstanding fail to form a true index of the amount of currency required by the business of the country.

Call loans in Canada are $2,200,000 more than in September, while call loans elsewhere have grown by $1,500,000. This is somewhat unusual at this time of the year. In October last year call loans in Canada increased by $400,000 only, while call loans elsewhere showed a reduction of $4,700,000.. In October, 1903, the changes were a decrease of $932,000 in call loans in Canada, and an increase of $5,953,000 in those elsewhere. Although the comparison is somewhat confusing at first sight, the fluctuations in call loans elsewhere than in Canada are readily accounted for by the level of rates in the New York money market. These were high in October, 1905, and 1903, but low in 1904.

Current loans in Canada continue to grow, $7,400,000 having been added to the total during the month, as against $4,100,000 in the corresponding month last year. The total now stands at $450,413,000; in October, 1904, the figures were $416,344,000 and in 1903, $380,823,000. The increase for the twelve months ending 31st October, 1905, has thus been $34,069,000, as compared with $35,521,000 in the previous twelve months.

Taken as a whole the statement is a very satisfactory one and reflects steady growth in the business of the country. Although the current month will probably show a substantial high level in the circulation movement, yet so regular have its fluctuations become that we are able to state confidently that the strain of moving the crops has now been successfully borne.

* * *

THE UNEMPLOYED IN ENGLAND.

Outsiders oftentimes see more of the game than those taking part in it. The New York Journal of Commerce, in discussing Mr. Balfour's recent references in his speech at the Lord Mayor's banquet in London to the lamentably large number of unemployed in England, attributes this unfortunate condition of things, as we have done on more than one occasion in these columns, to the state of the land laws, which drive the people from the starving agricultural industries to swell the ranks of the unemployed in large cities. Of course a partial cause for the languishing of "the noblest of the arts" in England, a country fairly well blessed by nature and presenting the finest market in the world for all products, is the fact that great tracts are held in waste, and that it is for all practical purposes impossible for people of small means to own the land they would prefer to till. A comparison is offered by France, where though it can boast of no such wealth or the existence of such great incomes as are the portion of many across the channel, yet offers a picture of rural contentment which is deeper and much more general. And there can be no doubt that, with some limitations, the reason for this is the cutting up of the country into an enormous number of small farms, each owned by its individual cultivator. This, from the nature of the case, from the advantages which accrue from a widespread ownership of the soil, is infinitely superior to the tenant-farmer system which prevails in England, with its uncertainty and short tenure of leases.

As we have already stated, the N. Y. Journal of Commerce agrees with this view, but shows up another cause for the overcrowded state of the cities and the too general lack of employment, which is well worthy of careful consideration. This cause our contemporary alleges to be the comparative monopoly of labor established by the labor unions. The British workers' market is not Great Britain only, but the world; and he supplies his wants not from Great Britain itself only, but also from the outside world. The great bulk of the people of the United Kingdom are engaged, or would be if they could, in industrial occupations. But for many years the unions devoted to these occupations have tried their utmost to circumscribe production and confine labor to a favored class. They have restricted apprenticeship, limited *per capita* output, fixed hours and wages. In this manner a sort of monopoly has been established, which has resulted in the shortening of production and the exclusion of many who would work if only they had the chance. Even if it be true that the status of workingmen in unions has been improved, by their having to do less work and being paid better for it, the monopoly has had the consequence of restricting the aggregate production of the country, impoverishing it to that extent, and also adding vastly to the great body of people chronically outside the pale of employment.

* * *

THE SOLID FOUNDATION OF LIFE INSURANCE.

The following utterance by Charles W. Scovel, President of the National (U. S.) Association of Life Underwriters, in no measure excuses recently-proven lapses from rectitude by managers of large life insurance companies in the United States, but it does set forth in a forcible manner the absolute solvency of these companies and the absurdity of anybody dropping his premiums because of any fancy to the contrary. Mr. Scovel argues that the great fundamental safeguard lies in the legal reserve system itself. That system is an exact science. It is pure mathematics applied to the average death rate as shown by the actual experience of the human race for many generations. That science, studied and followed by the actuaries of all countries, has been enacted into law by the legal reserve statutes of the various States of the Union.

We quote from his address the following paragraphs:

> Those scientific and State laws compel every company at all times to maintain absolutely intact the full legal reserve that covers the exact present value of all its outstanding policies. That is to say, this legal reserve, with its interest and the premiums on outstanding policies, is the full amount needed to pay every one of those policies as they mature year after year—and this without writing any more new business. If the assets of any company, as valued by the State officers, fall one dollar below this rigid requirement, the law declares the company insolvent and forbids it to issue a single new policy. Nothing approaching this drastic standard of solvency is set for any other business or financial institution.
>
> Let us see what this means in round figures. The seventy-nine ordinary companies, as shown by the Year Book of 1905, had on January 1, total assets of $2,250,000,000. Of this total, $1,900,000,000 constitute the legal reserve, every dollar of it required by law to be there. That is 84 per cent. of the entire resources. Three per cent. more covers all the other liabilities, and must also be on hand for solvency. That leaves only the modest surplus of 13 per cent. as the fund for dividends to the policyholders.
>
> True, that modest surplus of 13 per cent. amounts to $300,000,000, and that is a sum worth stealing. But the wildest assailant of insurance officers does not think them fools enough to kill the goose that lays the golden egg, as they would do if they stole all of this surplus and thereby had their doors closed for insolvency.
>
> Thus, the legal reserve system of itself practically limits the field of operations for criminal theft, or conscienceless graft, or ignorant carelessness, to *some portion only* of this 13 per cent. surplus. And mark you, if the officers of all the seventy-nine companies actually had stolen every dollar of that $300,000,000 surplus and all their doors were closed to new business to-day, there would yet remain the $1,950,000,000 to pay off every obligation as it falls due in the years to come.

In still another way does the modern system of life insurance erect a strong safeguard around insurance funds. The vast bulk of the assets forms a kind of sinking fund to meet future obligations, and a large part of the surplus will not mature for distribution for many years hence, while the reserve on some of the policies written now may possibly be yielding a revenue a hundred years hence through life annuities to beneficiaries as yet unborn.

* * *

MR CHAMBERLAIN'S PLANS

Mr. W. A. S. Hewins is secretary to Mr. Chamberlain's Tariff Commission, and he has been on a trip of investigation in this country, so that his views on the possible *modus operandi* of any preferential trade arrangement between Great Britain and the Colonies are of more than usual interest. As a result of his inquiries he disputes the view of those who hold that even if Mr. Chamberlain were to carry the people of the Mother Land with him, there would be found to be so many complications in the way of a detailed adjustment of any scheme that no organization in the hands of the tariff reformers could hope to tackle it satisfactorily. Mr. Hewins finds the main ground for his hope in the fact that Canada has already put in operation a preferential tariff on British goods. If only the British Government had seen its way clear to retain the shilling a quarter duty on wheat from abroad and to lift it on wheat coming from the colonies, the future course of events would have had plain sailing. Mr. Hewins absolutely disclaimed the idea that Mr. Chamberlain had any plan in view for inducing Canada, or other parts of Greater Britain, to abandon their manufacturing industries. The essence of his policy was to give a greater stimulus to the Empire as a whole by developing each component part to its fullest extent. No country in the world, he believes, could reach the state of self-sufficiency in manufactures. There must always be some imports, and it was in relation to these articles which must be imported that Mr. Chamberlain believed a mutual arrangement could be made which would be to the benefit of the Empire. His practical suggestion was that the friends of preference in Canada should not wait on events, but should seek to shorten the time that would be consumed in putting the policy into operation, after it had been adopted, by doing in regard to their manufactures what the Tariff Commission was doing in England, getting together all the data that were necessary for making a perfectly fair arrangement.

THE MANUFACTURERS AND THE INSURANCE COMPANIES

Referring again to the proposal made by the C.M.A. to the companies constituting the C.F.U.A., we find that our article of last week did less than justice to the attitude of the insurance bureau of the former body. Our construction of the letter which that bureau issued appears, in the light of further information, to have been inexact in one or two points, which we proceed to state.

We are charged with having taken, in the article in question, too exclusively the underwriters' view of the situation; and we certainly did set out with the intent to show where we deemed it unlikely that underwriters would take a friendly view of the arrangements of that bureau where it seemed to us to aim to assume functions that could not be given up to it by any self-respecting manager of an insurance company. It is denied that the C.M.A. wish the insurance companies to be governed by the opinions of the bureau's inspectors as to rates and conditions, and it is as distinctly denied that the C.M.A. desire to put aside the machinery of the insurance companies or subordinate it to their bureau. It, therefore, appears that we had misinterpreted the letter sent to the insurance companies asking for a conference in these respects.

The real meaning and intent of the manufacturers' circular originated, we are told, in a desire not to do the fire insurance agents' business, but to co-operate with fire insurance companies in Canada for the purpose of improving risks and lessening rates, an object which, in the opinion of the C.M.A., the insurance companies and their agents have not always had at heart. "What we desire," says the gentleman whom we have seen upon the subject, "is to help Canadian firms and companies to manufacture under the most favorable and economical conditions. We desire harmonious relations with the companies, but we desire to benefit our members; and already we have had the satisfaction of finding many risks of our members improved and their rates reduced through the efforts of our Insurance Bureau."

The real object of the foundation of the Insurance Bureau, as it is now explained to us, was the betterment of risks, a matter in which the insurance companies ought to be very glad to concur. Finally, the last sentence of our article is objected to as not adequately expressing the desire and intent of the Insurance Bureau. That organization wishes to touch a side of the fire insurance business of its members which is to-day being neglected, and in fact the Association of Manufacturers want the privilege of placing their business where they can get the best results.

We are pleased to be assured on behalf of the Manufacturers' Association that their great object in founding a department of insurance is to secure the most intelligent and economical treatment of industrial risks by insurance companies and the reduction of premium in exact ratio to the betterment of risks thereby secured. On this desire The Monetary Times can both agree with them and compliment them. And we believe that every prudent underwriter is likely to agree with sensible measures having this object in view.

* * *

—The value of our Pacific Coast fisheries has often been insisted upon, and never too strongly. And we have often stated that this great food supply ought to be conserved. Last week the British Columbia Fisheries Commission began its important work, which is to gain information upon all matters incident to this great industry and to frame regulations that would result in conserving the fish and aiding the individuals and industries dependent thereon for their livelihood. Referring to the general aspects of the fisheries in British Columbia, Prof. Price, one of the Commissioners, remarked in an interview that they were capable of far greater development. The salmon fisheries, he said, are by no means the only important ones in these waters; the halibut is a valuable fish, and needs more careful guarding on the coast if it is to be saved from depletion. The herring fisheries are also capable of great development; although, partly owing to the somewhat indifferent methods of curing, etc., the Canadian herring, it fetches a very low price in the markets, the revenue derived from this one source in other countries is very large, which shows that this branch of the fishing industry is worthy of great expansion in Canada.

* * *

—The Railway Commission has come to the conclusion that the complaints of the Dominion Millers' Association with respect to discrimination by the Grand Trunk Railway in the distribution and allotment of its freight cars for the carrying of grain brought by lake shipments are well justified, and that this discrimination acts unjustly towards the flour milling industry of Ontario and in favor of shipments for export to Montreal and Portland. The Commission orders under certain provisions that if at any time after notice of this order, and before the 31st day of January next, the Grand Trunk Railway Company fails to furnish at any of the following points on its system, namely, Midland, Collingwood, Meaford and Point Edward, all in the Province of Ontario, sufficient empty cars to fill all shipping orders then on file with the said company at any such point: such cars as are furnished shall be apportioned among such shipping orders which have then been so filed for more than one day at such port in the order of filing until one car has been alloted to each order, after which the remaining cars, if any, shall be apportioned pro rata among the remainder of such orders which have been so on file for more than one day, and which have not then been filled. This operation shall be repeated from day to day so long as the supply of cars is less than the requirement. Meantime the enquiry into a general shortage of equipment is being proceeded with.

* * *

MEDITERRANEAN NUTS AND FRUITS.

As is usual at this time of the year, with Christmas looming so near in the foreground, wholesale grocers as well as retail dealers throughout the country are taking a particular interest in reports coming to hand concerning dried fruits and nuts. So far as can be judged at this stage, the volume of trade in these popular goods is likely to be fully up to average, though the prices are, as a rule, quite high.

An outstanding feature of the trade at the present time is the arrival of walnut importations from France. Early shipments of both Grenobles and Marlots have reached New York, and are being forwarded to Canadian points. Bordeaux walnuts are now *en route*, and will arrive a week later. In the primary market, prices are higher than at time of shipment.

Shipments of almonds are pretty well to hand for this season's requirements.

The Comadre fig crop in Portugal is reported to be about exhausted. Natural figs are reported from Smyrna to be strong, with stocks generally running out.

According to reports received this week from Smyrna, prices there for Sultana raisins have been steadily advancing for some weeks past, and now stand higher than at any previous time this season. Shippers would appear to see no indications of possible decline.

Currants are in rather a peculiar condition. This is a very early stage of the campaign, but it is even now difficult to find really good fruit. The fact is that the entire provincial crop (the term "provincial" including Amalias and Filiatras), was of a quality considerably below the average this season. It is difficult as yet to foretell as to how this is likely to affect the market.

The market for French prunes and plums is very firm, and the former have been advancing weekly for some time past. As a matter of fact, there can be no doubt that in past seasons these and similar fruits have been priced altogether too low; they have been practically slaughtered, and recent advances only tend to place the product on a more normal plane.

* * *

PRICES, AND THE LAW OF SUPPLY AND DEMAND.

A few weeks ago the Southern Cotton Growers' Association declared that 11c. per pound would be the minimum price at which the planters would sell the remainder of their cotton. So far, however, as could be seen, the pronouncement was without the slightest effect. The New York Journal of Commerce, in referring to this planters' attempt to manipulate the price of their raw material, makes some remarks which appear to meet the case admirably, and point towards the weak spot which seems to be the Nemesis of all such artificial interference with the supply of law and demand.

"It is not certain," says our contemporary, "that there will be any benefit. It will cost something to store and insure cotton, and proper warehouses have not been provided. If three million bales are held out of the market it is quite possible that the market will get along without it before spinners can afford to pay a price to net Southern dealers fifteen cents. There may be some hardships to manufacturers, and some check upon their industry, which will have to be laid to the planters' combination instead of the speculators, but nobody can be forced to buy cotton at a price that will yield no profit. These three million bales, if the combination was tight and strong enough, might be carried over to next summer, and then it might be necessary to break the price to get rid of it. In the meantime the real price would be kept up to the highest notch the market would bear, and this would stimulate a planting in the spring, which the association would be unable to control. This might lead to another large crop, possibly too large for the world's requirements at a remunerative price, and there would be another break and a new spasm to control production. These efforts to baffle or control the law of supply and demand are short-sighted and clumsy, and in the long run they are sure to do harm and not good to all concerned. Better cultivate the general intelligence and judgment and leave it to calculate for itself than attempt to replace it with the concentrated wisdom of the few working in combination to profit at the expense of the many."

* * *

Spring millinery promises to be high-priced, judging from the manner in which its main requirements have advanced lately. Silks and ribbons in the European centres for those commodities have advanced 5 to 10 per cent. in the last month. At the London feather sales, too, a few days ago there was a pronounced upward tendency in values. Some look for lateness in the delivery of postponed orders of ribbons, owing to the great activity of the demand.

ECONOMY IN WOOD WASTE.

Editor Monetary Times:—

SIR,—I notice in your issue of 17th inst., on page 638, a paragraph referring to enquiries that have been made to you by certain persons on the subject of an article on "Economy in Wood Waste," which was printed in your issue of 27th October.

Having the information here at my disposal through the courtesy of the British Consul, who has recently made a careful enquiry into the subject I have been able to supply your correspondent, Mr. Diplock, of Vancouver, with the information he asks for; and for the benefit of your other correspondents, it may be well to give you the names of the firms in the business. They are "The Standard Turpentine Manufacturing Co., of Hinckley, Minnesota, and the Climax Refining Co., of Minneapolis, Minnesota."

Trusting the above may be of use to you.

Yours truly,
E. D. Arnaud, Commercial Agent.
Commercial Agency for Canada,
Chicago, 20th November.

* * *

GREEN VS. HARTFORD LIFE.

A CORRECTION.

We are told by Mr. Hinsdale, of Raleigh, N.C., that the article which he forwarded to us, headed "Important Insurance Decision," which appeared in our issue of last week, contained an error, which should be corrected. In place of the second sentence which reads:

"It issued legal reserve policies until 1899, when it ceased to do that kind of business, and thereafter issued only old line policies;" there should be inserted in place thereof the following:

"It issued legal reserve policies for a few years, when it changed to an assessment business, issuing assessment policies only until 1899. It then ceased to issue assessment contracts, and underwrote only legal reserve or old line policies."

* * *

BANKING AND FINANCIAL.

A branch of the Molsons Bank has been opened at Lucknow, in the county of Bruce.

The Traders Bank of Canada has opened a branch at Norwich, Ont.

The new manager of the Montreal branch of the Bank of Ottawa is Mr. Francis Cole, who is already at work in his new position. Mr. Cole was for seven years manager of the Toronto branch of the same institution where he had many friends. The vacancy in Montreal branch was caused by the acceptance of the former manager, Mr. R. B. Kessen, of the general managership of the Bank of New Brunswick at St. John, N.B. Mr. Kessen intends to leave Montreal for St. John, to-day.

The Montreal Street Railway Company, it is understood, is engaged on a plan to reorganize its finances, and at the next session of Quebec Legislature, will ask power to increase its capital, and to issue additional stocks and bonds, also to change the denomination of its shares from $50 to $100. Probably the total amount of stock issue will be increased to $12,000,000. The amount of capital authorized now is $10,000,000. At present, $7,000,000 has been issued, and the outstanding bonds amount to $2,473,000. The Montreal Park & Island Railway is indebted to the Montreal Street Railway in the amount of some $800,000, and this would be placed on a different footing in the contemplated reorganization.

Under authority of a by-law passed at a special general meeting of the shareholders of the Eastern Townships Bank, on the 10th of February, 1903, says the Sherbrooke "Gazette," the capital stock of the bank was increased by the sum of

$1,000,000, of which 5,000 shares amounting to $500,000 were then allotted. The directors have now decided to call up the remaining half-million, which will be offered to the shareholders, in the proportion of one share to five of the old stock at 60 per cent. premium. The first call of 10 per cent. capital with 10 per cent. of the premium, making a total of $16 per share, will be due and payable on the 2nd of January next, and subsequent instalments for equal amounts on the first of the nine following months.

There is scarcely a financial institution of note in these days that does not employ some kind of adding machine. That these machines are great savers of time and labor, as well as ensurers of accuracy, is the testimony of all who have used them. As showing the mechanical efficiency to which these devices have attained it may be interesting to note that at the recent office appliance show held in Madison Square Garden, New York, Edwin D. McCullough, a clerk in the American Trust and Savings Bank, Chicago, correctly listed 500 cheques in the remarkably short time of nine minutes and twelve seconds, using for the work a hand-operated Universal adding machine. Mr. McCullough completed his task eighteen seconds ahead of the second man in the competition. To list a cheque almost every second, and to do it accurately, is wonderful work indeed.

The statement of the Sovereign Bank of Canada for the half year ended with October contains some comparative figures which are interesting. The total assets, which were $3,855,000 three years ago are now $13,818,000, of which $11,144,000 are in loans and discounts. The circulation has doubled in three years, being now $1,550,790, while the paid-up capital is $1,610,478. There is a reserve fund of $523,000. The total deposits amount to the large sum of $10,134,000 from thirty thousand subscribers. A new issue of stock during the present year, $325,000, at a premium of 25 per cent. was readily subscribed, and the general manager tells us that 95 per cent. of it is paid up, although not due till next March. The shares of the bank are to be listed on the Montreal and Toronto stock exchanges this month or next. It has thirty-five branches and eighteen sub-offices, all in Ontario and Quebec. The statement gives a very remarkable record of success.

* * *

FOR GROCERS AND PROVISION DEALERS.

The Canadian Co-operative Concern, Limited, is the name of a concern in Hamilton which has been granted a charter by the Ontario Government for the purpose of buying, selling, manufacturing and dealing in general merchandise, produce, machinery and farm stock. The share capital is $250,000. J. P. Whelan, of Hamilton, and S. A. Laidman, of Walpole, are among the provisional directors.

The H. T. Murray Company, Limited, are about to start business in Brockville as general grocers and provision merchants, and dealers in flour and feed, woodenware, crockery, etc.

The London Stock Yard and Abattoir Company, Limited, has been organized with a capital of $300,000 to build and operate a live stock market and exhibition and sales stables in London, Ont. They express the intention of engaging in all branches of the meat trade, and in the manufacture and sale of animal by-products; also in the cold storage business. J. D. Wilson and F. P. Drake, of London, are among those interested.

Rossland despatches say that for the week the shipments of ore have been: Le Roi, 1,890 tons; Centre Star, 1,620; War Eagle, 1,350; Le Roi No. 2, 2,240; Jumbo, 300. Total for week, 5,400 tons; for year, 287,953 tons. During the whole season up to date the shipments from the district have reached a total of 287,963 tons. Should the same ratio of production keep up till the end of next month, the aggregate year's output will approximate 327,000 tons.

The Hall Elevator Company are erecting a grain elevator in Vancouver, which is expected to be in readiness for operations next January. The grain to be handled will be the Alberta crop. Mr. Hall estimates that the milling wheat produced in Alberta this year will amount to close upon 1,000,000 bushels. Estimates have placed the total crop at 1,500,000 bushels, but all this will not be milling grade. The experience of grain-growers in Alberta this year has been such as to demonstrate apparently beyond a doubt that that great Province has a great future before it as a grain-growing centre.

The market for apples in Great Britain is strong, and Canadian are selling well. At last reports from London they were fetching: Greenings, 21 to 22s. 6d.; Baldwins, 20 to 22s.; Spies, 20 to 23s.; Russets, 19 to 23s.; Kings, 23 to 26s.; seconds, 4s. less. Total shipments to Great Britain during the week ending November 11th were 132,696 barrels, against 139,791 for the same week last year, and 224,416 in 1903. Total shipments for the season to date are 1,114,843 barrels, against 1,084,035 for the corresponding period last year, and 1,889,025 barrels in 1903, figures which, in view of the much shorter crop of apples in Canada this year as compared with the last two seasons, would appear to indicate that a much larger proportion of the production this year is being exported, and that apples are likely to be scarce for home consumption later on.

* * *

INSURANCE MATTERS.

A change in the Toronto agency of the Phœnix of London resulted in the appointment of Messrs. Ridout & Strickland to represent that company in the city. These gentlemen are also Central Ontario agents for the Law Union and Crown, and represent the London and Lancashire Life in the city.

Mr. Hoffman, of the Prudential Life of New Jersey, declares that the large majority of bills affecting insurance measures introduced into the various State Legislatures in the last five years, provided for increasing taxation of policy-holders. In 1904 he said "the life companies alone paid over $10,000,000 in taxes and license fees and for the cost of State supervision!"

The sudden death on the 30th October (from heart failure) of Mr. S. Sandbach Parker, J.P., one of the best known men in the commercial life of Liverpool, is announced. He was a director, and for some years, chairman, of the Liverpool and London and Globe Insurance Company, as also of the Thames and Mersey Marine Insurance Company. Mr. Parker was for forty-five years a member of a prominent Demerara and West Indian firm, of which his father was one of the founders.

Here is a weighty warning to insurance agents, taken from the Fireman's Fund Record: "The Lord loves a good collector, and the agent who advances premiums for slow payers takes the chances of losing the love of the Lord, of losing the premiums advanced, and of losing the respect of the client for whom he makes advances. The client who does not pay up is liable to be a bad risk both for the agent and for the company. The company does not want that class of customers and the agent can get along without them."

Mr. H. F. Atwood, secretary of the Rochester German Insurance Company, of Rochester, N.Y., was a visitor to the office of The Monetary Times during the past week. The Rochester German is the latest United States fire underwriting association to enter Canada for business. The company has made a deposit of $100,000, and has received a license to transact fire insurance business throughout the Dominion. Established in 1872, their assets now exceed $1,600,000 with a net surplus over and above capital and all liabilities of $421,416. Messrs. Muntz & Beatty, of the Temple Building, this city, have been appointed agents for Toronto. Mr. Walter Kavanagh is agent in Montreal.

English exchanges tell us that the Federation of Insurance Institutes of Great Britain and Ireland recently offered the presidency of that body to Mr. Samuel J. Pipkin, general manager of the Atlas Assurance Company, Limited, of London, who has accepted the same.

—The Toronto Crown Attorney is displaying a gratifying amount of energy in probing the system of combines which seems to have eaten its way into the heart of the commercial world, and as a result the offices of Messrs. Jenkins & Hardy were visited in a very drastic manner, by Mr. Curry accompanied by a detective and armed with a search warrant empowering him to seize all letters, books, and documents relating to the existence of combines of which Mr. James Hardy is supposed to be the secretary. Mr. Hardy made a specialty of looking after the affairs of manufacturers' associations, and is said to be secretary to the Wholesale Hardware Dealers, the Wire Nail Association, the Stove Manufacturers' Association, the Graniteware Manufacturers' Association, the Tar Paper Manufacturers' Association, the Paper Manufacturers' Association, and other stationery industries, and the Woodenware Manufacturers' Association. It is held that if the object of these associations be to swell prices beyond the true value of the commodities dealt in, they are guilty of illegal combination, and Mr. Curry states his intention to carry the investigation to a conclusion, even if it takes six months.

* * *

—A comparison of bank clearings for the week ended 16th November, at eighteen clearing cities in the United States and Canada, with the clearings for the corresponding period in 1904, shows an increase at every point, thus illustrating the industrial and commercial activity of this continent But the interesting feature is to Canadians that where the increase equals 4 per cent. in the cases of Boston and New York, 7 per cent., at Pittsburgh and Chicago, less than 1 per cent. at St. Louis, and 16 per cent. at Philadelphia and San Francisco, the increases at Canadian cities run up to vastly higher percentages. For instance, Vancouver and Winnipeg shows advances of 56 and 53 per cent. respectively; Halifax, 47 per cent; Montreal, Ottawa, Quebec, and St. John, 33 to 35 per cent.; Hamilton and London, 20 and 27 per cent.; Victoria, 10 per cent., and Toronto between 5 and 6 per cent.

—An important delegation of boot and shoe and leather manufacturers in the United States declared this week to President Roosevelt that they would willingly consent to a reasonable reduction of the duty on boots and shoes if only they could obtain free hides and cheaper leather.

—We are pleased to find it stated by the Ottawa correspondent of the Montreal "Gazette," that there is a likelihood of the Provincial Government of Quebec amending the commercial travellers' tax legislation at the next meeting of the Legislature. Protests have been received from all over Britain and the United States against the tax, and the Dominion Government has forwarded these to the Quebec Government with a recommendation, no doubt, that something should be done to remove the objectionable features of the bill.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, November 23rd, 1905, as compared with those of the previous week:—

	Nov. 23.	Nov. 16.
Montreal	$28,508,950	$31,029,000
Toronto	22,367,372	23,905,764
Winnipeg	11,181,806	10,849,503
Halifax	2,145,946	2,010,877
Hamilton	1,628,320	1,549,194
St. John	954,745	1,281,466
Vancouver	2,181,082	2,227,705
Victoria	590,078	809,369
Quebec	2,090,753	2,084,587
Ottawa	2,704,415	2,801,047
London	1,063,253	1,132,565
Total	$75,416,720	$79,681.077

A POLITE CHINESE EDITOR.

Chinese editors are polite. A Peking author who had submitted a manuscript to an editor received it back, not with an ordinary "rejected with thanks" note, but with this characteristically polite letter:

"Illustrious Brother of the Sun and of the Moon.—We have perused your manuscript with celestial delight. By the bones of our ancestors, we swear that we have never met a masterpiece like it. If we publish it, H. M. the Emperor will command us to take it as a criterion, and to print nothing that does not equal it. Since that could never be possible in 10,000 years, we return your manuscript, trembling and asking your mercy 17,000 times."

* * *

VISITORS' IMPRESSIONS.

The Paris "Matin" summarizes the impressions of the Paris municipal councillors on their visit to London·

They were struck most by:

The lift in the "Tuppenny Tube."

The magnificent electric factory on the bank of the Thames.

The calm of the London policeman, which is far superior to that of his Paris colleague.

The excellent organization of the fire brigade.

The way in which the traffic is managed so as to avoid accident.

IT WILL STAND ANY TEST

OUR HALIFAX LETTER.

An epoch-marking event in the history of the city of Halifax took place last week, when the Imperial troops departed from this station, after having garrisoned it for over 150 years. Canadians are now in possession. There was a certain amount of sentimental regret at seeing the British soldiers depart, but their place has been taken by Canada's soldiers, and everything will probably go on as before. The loss is merely a sentimental one, as the departed garrison never were an integral part of our life, and were on the whole, not a great acquisition to society.

Rumors of the demise of King's College are again current. President Hannah has said that he finds the attempt to resuscitate the institution hard to accomplish, and has thoughts of abandoning the work. At present there are only sixteen students in the college.

Prof. Prince, the Dominion Commissioner of Fisheries, in an article published in the "Maritime Merchant," calls attention to the great damage done to our fisheries in the Maritime Provinces, by the careless way in which lumbering operations are conducted. Sawdust and other debris in the rivers kill the fry of the shad, the gaspereaux, and other fish upon which cod and mackerel feed, and which attract those valuable food fish to our shores. Dams with improperly constructed fishways (or without them altogether), also contribute to deplete the fisheries which are of such enormous value to this Province.

There has been considerable activity in real estate here this autumn. Large tracts of land on Jubilee Road and other portions of the north-western suburbs have been cut up into lots and sold at auction at fair prices, and real estate on the North-West Arm, eligible for summer residences has been changing hands. It is said that the large acreage held and owned by Sir Sanford Fleming will be disposed of before long for building purposes. The Canadian Bank of Commerce has secured for sixty thousand dollars an extremely good site on the corner of George and Granville Streets, and will erect a fine bank building thereon.

It is reported that an Ontario firm contemplates opening a large retail grocery on Barrington Street; and that a departmental store concern from the Upper Provinces is looking for a site here. There is a very large mail order business already done from this city with the Toronto departmental stores.

Work at the Londonderry Iron Mines continues active, and six hundred and fifty men are now at work. About one hundred tons of superior iron is being turned out daily. The ore is being secured at the mines on the spot, and from Torbrook in Annapolis County.

The cattle on the Dominion Experimental Farm at Nappan, N.S., which were found to be infected with tuberculosis are to be given the fresh air treatment, and dieted scientifically. This may seem peculiar, but it is true, and is believed to be the first time this sort of treatment has been applied to tuberculosis in cattle.

The annual report of the Acadia Sugar Refining Company has been issued, and the shareholders are apparently very well satisfied with the showing made, considering the peculiar position of the sugar market since the first of the year. The company had a heavy stock of sugar on hand at the time the last annual report was issued, but they have pretty well reduced this. Including $5,895.93 brought forward from last year, the net profit, after providing for depreciation, was $99,452.93. On June 1st an interim dividend of 3 per cent. on the preference shares was paid, and the same is recommended to be paid for the last half year; also a dividend of one per cent. on the ordinary shares.

The Nova Scotia Telephone Company has advised shareholders that it will accept payment in full for the new stock recently issued.

Provincial electric tractions show satisfactory earnings. The earnings of the Egerton Tramway and Cape Breton Electric show a fair improvement over last year. Halifax Tram shows a very small increase. The Gas Department of the Halifax Electric Tramway shows a decrease of earnings of over one thousand dollars. The price charged (two dollars per thousand net), is, considering the proximity of coal supply, almost prohibitive. A very large quantity of oil is used in Halifax, owing to the high prices charged for gas and electricity.

Halifax, Nova Scotia, 20th November, 1905.

* * *

OUR RICH WEST.

A tribute to the richness and the attractive character of Western Canada is paid by Mr. A. E. Kirkpatrick, Canadian manager of the United States Fidelity & Guaranty Company, who has lately returned from a trip throughout Western Canada. He expresses himself as being especially struck with the remarkable growth and development of the West. So much has been said of the vast grain fields of the prairie section of Canada that the average Eastern man is well acquainted with that portion of the country; but, he says, we hear very little of British Columbia, where possibly changes of far greater import than the majority of people imagine, are rapidly taking place. "The country has gone through the various evolutions of a purely lumber country, then was added to this resource that of mining, and that province is now coming rapidly to the front in the most satisfactory of all industries, that of agriculture. In the Okanagan Valley fruit is grown that equals anything that is produced in any other part of Canada, its peaches and grapes comparing favorably with those of California. Cleared land is selling all the way from $200 to $400 an acre; and this can be better understood when one realizes that an acre of land in the prairie section will produce about $25 per annum gross at its best, but an acre of land in the mountain district will produce in apples or peaches an annual gross return of in the neighborhood of $500. The comparison will readily show what a valuable asset British Columbia has in its agricultural land, and few persons realize the thousands and thousands of acres of valuable property lying in the mountain valleys only awaiting the settler's hand." The company which Mr. Kirkpatrick represents has agencies now established throughout all Canada, and he says, "we are watching with keen interest the development of the business in the West. The principles of guarantee insurance are taken up more rapidly by the Westerners in a new country, than in the East, but a considerable amount of missionary work has to be done to defeat the principles of personal suretyship, which have such a strong hold throughout the whole country."

* * *

HALL MINING & SMELTING CO., LIMITED.

The sixth ordinary general meeting of this company was held on 30th October, in London, Lord Ernest Hamilton in the chair. A very hopeful address was delivered by the chairman who stated that "the general tendency of each separate branch of our business is in an upward direction." Looking back a short while, he said their affairs appeared to be in a bad way, "we imagined that we had lost our mine and the smelting business was being run at a loss." But an improvement came; a profit of $8,000 was shown in 1903-04. We quote from his speech:

"The smelting business during the past year has been quite satisfactory. We have made a profit of over £5,000, as against a profit of £500 last year, and as against a loss in the year before (1903) of £4,300, so that you will see we have made £10,000 more net profit on our smelting business than we did two years ago, and there is no doubt that that is an extremely satisfactory position of affairs. (Hear, hear). This profit we may take as being due chiefly to three things. You will see, in reading the smelting manager's report, that he points out that the smelting profit this year has been made almost entirely owing to excellent metallurgical extractions, which, of course, is extremely to the credit of our smelting manager, and an indication that he has used not only great technical skill in his smelting business, but also extreme care and watchfulness. Our profit is

also due, no doubt, to the fact of the increased activity of the silver lead mines in British Columbia—an activity stimulated by the Government bounty on silver lead ores. This activity has enabled us this year to deal with 125 mines, as against 102 only last year. Thirdly, our profit is no doubt due to the improvement in our plant. It has been the policy of this Board ever since its inception to devote every year a considerable sum not only to the maintenance of the existing plant, but to additions to plant and improvements to the existing plant. For instance this year we have spent £3,200 on improvements and new plant, and £5,600 on maintenance of old plant. Last year we spent £7,500 on new plant and £4,500 on maintenance. Therefore, you will see that during the past two years we have actually spent £20,000 on maintenance and improvements to our plant; and I may say that since the new company was started we have spent over £26,000 ($130,000), on the maintenance of our plant."

A new process for smelting ores has been submitted by the managers of the mines and works at Nelson, B.C. It is in successful use in several other smelters in both the United States and Canada, and appears to commend itself to the board. But the directors are yet in negotiation with regard to its adoption, and therefore nothing definite can be said about its use. As to the balance-sheet, Lord Ernest remarked; "The exact extent of our assets over our liabilities is £14,250, and in addition to that we may claim as a distinct asset £6,173 which we have spent on the Emma mine, so that practically we may claim that the excess of assets over liabilities is over £20,000." Speaking of the success met with in working the Emma mine, the chairman went on: "The main credit for the success of the Emma mine does not rest, in the first instance, with the board, but with Mr. Campbell, our general manager in British Columbia —(applause)—and this not only in respect of the success of the working of the Emma mine, but also with regard to the judgment and the foresight which suggested the acquisition of our interest in that mine. (Hear, hear). This year we have made a profit of £2,800; last year we made none. * * * As far as we can see it is an improving property, and our profit ought to increase year by year. Now I come to the Silver King, our own mine. * * * At no time since the melancholy moment when our late manager, Captain Gifford, announced that all the ore was out of the mine have the prospects of the Silver King looked so remarkably encouraging as they do at the present time. (Applause). I cannot really see exactly what has happened in the neighborhood of No. 1 tunnel. A body of ore has been encountered of excellent value, and apparently a body of ore which may develop into a body of considerable magnitude and importance." In conclusion, said the chairman, "This year I can express as my firm opinion that the affairs of the company look very much healthier than they did last year.

⁂

CAUSES OF SUICIDE.

Why do more men commit suicide than women? And why should there be more suicides among married than single men? Statisticians who have been investigating the suicide problem in the United States tell us that the above conditions exist in that country. Business troubles appear to be the predisposing cause. Professor Bailey, of Yale University, investigated 29,344 cases of suicide occurring between 1897 and 1901. He found the proportion of males seven to two as against female suicides. And Mr. F. L. Hoffmann, who looked into the suicide returns of fifty cities in the year 1904, found the rate to be slightly over nineteen persons in the 100,000 of population during that year. But the rate has been advancing in recent years. A singular fact is that the tendency to suicide is greater between twenty and fifty years than at any other age. What is of moment to observe is the fact shown that according to these returns neither alcohol, bad health, nor what is popularly known as blighted affections form such an incentive to suicide as business worries. For probably the American business man is the hardest worked and the most worried person in his generation. It would appear, indeed, that money in some form or other is answerable for the greater number of United States suicides. And it has been stated by the London "Spectator" that money causes most suicides in England, the case in this country at the present day, where a glance at the daily newspapers readily shows that pecuniary troubles of some kind or other are the finally precipitating causes of the great majority of contemporary suicides.

⁂

TRADE ENQUIRIES FROM FRANCE.

A dozen or more enquiries from various parts of France and her African possessions have lately been received by the French Chamber of Commerce, in Montreal. A firm in Champagne wants a representative in Canada, and so do two cognac houses. One of the most important biscuit factories in France is ready to appoint an agent in Toronto. A French house of olive oil wishes an agent to introduce its products in Canada, and a Tunisian house in the same business wishes agent in Montreal. A shoe manufacturer in Toulouse, "English shoe a specialty," wants a good agent in Canada, and a large factory of sewing thread in Lille asks for representatives in Montreal and Toronto. A factory of oil and castile soap in Marseilles wishes an active agent in the Dominion. So does a producer of cheese in Roquefort. A factory of toilet and laundry soap desires an agent in Canada. A Marseilles firm would like to find a market in Canada for marbles and granites. An Oran firm engaged in exportation of vegetable hair, wants representative in Canada. A raw wool exporter in Mazamet (France), desires to place his products in Canadian market. Makers of crystal and of artificial flowers in Paris, and a maker of looking-glasses "specially for dressmakers" want to do business in Canada.

⁂

ALLIANCE ASSURANCE CO.

A meeting of shareholders in the Alliance Assurance Company, Limited, was held on November 8th, in London. Lord Rothschild, the president, said that for years the company had in view a definite policy, namely, to extend their business over a wide area, taking the risks which their staff could best look after, and also to build up a large reserve fund. The amalgamation with the Imperial Life and Fire Office had proved successful and remunerative, and increased their reserve. There is now a proposal that the Alliance shall enter upon a further amalgamation, namely, take over four offices, two of them being the Alliance

The Standard Bank of Canada.

Marine, and General Assurance, and the Westminster Fire Office, and for this purpose the number of directors and the number of Alliance shares would be increased. It is proposed to take over the Alliance Marine and offer its shareholders 50,000 new shares, of £13 each = £650,000. A sum of £50,000, or £1 per share would be added to the paid-up capital of the company, and the balance of the funds—£550,000—would be added, to the company's reserve. It is likely that the Alliance Marine directors will join the board of the Alliance Limited. Various meetings of members of the Westminster and the other companies will be held about November 29th to 31st, and if they agree, the basis of amalgamation as above outlined will be carried out. It is understood that the County Fire Office and the Provident Life are the other two companies to be taken over. But it is by no means certain that the County Fire Office will agree.

* * *

—It is shown by the official return for the mining industry in Great Britain and Ireland that during the past year 877,057 persons were employed therein, the number working regularly underground being 698,967, or almost eighty per cent. There were 9,455 persons under fourteen years of age employed in mining, 6,818 of them underground; but the number is decreasing since the Employment of Children Act came into force, and last year only thirteen girls were found laboring in mines. It looks as if the increasing use of electricity in mines has increased the number of fatalities. The present return shows that in 1904-5 there was an increase of seven in the number of accidents and ten in the lives lost in mines and quarries in the last twelve months. The total of accidents was 1,158, which involved the loss of 1,202 lives.

* * *

—A despatch from Halifax dated 15th inst. stated that a serious condition of affairs existed in the islands of St. Pierre and Miquelon, south of Newfoundland. These French islands have a population of six thousand. The failure of the fisheries, and the consequent dullness of trade, has caused great destitution, and the inhabitants see starvation staring them in the face unless the French Government lends a hand towards improving business and other conditions. The residents have commenced to emigrate to Canada, and return to France. Over six hundred are said to have arrived at Sydney already this fall, and all tell the same story. A Halifax writer says that these islands might be joined to Canada, but to this it is replied that for France to give them up would mean to abandon the bank fisheries of the North Atlantic, something which France is little likely to do. She has always regarded this calling as a most important one, and gives a cash bounty on every quintal of fish exported to a foreign country, as Canadian fishermen know to their cost.

* * *

—Mr. R. Dawson Harling advises us that according to the Manchester "Evening News" of 23rd October, the United States Government has divided England into two consulate general districts, with London and Manchester as the headquarters of the southern and northern divisions respectively. Manchester has doubtless been chosen as the headquarters of the northern area because of its geographical position as the centre of a great distributing field for American products. Official reports and notifications from or to the United States Government relating to the North of England will now come and go through the consulate general office in Manchester instead of through the London Consulate General.

* * *

—The present year is the greatest in the history of the lake marine trading to Lake Superior. This is shown by the figures of traffic through the Canadian and American canals at Sault Ste. Marie river. During last month the west and east-bound freight passing through the Canadian Soo canal was 592,243 tons. The number of vessels passing through was 712. The freight record shows that nearly 6,000,000 bushels of wheat passed through on the way east, while there were 1,183,658 bushels of other kinds of grain. The other east-bound shipments composed copper, building stone, flour, iron, lumber and silver, making in all 483,973 tons. Westbound the shipments were coal, grain, iron and salt, the total being 108,270 tons. The passenger traffic in the Canadian Soo was larger than in the American Soo. Already the tonnage passing through the St. Mary's canals has passed the record of the greatest year in the history of the lakes, and there are still two months before the season closes. The total net freight tonnage to the first of November was 37,993,630, as compared with 1902, the next best year, when the total for the season reached 35,961,146 net tons. If business continues during November and December in the same volume as last year the total for the present year will be over 48,876,000 net tons.

Crain Loose-Leaf Systems

Our systems have stood the test of years, and are the standard of excellence throughout Canada to-day.

We were the first to manufacture the End Screw Binder in Canada—the only binder that locks absolutely secure.

It is a fact that our systems are found in mostly all the large Financial Institutions and Banks.

Write us or call at our agencies for further information.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as may seem safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

MANAGEMENT.

The Directors of the Corporation have been prominent in the business life of the Province for many years and are thoroughly conversant with local conditions, thus insuring careful and experienced supervision over the investments and business to be transacted by the Corporation.

ADVANTAGES.

This Corporation affords an opportunity for the small investor, by becoming a shareholder, to earn substantial interest on his money, while his security is unquestionably gilt-edged and will enhance in value as the business of the Corporation grows with our rapidly developing country.

Large sums of money are lying in our Savings Banks drawing only 3%. Savings Bank depositors by becoming shareholders in this Corporation are afforded the same opportunity as the large Capitalists for getting their money out at a good rate of interest.

SHARES.

These shares which are of the par value of $100.00 are offered for subscription at ($110.00) one hundred and ten dollars, payable on application, $10.00 for the premium and 10% on the par value of the shares, and thereafter to be subject to a call of not more than 5% per annum until fully paid. The shares may be paid in full at any time after allotment. Five per cent. interest will be allowed on payments in advance of calls, until such time as the subscriber shall elect to receive in lieu of interest such dividends as may be declared by the Corporation. It is not expected that the Corporation will need to call more than the first 20%, as many applicants will voluntarily pay up their shares so as to receive the guaranteed 5%. This will give the business man an opportunity to participate in the speculative value of shares in a first-class financial Corporation without investing a large amount of capital.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185,149	30 per cent.	1,500
N. Y. Life Insurance & Trust Co.	1,000,000	3,514,863	40 per cent.	1,350
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

6. The organization expenses are limited as will be seen by referring to the contract with the B. C. Finance Company, Limited.

LIMITATION OF EXPENSES.

The Corporation has entered into a contract with the B. C. Finance Company, Limited, whereby that Company has agreed to subscribe for 100 shares in the Capital stock of the Corporation at the price of $105.00 per share, and to advertise the prospectus and act as the broker of the Corporation in selling its shares. The Corporation in consideration of the foregoing has agreed to pay, in cash or fully paid up shares, at the option of the Company, to the said Company, a commission at the rate of 5 per cent. on the par value of all shares in the Corporation, sold by the company at the price of $110 per share. No commission will be paid in respect of the shares subscribed for by the Company, so that the Corporation will net the same amount for the shares subscribed for by the Company as for the shares sold at $110. The Directors and Promoters of the Corporation, other than P. Donnelly, are all Shareholders in the Company, and as such will be entitled to participate in such commission and other assets of the Company *pro rata*. The above commission of five per cent., the Government fees and legal charges of incorporation will be the only expenses of organization. The premium at which the shares are sold will more than cover these amounts, so that the Corporation will be in a position to commence business with its capital unimpaired and a substantial reserve fund.

SUBSCRIPTIONS—Subscriptions for these shares will be received at any B. C. branch of the Bank of Montreal, or at the Bank of Montreal in Quebec, Montreal, Ottawa, Toronto, London or Winnipeg.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st October, 1905.

A Minneapolis syndicate, headed by Mr. J. Astley, of Rossland, B. C., is putting in, it is said, $35,000 worth of machinery on their coal and oil property in the Flathead Valley.

Mercantile Summary

A sale of Hudson's Bay Company reserve lots took place in Edmonton last week and netted $300,000. Great interest was taken in the proceedings.

The Vermilion Forks Mining and Development Company will shortly begin the development of their coal properties at Princeton, in order to be in a position to market the product as soon as the new railroad reaches that point.

There seems to be a possibility that the Ontario Asphalt Block Company will remove to Stratford, Ont., that city having made tempting inducements, and owing to the high freight charges to and from Walkerville where the company at present is located.

"Commercial Centre," the name by which M. A. Pigott's three story office building in Hamilton was to have been known, on Wednesday evening last suddenly collapsed, the cause no doubt, being the excavation for a new building next door. Fortunately no one was hurt.

The Dominion Copper Company has begun to make shipments of ore from the Brooklyn mine, near Phoenix, B.C., to its smelter at Boundary Falls.

The Big Dipper Mining and Milling Company, Limited, Peterborough, Ontario, capital $2,500,000, has received an Ontario charter empowering it to carry on a mining, milling, reducing and developing business.

The Silver Gulch Mining and Prospecting Company, Limited, has been incorporated with a share capital of $75,000 for the purpose of acquiring certain mining locations in the township of Ingram, Northern Ontario, and engaging in mining, milling and development operations.

The Nickel Plate mine mill at Hedley, B. C., is to be increased in size from forty to one hundred stamps, as there are large reserves of ore believed to be sufficient to keep the latter number running. It is said to be the intention of the owners to erect a smelter, and in order to keep it running, they are now purchasing and developing additional copper properties.

A Minneapolis syndicate has just purchased the land grant of the Nelson & Fort Sheppard Railway Company, a Canadian branch of the Great Northern Railway, comprising 433,000 acres. A large proportion of the land is claimed to be excellent for settlement for agricultural and horticultural purposes, and steps are being taken to classify, cut up the various tracts, and dispose of them to settlers.

A notable feature of the returns for Trail district of British Columbia is the number of mines which have for the first time entered the list of shippers, at least of lead bearing ores. They are: The Arizona, B. C., and Tilbury, Crescent, Greenwood; Goldfinch, Native Silver Belle, Nettie M., Sharp, Goat Mountain; Strathmore and Sirdar. The output of ore for all the mines last month was 2,313,682 pounds, and of lead 944,852 pounds.

The variety of brands of Scotch whiskey has become a joke, but the quantity of that seductive fluid produced of late years is no joke, for the total on hand at the last compilation of statistics was 121,788,039 gallons, or say three million barrels. There was an increased stock shown during the latest year, and the increase was altogether in the lower grades. This means that more is being consumed of the higher grades.

The following patents have been granted by the United States Government to Canadian inventors: 803,562, flue-cleaner, G. W. Dean; 803,620, prospector's pick and axe, J. McMahon; 803,641, wrench pipe jaw, E. Thompson and T. A. Brown; 803,725, automatic valve-actuator, C. A. Sullivan and E. J. Woodison; 803,804, cutter-blade, P. F. Bolton; 804,029, wire-working machine, International Automatic Machine Co.; 804,187, voting-machine, A. A. Farwell; 803,955, mail-marking machine, J. B. Young.

Mercantile Summary.

Robert Whitehead, an expert in oil who has done considerable work in Siberia, is prospecting in Alberta in the interests of an English syndicate, who own some 2,000 acres of oil and coal land near Pincher Creek.

Lester W. David, J. W. Hunter, and other capitalists of Blaine, near Vancouver, plan to increase the size of the Erie shingle mill on the water-front and build in addition a lumber mill having a capacity of 60,000 feet per day.

Finkleman & Schapper's general store at Hartney, Man., was last week destroyed by fire, together with an adjoining restaurant and butcher shop. The insurance is placed at about $6,000 altogether, which does not cover the total loss.

The Montreal Harbor Commissioners have decided that the new Government elevator at Montreal shall not be a bonded warehouse, it being considered that it is hardly proper for a Canadian Government to undertake a bond of this nature for United States products.

From Phoenix, British Columbia, comes word of the discovery of several rich finds of ore on the high-grade mines near Greenwood. Ore rich in wire silver is said to have been located on the Prince Henry at a depth of 115 feet, for which average assays give a value of $160 per ton. On the Elkhorn similar results are reported.

The British Columbia Electric Railway Company has just placed orders in the East of Canada for something like $125,000 worth of electrical machinery and equipment, including a 3,000 horse-power alternating current generator, giving a maximum capacity to the power house of 12,000 horse-power. This will be built by the Westinghouse Company. Material is also being ordered for another line of 48-inch steel pipes from the dam to the power house.

A Vancouver newspaper states that the steamers "Whittier" and "Argyll," oil-tank vessels, which for the past two years have been on the run between Port Hartford, Seattle and Vancouver, are to be replaced on the route by the immense tank steamers recently purchased in the East by the Union Oil Company. The vessels acquired by the Oil Company are the "Lansing," "Washtenaw and "Roma," and are being purchased from the Michigan Steamship Company.

Grain is still moving from the West of Canada in enormous quantities. Up to the 18th inst. the Canadian Pacific and Canadian Northern Railways have hauled to their terminals at Fort William and Port Arthur almost 20,000,000 bushels. This fall the C. P. R. handled at Fort William 12,485 cars, or a total of nearly fourteen million bushels. For the same period last year the amount was 5,843 cars, showing over 6,000,000 bushels increase this year. The C. N. R. at Port Arthur have handled five thousand cars of wheat, or over six million bushels this fall.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

A fire which did $10,000 damage took place a few days ago on the tug boat "Charlemagne" at Hochelaga, and for a while the Dominion cotton mill was in peril from the flames.

Stratford Board of Trade last week passed a resolution in favor of the city owning and operating the electric light and power plant, and recommended that the lighting plant be renewed for only one year.

Cornwall, Ont., ratepayers have endorsed a by-law to loan $20,000, without interest, to Thos. McGill, who is forming a company to manufacture chairs in that town.

The Westinghouse Machine Company are issuing a beautifully illustrated little brochure describing the Westinghouse Standard steam engine, which now has behind it a quarter century of uninterrupted success.

From Ottawa we learn of the failure of O'Connor & Wilson, who have been in a moderate hardware way for the past three or four years.——D. Belleau, of the same city, engaged in a small plumbing business since the spring of 1904, and who has been found anything but satisfactory in settlements, has also assigned.

The report of a demand of assignment upon the extensive machine manufacturing concern of Carrier, Lainé & Co., Levis, Que., was received with some surprise, and the shutting down of their shops must prove quite a serious matter to the town. The firm's liabilities, outside of the claim of their bankers, amounting to some $160,000, are said to be small.

In the spring of the present year J. B. Nadeau, formerly a clerk in various dry goods establishments, began in a clothing business on his own account in Quebec city. He has already assigned, with liabilities figured at about $5,000.——Elzear Lafrance, a baker of the same city, is reported insolvent, with an indebtedness of $5,125, and P. Jordan, saloonkeeper, also of Quebec, is reported as offering creditors 30 cents on the dollar, on liabilities of about $6,000.

The Hall Mining and Smelter Company of Nelson, British Columbia, made a profit during the year of $25,000. The smelter treated over 30,000 tons of ore and produced 1,206,920 ounces of silver, 9,021 ounces of gold, 40 tons of copper and 7,436 tons of lead, the aggregate value of them being $1,100,000. During the coming year some improved lead-smelting processes are expected to be installed. An abridgment of the meeting on 30th October in London will be found on another page.

WORK AND PRICES RIGHT
GALVANIZING
ONT WIND ENGINE & PUMP CO. TORONTO, ONT. LIMITED

An assignment has been made on demand by Woodhouse, Rozand & Co., jobbing milliners, of Montreal. The firm has been in existence about three years, and has done a limited business of from $20,000 to $25,000 a year. It is not anticipated the liabilities will much exceed $5,000.

Mercantile Summary.

Capt. McCoskrie, we are told by a British Columbia paper, is about to build a small steamer for the mail-service between Hartley Bay and the head of Kitamaat Arm.

John Vaux, who began a small grocery business in the Point St. Charles suburbs of Montreal, last spring, is reported an absentee, and insolvency proceedings have been instituted.——Rochon & Paiement, in a small tailoring way in the Montreal West End, have made a voluntary assignment and owe about $1,800.——Alphonse Olivier, formerly a street car conductor, and in a retail grocery experiment since last May, is reported in trouble and a meeting of his creditors has been called.

V. E. Paradis, of Quebec, has been appointed curator of the estate of R. Julien, Beauceville, Que, who shows liabilities of $5,200, with nominal assets to about the same figure. Julien has long done business as a baker, and last fall, having widened his horizon, determined to go into general storekeeping. He did so, with the disastrous results usually to be noted in such cases.——L. Tremblay, in a limited general merchandise way of business at Edouard de Peribonka in the Chicoutimi district of Northeastern Quebec, is reported as compromising liabilities of about $1,000 at 40 cents on the dollar.——Coté & Co., general dealers at Sté. Flavie Station, Que., have assigned. The record of the concern has been a markedly unsuccessful one. The present proprietor is reported to have been "unfortunate", (another word for compromising, we presume) a year or so ago, and his father, who formerly carried on the business, did not achieve any better results. The present liabilities are stated at $3,000.——A baker at Baié St. Paul, Que. Edouard Bouchard by name, has made an assignment, with small liabilities, to Quebec houses.——Another baker at Bromptonville, Que., Noel Pellerin, doing in addition a small grocery business, has assigned to J. P. Royer, accountant, Sherbrooke, and shows liabilities of $2,200, with assets of about $1,500. He formerly conducted a butter and cheese factory, and has only been in his present business about a year.

NOVELTIES.

The craze for the latest thing still continues. The newest book, the last style, have first claim upon our attention.

Obscurity has no more distinguished guest than yesterday's newspaper.

A woman goes into a bookstore to get "something to read." High up on the shelves, discreetly guarded from the dust, are Scott, Eliot Balzac, Shakespeare and other back numbers. She sniffs at them and rapidly approaches the counter where the newest publications are on view.

"What's this," she asks, picking up a yellow and black affair. "Is this by a new man? How long has it been out? Is it good?"

C. H. NEWTON, President.
FRANK E. McGRAY, Manager.

"Yes'm," says the clerk. "It's excellent. It came out only yesterday, and I sat up all night reading it. Taken the country by storm."

The woman hurries away with her prize. The style may change at any moment.

Only one obstacle remains to block us in our search for the latest thing. We have the same old people always about us. No matter how they are rigged out, or what new conceits they may furnish themselves with, their style is ever the same.

There is nothing new in people. Babies continue to be doubled up with old-fashioned colic. Stomachs are still in vogue. It is true that some effort has been made to predigest our food, but the success of this has not been paramount. Boys are still boys, and when they grow up they are still men—or otherwise.

Some day some bright mind will get out a patent on to-morrow—and those who can afford to pay can use it beforehand. Then, doubtless, it will be discovered that one day is just like another, and that there is nothing new under the sun.—Life.

⁂

BRITISH LUMBER MARKETS.

Farnworth & Jardine's (Liverpool) wood circular, latest to hand, states that the arrivals from British North America during the past month have been 22,011 tons register, against 23,769 tons register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1903, 1904, and 1905 has been 438,924, 425,151, and 434,612 tons respectively. In the business of the past month there has been decidedly better tone and rather more activity. Imports generally have been moderate, the deliveries fair, and values of some of the leading articles, partly in sympathy with advance in freights, have shown a marked improvement. Stocks, with few exceptions, are fairly light. In regard to the Canadian woods, waney has arrived freely, the bulk going to Manchester, and largely on merchants' account; the deliveries have been satisfactory, prices are firm, but stocks are adequate; second class has also arrived freely, but the demand is limited, and stocks are ample. Square pine—There has been no import; the deliveries have been small, but stocks are light, and values are steady. Red pine—There is very little enquiry, and stock, though small, appears sufficient. Oak—The arrivals amount to 31,000 feet; the consumption has been fair, and stocks are not large; prices are steady. Elm—There has been a small import, about 2,000 feet; the demand has been quiet, but stocks are moderate; values rule high. Pine deals have again arrived freely; the deliveries have been rather disappointing, and stocks have increased; there is little change in values to report. Red pine deals—The demand is dull, and recent sales have shown weakness.

Speaking of New Brunswick and Nova Scotia spruce and pine deals, the arrivals during the past month have been 9,040 standards, against 9,320 standards during the corresponding month last year. The deliveries have fully kept pace and values have improved, recent sales being the highest prices of the season; stocks are large, though rather less than at same time last year. There is little tonnage offering, and freights have shown a marked advance. Pine deals have been in better request, but prices rule low. Of birch logs, a moderate import, chiefly from Quebec; there has been more enquiry, stocks are light, and values firm. Planks are in better request; stocks are low and values have improved. For British Columbian and Oregon pine the demand is slow, and stocks large, but values are firm.

⁂

MONTREAL MARKETS.

Montreal, Nov. 22nd, 1905.

Ashes.—Trading is now of a very limited character, as the season of navigation is about over, and values are, if anything, easier at $5.40 to $5.45 for first pots and $4.75 to $4.80 for seconds. No recent transactions are reported in pearls, and about $7.50 per cental is a nominal quotation.

Dairy Products.—For the season of the year last week's shipments of cheese were fairly liberal, aggregating 77,491 boxes, but of butter only 2,825 packages were shipped. In both articles values are strong, the prices of butter precluding much export demand. Fancy Townships creamery is quoted at 24c., while anything in the way of fair quality will bring 23 to 23½c. Fine makes of Western October cheese are held at 12½c., and Quebec's at 12⅛ to 12¼c. per pound.

Dry Goods.—Retailers in the city are disposed to do some grumbling, as the fine open weather of late prevailing is not favorable to the breaking into of fall stocks, and wholesalers report that some falling off is noticeable in remittances. Under date of November 20th the Canadian Colored Cotton Co. advises an advance, equal to about 5 per cent. in ginghams, cottonades, domets, etc.

Fish.—There is quite a good business doing in this line, with stocks in comparatively limited compass, particularly of green cod, and skinned dry cod. We quote: Labrador herrings, $5.50 in barrels, and $3.00 in halves; Nova Scotia salmon, $18.00 in tierces, and $13.00 in barrels; B. C. salmon, $12.50 in barrels; mackerel, $2.00 in kits; large green cod, 4c. per lb.; boneless cod, 6c.; dry cod, $6.00 per quintal; finnan haddies, 6½c.

Groceries.—The sugar market has assumed a rather firmer phase in sympathy with New York, where two of the leading refineries established an advance of 10c. on Monday, but as yet no revision has been made of local quotations, and the factory figure for standard granulated is still $5.30 in barrels, and 5c. less for bags. Molasses is steady at 35c. per gallon for Barbadoes in single puncheons. In other lines of groceries there are no new features of special interest.

Hides.—Receipts of beef hides are moderate, and are readily absorbed at steady prices, there being really little stock in warehouse. We quote: 11½ to 12c. per lb. for No. 1 beef hides, and 95c. to $1.00 each for lambskins.

Metals and Hardware.—While the volume of business is not as large as a fortnight ago, owing to the going into effect of winter freight rates, the demand is still active for this season of the year. The outstanding feature of the market is the continued advance in pig lead, which is now quoted at $4.15 in an ordinary way, and the visible supply is reported as actually running short; some further revision of lead pipe quotations is deemed not unlikely shortly. Tin and copper, as well as spelter are also firmer if anything; ingot tin is quoted at 36½ to 37c.; copper, 17¾c; spelter, 7c.; sheet zinc, 7½ to 8c.; antimony, 14½c. Pig iron prices rule very steady at $20.00 to $20.25 for No. 1 Canon and Summerlee; bars, $1.95 to $1.97½; boiler plate, $2.20; iron pipe, $4.29 for inch. Plates and sheets generally all remain at last week's figures.

Oils and Paints.—The movement in these lines of merchandise is barely as active as it was. In values there have been no recent changes. Turpentine remains steady at 98c. per gallon, in single barrels; linseed oil, 45 to 46c. for raw, and 48c. for boiled; castor, 7 to 8c. per lb.; fish oils are dull and little asked for. The recent advances in window glass and white lead are firmly held. Putty is quoted at $1.40 in bulk.

Wool.—Business partakes of a sort of jog-trot character, millmen buying only in little lots to fill present wants. Values are firm, and we quote: Capes at 19 to 22c.; fine B. A. scoured, 43 to 45c.; North-West, 20c., and very little here; domestic fleece, 27½c.; pulled, ditto, 30c. per pound.

* * *

TORONTO MARKETS.

Toronto, Nov. 23, 1905.

Chemicals, Drugs, Etc.—The situation of the local drug trade is about the same as it has been for some weeks past, with a normally good volume of transactions passing and little worthy of special comment. Opium is perhaps a shade firmer, while quinine remains just as before. For other drugs the demand is fair. Baltimore advices with respect to chemicals and fertilizers show there is a good demand at firm to strong prices. In England the improvement before noted in the state of the export trade in chemicals has continued unabated, though for home requirements the immediate demand would appear to be rather slack.

Dry Goods.—The Christmas demand is beginning to set in in earnest. All fancy articles sell well. Furs are in large demand at the high prices prevailing. Carpet departments report a good enquiry. Staples are in about the same position as last week with a good demand for week to week requirements. Retailers now seem to have settled down to the belief that they can expect little in the way of price concessions for some time to come. Payments are reported satisfactory.

Flour and Grain.—Both flour and grain are easier in price than they were. Shipments of wheat from the West continue heavy. There is still some divergence in view between buyers and sellers and the milling demand is not of large dimensions. Oats keep pretty firm and so is barley. Rye is nominally the same. Oatmeal is dull. Bran and shorts are strong.

Hides and Skins.—Not much change has taken place in hides. Trade continues good without new features. Leather is meeting with a somewhat improved demand at the lately increased prices. Tallow is as before.

Groceries.—The movement in sugars continues much as last reported, with a fair volume of trading being carried on. The Christmas enquiry for dried fruits is now setting in, and indications point to a good trade in that line. For canned goods, the enquiry for this time of the year is pretty good. Teas are in good demand and coffees fairly so. Travelers report that prospects in the country districts point to a large business being done this winter in most branches of the general grocery trade. Payments are quite up to average.

Provisions.—The supplies of butter coming forward lately have fallen off a little and prices are quite steady. Cheese is firmer. Eggs are going up owing to light receipts of new laid. Hog products continue high priced for the most part, though for bacon and some other lines there is an easier tendency at the moment.

Wool.—But little is being done in respect to local trading in raw wool and prices are just as before. For pulled wool the demand is for immediate requirements.

SAFE INSURANCE

At the end of 1904 the Great-West Life was able to state that for every Dollar of liabilities it held $1.12¾ of assets—a good margin of safety.

At the end of 1905 the margin will be still greater.

Great-West Insurance is inexpensive, profitable and absolutely safe.

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

Mercantile Summary.

The Cambrian Mineral Company of Sudbury, Ont., has been incorporated with a capital of $100,000. The incorporators are R. G. Leckie, J. E. Leckie, and W. J. Montgomery, of Sudbury; R. G. Edwards Leckie, of London, Eng., R. G. Digby Gillies, of Montreal.

A police census of Toronto makes the population to be 262,749, an increase since 1901 of 41,166. The mayor claims that with the suburbs included the population of the greater Toronto is not less than 285,000. Toronto census takers have always been good counters. They have also good material to work on.—"Montreal Gazette."

The Albany County grand jury has found indictments against John Dyer, Jr., the contractor, and Clark L. Daggett, his supervising architect, charging them with manslaughter in the second degree in their alleged responsibility for the collapse on August 8th of the departmental store building of the John G. Myers Company.

Walkerville will have a very creditable record for new buildings during 1905. The most costly single structure is E. C. Walker's new residence, costing $125,000. The new King Edward school, costing $50,000; the Walker Company's rack house and new cooper shop, $40,000 each; the Globe furniture works, $40,000 and new residences will bring the total for this year up to nearly $400,000.

The report of the Intercolonial Railway for September makes much more satisfactory reading than usual. The earnings were $686,271, leaving a surplus of $24,659. For the past three months the average deficit has been reduced to $25,938, so that if this is maintained the year would close with only a small deficit. There will be a saving of $300,000 for the year in the maintenance of way, and $100,000 in the coal bill.

A petition for a winding-up order against the Canadian Preserved Butter Co., Limited, of St. Johns, Que., has been granted in the Superior Court, and Arthur W. Wilks of Montreal, was appointed provisional liquidator. The liabilities are about $49,000, and assets about $75,000. The company in question is one of the largest concerns of its kind in Canada. Besides a well-equipped factory in St. Johns they own separators in twenty surrounding parishes. The equipment was formerly the property of Mr. S. J. Roy, of Sabrevois. A meeting of the creditors has been fixed for December 12th.

Car-building is becoming one of Nova Scotia's largest industries. The large works of the Rhodes, Curry Company, Limited, at Amherst, are unable to keep pace with their orders from Canadian railways. On Saturday last they turned out for the Canadian Northern a combination baggage and express car, one first-class coach and six box cars. And they have orders for twenty-five refrigerator cars for the I. C. R., two hundred and fifty more box cars for the Canadian Northern, two hundred and fifty flat cars for the Canadian Northern, and fifty flat cars for the Halifax and South Western Railway.

The annual meeting of the Canadian Rand Drill Company took place at Sherbrooke, Que., on November 17th. The statements submitted showed the company's business to be in good shape. The old board of directors were re-elected, with the exceptions that Mr. Rand and Mr. Brainard were replaced by Mr. Doubleday and Mr. Grace, of the Ingersoll Rand Company. The meeting was one of some importance to Sherbrooke, inasmuch as the president and vice-president were authorized to proceed with the enlargement of the plant and works, provided the company acquire the necessary land under the by-law, which is coming before the citizens of Sherbrooke very soon.

⁂

MARKETING CANADIAN APPLES.

Mr. A. E. Sherrington, of Walkerton, Ont., is a well-known grower of fruits, and he has done a good deal to popularize among Canadian growers the idea of co-operative association in the marketing of their fruits. He has recently returned from a visit to Europe where he made observations on the manner in which Canadian fruit arrived and was sold there. His remarks on that topic are full of information and should be full of interest. He says:—

"After visiting all of the principal fruit markets in England and Scotland, I am more convinced than ever that co-operation among the growers and shippers of Canada and other countries is an absolute necessity if the growers are to retain that market and receive a share of the profits on the products of the orchard. I saw some dickering in Great Britain last summer that could scarcely be called square dealing, in fact, it was anything but square. Who was the loser in this particular transaction? No one but the shipper. The commission merchant had his commission and was at no loss. The time is coming when our fruit and other produce will be sold f.o.b. here, instead of by consignment.

"Retail merchants I saw expressed themselves as very much pleased with our method of co-operation in packing apples, and agreed that all products should be sold direct, and not handled on commission.

"I interviewed several retail fruiterers in regard to shipping apples in boxes. A number of them had had no experience with boxes, but said they were willing to give them a trial, believing that they would be very convenient for their trade. Others who had handled apples in boxes were perfectly satisfied that it is the right package for the finer sorts.

"During the short time that I was in Europe I had no difficulty in arranging with reliable parties to take all their requirements from our co-operative association f.o.b. here. If the right kind of man was over there one season he would be able to place nearly all the apples grown in Ontario by straight sales to reliable parties. It does not pay to send anything to Europe but first-class goods. When good fruit was offered the buyers vied with each other in bidding, but when the goods were inferior bidding was slow.

"It is a great mistake to mark the barrels wrongly. I saw some apples on Covent Garden Market, London, put up at Colborne, Ont., marked XXX Duchess. I opened some of the barrels and found one marked XXX Duchess which had not a Duchess in the barrel. They were green apples without a particle of color. Another barrel contained Duchess, but only number two, and marked XXX. This kind of packing will not do. It can be prevented by co-operation in packing.

"The need for greater co-operation on the part of Canadian growers becomes more apparent every year. Co-operation will mean better packing and higher prices, and will strengthen the fruit industry in all its branches. Wherever it has been given an honest trial in Ontario it has been a great success. The more of these associations we can have the better for the growers of the Province."

⁂

TEXTILE NOTES.

Owing to climatic conditions, says the Canadian Trade Agent in Australia, fur garments are worn more in the State of Victoria than elsewhere in the Island Continent. There is, therefore, he says, a demand in Melbourne for high-class Canadian undressed furs, with the heads, legs and tails complete. A special enquiry has been forwarded to the Department of Trade and Com-

merce, Ottawa, on behalf of Melbourne wholesale buyers, which offers an exceptional opportunity for Canadian dealers in undressed furs to open up a valuable business connection. There is no customs duty on undressed furs. Orders will be supported by a letter of credit, so there is absolutely no element of risk to the sellers once the buyers are assured that the values and qualities can be depended upon. With a view of assisting the increase of reciprocal trade between Canada and Australia, our Government agent is prepared to forward to Canadian furriers particulars of the fur skins exported from Australia to England and elsewhere. Such furs as Australian wallaby, opossum, omeo, kangaroo, and the better class of rabbit skins should, if properly introduced, find an increasing sale in Canada, where there is a constant demand for fur garments in varied character and qualities.

A visitor to the Horse Show in New York whose interests were centred on the display of laces would have imagined, says the "Dry Goods Economist" in its excellent number illustrative of that event, that a miracle of some sort had been wrought, and that he was seeing the Show of 1904 all over again. As far as laces are concerned, it is doubtful if there has ever been a season so absolutely barren in novelty as the present. True, laces were much in evidence, but they were the same kind as were seen last year, and many even of the style of the year before that. Moreover, there was no one special style that stood out prominently above the others. The whole array of popular sorts were in evidence, and but that it might be said that the Irish laces were most in evidence, no one style could be picked out as being the favorite. Starting in with the Irish, there was a great deal of this very beautiful lace seen.

Yokohama quotations for raw silk are on a slightly lower basis than last week, but the evidence of weakness is not as apparent as formerly. Activity on European account has been a steadying influence, and American importers are said to have been more active in the Japanese market. The condition of the European manufacturer is evidently considerably improved, and it is believed that requirements from this source will be sufficient to cause a stiffening in rates through increased buying. It is generally recognized that the purchases of foreign manufacturers are based on actual needs, so that their purchases would not be considered a speculative factor, but as a substantial influence in favor of a hardening tendency in raw material. As far as the home trade is concerned, comparatively little improvement in the demand for piece goods is noted, but the fact that stocks in nearly all directions are small would seem to indicate that with any improvement from the buying trade manufacturers must operate for self-protection.

A report from Paris states that there are such beautiful new and somewhat darker shades of crepe de chine shown this season, among which are ruby, garnet, claret, plum and some beautiful tints of green, that it is considered a quite suitable fabric for visiting toilettes, while in light shades and, above all, white, no material is more in vogue for dinner and ball dresses. Its soft-falling, clinging folds render it admirably suited for the new Directoire and Empire types of robes, and the loosely fitting corsage which always forms a part of this order of dress is far more suitable to it than any fitting bodice could be.

There is practically no change in the condition of the wool market at Bradford, Yorkshire, since last week, with the exception that those top-makers who were making slightly reduced offers for February and March delivery of coarse-fibred crossbred wools have withdrawn these, and are not now inclined to operate, except on the basis of to-day's full rates. The situation in the wool market is at present extremely difficult, from the points of view of both spinner and manufacturer, as the business in goods does not at all justify the present price of raw material; and yet the available stocks are so small that holders of these are able either to demand full rates or can afford to let business pass by. This is especially the case in regard to all the coarser and medium qualities of colonial crossbred wools, as the supply of these kinds is at present so meagre that even a reduced rate of consumption would have very little effect on prices. The disturbed state of Russia is having a very disquieting effect on the market, as not only have many of the yarn merchants considerable amounts at stake in that country, but there is, of course, great uncertainty as to the competition and delivery of contracts for yarns for that country which are at present being put through.

Glasgow manufacturers report a continuance of the pressure, especially in the production of grey and colored muslins. Looms are generally fully employed. The scarcity of millworkers is aggravating the position, and is leading to orders leaving the district for Lancashire, where delivery is more expeditious and mill equipment more modern. The enquiry for India is

broadening, and the evidence of the boycott is less apparent. Were cotton to relax somewhat in price, more business would quickly follow, says the "Draper's Record." Buyers, or consumers, having so long confined their purchases to dire wants, are loath to follow the rise, and they are accordingly placed at a disadvantage at the moment.

⁂

A NEW KIND OF FISH-STORY.

The following incident is reported by a Boston daily:—

When Antonio Perrio and Angello Leoni rowed their dory up to the mooring space at the foot of T wharf the other day their faces were white. Never a word did they say to their friends in other dories as they made fast and climbed up on to the wharf, and the others nodded knowingly, as if to say, "Something strange has happened."

To a reporter Antonio told his story. According to the fisherman, in Boston harbor is a new fish. He looks like an ordinary flounder, but he is larger, his scales shoot sparks when he is taken from the water, and to touch him is to experience a shock like that from a live wire. And the fisherman believes that this fish is the product of the East Boston tunnel. That the electric current passes through the walls of the tunnel and charges the eggs laid on the bottom of the harbor. And when the fish is

born he is a living electric current. Antonio's story is as follows:—

"Two days ago I and Angello are fishing in the harbor below Castle Island. We have bad luck. Hour after hour go by, and no bite. Then I feel something on my hook. I pull. The palms of my hand feel tickled like if touched with a feather, but I am excited and not pay attention. The fish pull hard, and Angello helps me. We give a great pull, and he come into the boat. He flop round and Angello kick him. Then Angello yell and fall out of the boat. I step on the fish and then I yell, as a terrible pain rush through me like a million needles sticking in me. I not know what it is, but the fish flop again and hit my leg and then I feel it again. I know then. It is a devil fish. I climb up on the seat and Angello swim in the water. The water is cold, but Angello don't want to get back in the boat. The fish come my way, but he can't reach me. He is about a foot long and nearly as wide. He look just like a flounder, but sparks come out of his scales.

"'Throw him back,' says Angello.

"I take an iron bar and lift him, then I drop it and yell again. I feel same as before. I cannot touch him and throw him back, so the only way to do is to turn the boat over. I jump out and Angello help, and we lose the fish and everything else we have in the boat. But we glad to get rid of him, anyway. We come back to the wharf and tell our friends about the electric fish. They laugh at us. To-day we catch him again, or his brother. Never again will I fish in this harbor. How now will I get my living?"

* * *

KINDS OF ABILITY.

Three types of ability are in constant demand for the more important positions in the business world—the ability to organize, direct and manage; the ability to create new markets, either by advertising or personal arguments, and the ability to supervise detail work and devise labor and time-saving devices. For these abilities, as a writer in "Harper's Magazine" truly says, employers are willing to pay salaries that formerly would have been considered fabulous. It is the possession or lack of one or all of these types which divides men into three great classes. At one extreme are the extraordinary, capable executives, salesmen and detail men; at the other extreme, men who possess none of these qualifications, but are fitted to do manual labor. Between them comes a large class—the mediocre man, too proud to work with his hands, and with only a limited amount of executive, selling or detailing ability. The question of salary becomes a secondary consideration when employers see the man that they want. "We do not care how much we pay," said the president of a million-dollar manufacturing company, "provided we can get a man who can manage our sales department as it should be managed and show the right results." The one great ever-crying demand is for results; expensive machinery is purchased and installed, only to be thrown aside for something better. Old methods pass quicker than the years, and along with the old methods the old men. The business of a firm expands at an alarming rate, and the older men are forced into retirement nowadays at an age when formerly they would have been considered in their prime. The day when a man could stand on his past record is gone. Results alone count. When a man cannot produce, the business world quickly demands some one in his place. To-day is the day of the young man. The pendulum of business demand has swung from one extreme to the other. The young man of thirty now holds the position formerly held only by a man in his sixties. The energy, push and determination of the young man are given great preponderance over the conservatism and experience of the older man. A few years more will undoubtedly place a man's maximum earning ability five to ten years farther along in life.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

CHEMICAL INDUSTRY IN BRITISH COLUMBIA.

Good service was rendered to its members when a paper by Dr. W. R. Lang, chemistry professor at Toronto University, was secured for the meeting of the Society of Chemical Industry at its meeting last week. The professor's subject was "Chemical Industry in British Columbia." Manifestly, we can deal only briefly with certain phases of the subject. Not alone did he mention mining, which is the industry in connection with which Canadians usually think of our most westerly Province, but he found chemical works, breweries, a distillery, sugar refineries, vinegar making, and a host of other smaller industries flourishing in the West. In Victoria there is, as it will surprise many "Eastern" people to learn, an excellent plant for the preparation of sulphuric acid. To those who think it a strange thing that sulphur imported from islands of the Pacific was used at these works instead of sulphur produced from our own Kootenay ores it needs to be explained that the high rail and water freight (500 miles) on Kootenay sulphur would prevent its economic use at Victoria. By-and-bye probably this sulphur will be used.

A Portland cement plant was erected not far from Victoria early in the present year. It is known as the Vancouver Portland Cement Co., and controlled by the same people who operate the Owen Sound Portland Cement Co. and the Lakefield Cement Co. in Ontario. There are two rotary kilns in operation on the Island. Fire-brick, drain pipes, and lime are also made on the Island of Vancouver. It will be news to Canadians generally to learn from Dr. Lang's paper that quantities of lime are being exported from that island, mostly to the Orient.

Of unusual interest are some facts and figures respecting the coke ovens at Fernie, taken in part from the Government Bulletin on Mining for 1904. At these ovens the volatile products of distillation of the coal "share the same fate as the sulphur at the smelters"; that is, they are wasted by dissipation into the air. Out of 268,320 tons coal there was produced 167,700 tons of coke; this left a difference of 100,620 tons to be accounted for in the shape of coal-tar, ammonia-liquor, gas and sulphur. The value of this coal-tar (1,780,000 gallons) is $53,400, and that of ammonia-liquor (4,200,000 gallons), $42,000, taking three cents and one cent per gallon as probable prices. Here is $95,400 a year going to waste! This waste appears inevitable in the present condition of development in the neighborhood of the Crow's Nest Pass Company's works, because the demand for such substances close at hand does not permit the saving of them, and they are too far away from other parts of Canada to justify the freight on them. This may be expected to be cured by further settlement and railway construction in the near future.

At the other end of the Dominion, namely at Sydney, the Dominion Iron and Steel Company utilize the more volatile products of their coke oves for making benzol, creosote oil and carbonic acid. The demand for these in Canada not being sufficient, a considerable amount of these products is sent to Europe and the United States.

The references made by Dr. Lang to the reduction works at Trail and Nelson are tempting, especially that to the production of lead by the Betts electrolytic process. This, he tells us, is the first instance of this process being carried out on a commercial scale. "A plant for making lead pipe up to four inches in diameter is included in the C. P. R. Company's equipment, the first of its kind in Canada for producing lead pipe from Canadian lead." It should be added that this is the first company to make silver bullion in quantity from Canadian ores smelted on the spot. At the works of the Granby Consolidated Company, at Grand Forks, which the professor did not visit, are installed Bessemer converters, "having a capacity for treating about 100 tons of copper matte daily—an exceedingly large amount." There blister copper of about 99 per cent. purity is turned out in cakes of about 100 pounds each.

These references by a chemist of experience to the mining activities of our Western country are valuable. Much of the news we in the East get about British Columbia and Alberta is of the "celestial rosy red" hue of the local daily newspaper, whose world, as Voltaire has it, is the best of all possible worlds. And the average writer therein is rarely known to admit that, as the Spectator said to Sir Roger, much may be said on both sides. Nevertheless, it is only by getting to know our defects, as well as our proficiency, in metallurgical or any other directions, that intelligent arrangements can be made to profit by our great resources.

* * *

FARMERS AND THE TARIFF.

The Tariff Commission, at its various sessions lately, has been the recipient of the views of not the least important section of the community affected by any changes in the tariff, namely, the farmers. It need hardly be said that the great preponderance of opinion of the agricultural body was distinctly in favor of any changes being in a downward direction. Nor is this to be wondered at. Directly at any rate, it is the farmers of Canada who have to pay perhaps most largely for any help that has been accorded by the Government for the development of the great manufacturing industries. They have paid the most, that is to say, compared with what help they have themselves received from the same source. Not that the Government, in framing its tariff schedule, has wilfully discriminated against the farmer, but simply that from the necessities of their products, with prices based largely as they are on values in outside markets thousands of miles away, it has been practically impossible to assist them in this way. Thus it comes about that while the clothes and boots they wear, and the fences and agricultural implements they use, and, generally speaking, all the articles they have to buy, are protected by more or less high rates of duties, the grain and other products which they have to sell are left unprotected. No wonder, as we said, that the farmers, as a body, are not in favor of a general raising up, but rather of a general leveling down of customs duties.

That this is far from being without exception, however, is shown by the attitude of the beet growers and tobacco raisers. The latter, as one of the ministers on the commission tersely put it, actually want a protective duty of 300 per cent., while the beet men are practically unanimously calling for a higher tariff on sugar; facts which indicate that, after all, the difference of opinion existing between some manufacturers and most farmers is one of interest, not spirit.

At the same time, to be fair, there is another side of the story which should be presented. We said that, directly speaking, the farmers are the people who have to pay most for assistance accorded to manufacturers. But against this, it may be argued that, by the development of these great manufacturing industries, there is a home market created for the farmers' produce which, for its net profitableness, is far and away ahead of that presented by exportation to Britain or any foreign country. In both the aggregate quantity of products it will absorb, and in the clear cash it will return into the farmers' hands, the local market is, strictly speaking, infinitely superior to the other, and this is a feature that perhaps scarcely gets the recognition it deserves. The full purport of this argument is that even if the farmer does have to pay out directly more for tariff favors than he can hope to receive in return from the same source, yet indirectly, by a large local demand being thus created for his produce, he does receive a certain *quid pro quo.*

Yet we do not dispute that the farmer, as all history shows, is very apt to receive the thin end of the stick in tariff arrangements, a condition mainly brought about by his habit of isolation or separation of units as contradistinguished from that of the manufacturers who have learned the value of association and of the added weight which co-operation for a set purpose brings. The estimates of the cost of running an average farm, and of the profits accruing therefrom after paying for the necessary labor and machinery, etc., show that the farmer, considering the intelligence, skill and labor required, does not receive a sufficiently good percentage of interest on his capital invested, compared with his manufacturing brother. The work of a Government should be, as largely as can be without undue interference, to even up natural conditions as far as possible rather than render them more uneven. Now, the high protection which many of the manufacturing industries have been receiving, apart from making the farmer pay a high price for the necessities of his life and profession, has also had the effect of increasing his difficulties in carrying on business. As an illustration, take one very important item. Manufacturers, owing to the good profits accruing from their several businesses, profits only possible, on their own showing, because of the protection of a customs duty, are enabled to offer higher wages. What follows? Thousands of young men are attracted away from the farms and towards the cities, and the farmer thus has to pay an exorbitant wage for hands, a wage which the profits of the business of farming will not stand, or, what is more likely, has to get on without the help at all, to the great detriment of his whole property.

Under all these considerations, it may easily be seen what an extremely difficult task confronts Mr. Fielding and his brother commissioners in their efforts to frame a tariff which shall at one and the same time create and develop the manufacturing industries, build up a great home market, keep some degree of equipoise between the urban and rural interests, and not bear heavily on the class who, after all is said and done, are really the mainstay of Canada in more senses than appear immediately on the surface.

* * *

GROWTH AND EXPORT OF CANADIAN APPLES.

The price which good Canadian apples are bringing this year on the British markets suggests several considerations. It shows for one thing, that even in an "off-year" there is money in growing apples of good varieties in Canada. And secondly, it raises the question: What becomes of the difference between the price realized by the grower and that which the consumer in England pays? Not that the grower who has held his fruit has so very much to complain of this year in intrinsic return for his skill and labor, for $2.50 to $3.50 for a barrel of Greenings or Spies or

Baldwins is good remuneration, and if he had many to sell at such a figure he might speedily make a fortune. Even, however, when he has succeeded in selling his orchard product at that price, there is quite a difference between that and the 21s. or 25s. which those varieties have been fetching in Liverpool and London. We are not speaking now of the legitimate profits to which a buyer is justly entitled when he takes the risk of buying a lot of apples for shipment to a country three thousand miles away. But complaint is heard that a certain amount of money which is handled by the British dealer and is due to the shipper or dealer on this side, as the case may be, somehow slips through in the process. That is to say, that when the market quotation in Liverpool for example, is $5 per barrel, only $3 makes its way to the shipper in Canada, although the cost for freight and other charges is a long way from $2. Both growers and shippers of apples in Canada, it is very evident, will have to exercise more care in their selection of commission men in Great Britain; and growers will have to co-operate to better advantage in the marketing of their fruit. This is a sore point in an important Canadian industry that seems likely, with good management, to attain to very large proportions in Canada.

Allied with this necessity for co-operative marketing, the good results of which in certain localities have been demonstrated under the best possible auspices during the last few years, there is shown to be a keen necessity for a closer study of markets by individual growers. It is all very well for the farmer to be imbued with the idea that the sooner he sells his apples, the sooner will he know what price he is getting, and the more trouble in storage and so forth, will be saved. But he must know whether he is losing by such a course a large proportion of the proper reward for his industry. Early in October, buyers were going through the country offering $1.50 for Greenings and other winter apples. Now $1.50 on the ground for practically run-of-orchard fruit is, under ordinary circumstances, a very tempting offer. But this year the same buyers a month or six weeks later were giving $2.50, and the growers who sold at the former figure were "out" just a dollar per barrel for a very little trouble in handling and storing. In one case that we know of a man near Toronto sold his orchard this season for $400.00, while the buyer who purchased it made $1,800. Now, as we have said, the buyer who buys in advance and takes the risks, is entitled to a good profit, but it can scarcely be said that he is entitled to as much as that, which only serves to prove our contention that the generality of apple growers will have to educate themselves up to the pitch to which many have already done, who know just about as much about the probable future course of the market as the keenest of buyers. At the same time it must be remembered that the buyer is sometimes himself badly hitten, the cause usually being when over-competition runs away with good-judgment.

* * *

A Montreal newspaper states that $20,000 is being bid for a seat on the Stock Exchange of that city. The price asked, however, is $22,500, it being felt that the recent reduction in the commission rate chargeable by brokers will bring about a large increase in their business, and probably in their profits.

YORK COUNTY LOAN

There is a likelihood of the York County Loan Company being bought up, and so losing its identity. When we hear this, we have a feeling of almost bereavement to think that The Monetary Times is likely to be deprived of a subject of so much attention as the York County Loan Co. At almost any time these ten years past we have been criticizing it, or telling of its novel phases of money-getting from serving maids and hostlers to be put into real estate or pianos, or magazines or insurance. Rarely has a month passed that we have not had an enquiry about this curious concern. And dear knows we have written articles and paragraphs enough and answered letters enough about it. But now appears in the daily papers notice of a special general meeting of shareholders on January 11th, to consider and ratify, if approved, a provisional sale of the "assets and undertakings" to the Dominion Permanent Loan & Savings Company, whose president is Hon. J. R. Stratton.

We have made some enquiry into the nature of this indenture of agreement, and find that the purchasing company does not purpose saddling itself with any of the patent attachments or entanglements of the York County Loan with its shareholders. Nor will it go into the piano business, or the insurance business, nor will it continue the commercial college. First, it will have a valuation made of the assets of the selling company, and, if its offer is accepted, will pay for them in debentures of the Dominion Loan Company maturing in five or ten years. In the case of shares of the York County not matured deposit-receipts will be given for amounts under $10, to mature in say three years. One paragraph of the conditional agreement runs as follows:

> The purchasing company shall only assume and pay the trade or business debts and obligations of the vendor company, and shall not be liable to the shareholders of the vendor company in respect of any terminating or withdrawable stock or otherwise whatsoever save and except only to apportion the consideration under this agreement for the net assets among the shareholders of the vendor company as aforesaid; and it shall not be obligatory on the purchasing company to make such apportionment until all questions as to the right (if any) to withdraw on the part of the shareholders of the vendor company, or any of them has been settled, and until complete schedules of debts and shareholders shall have been prepared and completed as aforesaid.

The question is a natural one: What are the assets of the York County Loan Company. The most tangible, or at least the easiest recognizable, is the real estate, standing on the books of the company at $991,000, and consisting in the main of land and houses in a large block between Roncesvalles Avenue and High Park at the western fringe of the city of Toronto. The figure mentioned, however, is stated to be the actual cost of the land and houses, together, we presume, with the scores of thousands of dollars expended in levelling sand-hills and filling up ravines to make streets for the houses. The value of this $991,000 asset is given by Mr. Joseph Phillips, the talented and versatile president of the company, at anywhere from four millions at the present time to ten millions at a future date within the rosy circle of his mind's eye. Asked by The Monetary Times what he thought of such values, Mr. Stratton intimated that he was not paying out any millions at present, and could only say what figure would be paid when his valuators had completed their task and the shareholders of the respective companies had consented to the deal.

It is quite obvious that the report of this intended transaction has caused alarm to some of the shareholders, who are said to number 30,000. They clamor for their money as certain of them have been doing for several recent years. But the poor things did not appear to understand—and the company's crafty canvassers and collectors, of course, did not tell them—that by statute or by company's by-law they had no right of withdrawal for some forty months after purchasing shares.

If any one asks why the managers of the company sell out, the reply may be either that they could not place the company on a "permanent" basis, or could not carry the real estate and pay taxes on it longer, or that they found the income from fresh members unequal to the outgo for maturing shares. We have been told that the concern in one recent year, 1903 or 1904, paid out $1,300,000, and actually got in nearly $1,200,000 of fresh money. The huge structure has grown, founded upon an insecure basis, until it reached an unwieldy weight, having shareholders almost from the Atlantic to the Pacific, and has quite outgrown, as we have predicted it would, the capacity of its directors to manage. As for the shareholders, all they can do is to wait. They will get some of their money back, no doubt; whether they will ever get it all back depends upon circumstances in the future which it would require a bold man to predict.

* * *

INSPECTION OF INSURANCE COMPANIES.

We received this week from the office of the Superintendent of Insurance at Ottawa a lengthy statement from that officer in answer to a request by the Minister of Finance for a special report dealing with the manner in which the inspection of insurance companies by that office is carried on. As long ago as October 6th the Superintendent was asked for this report, dealing wth the manner in which the inspection of insurance companies is carried on in the Government's office, and showing the scope and nature of the inspection. Some uneasiness was evident in the public mind in Canada by reason of the revelations made before the New York committee of investigation, and the Minister did a wise thing to have the methods of inspection pursued in Canada made known.

The report now submitted will tend to allay doubts as to any undiscovered weakness in Canadian life companies. It will reassure people also as to the safety of policy-holders of foreign insurance companies which do business in the Dominion.

It is clear, after a perusal of its nineteen typewritten pages, that the system of examination of the books, accounts, and securities of all companies in Canada pursued by Mr. Fitzgerald and his assistants is minute. Its object is to verify the sworn statement which each company makes to the finance department. Errors are frequently found, but they are either due to misunderstanding or to variance of opinion between the officers of the company and the Government as to the forms used. "Cases are rare," says Mr. Fitzgerald, "when wilful misrepresentations have been made in the returns for the purpose of concealing the true standing and condition of a company."

He gives one instance where the Canadian manager of a British fire company of a former day (and now out of existence) made a return which underrated the reserve of unearned premium liability.

The method adopted in verifying the statement of a company's assets is dealt with under different headings, as 1st, Real Estate; 2nd, Mortgages; 3rd, Bonds, Stocks and Debentures Owned; 4th, Ditto, upon which loans have been made; 5th, Loans on Policies; 6th, Agents' Balances; 7th, Cash in Banks; 8th, Outstanding and Deferred Premiums, Interest, etc..

Considering the third item, bonds and stocks owned, the method of examination is described thus:

> The schedule of bonds, stocks and debentures of each company, which accompanies and forms a part of the annual return, is verified. For this purpose all such bonds and debentures are counted and stock certificates examined at the head office of the company, and where securities have been sold or paid off between the date of the statement and the time of inspection, such sale or payment is verified by reference to the company's ledger and cash book.

It is a conceivable thing, however, that the authorities of two or more companies which may find it necessary under pressing circumstances to make a better showing than their actual assets will permit, might lend each other securities, which would be found in the possession of and counted as belonging to company A in December when the examiner visited that company's office; or of company B in January, or of company C in March. Such things have been done in other countries. Does the superintendent's method of examination take account of such possibilities?

We make some extracts from this interesting report, perusal of which confirms our belief that insurance companies in Canada within the purview of the Government office in Ottawa are very well looked after:

> Most of our Canadian life companies have well established and efficient actuarial departments presided over by skilled and competent actuaries, and have also on the staff of these departments students of actuarial science who have passed one or more of the examinations either of the British Institute of Actuaries, or of the Actuarial Society of America.
>
> An exact valuation of the policies is made each year by the company's actuaries. In fourteen out of twenty-one Canadian companies, the standard of valuation adopted is higher than the Government standards.
>
> Three of the remaining seven are new companies to which the higher standard which came in force 1st January, 1900, applies.
>
> Thus in the case of the larger number of these companies involving over 90 per cent. of the reserves the liability returned is greater than the companies are required to show under the provisions of the Insurance Act. In no case is a lower reserve returned than that produced by the Government standard.
>
> Since the 31st December, 1904, a valuation has been made in the department of the policies of four of these Canadian companies with the following results:—

Companies' valuation	$34,013,830
Department's valuation	31,386,964
Excess by standards used by the companies	$2,626,866
Several other companies have made their valuation both upon their own and also upon the Government standards bringing out an excess over Government standards of	865,145
In the other companies the estimated excess is...	200,000
	$3,692,011

This will reduce the net reinsurance reserve of all the Canadian life companies as at 31st December, 1904, from $80,684,769, according to the companies' standards of valuation to about $77,000,000, according to the Government standard, and increase the surplus to policyholders over all liabilities and paid-up capital from $5,352,037 to $9,044,048.

The other items of liability in the case of all companies are usually comparatively trifling in amount, and no special reference thereto seems necessary.

Results.

There are at present 110 companies licensed under the Insurance Act for the transaction of business in Canada. Twelve varieties of insurance are carried on by them, namely, Life Insurance, Life Insurance on the assessment plan, Fire, Inland Marine, Inland Transit, Guarantee, Contract, Accident, including Employers' Liability, Sickness, Steam Boiler, Plate Glass, and Burglary Guarantee.

Of the companies, fifty-one are Canadian, thirty British, and twenty-nine American.

There are also eight life companies (four British and four American), which ceased to transact new business in Canada before the Life Insurance Act came into force, but which are entitled under Section 32 of the Insurance Act to carry on all business connected with policies existing at 31st March, 1878. These companies, as well as the licensed companies, make annual returns to this department.

Upon looking through the statements of the business of 1903 examined by the Department, it is found that corrections were made in over 600 items (608), and this would probably be about the average number of changes from year to year. The earlier years would probably show a larger number of errors, for the reason that the examiners have endeavored to instruct those engaged in the preparation of Government returns as to the proper and most expeditious methods of compilation. The result of this instruction has been a greater uniformity in the statements of companies doing similar kinds of business and a greater degree of accuracy attained through a smaller expenditure of labor than prevailed in the earlier days of the Department.

New companies, however, are from time to time (and now quite frequently) receiving licenses, and the first statements received from these companies are usually very crudely prepared. In the older companies changes of the officials who compile the statements is another source of incorrect returns. It is proper to mention that the corrections made have been invariably acquiesced in by the companies.

* * *

THE DANGERS OF GASOLINE.

From time to time reports come to hand of compounds guaranteed to make gasoline as non-explosive and harmless as vinegar. Now, strictly speaking, gasoline is not an explosive, though, when mixed with air in the proportion of seven per cent. or more of the former, the product is a vigorous one. The fact is, however, that the instant any substance is added to gasoline for the purpose of removing its dangerous qualities, its usefulness for lighting is also destroyed. Mr. W. H. Merrill, Jr., secretary of the National Fire Protection Association, of Chicago, recently issued a bulletin which sets forth various points in regard to these preparations very clearly. It is of a greater importance because, owing to the representations made as to the properties of these "safety" compounds, merchants and others have been known to remove tanks of gasoline from outside into the interior of their stores, where they are a menace to life and buildings. The bulletin follows: The so-called "magic powders," "anti-explosion solutions" and "safety compounds" for the treatment of the lighter products of petroleum (gasoline and benzine) which are again being exploited in certain sections of the country, recall the original attempt to impose upon the credulity of the public by this means, which occurred something more than twenty years ago.

No "treatment" of gasoline can be administered which will remove its hazardous qualities and leave it in condition suitable for the uses to which it is commonly put. Investigations have been made at the laboratories of some of the stuff.

The tests indicate that two methods are employed. The first consists of utilizing small quantities of a non-inflammable liquid compound having a lower specific gravity than gasoline to form a film over the surface of the oil. This acts to retard volatilization somewhat and to prevent ready ignition as long as the liquid remains in a position of rest.

The second and apparently more common method seems to include no attempt to employ an artificial or temporary safeguard, but to depend solely upon the cleverness in manipulation of the sales agent. The tricks which any one can safely do in bringing fire and gasoline together do not seem to be generally understood, and this fact is taken advantage of to the pecuniary benefit of the fakir. "The tests indicate that the 'witchery compounds' which he puts into the gasoline generally have all of the characteristics of gasoline itself, though they are often colored to give an attractive appearance. . . . It is a fact that gasoline and the lighter products of petroleum are highly inflammable and that their vapors and air form an explosive mixture."

* * *

OUR SAINT JOHN LETTER.

Mr. R. B. Kessen, the new general manager of the Bank of New Brunswick, arrived here from Montreal on Saturday, and to-day had his first meeting with the directors. After this meeting it was given out that the directors had decided in favor of increasing the capital stock of the bank from $500,000 to $1,000,000. One-half of this new issue will be offered to present shareholders at 265. The shareholders are called to meet on December 9th to consider this project and it is generally believed it will be endorsed. Bank of New Brunswick stock now sells for between 290 and 300 per share. There are some rumors that the last has not yet been heard of the proposed amalgamation of the bank with the Bank of Montreal. One report is that the big institution is endeavoring to buy out the stock of the bank by private negotiations with individual stockholders.

The most important happening in St. John for a long time has been the strike, now on of the ship laborers or longshoremen. These men who are engaged to load the steamers that come here in winter are demanding a wage of 35 cents per hour with double time on Sundays and holidays. The steamship owners declined at first to pay more than the wage of last winter, 30 cents per hour, with 40 cents for grain; 60 cents on Sundays and holidays, and 15 cents for all waiting time. The laborers tried to compromise on the Portland rate which is 30 cents day, 40 cents night; grain 60 cents, and Sundays and holidays 90 cents. This the steamship men refused to accede to, while the laborers refused the compromise offer of the steamboat men to give the night crews a midnight meal in addition to their regular pay. There the matter stands. The steamship men have brought here a number of laborers from Montreal and have made some headway in loading and unloading their vessels. So far the laborers have been quiet and no disturbances have occurred. There are about 1,200 men in the union and they contend that the average earnings are less than $300. The men who depend on lumbering for a living had a poor season of it and if there is any prolonged trouble over this winter business it will go hard, indeed, with the working classes of the city.

[We are glad to learn, by telegraphic advices of a later date than our correspondent's letter, that the longshoremen's strike is settled. The men decided on Tuesday night to go back to work at the same rates as paid them last year. The decision was reached after a public meeting held in sympathy with the strikers.—Editor "Monetary Times."].

A serious condition of affairs developed to-day in connection with the dredging work the city is having done preparatory to putting down new wharves for the accommodation of the winter traffic. It is necessary to dredge within about 100 feet of Union Street, and to a depth of thirty feet. This work has started a slide which threatens to take into the ship a considerable portion of Union Street along which run the C. P. R. and the New Brunswick Southern Railway. Wide cracks or fissures have opened in the street and an old building on the water side of the street, is in great danger. The tenant, a retail grocer, moved out this morning after the first warnings, and after the bottom had dropped out of his warehouse, dumping some of his stock into the harbor.

The American Tobacco Company has just secured control of a St. John industry and closed it up. For several years the Messrs. Isaacs have been carrying on a cigarette manufacturing business here under the name of the Imperial Cigarette Company. A good business was done all over Canada and employment was given to some thirty or forty hands. Now the American concern has shut off the competition by purchase and has closed up the factory. Mr. Isaacs is still engaged in the manufacture of cigars, a branch of the trade that the American Company has not as yet sought to control.

Seemingly good and satisfactory progress is being made with the work of prospecting for iron at Lepreaux, in Charlotte County, on the Bay of Fundy shore just west of St. John. It was announced a few days ago that the company behind the enterprise had contracted with a prominent Pittsburgh man to come from Nova Scotia, where he has lately been engaged, and sink a shaft for the further work to be undertaken. Expert reports are said to have shown that the ore at Lepreaux is of the very highest grade, and the only question of success is now said to relate to the extent of the deposits, and on this score the promotors now profess to have no doubts.

Col. Jacobs of the Salvation Army has just paid a visit to Stanley, York County, where the Army owns a large tract of land. He has not announced any plans for the use of the property, but the visit at this time, when the Army is preparing to bring a large number of immigrants to Canada, lends color to reports that something is to be done.

Samuel Romanoff, one of the leading Jewish merchants in St. John, conducting a large dry goods and millinery business on Main Street, is in financial difficulties. He has suspended payment, and is offering to compromise at forty cents. No statement of his liabilities has yet been made.

So far this year there have been fifty-seven failures in New Brunswick, with liabilities of upwards of $412,000. This has been a bad year. In 1904 there were but twenty-six failures with liabilities of $160,000, and in 1903 twenty-two failures, with liabilities of $250,000.

The province of New Brunswick has made money this year out of sale of licenses to big game hunters. The receipts to date (and the season is practically over) are $20,468.81, an increase of $4,252.28 over last winter, which was the previous high-water mark. It is almost impossible to estimate the amount of money spent by the foreigners, mostly Americans, who come here hunting moose and caribou, but it would many times multiply the actual receipts from licenses.

NEW VALUATION TABLES FOR LIFE OFFICES.

On account of their recent date, the magnitude and character of the data employed, and the exceedingly scientific method of graduation, the British Offices' O^M Mortality Table is bound to become the basis of valuation in life assurances offices, at least in the British Empire. A most valuable contribution has been made to the actuarial profession by the two well-known Canadian actuaries, Messrs. T. Bradshaw, F.I.A., and F. Sanderson, M.A., F.F.A., in the preparation of the extensive tables recently published under the title, "Net Premiums and Values,"in a neat and handsomely bound volume of 250 pages. These tables are based upon the above Mortality Table, and are given on both 3 and 3½ per cent. interest bases. The book contains net single and annual premiums and terminal values for twenty-nine systems of assurance on the whole life, endowment and term systems (including net single premiums for endowment assurances of from one to forty years); net annual premiums for whole life assurances on two joint lives; the O^M Mortality Table; commutation columns extended to three more decimal places than in the "British Offices Life Tables, 1893"; valuation columns, and tables of the present value of 1, due at the end of any year from 1 to 100, to ten decimal places.

The Tables of Reserves have been exceedingly well arranged for convenience and accuracy in practical office work. The system of assurance is given at the top of each page. The ages at entry are placed in vertical columns in groups of five on each side of the page, while the years of duration are given across the top. Thus, for any given system of assurance the values at the end of any year, for all ages, are given in the same column. All the data required to find any given value are thus conveniently given on the same page upon which the value is found.

The incorporation of the Mortality Table and the Commutation, Valuation and Interest columns gives ready access to the material necessary where special calculations are required to be made. These fundamental tables, owing to the extended form in which they are given, should also prove of much service where very exact results are desired.

No life office can afford, we should think, to be without this excellent publication, containing as it does 250 pages of values based upon the most up-to-date and scientifically constructed table now available—a table which is considered to-day, in Great Britain and the colonies at least, the standard for life assurance purposes.

* * *

BANKING AND FINANCIAL.

The addition of Drumbo, in Oxford County, and North Williamsburg in Dundas County, of Ontario, are announced as points where the Molsons Bank has established branches.

We hear that a property at the north-west corner of Main Street and Selkirk Avenue, Winnipeg, has been bought by the Northern Bank. That institution intends to place a branch there.

We observe that the Molsons Bank, which for some little time has been paying five per cent. dividends twice a year, announced on the 28th ult. that it intends henceforth to pay quarterly dividends of two and a half per cent. each.

The American Bankers' Association is now issuing the specially compiled cipher code for the exclusive use of its 7,500 members. It is thought this will go far toward obliterating the large number of small spurious cheques floating in different sections of the country, and whose amount aggregates a large figure annually.—Bankers' Monthly.

A by-law of the Canada Cycle and Motor Company, Limited, authorizing a decrease in the amount of its capital stock has been confirmed by the Ontario Government. The common stock of the company, amounting to $3,000,000, is cancelled, and that $900,000 worth of the paid-up, and all the unissued preference stock, amounting to $500,000, are cancelled. In future the total stock of the company is to be $800,000, instead of $6,000,000.

The Elgin Loan Company appealed from the decision of the Divisional Court in its suit against the London Guarantee Company, and the appeal was argued last week before a full bench. The Guarantee Company pleaded that the Elgin Loan Company did not furnish sufficient particulars, also that they had not exercised proper supervision over George Rowley, their defaulting manager. Judge Meredith held the defence to be good and dismissed the claim, which judgment was upheld by the Divisional Court.

The other day, in the city of London court, Judge Rentoul, K.C., made an order to pay a debt of £10 8s. 10d. to a money-lender at the rate of one penny a month. The payment will be completed in 209 years. This is a professional joke on the money-lender, his heirs and assigns.

We have looked over the latest edition (Vol. XXII., September, 1905), of the Bankers' Encyclopedia, published by the Bankers' Encyclopedia Company, 1402 East Jackson Boulevard, Chicago, and conclude that it is a very serviceable volume for financial concerns in the United States and Canada. It contains lists of the banks, bankers, savings banks, private banks, and trust companies of both countries, and gives a resume of the capital, rest, circulation and deposits of each, together with the names of officers and correspondents and bank attorneys. An additional attraction is a map of each State. The book has 1,130 pages, of which some thirty are devoted to Canada. A feature which we find attractive is the list of Canadian bank directors on page 1046: it includes the boards of several mortgage loan companies and trust companies. The compilers seem to be under the impression that the French islands of St. Pierre and Miquelon are in the Dominion of Canada, for they put down on this page the directors of la banque des iles St. Pierre and Miquelon. But then many Americans think Newfoundland is in the Dominion, too. It can hardly be wondered at, for R. G. Dun & Co. have continued for years to put these in their reference book for Canada without, however, anything to indicate that this and the French islands are not Canadian.

* * *

INSURANCE NOTES

Mr. H. Waddington, for some years managing director of the London Mutual Fire Insurance Company, has resigned his position, to engage in other buisness. His successor is Mr. D. Weismiller, long and favorably known in connection with the company as . inspector, and for the last two years supervisor of the underwriting department.

The North American Life made a good choice when they selected Mr. W. K. George to fill the place on their board made vacant by the death of Dr. Larratt W. Smith. Mr. George is a man of good judgment and business capacity, and is in the prime of life. He has lately closed his term as president of the Canadian Manufacturers' Association, in which he made for himself an excellent record.

The Murphy hotel at Dalhousie, on the Bay de Chaleur, one of the best known hostleries in the province of New Brunswick, was burned to the ground early on Tuesday last, with a loss of upwards of ten thousand dollars. All the outbuildings in connection with the hotel were completely destroyed. This fire is a serious loss to the town, and will prove a great inconvenience to travellers.

Scarcely had last week's Monetary Times gone to press than we heard of the sudden death, from that cruel *angina pectoris*, of Mr. Walter Kavanagh, of Montreal. The deceased gentleman was born in Montreal, a son of the late Henry Kavanagh, of His Majesty's Customs, his mother being a sister of Bishop Horan, of Kingston. He was well known and valued in the fire insurance world, having held the chief agency for the Scottish Union and National, the German-American, and being recently appointed by the Rochester German. A hard worker, and necessarily a fighter, he had nevertheless a soft side for a friend, and was brimful of wit and warmth. His age was only fifty-two.

We are advised by Mr. C. T. Gillespie, general manager for Canada of the Provident Savings Life Assurance Society, that he has just returned from the Far West of Canada, where he has made the following agency appointments: S. N. MacKay, superintendent of agencies, Winnipeg, Man.; E. M. Young, of Regina, manager for the Province of Saskatchewan; E. A. Gibbs, general agent, Edmonton and vicinity; A. A. Dick, general agent, Calgary and vicinity; G. B. Borradaile, general agent, Medicine Hat and vicinity, and R. B. Switzer, general agent at Calgary.

A water-works plant for citizens' water supply and fire protection purposes is now being constructed in Chilliwack, B. C.

We have just learned that the Waterous Engine Works Company, Limited, Brantford, Canada, have received a third order for one of their steam fire engines from the corporation of Santiago, Chile. Accompanying this last order is the following complimentary reference to their engine: "The first company's engine has had a splendid record in Santiago. I have a very complete record of the work done and cost for repairs during the whole time it has been in use. There were several other bids, including those from European firms, all lower than ours. Competition here is very keen." Here is an illustration of "Canada First" that is something more than rhetoric. It tells its own story: the highest in price and yet three times preferred.

* * *

BOOKS RECEIVED.

We have received from the author a copy of Mr. Watson Griffin's book on Protection and Prices, and The Farmers' Home Market, reprinted from Industrial Canada, 158,000 copies thus far printed. It comes to us from the office of the general secretary, Canadian Industrial League, whose motto is "Canada for Canadians"; and his letter bears the legend, "Keep your money in circulation at home by buying goods made in Canada."

We acknowledge with thanks the receipt of Part II. of the Report of the Ontario Bureau of Mines for 1905. The book is entitled "The Cobalt Nickel Arsenides and Silver Deposits of Temiskaming," and has been compiled by Willet G. Miller, Provincial Geologist. It contains a full and well-written account of those ores and of that unique mineral-bearing portion of Northern Ontario. It has also several pictures illustrating conditions around Cobalt as well as some maps and diagrams of use to prospectors and claim-owners.

* * *

FOR GROCERS AND PROVISION DEALERS.

The Hastings Milling Company, Limited, of Hastings, Ont., has been incorporated with a share capital of $75,000. It will make and sell flour and all kinds of feed, and will acquire the milling business and water powers of F. W. Fowlds in Hastings.

This season's exports of Canadian dairy products from Montreal to Europe have exceeded those of last season after all. It was thought up to the present that they must fall behind. Last week's exports of butter made the total shipments for the navigable season 554,041 packages as against 485,458 in 1904, while of cheese the exports are found to be 2,119,920 boxes as compared with 2,112,420 in the like period of last year.

The Canadian Universal Stores Company, Limited, are about to start, under Dominion charter, a modern departmental store of all branches in Montreal. Paul d'Aigneaux and J. Salone, of that city, are among the movers in the enterprise.

Representatives of nearly a hundred English and Scotch chambers of commerce, co-operative societies, butchers' societies, etc., met together in London last week and organized a body which will work for the importation of Canadian cattle into Britain. It will be known as the "Free Importation of Canadian Cattle Association of Great Britain," and it will, it is said, enter into politics.

* * *

The sixth series of the 1905 wool auction sales was opened on the 28th ult. The attendance was large. The offerings amounted to 12,123 bales, including good lines of fine merinos, which were in animated demand for France and Germany. Inferior merinos were in buyers' favor.

Medium crossbreds were in moderate request for America. Slips were taken largely by home buyers. Cape of Good Hope fine was in steady demand, but low, heavy greasies were in buyers' favor.

* * *

—The lumber industry of British Columbia would appear to have improved prospects. A paragraph in a recent number of the Vancouver "World" states that the saw-mills of that city and along the coast are filled with orders for six months ahead, and that the prices for logs are high. The camps have been able to work more continuously than is usual at this time of the year, though there seems little reason to doubt there will be some degree of scarcity. Cedar logs are in even greater demand than fir, and in Vancouver and Victoria the call for the former is said to be so insistent that there are not enough for export.

* * *

In his report of 30th Oct. to Government, Mr. McNamara, the Canadian agent at Manchester, says:—"I attended the apple salesroom this week, and saw the contents of many barrels dumped into baskets for inspection of the buyers, and am pleased to be able to state that the packing and grading were right, and that the condition of the fruit was excellent. Fairly high prices were obtained, and as much as twenty-five shillings per barrel, or $6.07, was realized for twenty barrels of 3X Baxters." This is the sort of thing that Canadians delight to hear. The report further states that while prices for Canadian apples are greatly better than those of last year, they should have been higher still, considering the comparative failure of the English crop. Liverpool reports arrivals of Canadian apples this season up to October 7th, at 95,528 barrels, as compared with 172,650 barrels all last season.

—The promoters are busy with a scheme for building a line of railway from Victoria to the north end of Vancouver Island, and connecting it by ferry with a new American line at Port Angeles, Wash., which will be constructed from the latter point to Olympia. It is stated that for the Canadian line a land grant of something like 8,000 acres per mile will be asked, the company paying taxes on the land from the start. Capital, it is being understood, is being obtained from Europe. Opinion on the Canadian Pacific Coast is to the effect that, at the back of the whole scheme is the Chicago, Milwaukee and St. Paul Railroad, which is seeking an outlet to the ocean.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, November 30th, 1905, as compared with those of the previous week:—

	Nov. 30.	Nov. 23.
Montreal	$26,999,761	$28,508,950
Toronto	21,780,967	22,367,372
Winnipeg	11,120,874	11,181,806
Halifax	1,764,633	2,145,946
Hamilton	1,529,357	1,628,320
St. John	968,416	954,745
Vancouver	1,982,272	2,181,082
Victoria	719,497	590,078
Quebec	1,762,726	2,090,753
Ottawa	2,608,262	2,704,415
London	899,438	1,063,253
Total	$72,136,203	$75,416,720

Vault doors in Bank of Montreal and Royal Trust Company, Montreal Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

News comes from Winnipeg of the sudden death of Mr. Fred. W. Morse, vice-president of the Miller-Morse Hardware Co., and one of the best known business men in that city.

* * *

D. Gilchrist is forming a company to erect a factory in Stratford for the manufacture of wooden boxes, and the city council will submit a proposition to the ratepayers to endorse the company's bonds to the extent of $20,000. The company is to have a a capital stock of $100,000.

* * *

—A young man was on trial in Independence, Kansas, for stealing watermelons. When the jury had retired the foreman asked all those who had never stolen melons to stand and be counted. Not a juror moved, and a verdict of not guilty was returned.—Kansas City Star.

* * *

—The continuous efforts of the universities to pervert the public schools from their legitimate function of preparing for life to the illegitimate function of preparing for a university is a crying evil, says the San Francisco "Chronicle." It overloads the public schools, wastes the public funds, wears out teachers in attempting the impossible and wastes the time of the great majority of the pupils. The schools are constantly spurred into attempting what they can not possibly do.

TRADE WITH MEXICO.

The subject of trade with Spanish America and particularly with Mexico, in view of the recent inauguration of a steamship line between the two countries, is one which ought to awaken more interest in Canadians than it appears to do. A recent report of Mr. A. W. Donly, Dominion Commercial Agent stationed at Mexico City gives some very useful information in this regard, and incidentally some pointers which may possibly be seized upon with advantage by Canadian exporters.

There has been in Mexico this season a considerable shortage in the domestic wheat crop, which has caused a great advance in the price of corn, an important part of the diet of the middle and lower classes. This state of things induced the Mexican Government to lower the duty on wheat by 70 per cent., and it is not unlikely that at the expiring of the term of reduction, viz., December 31st next, the latter will be extended. Should the situation grow worse, it is not impossible, Mr. Donly thinks, that the duties on wheat and corn may both be abolished entirely.

The sugar crop of Mexico for some years past has been increasing materially, so that the export of that commodity makes to-day quite a figure in the commercial resources of that country. Mr. Donly, referring to this fact, says: "Now that the Canadian refineries are directly connected with this market, by the establishing of the Canadian-Mexico Steamship Line, and as this line will undoubtedly be able and willing to grant very favorable freight rates, it would certainly be to the advantage of the Canadian refiners to purchase their raw product in this market. Any advantage they may enjoy, through the preferential tariff, with West-Indian sugar is more than counteracted by the cheaper labor here, and the lower cost of land."

Again, speaking of the enormous increase in the production of Mexican tobacco, the exportation alone of which last year amounted to 1,600 tons, valued at $950,000, he says not a pound went direct to Canada. The best of the Cuban tobacco being mainly controlled by one or two interests, many manufacturers, it is said, have to be content with inferior qualities not equal to the best obtainable in the Mexican market.

Another Mexican article which is making its mark in no uncertain degree is coffee. To-day Mexico is second only to Brazil in America in the production of this commodity, while in quality the former is vastly superior. Last year the total exportation of coffee from Mexico was 18,460 tons of the value of $4,338,000, of which 11,068 tons went to the United States. To Canada, however, notwithstanding that it is a coffee consuming country, only 19 tons came, at least directly. The difficulties of starting a trade are thus touched upon: "Though in the case of both coffee and tobacco, it is somewhat difficult to purchase here, as the large American and European dealers send their buyers to the country to contract the crops before being harvested, still there are a few independent dealers whose names I shall gladly furnish to those interested. The same difficulty, though in an aggravated degree, exists in regard to Henequen (Sisal) which is exported from Yucatan. Should Canadian manufacturers wish to procure large quantities of this fibre direct, it will certainly be necessary to send a buyer into the field to contract same, on the same basis as the American and European dealers. There is no way of purchasing, on the spur of the moment, a quantity large enough to make a ship's cargo, and any purchases so made would be at an advanced price.

"Those Canadian firms who wish to open up a successful trade in Mexico should be convinced, by the experience of others, that this can only be done by a competent personal representative who thoroughly understands the line he is desirous of introducing. Circulars and other advertising matter are an aid, without doubt, but only as auxiliaries to the personal effort of the agent. Here it is a question, in introducing a new article, of convincing not only the consumer, but also the dealer, of its particular merits. It is not, as a rule, sufficient to appoint some local dealer as a general agent, thinking that any efforts he may make will ensure any modicum of success. On the contrary, agencies placed in this way seldom give any results, the samples, if any are supplied, frequently being stored away out of sight and out of mind. There are a few firms here in a position to do justice to such agencies, but before coming into the field it would be always well for some member of the firm to make a thorough investigation."

* * *

THE LAKE ST. PETER CHANNEL.

Some facts of interest as regards the channel of the St. Lawrence river below Montreal are found in a paper by A. W. Robinson, M. Can. Soc. C.E., read before the Canadian Society of Civil Engineers. He is describing the work of a hydraulic dredge, built by the Polson Works, of Toronto, for the Government of Canada, and incidentally gives some facts and figures about the route, thus: The Lake St. Peter channel is part of the improvement in navigation of the River St. Lawrence between Montreal and Quebec. This work has for its aim the passage of ocean vessels to Montreal, making that city the point of transhipment of the inland lake and rail traffic by the St. Lawrence route to the sea. This section of the river is 160 miles long between the cities named, of which about sixty miles is dredged channel in about twenty different places.

The kind of material met with in this channel varies in the different localities from soft clay to slate rock and stones. The dredging machines, therefore, must be different in their character for the different sections of the work. The original least depth of water in the channel, the author tells us, was ten feet, "this being the nearly uniform depth on the flats of Lake St. Peter, which is a shallow expansion of the river about nine miles wide by eighteen miles long. The bottom here is of blue clay of a varying degree of softness, with some sand and stones in places." The following table of the successive stages of water attained and the dates of completion is appended:

	Feet.
Original depth of water in channel............	10
Dredging commenced in 1832.	
Depth completed in 1853......................	16
Depth completed in 1858......................	18
Depth completed in 1865......................	20
Depth completed in 1878......................	22
Depth completed in 1882......................	25
Depth completed in 1888......................	27½
Depth now nearly completed..................	30

This is the "thirty-foot channel" which Hon. John Young and his successors had in their minds as necessary to be completed before Montreal could become the ocean port which it had long before been determined to make her. Of course, the deepening has gone on to a depth beyond that proposed by its earlier advocates; but having in view, no doubt, the marvels accomplished in the deepening and lighting of the River Clyde from Greenock up to Glasgow, the successive stages of the improvement of the St. Lawrence has been reached.

The fact that this great work was commenced in 1832 and prosecuted with more or less continuity ever since, says Mr. Robinson, is eloquent testimony alike to the importance of the work and to the energy, pluck and perseverance of those early pioneers, who so boldly faced a work of such stupendous magnitude with the primitive appliances and slender financial resources which they then possessed. It is, indeed, a fortunate fact that all this early work still remains to the good, and that the character of this noble river is such that its bed is practically unchangeable. In this respect it is unlike the alluvial Mississippi, which requires a fleet of ten powerful dredges to maintain the channel It is important to bear in mind what follows, namely, "that in the public mind unacquainted with the facts, there exists a widespread impression that much of this dredging is of a temporary nature, and that it must naturally fill in again. This is entirely erroneous." One is glad to

learn that it is erroneous, but the impression to the contrary has been widespread, and is not, we think, so "strange" as the author finds it. The geological formation is such that there is practically no erosion of the banks, and the bed of the river, he tells us, is composed of various kinds of material, some of which is very difficult to dredge, and all of which (with the exception of one or two unimportant places where sand occurs) remains in place. Surveys and soundings made sixty years ago correspond closely with those of the present day. The work [done], therefore, is permanent."

The size of ships using the St. Lawrence route has steadily increased during the last forty or fifty years, and has at all times been fully up to the limit of the depth of water. Bearing in mind the continued deepening of the waterways and harbors of the Great Lakes of America, and the constantly increasing size and draught of ocean-going steamers, there can hardly be said to be any rest-and-be-thankful stage for those who wish to see the St. Lawrence route to the sea made an up-to-date one.

* * *

PUSH AND SAFETY.

Mr. Andrew Carnegie is reported to have expressed the opinion in a recent interview that the men needed in America as the occupants of fiduciary positions, such as the managers of great insurance companies, and so forth, are men "who have retired from grubbing for dollars," and who in such positions of trust could be relied on to attend to their responsibilities as carefully as they would to their own affairs.

Mr. Carnegie, no doubt, is an authority on the question upon which he speaks, but to many people we believe there would appear to be another side to it, opposed to that to which Mr. Carnegie affixes the weight of his support.

It is true that men who have already accumulated fortunes may generally be looked on as safe advisers. They act as a sort of governor or balance-wheel to prevent new undertakings being entered into without a proper measure of previous reflection. They are "safe" because, under their guidance, the affairs of any institution at which they are at or near the helm, are not likely to be plunged violently into waters where they can be easily swept off their feet.

On the other hand, in all business, and more particularly modern business, while safety is an important consideration, it is very far from being the only factor of success; nor does an absence of bad debts necessarily mean the progress, without which no business house can long succeed. The men who have retired from "grubbing for dollars," as Mr. Carnegie poetically puts it, often act as though the corporation they are directing had also retired. It needs in addition to the warnings and the safety which come from their experience, the energy and enterprise, the powers of initiative, and the constant struggle towards larger aims, that are the portion of men who have not yet made their fortunes, of men whose ambition is as yet far from being fulfilled, and who, for this cause, are more likely to push a live institution along the road which leads to eminence. The two characters serve admirably, the one as a counterpoise to the other; but, safety while of the utmost importance is no more essential to any undertaking than is the equally important feature of constantly renewed momentum, without which, all the safety in the world will not preserve it intact.

UNITED STATES NATIONAL BANK NOTE CIRCULATION.

In reply to a subscriber we would say that the banks organized under what is known as the National Banking System are the only ones in the United States which issue circulating notes. The issue of notes by banks organized under State banking laws is prevented by a tax of ten per cent. per annum which is imposed on such issues.

Each National Bank, as a preliminary to commencing business, is required to deposit with the treasurer of the United States registered United States bonds to the extent of not less than one-fourth of its capital provided the capital is $150,000 or less, or for the sum of $50,000 if the capital exceeds $150,000. It is then entitled to receive from the comptroller of the currency circulating notes of different denominations to an amount equal to the par value of the bonds deposited, so long as such bonds remain at or above par in the market, provided always that the total of circulating notes so issued to any bank shall not at any time exceed the total of its paid-up capital stock. Not more than one-third of each bank's circulation may be in the denomination of five dollars and notes for lower denominations are prohibited. Each half-year on the average amount of notes in circulation a tax is paid, amounting to quarter of one per cent. on notes secured by two per cent. bonds of the United States or half of one per cent. on notes secured by bonds bearing a higher rate of interest.

* * *

CHATHAM, ONTARIO, "THE MAPLE CITY."

Even more striking than the illustration forecasting what Chatham will be in 1925, with ten-story buildings and local air-ships, is the map on page 9 of the "Daily News" of the 21st of November, showing what already exists in the way of villages around Chatham and the network of railways and tramways which connect or presently will connect Wallaceburg, Dresden, Petrolea, Thamesville, Ridgetown, Rondeau, and a dozen villages with the "Maple Leaf" city. There is the Chatham, Wallaceburg and Lake Erie line, with an extension northward by-and-bye, and there will be the Rondeau, Ridgetown and Wallaceburg line and a loop to Dawn Mills, Norfolk, and may be a branch to Florence; then to Windsor. Essex, and Lake Shore tramline will place Chatham in connection with Kingsville, Leamington, Wheatley. Then, of course, there are the trunk lines of steam railway, the Grand Trunk and C. P. R., also the Michigan Central and the Walker line, besides the river Thames. If these various feeders and outlets do not result in an abundance of trade for the merchants and manufacturers of that place it will be the fault of the latter.

That the citizens of Chatham have no fear for the future and that they are making fairly energetic struggles in the present may be learned by any one who will read any one of the sections of the 24-page illustrated edition of the paper just mentioned. Engine works, lumbermen, woodworking factories, waggon factories, steam-heating works, the Gray & Sons carriage works, the Defiance Iron Works, as they exist, are all pictured, and there are portraits of the Malcolmsons, the Stevenses, the McKeoughs, the Balls, the Gordons, who for years have been building up the city and the county of Kent. The illustrations of the public buildings are interesting too, while the residences pictured are indicative of comfort and of taste, and the bowling green shows the citizens love recreation. The cuts of Wallaceburg are welcome: they assist to show, especially that of the sugar beet factory, how energetically her citizens worked to bring that town up from a nearly buried village to its present status.

We should do less than justice to the industry and skill shown in compiling this "Inter-Urban Electric Railway Edition" if we did not remark upon the municipal information given in it. The city now owns the water-works system and has ambitions towards civic ownership in other directions. The population of the place has advanced from 2 070 in 1851 to between 10,000 and 11,000 to-day. Statistics of its trade indicate a very remarkable growth in recent years. In 1880 the whole trade of the town, inward and outward, amounted to but half a million dollars; in 1900 it exceeded a million; but last year the imports were $1,025,-700, and the exports $981,612, equalling $2,007,000 in all; while this year's figures will exceed a million inwards and a million outwards. It is an interesting and pretty place, this "Maple City" of South-Western Ontario, as well as a busy and enterprising place, and we are pleased to see that through the energy of the "News," its progress has been so well described.

* * *

—Among the recent enquiries relating to Canadian trade received at the Canadian Government Office, in London, were the following: An Irish firm of wholesale provision merchants, with English and Scotch connections, desire to reach good creameries in Canada who will consign butter; also with large exporters of bacon and hams from Canada. A London importing firm wish to be supplied with good, sound square cut timber ½-inch to 6-inch, in beech, birch, maple, etc., C.I.F., London. The names of reliable shippers of Canadian provisions—cheese, butter, eggs, bacon, apples, and fruit of all kinds are enquired for. A firm of furriers in Montreal are seeking the representation in Canada of a good English house in the trade. A Toronto importer and agent is desirous of obtaining an agency for twines, webbing, hessian and jute goods.

The FIVE per cent. Debentures issued by this Company afford the following advantages:

The investment can be converted into cash at any time after two years by giving sixty days' notice.

The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.

The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.

The Debentures issued by the Company will be a first charge upon the assets.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

The Securities Corporation of British Columbia, LIMITED.

INCORPORATED.

HEAD OFFICE: VANCOUVER, BRITISH COLUMBIA.

DIRECTORS:

FRANK S. BARNARD, Chairman, Victoria, B.C., Director of The B. C. Electric Railway Co., Limited.
DAVID R. KER, Victoria, B.C., President Brackman-Ker Milling Co., Limited.
RICHARD HALL, M.P.P., Victoria, B.C., Director of the Victoria Sealing Co., Limited.
ROBERT KELLY, Vancouver, B.C., of Kelly-Douglas Co., Wholesale Grocers.
HON. F. L. CARTER-COTTON, M.P.P., Vancouver, B. C., Managing Editor of The News-Advertiser.
WILLIAM FARRELL, of Farrell & Tregent, Vancouver, B.C., President, of B. C. Telephone Co., Limited.
PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as seems safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

AUTHORIZED CAPITAL, $1,000,000.00

In Ten Thousand shares, of the par value each of $100, are offered for subscription at $110 per share.

Payable $5 per share on application, $5 in 30, $5 in 60, and $5 in 90 days, and thereafter to be subject to a call of not more than $5 per share per annum until fully paid.

Five per cent. interest will be paid on all payments in advance of calls until such time as the applicant may elect to receive such dividend as may be declared by the Corporation in lieu of interest. These shares may be paid in full at any time.

SUBSCRIPTIONS for the Shares will be received at ANY B. C. BRANCH OF THE BANK OF MONTREAL, or at The Bank of Montreal, Quebec, Montreal, Ottawa, Toronto, London or Winnipeg and at the CORPORATION'S offices, Vancouver, B. C.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000.000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,050
Union Trust Co.	1,000 000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

The Temiscamingue Reduction Works, Limited, Cobalt, Ont., has been granted a charter. Its capital is placed at $166,000.

Mercantile Summary

The business career of J. P. Lefebvre dry goods retailer in Montreal, has been a brief one. He began business in February, 1905, having been for a number of years a clerk in the leading establishment of H. Morgan & Co. He has now stopped.

Red Deer, Alberta, has now, we are told, more than a thousand people. and is growing apace. Already it is lighted by electricity, and in the spring will have a water supply. New buildings, both residential and commercial, continue to go up. The Alberta hotel is enlarged, and the "News" has increased its premises and added new machinery.

They were mostly vigorous men, those merchants of Montreal's earlier days. A visitor from Montreal this week reminds us that Mr. William Kinloch celebrated his 88th birthday last week. Well do we remember him as of the firm Kingan & Kinloch in 1870, and at a later stage of Kinloch, Lindsay & Co., wholesale grocers in that city.

After being for twenty-five years in the baking business at Victoriaville, Que., J. Faucher has assigned. He is said to owe as much as $6,000, while his assets are very light, and he is said to be proposing a 10 per cent. compromise with his creditors.

The Montreal firm of V. Brousseau & Co., manufacturers of syrups in a small way, and dealing in grocery sundries, have assigned. Mr. Brosseau was some few years ago engaged in general business at Bedford, Que., where he was unfortunate in being burned out, and in consequence failed.

The estate of R. Lakeman, general dealer at Compton, Que., has been placed in the hands of J. P. Royer, accountant, Sherbrooke, for liquidation. Lakeman became involved last May, when he arranged with his creditors a general extension, but defaulting in the second instalment, insolvency proceedings have been instituted.

We observe the incorporation of the John Macdonald & Co., Limited, to acquire and carry on the business of the well-known Toronto wholesale house of John Macdonald & Co., importers, manufacturers of and dealers in dry goods. The capital is to be $1,000,000; provisional directors, John Macdonald, James Fraser Macdonald, Duncan MacGregor Macdonald, Annie Elizabeth Macdonald, and James Glanville.

A meeting of the retail merchants of Mount Forest, Ont., was held on Thursday night of last week, when it was unanimously decided to form a branch there in connection with the Retail Merchants' Association of Canada. The following officers were elected:—President, J. P. Noonan; 1st vice-president, J. N. Scott; 2nd vice-president, G. P. Bateman; treasurer, J. S. Ireland; secretary, Walter Ellis.

A judicial abandonment has been made by A. J. Caron & Co., dealing in boots and shoes at Chicoutimi, Que. Caron, who has latterly been doing business under cover of his wife's name, was formerly in the same line of business in Quebec city, with a rather unsuccessful record, and moved to his present more remote address in 1903. In June, 1904, he was obliged to go into insolvency, getting no compromise settlement, and now again he is in the assignee's hands.

An assignment has been made by Armand Giroux and Mrs. B. Charbonneau, doing a dry goods business in Montreal, under the style of "Le Louvre," a name imitated from Paris. Giroux bought the stock of the late N. Toussignant, (an old established retailer, who died in 1901), under a peculiar arrangement, agreeing to pay the widow at the rate of $1,000 a year for the assets, which were valued at something over $30,000. Last summer he took into partnership Bruno Charbonneau, who had previously been unsuccessful as a retailer on his own account, leaving to him the main management. The liabilities are reported at about $39,000.

26 KING ST EAST TORONTO.

Mercantile Summary.

The first receipts of zinc ore at the reduction works at Frank, Alta., arrived a few days ago, from the Goodenough mines, and it was speedily converted into pig-zinc. This is interesting, as being, we understand, the first thing of the sort in the Dominion.

The St. Louis Shoe Co., manufacturers in a small way in Montreal, have assigned. The partnership, only formed last summer, is composed of B. Vaillancourt and L. E. Gagnon, the latter being an insurance agent, who took no active part in the management of the shoe business. Vaillancourt, though a practical man, was unsuccessful on his own account in 1904, as well as on a previous occasion.

It is announced from Montreal that Mr. Robt. Kerr, chief of the passenger traffic department of the C.P.R., issued a circular containing the promotion of Mr. G. McL. Brown, now superintendent of sleeping and dining cars, to be general passenger agent of the company's Atlantic steamship service. His office will be in the Board of Trade building, Montreal, and the appointment takes effect from to-day. It was further announced that Mr. G. A. Ringland has been appointed assistant passenger agent of the same service.

The Ontario Government has made a new contract with the Colonial Cordage Company, who have taken over the binder twine plant at the Central Prison, Toronto. It is to receive fifty cents a day for every ten-hour day of convict labor, with an additional revenue of three dollars per ton for every ton of twine and rope made, there being a guaranteed output of at least one thousand tons per year. Against this the Government has to pay for free labor in salaries, uniforms, meals, less than $1,000 per year, and also to pay for the development of power as under the old contracts with the Independent Cordage Company approximately $5,500 per year. Under the new contract the farmers are entitled to twine at one cent per pound in advance of cost.

There are many who regard it as a privilege to contribute to the up-keeping of the Toronto Hospital for Sick Children. And to such as are familiar with its working the appeal made yearly on behalf of that very worthy charity never falls on unsympathetic ears. To those outside the city who may not be conversant with the growth and importance of this hospital, we may say that it has treated since its foundation, eleven thousand children, about eight thousand of whom, being unable to pay for either nursing or surgical treatment were treated free. Last year alone it treated 891 patients, and 316 of these came from 217 places in Ontario. Contributions may be sent to J. Ross Robertson, chairman, or to Douglas Davidson, secretary-treasurer, of the Hospital, College Street, Toronto.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Riordon Paper Mills, Limited, has been authorized to increase its capital stock from $1,000,000 to $2,000,000.

The Spadina Avenue roundhouse of the Grand Trunk Railway Company in Toronto was on Monday last damaged by fire, as well as several locomotives, the total loss being in the neighborhood of $20,000.

The Ontario Gazette gives notice of the granting of a charter to the Canadian Typewriter Company, Limited, which purposes taking over the business of the concern now doing business in Toronto under that name.

Contracts are being given out for the new Canadian Pacific Railway hotel in Winnipeg, an extensive structure. The T. Eaton Co., it is understood, has secured the contract for all the brass beds and mattresses. The order for table cloths and other linen has been given to Archibald Wright, of Winnipeg.

A telegram from Amherst states that Messrs. B. E. Pearson and J. Johnson, of Halifax, have succeeded in interesting some wealthy Pennsylvania capitalists in their large coal areas in the territory which is being developed by the Standard Railway and Coal Co. These areas extend from the Cumberland coal basin through Apple river up to the Joggin mines. It is likely that steps will shortly be taken to develop them.

The Berry Lubricator and Machine Company, Limited, Ottawa, has received a charter from the Dominion Government authorizing it to acquire the patent rights of Berry's Automatic Journal Lubricator, etc., to deal in and manufacture machinery, etc. The capital stock is placed at $250,000, and among those interested are Jas. Walker, of Montreal, and Austin Berry, of Shefford, P.Q.

Mr. L. J. Sergeant. who ten years ago or more was general manager of the Grand Trunk Railway Company, died in London on Tuesday last. Mr. Sergeant still retained the position of director of the company at the time of his death. He had been a railroad man of experience in England, and was appointed traffic manager of the Grand Trunk in the year 1874, and a remarkable feature of the appointment is the fact that that office was practically created for him, he being the first traffic manager on this continent. He was promoted to the office of Vice-President and General Manager in 1890, in succession to Sir Joseph Hickson.

TORONTO, ONT.

A charter has been granted by the Ontario Government to East & Company, Limited, Toronto, who will carry on, as before, the manufacture and sale of umbrellas, trunks, valises and leather goods generally. The share capital is placed at $100,000.

Mercantile Summary.

The Mount Forest Carriage Company, Limited, has been authorized to increase its capital stock from $50,000 to $100,000.

The well-known turbine steamship "Turbinia," which all summer plied across the lake from Toronto to Hamilton, is now under the control of the United Fruit Company, who are using her on the route between Havana, Santiago de Cuba and Port Antonia, Jamaica.

The Canada Turpentine Company, Limited, Ottawa, capital $200,000, just incorporated, will acquire certain patent rights affecting the manufacture of turpentine, tar, charcoal and allied wood products, from Robt. Alex. Sibbitt, and will manufacture and refine and deal in those articles.

The Corrugated Steel Bar Company, of Canada, Limited, capital, $50,000, has been incorporated. It will acquire patents relating to corrugated bars, etc., and manufacture and deal in the same; G. E. Drummond, J. T. McCall, and other gentlemen prominent in the iron industry in Montreal are interested in the enterprise.

R. E. Kinsman and others, of Hamilton, Ont., have formed a company to take over the lumber business carried on at present by Mr. Kinsman in that city, and buy, sell, import and export timber of all kinds, and to deal in timber limits and concessions. The capital is placed at $50,000.

On the 26th ult. a rear-end collision occurred between two passenger trains on the Fitchburg division of the Boston and Maine Railroad, near Lincoln, resulting in the death of at least sixteen people and the injury of thirty-nine others. The trains in collision were the local leaving Boston for stations on the Marlboro branch and the heavy passenger for Montreal. The latter train was drawn by two locomotives, and it crashed into the rear of the local with terrific force, telescoping two cars, the wreckage of which caught fire. None of the passengers on the Montreal train were seriously hurt, but the engineer and fireman of the leading locomotive were killed.

Pelee Islanders complain bitterly that they have no proper facilities for marketing their produce, and some of them are said to have gone to the length of suggesting that the United States should be asked to purchase the island. The Canadian Government has neglected, in spite of many promises, it is alleged, to provide the needed facilities, such as a ferry all the year round and supplementary means for marketing produce in the harvest time. Lying at Lake Erie's west end, this island is one of the richest and most picturesque portions of the Dominion, and it is a shame that something tangible has not been done for it in the way of transportation long before this.

"Contract Bonds insure completion of buildings."

The Hamilton Facing Mill Company's factory in Hamilton was badly damaged by fire the other day, probably to the extent of $20,000.

The "Empress of Britain," the first of the new passenger steamships which the C.P.R. intends building, to add to its Atlantic fleet next season, was successfully launched at Glasgow on the 17th November. She will make her first trip from Liverpool to Montreal next May. The "Empress of Ireland" will be launched in January. Both have a displacement of 20,000 tons, and a speed of twenty knots, making the run across the ocean to Montreal in six days.

The Home Telephone Company, which has systems in about thirty-five cities in the United States, makes a proposition to put in a million dollar plant in Vancouver. The system has the advantage of being an underground one, and in connection with it there is no "central," the user connecting himself with the desired number by the manipulation of a few keys, thus acquiring absolute secrecy. The company is putting in long-distance systems in the State of Washington.

The Grand Trunk Pacific Railway, with a view to choosing a name for their terminal city on the Pacific Coast which shall be appropriate and thoroughly Canadian, are offering a prize of $250 in cash to the person whose suggestion is preferred. The name is to be not more than three syllables nor more than ten letters; it must be purely Canadian, typical, if possible, of British Columbia, and not to conflict with the names of other towns or post-offices already in existence in Canada. Accompanying each name, each competitor should write a short explanatory article.

The old Huron and Ontario Electric Railway Company is being reorganized with a view to starting work on the proposed line from Owen Sound to Meaford. The company has already expended $100,000 in construction work in the southern part of the Province. The proposed line in this section of the Province will run from Walkerton to Owen Sound via Hanover, Durham, Priceville, Flesherton, Thornbury, Meaford to Owen Sound. There is said to be every possibility that the line from Meaford to Owen Sound will be built next summer.

The Bucknall Steamship Lines Company, of London, Eng., has made a three-years' agreement with the Dominion Government to run a two-monthly cargo service between Canada and New Zealand, this country granting a subsidy of £10,000 per year, and it being believed that New Zealand will do the same.

* * *

THE TEXTILE CENTRES.

While the demand for raw silk shows a slight improvement, says the New York "Dry Goods Economist," over the apathy of the last few weeks the volume of business consummated does not speak very well for any increase in the needs of manufacturers. One of the most satisfactory signs of the industry is the restriction of production which is going on very generally and which must result in the depletion of supplies, bringing about eventually a more satisfactory state of affairs. Demand to-day, however, is only for immediate consumption on special lots of silk to fill in where preparations were not large enough to meet the demand for some particular fabric. Prices remain practically unchanged in this market, although importers are not willing to assert that the bottom has been reached by any means. From Yokohama it is reported that a small business has been done, but receipts more than counterbalance the reductions in stock made by these sales. The stock in Yokohama is estimated at about 20,000 bales, which is regarded as liberal for this season of the year. In Canton and Shanghai business is restricted to a certain extent by the high rates of exchange, which have kept prices at a level on which business is very difficult. In Italian silk there is a disposition to hold for higher prices as it is claimed reelers are making a loss on every pound sold at the present basis.

The latest advices from abroad are to the effect that the gray cloth market is practically sold up on fine-count goods for dyeing, printing or embrodiery. Agents and importers on this side are therefore refusing to accept any further orders for delivery prior to next April. As a result prices are very firm with an upward tendency. As practically the same situation exists in the New York market in all grades of fine-count yarns suitable for making white goods, prices remain at a high level all along the line, and there is no possibility of a decline. On the other hand, some advances are spoken of. The situation is certainly very firm, and it is immaterial whether the immediate demand is heavy or not. Most of the mills are sold up and could not take further orders; those that are not, are by no means seeking new business.

A special correspondent of the "Dry Goods Economist" says that, taken altogether the styles of the present winter in Paris are prettier than those seen for some seasons past. The long skirt with its graceful, supple, drooping folds, accompanied by the full-length jacket or coat of fitted form presents a very elegant appearance, and this is the type of toilette assuming anything of a dressy order that is adopted. The tailor suit in which the skirt, though not short, has but slight train effect, and the jacket, mostly of three-quarter length, is of a fitting order is the general favorite for ordinary wear. The costume consisting of a short round skirt, completed by the really short and fitting jacket, or else the bolero, is most suitable for morning walks or shopping. These, for outdoor wear, are the three types of the season.

The prices of all kinds of both colonial and home-grown wools remain unchanged, and there is hardly likely to be any movement in values of importance until after the opening of the London colonial wool sales, when it will be possible, says the Bradford correspondent of the "Drapers' Record," to ascertain the views of both home and foreign buyers as to the course of values in the early future. The wool situation has been most difficult to gauge for some months past, as it has been impossible to estimate the extent of the increased consumption of either merino or crossbred colonial wools, which has resulted from the generally improved trade in both the home and shipping markets, and, therefore, one could not foresee to what extent the increased supply of Australian wool would relieve the pressure of shortage in supply which has forced up the prices to such an unusually high level. The present position is still further complicated by the disturbed state of Russia and the large strike of weavers in Germany, as the flow of large orders for worsted yarns from here to those two countries must be considerably interfered with. The prices of pure merino wool cannot be considered really high, when compared with those of the coarser fibred sorts, or of cotton, the other raw materials which enter most largely into the composition of wearing apparel, and as the new Australian merino wools are being

C. H. NEWTON, President. FRANK E. McGRAY, Manager.

sold on the other side at an advance of only some 7 per cent., as compared with a year ago, there does not seem to be much danger in users of merino wool textiles operating on the basis of to-day's rates. In the case of the coarser fibred crossbred wools (from which the great bulk of the Continental export yarns are made) it seems probable that the temporary defection of the two great using countries, Russia and Germany, may have the effect of making the prices of these wools rather easier for the time being, and if a settlement in Germany is not arrived at soon, of course the effect on values would be proportionately greater. The demand for both raw wool and for worsted yarns in the home market is certainly improving, and in Bradford district generally looms are in much better employment, and the prospects for the coming year are decidedly better than they were from the manufacturer's point of view.

The troubles in Russia are having a considerable influence on the Belfast flax market. Shipments are uncertain, and prices have been advanced. There have been fairly good supplies in the home markets, and these were disposed of at full late rates. Stocks of yarns are in very small compass. Spinners are oversold, and there has been a considerable demand for foreign spinnings, while prices have hardened.

⁂

TRULY, WATSON IS A FOOL.

Doctor Johnston.—Is it true that Watson's mills have been burned to the ground?

Agent Jones.—Yes.

Doctor.—How much insurance?

Agent.—None.

Doctor.—Oh! What a fool!

Agent.—By the way, doctor, are your buildings insured?

Doctor.—I don't own any building.

Agent.—How do you invest your money?

Doctor.—I do not invest any. I have a good income from my profession, but my family expenses eat most of it up.

Agent.—Then if you die, your wife and daughters will carry on your business.

Doctor.—My dear sir, I am a physician; how can I leave my practice with a parcel of women?

Agent.—Then your income ceases at your death?

Doctor.—Yes.

Agent.—How much assurance do you carry on your life?

Doctor.—None.

Agent.—Ahem!—Yes, you are right, Watson is a fool!—Business.

⁂

TORONTO MARKETS.

Toronto, November 30th, 1905.

Chemicals, Drugs, etc.—The market for all the principal staples remains quite firm, with a normally good local demand. Cod liver oil is a little easier Carbolic acid is likewise. The chemical markets of the south are said to be rather exceptionally strong. In England the export of staple chemicals is going on more briskly. For home trade, the requirements seem small.

Dry Goods.—A large volume of trade of a general character is being done, though no doubt had it not been such mild weather, the requirements in the way of seasonable heavier goods would have been somewhat larger. No anxiety is expressed on this score, however. The position of the raw cotton market has been unsettled, though strong on the whole, but this uncertainty has not been allowed to affect the values of finished goods, which are all very firm.

Flour and Grain.—A quiet demand has prevailed this week for wheat, while holders have been content to wait. Good business has been done in Manitoba flour, while of Ontario flour the deliveries have been light with little export demand. Bran and shorts are in very good demand, with the former particularly scarce. Barley and oats are a little easier. For Canadian corn there is no great demand as yet. Rolled oats are firmer.

Fruits.—The demand for foreign fruits is increasing with the disappearance of the domestic. Oranges are selling at normally good prices.

Hides and Leather.—In sympathy with easier prices in Chicago, the tone of the market here for hides is less firm than it was, though as yet there is no appreciable change in prices. In leather no very great amount of business is now being done, but prospects continue good for a good season's trading.

Groceries.—No further change has occurred in sugars, and the position of the market both locally and in New York remains much as before. The movement is only fair. In keeping with the season of the year, the demand is increasing for dried fruits. Currants are in good demand, and so are sultanas. Prunes are not apparently selling over-readily. Teas are firm, while for coffees the enquiry seems temporarily to have gone off a little. There is a brisk demand for canned goods of all descriptions.

Seeds.—Most seeds are more firm than they were a couple of weeks ago. Alsike, for instance, is quoted as high as $6.25 to $6.50 per bushel for No. 1. Red clover keeps unchanged at $7. Timothy is easier. The efforts of the pure seed advocates seem to be gaining ground, for seeds where the admixture of weeds or foreign substances is at all pronounced meet with a great reduction in price.

Provisions.—For really good butter the market is a firm one, and prices are unchanged, but considerable quantities of inferior quality are coming in, for which values are naturally easy. Cheese is firm, at 12¾ to 13c. Eggs are very firm in price, with less plentiful receipts. Much of the poultry coming to hand is poor stock, and for this prices are easy. The season for game is now practically over. Smoked meats are in good demand for this time of the year.

Wool.—Prices are unchanged for wool, but the market is a dull one, and little business is being done.

Life Insurance does for a man what he cannot do for himself—provides against the unforeseen.

MONTREAL MARKETS.

Montreal, 29th November, 1905.

Ashes.—The market is now particularly flat, and with the departure to-day of the last ocean steamer for the season it will likely remain so for some time. There is practically no stock of potash or pearlash in store, not more than a dozen barrels in all, but from $5.25 to $5.35 would probably be a full present quotation for No. 1 pots; seconds, about $4.75; pearls, $7 to $7.50 per cental.

Cements and Firebricks.—Business in cements is now quiet, but there is fair demand for firebricks. Stocks have not yet been removed from the wharves, and summer prices still hold, but are likely to be changed in course of a week or so. In the meantime we quote Belgian cement at $1.80 to $2; English, $1.90 to $2.10; Canadian, $1.90 to $2.10; firebricks, $17 to $21 per thousand.

Dairy Products.—The shipping season practically closed on Saturday, though one or two last steamers this week will take out some moderate lots of both butter and cheese. For the week, exports of cheese were 42,933 boxes, bringing the grand aggregate up to 2,119,920 boxes, figures just a round 7,500 in excess of those of the year previous. Of butter only 845 packages were shipped, making the total for the season 554,041 packages, as against 485,458 packages a year ago. Prices of late-made cheese are easier, but best October makes of Western cheese are held at 12¼ to 12⅜c., with Quebec's quoted at from 12 to 12¼c. There is practically no export demand for butter at the moment, and values are barely as strong as they were a week ago. Choice to fancy creamery quotes at 23½ to 23¾c.; dairy, 20 to 21; rolls, about 21½c. per pound.

Dry Goods.—After a day or two of cold weather, which hurried away the last boats, we are again having a moist, slushy time, which does not at all suit the views of city dry goods retailers, and collections from this source are not as liberal as they might be, while wholesalers would like to see more briskness in sorting business. Orders for spring delivery, however, are coming in well. The Montreal Cotton Co. gives notice of an advance in price of sateens, jeans, pocketings, Italians, etc.

Furs.—Owing to the prolonged open spell, dealers are backward in establishing actual quotations for new catch. Receipts so far consist of some few lots of mink and musk-rats, the former being of good color, but thin-haired, as a rule. Persian lambs are held very firmly, and it is claimed, are bound to advance in price.

Groceries.—There has been some decline of activity with the close of navigation, but for the season of the year there is a fair movement in progress. With regard to values, no late noteworthy changes have been made. Refiners report good demand for sugars, which are about steady at $4.30 for standard granulated in barrels. There might be the possibility of a slight advance, but for the fact that there have been some fair importations of European refined. Some sales of round lots of Barbados molasses from first hands are reported at 30 to 30½c.; jobbers quote 35c. per gallon, in single puncheons.

Hides.—Lambskins bring $1 each, and will probably be advanced next week. Hides are unchanged at 11½ to 12c. per pound. There is no special activity in the market.

Metals and Hardware.—Further pronounced and almost phenomenal advance characterizes lead, from $4.35 to $4.45 being now asked in a jobbing way; there has been an advance of 16c. in outside markets within the last three days. The discount in lead pipe is still 25 per cent., but a change is expected momentarily. Copper is also steadily climbing upwards, and is to-day advanced to 19½ to 20c.; ingot tin is dearer at 37 to 37½c.; spelter, 6¾ to 7c.; sheet zinc, 7¾ to 8c.; sheet lead, $4.75 to $5. Iron pipe is firmer at $4.37. No recent change has taken place in tinplates, but some advance would not be surprising. Boiler plate, and sheets generally are firm at last quotations.

Oils and Paints.—The movement is gradually slackening off, and holiday quiet will soon prevail. Turpentine is easier at 96c.; linseed oil fairly steady at 45 to 46c. for raw, and 48 to 49c. for boiled, in a jobbing way. Ground white lead firm at $5.40 to $5.50 for chemically pure; putty, $1.40 in bulk. The large sales of damaged window glass, some 9,000 boxes, disposed of at auction as part of the cargo of the wrecked "Virginian," have somewhat disturbed the market, but quotations from stock are steady at lately advanced prices.

THE IRON AND STEEL MARKETS.

Strength is the most obtrusive quality of the iron and steel markets, says "Iron and Machinery World." Whether there is to be a runaway market is not yet ascertained. There is at least hope that there will not be, though a few danger signals are appearing. Ferro-manganese has sold this week at Pittsburgh as high as $100 per ton, a marked jump from the quotations of a week ago. Production is inadequate and needs are urgent. The reported purchase of 50,000 tons of Bessemer by the steel corporation with pending inquiries for twice that amount additional for first quarter shipment are certainly not quieting developments, though it has been known for months that with its steel product sold so far ahead, the corporation would probably have to continue buying pig. An advance of $2 per ton was made early in the week in sheets and tin plates and the same in hoops. But at the conference of the plate mill owners in New York last week, according to eastern reports, it was decided to make no advance in the price of that product, not because the conditions do not warrant it, but because the rise might injuriously affect the buying later and aid in bringing to a premature end the present magnificent demand for the metals.

As the year speeds along, the vista of the coming twelve months grows decidedly brighter. A year ago at this time, those mills, the products of which are consumed mostly during good weather, were beginning to accumulate product at mill for the coming spring trade. But this year this output is said to be going steadily into the trade for current consumption, so that the mills are not yet beginning to accumulate a tonnage for the spring. The consumption of wire and nails, for example, is said never to have been so heavy at this time of year as now. And in various other directions, as far as the new year's business in iron and steel is opening up, the prospects are all pointing to a continued use on the most elaborate scale. If prices can be held to present levels, it is predicted that the new year's trade is practically assured.

Prices of pig-iron have not yet advanced to the figures which some eastern pig men have been predicting would be touched before the end of the year. Just how much more of an advance the users will stand for before the orders begin to slacken, is a question of too delicate a description to be accurately surmised. But main reliance for a continuance of the present quotations must be placed with the buyers. It would not require any very great decrease in the demand to give an easier tone to the market, for the rate of production is tremendously large and if transportation facilities are at all adequate will continue large through the winter.

THE HIGHER LAW IN BUSINESS.

For my single self, I earnestly hope to see the day when all trust funds will be under proper public supervision. But it must not be forgotten that much of the recently exposed corruption is directly traceable to political influence, persuasive or coercive. Therefore, in placing private enterprise under public supervision we must see to it that it is public and not political supervision. Public supervision of trust funds, or corporations generally, is the next step in national development. There is no doubt about this. And therefore, since the Government is to assume business functions, there is a pressing need for the active participation of business men in political affairs. It rests with us to see to it that the supervision of railroads, of life insurance companies, of banks, is free from political taint. The supervisors of these various interests should be selected upon merit alone, without regard to political affiliations. Good behavior should be the tenure of office, and the salaries should be absolutely adequate. And so they may be delivered from temptation.

All this will be done. If not done by business men or through influence exerted by business men and so done in the best way and with the best motives, it will be done by the practical politician in a way peculiarly his own and with motives peculiarly his own.

The business man must become something more than a mere usable factor in politics. He must make his influence felt in the framing of our laws, in their passage and in their execution. And this applies with peculiar force to the banker. For, after all, there is no other class of men so vitally interested in the welfare of the nation. Their very business lives depend upon general prosperity and there can be no prosperity without wise laws, wisely administered. Therefore, it evidences devotion to business, not neglect to business, to give a reasonable part of our time and attention to public matters. Believe me, the time given to local, state and national politics from now until the campaign of 1908 is fought and won will prove the best investment ever made by the business element of this country. The demogogue is now enlarging his vocabulary of vituperatives for the coming frenzied attack upon vested rights. Every trick known to the political mountebank will be used to revive and intensify class hatred. It will be "Down with the thieving plutocrat!" on every anarchistic platform. The rich will be virulently villified. And we poor, humble workers in the financial vineyard will be held up to public scorn and derison as the dishonest rich. God save the mark! The misdeeds of the few custodians of trusts who are in jail, and of a few more who should be there, will be declared the common practice of all our class. And think of the ammunition these exposures of the practices of the few thieving members of our craft will place at the disposal of the forces of disruption in the coming campaign. Ah! my friends, we must awake. We must be up and doing. We must not belittle the effect of the crimes of the betrayers of trusts upon our business and political future. Do not regard these crimes lightly. Let no one attempt to excuse, to palliate, to condone the crimes or evince sympathy for the criminals. If sense of right does not dictate our attitude in this direction, then policy must. Fortunately for the country and its business interests these exposures have come at this time. Basic conditions are so sound panic cannot result. There is time sufficient before the next national campaign to prevent their logical effect. We can always depend upon the discriminating judgment of this people if they have both sides clearly and forcibly presented. Those birds of prey, the political demagogue, the political mountebank, who feed upon discontent and fatten upon misery, you may be assured will do all things possible to disrupt, divide, disorganize the forces of law and order. All men who believe the enforcement of law and order essential to the maintenance of free institutions must unite to render the malign efforts of the disruptionists futile. All men who believe that all our people of every class should be drawn closer together, and not driven farther apart, must stand shoulder to shoulder in the coming contest. It will be a battle royal—let us pray God, the last—between the so-called classes.—From an address by Mr. S. R. Flynn, President of the National Live Stock Bank, Chicago.

THE DANGERS OF GETTING RICH QUICK.

In America where men are "born free and equal," we have every incentive of native pride and inherited hope to do as well in life as our fellow man. It is only by uncommonly fine and lofty self-restraint that an American can be held back from following the leadings of such an ambition. It need not be said that the men who, in the presence of such stimulating incentives, as multi-millionaires do so restrain themselves and compel themselves to be content with smaller wealth, are comparatively few. They are positively rare.

A general strong desire to be quickly rich has always one sure effect on a people. It makes the few very rich, and the many poorer. No more impoverishing temper could possess the great majority of our people than a desire to get rich in the next few years. Fired with this desire the working man that might otherwise have put his little regular savings into a lot and a cottage, will listen with willing ears to the promoters' agent who promises fabulous dividends in mines or oil wells or stocks or mushroom corporations. If we follow the savings from the many small incomes of any large western city, we shall see that an alarmingly large proportion of them have gone from the owners' hands into empty golden promises. These small earners have seen other men grow rich in a year. They hope to do as well. So they trade their small sure holdings for a big uncertainty.

To this popular desire for quick wealth, the institution of life insurance has been for years a powerful and a very active antidote. And it is here, in this very beneficent function of the institution, that the monstrous thieves at the insurance till have dealt our social economy its most staggering blow. Probably three-fourths of the actual savings made by small American wage earners have been passing over into the hands of insurance companies. When the faith in these institutions is shaken, the very financial foundations of our country—the habit of self-denial for future needs—is shaken. Many years of rigid insurance honesty will be necessary to establish once more the popular faith in investment by insurance.

In the meantime the great remedy for poverty, and for over-strained ambition for great wealth (which is in itself a distressing form of poverty) is a deliberate, persistent return to content with reasonable prosperity, an habitual putting away of desire for the things of luxury, and a seeking for large enjoyment in things that are not and cannot be bought and sold.—Commercial West.

AUSTRALIA MAY BE A WARNING.

Mr. Goldwin Smith, writing in the Toronto Weekly Sun, says:

Australia, it is to be feared, is going to give the world a warning at her own expense. In her politics the most advanced ideas have prevailed. Socialism and femininism have had full play. Socialism has assumed a distinctly political form, and revolution in the policy of the Commonwealth was brought about the other day, as it appeared, by the woman's vote. Collective ownership and control of industries have been tried to the fullest extent. Government owns workshops, it owns hotels. It seems in a fair way to become a general employer. Compulsory arbitration has been tried. Pensions have been voted to the aged. The results are seen in a territory of thousands of miles unsettled, a crowding of the people from the land into the cities, an arrest of immigration, a falling off in the birth-rate, a mountain of public debt, flight of capital, and even of savings. In another quarter danger seems to impend. The first article in the manifesto of the political labor party's organizations is the maintenance of a "white Australia," that is to say the exclusion of the Japanese and Chinese, whose competition Australian labor fears, and has reason to fear. But the Japanese and Chinese may demur to the exclusion. If they do, a storm is brewing.

* * *

NATURE AND TINSEL.

Recently I stood on a prominent street of a large city while a storm was approaching. The fiery flashes of lightning were scattering their forked tongues over the arching sky, while the long roll of the reverberating thunder added intensely to the magnificent spectacle. It was indeed a great scene to a lover of nature. As I stood awe-inspired, a mute witness to the grandeur of this display of heaven's artillery, a street urchin of perhaps ten years of age, standing near me, in a burst of enthusiasm, exclaimed, "Gee! it looks like de stage!"

I wonder how many lives, narrow and pent up within the city's confines would compare nature's vast stage with that of the dwarfed, ill-smelling theatre stage, with its rumbling sheet iron thunder and a few ounces of powder made to represent the flashes of lightning.

Of this calibre is the mind of the girl who spends her vacation in the country and is never entranced by the beauties of the songsters in the leafy trees, but must hasten back to see the fall millinery opening, in order to admire the plumage, taken from the dead bird, as it rests upon the gorgeously trimmed hat which she terms "stunning."

Such a narrow-souled being does not see the beauty of living fragrant flowers with their rich coloring, but goes into ecstacies as she holds the artificial flowers which adorn her spring hat. "Gee! it looks like the stage!" are words which fit many lives that are strangers to the glories of nature.—Exchange.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

THE BANK OF MONTREAL MEETING.

> Probably never before have we had a twelvemonth of such universal prosperity, and it is during a year like this that everyone should set his house in order. Collections should be pressed, and manufacturers should husband their resources and strengthen themselves in every way, for they are to a great extent prosperous by the grace of their neighbors, and when adversity comes to other countries, the American bargain counter will be opened in Canada, and our manufacturers and their employees will surely suffer."—Mr. Clouston, general manager Bank of Montreal.

> I can only, in conclusion, echo the General Manager's advice, that the abounding prosperity of our country should be prudently accepted and used. —Sir George Drummond, President Bank of Montreal.

These words of caution are spoken by men eminent in the financial world at the very time when nine persons out of ten will tell you that farmers are doing well, factories are full of work, everything is active and the outlook is first-rate, never better—no trouble in sight. At just such times merchants are in danger of over-buying and manufacturers of over-producing; at just such times promoters are plausible, and speculators are sure to be busy. Therefore, it is of great moment that men whose words and ways can be so influential in the community are sensible enough to stand firm in an attitude of warning that the present good times will not always last. Business men who take the advice above given, overhaul their affairs and get them into manageable shape, will be grateful to these two gentlemen rather than to the sanguine or over-enterprising advisers who prophesy only smooth things.

Now to glance for a moment at this prevailing activity as it is reflected in the statements laid before the Bank of Montreal meeting. An increase of two millions in the circulation of this, our largest bank, during the twelve months, and an increase in the aggregate of Canadian bank circulation from $72,000,000 to nearly $77,000,000 in the same period, is one index of increased business. Another is the volume of transactions shown in the clearing houses of the country. For the first week of November last year the aggregate of clearings was $67,600,000; for the corresponding week this year it was $82,795,000, an increase of more than eighteen per cent. Mr. Clouston seems to think that the margin of $4,500,000 between the total circulation at its highest point this year, and the aggregate paid-up banking capital will be, allowing for the addition of new banking capital, sufficient for the needs of the country for some time to come. Deposits of the public in our banks continued to grow during the year, having risen from $446,000,000 at the end of October, 1904, to $500,000,000 at the end of October last. We have not included deposits in Canadian banks in England and the United States. More than a third of this increase took place in the deposits with the Bank of Montreal. Loans and discounts by the banks usually grow in some such proportions as the growth in deposits. The rise in the Bank of Montreal's loans in the twelvemonth was $7,000,000, part of which was occasioned by the absorption of the People's Bank of Halifax.

It is a comforting reflection for banking customers and a tribute to the adequacy of our banking system, that no such "squeeze" was felt in Canada as afflicted United States borrowers last month, when twenty and even twenty-five per cent. per day was paid for money in New York. "Notwithstanding the heavy demands to move the largest crop in our history," says Mr. Clouston, "the interest rate to our people has remained normal. We have only to glance at the condition of affairs across the line to see what fluctuations in rates for money the public are subjected to under the system there in vogue."

Another circumstance in which a Canadian banker may be pardoned for taking some pride is mentioned at the conclusion of his address: "An interesting event in financial circles was the offering here of a portion of the Japanese loan, the first time in the history of Canada of any foreign loan being issued locally, and, considering the short time at our disposal, the success was surprising."

The remarks made at the meeting by the chairman were, as his references to current commercial events usually are, well worth attention. His opening paragraps on the reduced cost of money to the public, and the steadily decreasing profits of banking find illustration in the statistics afterward given in this connection. As to the staple industry, the lumber trade, he ventures to express the conviction, for which, indeed, he has ample warrant, that "we are using up our resources in a most reckless fashion, certain to end disastrously, unless we take prompt steps to treat it as other crops, and replant on an adequate scale."

Sir George Drummond lays emphasis upon the value of the home market to Canadian producers, whether in factory or on farm, quoting a recent writer to the effect that "Western Canada produced two and a half times as much wheat, twenty-five times as much oats, and thirty-four times as much barley as Canada exported." He has further been informed by expert millers that the quality of the present year's wheat is so good that seven per cent. less is required to produce a given quantity of flour than an average."

Much interest naturally centred in the announcement of the retirement of Lord Strathcona from the presidency of the bank, which he has held for eighteen years. It was natural that the board should contemplate with reluctance the retirement of this valuable and distinguished man. A middle course was happily found when His Lordship accepted the position of Honorary President, to which he has been appointed. It will be conceded readily that the position of president of the Bank of Montreal, which Sir George Drummond now receives, is his by right, as a valued servant of his shareholders and the public for a long period, and an admirable exemplar of the thoroughly informed and high-minded man of affairs. The board have signified their appreciation of Mr. Clouston's services by placing him upon the board and making him vice-president, in addition to the position of general-manager. Mr. Clouston is emphatically a good banker, and has many times given proof of his prudence and ability in a position of rare responsibility. The Bank of Montreal is to be congratulated on its chief officers.

* * *

CONDITIONS IN WINNIPEG.

A letter of Monday last from Winnipeg gives some facts and emphasizes others about that city which are interesting. The writer reminds us that the past season has been again a very active one in the building line, and he adds that there are in the neighborhood of 500 houses to rent. "A great many of these will remain vacant all winter, as a large number of families are living in blocks and apartment houses, quite a few of which were built this summer." This agrees with what we learn from another account, which says that nearly 200 small stores are awaiting tenants in that city and several hundred empty dwelling-houses. We have been accustomed to hear much of the expense of living in Winnipeg for young married folks and clerks, and the difficulty of getting them housed. What is said above tends to make one think that these discomforts are sensibly moderating.

We gather from a recent article in the "Commercial" that most of these stores and dwellings are new ones which were built this year, and have never been tenanted. It has come about, therefore, according to the admission of the contractors and builders who put them up, that the city has been overbuilt, or rather, that the building movement has at last overtaken the increase in population. Still, it is quite on the cards that, with another inrush of new residents such as has characterized several springs past, these houses, now vacant, will be wanted in 1906.

There is a distinct lull in real estate operations in Winnipeg, and it is probably time. Assuredly the prices asked and paid for land in the city and outskirts were for a time quite beyond reason. Many of the real estate dealers, who were in part responsible for the boom prices of land and the extravagant "deals," which gave them so much delight and prudent people so much apprehension, are out of the way. Prices of land have come down to more reasonable figures during the past few months, and rents are also coming down. This is good news, for it is not a good thing for a place when married people of small or moderate incomes cannot afford to live in a self-contained house.

A gentleman who has visited Winnipeg recently tells us that he was able to discover marked contrasts for the better with the feverish and unnatural conditions which prevailed there a year ago or thereabout. Some speculators may have been bitten, but they do not command much sympathy. He is disposed to agree with our contemporary that the outlook was never more favorable for the honest man who wants to make a living in the city than to-day. With the speculator out of it and values on a more solid footing, those people who want to own their homes and places of business will now get a fair chance to do so at reasonable valuations, and the ultimate result will be an improvement in the real estate situation. Every well-wisher of Winnipeg will rejoice at her deliverance from the toils of the land speculator and boomster.

INSOLVENCY EXPENSES

There was a time in the history of Canadian wholesale trade when profits on selling to the retailer were large; and an occasional bad debt or compromise loss did not seem to matter at the end of the year. But to-day that sort of thing does not prevail, and so narrow are the profits as a rule that bad debts are a very disturbing element. Especially is it irritating to a creditor to find, after a customer has failed, and his estate is being wound up, that a needlessly large proportion of the assets has been frittered away in expenses.

A case has just come under our notice where an insolvent firm's stock was sold for 70 1-4 cents in the dollar of its invoice value, and his book debts for 35 cents of their face, and some other assets were realized, making it look probable that the estate would pay fifty cents in the dollar. Now that the assignee's report is sent out we find, however, that 41 1-2 per cent. is all that can be paid to creditors, and the difference is used up in expenses. One good reason why the expenses should have been lower is that the assets were disposed of at the first meeting of creditors. The estate is that of Russell & McLaughlin, who kept a general store at Martintown, in the County of Glengarry, Ontario. The firm owed $12,281, and showed nearly $9,000 of assets. These realized $5,960, equal to about 48 cents in the dollar. But instead of having this $5,960 to divide among creditors the assignee had only $5,096, the difference being made up in expenses. With some items of expense, no fault can be found, but the same may not be said respecting others. It should not have needed five persons at $27 apiece eleven days to take the stock, whose nominal value was $7,700, nor the additional $24.50 paid for their board and lodging. True, the assignee is a Cornwall man, and he may have deemed it his duty to send clerks from that place to Martintown to take stock, but $174.50 is a heavy tax to pay for country-town stock-taking; since there is another item in the list of disbursements, viz., "$15 for assignee's liveries and expenses stock-taking." Then there is accountants, $20, and wages and expenses checking with purchaser, $27.80; also type-writing, $39.50. What under the sun did such an estate need thirty-nine dollars worth of type-writing for?

Now come the exasperating items; we take them from the itemized list of the assignee:

Legal expenses, Cornwall	$53 00
Legal expenses, Alexandria	4 50
Legal expenses, Montreal	5 00
Paid inspectors and their expenses ..	100 00
Assignee's statutory allowance	298 00

The preferred claims amounted to a bagatelle of $25.36. Assignee, lawyers and inspectors got $460 for administering $5,000 of assets. And where was the need for three inspectors? We are told that in this case these three gentlemen, as Sergeant Buzfuz said, "belonged to the noble profession of the law," so of course their valuation of themselves was an elevated one. Just 14 1-2 per cent. of the realized assets was used up in expenses. It is too much.

Since so distinctly a legal atmosphere seems to surround this estate—which, by the way, has 79 creditors in 24 Canadian towns or cities—we must suppose there was legal warrant for everything that was done. But it is possible to wind up estates without exacting the last penny that is permissible under the law. And we think we know assignees in Ontario who would have wound up the estate for about half of the $818 disbursed. There should be some consideration shown for creditors in such cases, who, although they might be obliged by circumstances to be content with losing fifty per cent. on such an estate as this, ought not to be compelled to lose nearly sixty.

CANADIAN PURCHASES FROM BRITAIN.

In the course of a reference to Canadian affairs resulting from a notice in The Monetary Times, of his Mercantile Year Book and Directory of Exporters, the editor of the Mercantile Guardian of London, England, traverses some remarks of ours about the small array of Canadian names in his Year Book list of colonial and foreign importing houses. He now explains what we assuredly had not gathered from the preface to the book, that "the list in question only purports to be one of colonial firms having *buying houses* in Europe." He finds the methods of Canadian importers different in large degree from those of foreign or colonial houses farther away; and says:

> It is a curious fact that this trade, unlike the trade of the rest of the Empire, is, with few exceptions, not done through British merchants. In India, in Australia, in South Africa, and, indeed, almost every market, indents are made up by the importer, who often supplies many other firms, and sent to his agent, the British export merchant, to be filled.
>
> * * * * * * * * * *
>
> A few, a very few, Canadian houses have their own buying establishments on this side, firms such as the Robert Simpson, or the T. Eaton Co., of Toronto, or Carsley, Sons & Co., of Montreal. Many more send their buyers to London, Manchester, and Paris at regular intervals, and for the rest they buy—when they buy British goods, and that is not nearly often enough—from travellers who call upon them. Now apparently the "Monetary Times" does not know this, certainly hundreds of British manufacturers do not know it, for I am constantly being asked for advice as to how to obtain Canadian trade. My reply is ever the same, "Go to Canada and get it. It isn't easy to obtain trade from Canada, but that is the only way by which you will get it."

His advice is so far good. If British houses would send competent travelling salesmen over here they would likely get more trade—that is, if these agents would tell their principals the truth about what styles of goods Canadians want, and not try to convert merchants here to an admiration of British goods as *always* the prettiest and the best. In many, many cases, the Yankee salesman's samples offered here please more than the Britishers, just as goods from Vaterland are neglected while our people buy with avidity the daintier products of France.

Now, as to the Canadian method of purchase of European goods. It is true that purchases by department stores in our cities have increased enormously of late years, resulting in their planting resident houses in Europe with all-the-year-round buyers. It is also true that a considerable volume is bought in England by the Canadian Dry Goods Syndicate, which supplies retail houses in a number of our smaller cities. But the purchases of these put together would not amount to the figures of Canadian imports from the United Kingdom which the English Board of Trade returns give. An enormous aggregate of British, Scotch and Irish textiles, small wares, laces, carpets, furnishings, metals, hardware, cutlery, etc., is bought by wholesale houses and retail houses in the Dominion, who send over buyers twice a year or oftener, to the British and Continental centres. These houses, we believe, buy more goods than either of the other groups of jobbers mentioned. And they would buy more, if our good but stubborn John Bull would take as much pains to please them as American, German, French or Belgian houses.

PRESIDENT ROOSEVELT'S MESSAGE.

The President's message, if he can ever hope to carry to a practical issue the tenets set forth, which is hardly probable, indicates that he has an enormous amount of work before him between now and the expiry of his office. Roughly considered, his several pronounciamentos may be described as eminently sane in the terms of their setting forth. For example, he expressly disavows any hostility to corporations, for, as he says, all should recognize in cordial fashion the immense good effected in such a country as the United States by corporate agencies, and the wealth of intellect, of energy and fidelity devoted to their service, and normally to the service of the sovereign people, by their officers and directors. But, while efforts to prevent all combination would be not only useless, but in the end vicious, corporations must be brought to a sharp check when they act against law and justice. Should it, the President declares, be found impossible to reach this end by present constitutional treatment, it will be necessary to alter the law so as to bring the acts of railroads and other corporate interests under the supervision of the Federal Government. Moderation breathes throughout this part of the Message, but a stern determination in every word to do away with present evils.

As an example of the manner in which great corporations have extended their business so far beyond the jurisdiction of the States which created them as to preclude a properly strict enforcement of supervision by the parent States, he instances the recent disclosures as respects the great insurance companies. And that the President is not one of those influenced by the apologists for the doings of some of these companies is evidenced by the following words:

> Recent events have emphasized the importance of an early and exhaustive consideration of this question, to see whether it is not possible to furnish better safeguard than the several States have been able to furnish against corruption of the flagrant kind which has been exposed. It has been only too clearly shown that certain of the men at the head of these large corporations take but small note of the ethical distinction between honesty and dishonesty; they draw the line only this side of what may be called law-honesty, the kind of honesty necessary to avoid falling into the clutches of the law.

The President in his Message also brought up a matter of more than usual interest to Canadians. It referred to immigration from across the border of undesirables. "We cannot," he said, "have too much immigration of the right sort, and we should have none whatever of the wrong sort." He recommends, therefore, that no immigrants should be allowed to come into the Republic from Canada or Mexico excepting natives of the two countries. And he suggests the holding of an international conference for the interchange of views on the subject.

Another clause in the Message of special interest to ourselves was the following in reference to Niagara Falls:

> Nothing should be allowed to interfere with the preservation of Niagara Falls in all their beauty and majesty. If the State of New York cannot see to this, then it is earnestly to be wished that she should be willing to turn it over to the National Government, which should in such case, if possible, in conjunction with the Canadian Government, assume a similar burden and responsibility for the park at Niagara Falls as it has already assumed for the Yellowstone Park.

* * *

BUTTER AND CHEESE

The season for exportation of Canadian dairy products being now about completed, it is in order to give a brief resumé of the general status of the market and of the probable course of prices, though this latter matter is always to be treated with caution. The exportation of cheese during the past season to Great Britain, the figures of which are given elsewhere, was, to the tune of a few thousand boxes, slightly in excess of that of last year, and, as receipts from the country were, if anything, a little less, and as last winter the supplies were only barely equal to the demand, it seems not unlikely that something of a similar character will be repeated this year. At the same time, prices are already high under the present firm market, and a little anxiety is expressed by some lest, if they become any higher, they may restrict consumption. One factor of danger which put in its appearance early last year was the shipment from United States to England of considerable quantities of poor quality cheese, but this is hardly likely to happen during the coming winter, as supplies in the neighboring Republic are described as promising to be barely sufficient for home requirements.

A satisfactory feature of the butter trade has been that makers and shippers have evidently taken to heart the protests of the English importers at the earlier stages of the season with regard to the poor and irregular quality, lack of cleanliness, bad packages, etc., and that there has been a noticeable improvement in the quality of Canadian cheese shipped. Some saltless Canadian butter which has made its appearance at intervals in the Old Country during the last two or three months, has received the encomium that it was the equal of any. A good deal of Danish butter which usually makes its way into the British markets has this year been attracted to Germany, thus helping the Canadian make in the British market. Against the Irish product the latter has made good headway, and though Siberian is a growingly important competitor, it may be said on the whole that Canadian butter has made good progress.

So far as the local market for butter is concerned, it does not present any noteworthy feature. Some of a rather inferior grade has been coming forward lately, for which prices have been only fair, but a good article fetches its value with little trouble.

* * *

THE MINERAL DEPOSITS OF THE TEMISKAMING.

As long ago as 1848, Dr. T. Sterry Hunt, the great Canadian geologist, expressed the opinion that the detection of a small portion of cobalt in association with other metals upon the shores of Lake Huron should lead prospectors to look for deposits of that rare and valuable material. How full of truth was the remark is shown by the contents of a report by the Ontario Bureau of Mines for 1905, entitled "The Cobalt-Nickel, Arsenides and Silver Deposits of Temiskaming," by that able Government geologist of to-day, Prof. Willet G. Miller.

In connection with the mineral developments in Northern Ontario, one or two peculiar facts may be mentioned. One is that two of the most important discoveries of metal ore in Ontario have been the work of railroads. For instance, the Canadian Pacific virtually discovered the great nickel deposits at Sudbury; and now again the unearthing of the great ore bodies which carry values in silver, cobalt, nickel and arsenic, was made during the building of the Temiskaming and Northern Ontario Railway. In fact the line runs almost over the top of what is perhaps the most important vein yet found. The other fact referred to is that this rocky, rugged part of Ontario seems to be the home of a group of what may be called unique, or, at any rate, rare economic minerals. The chief mines include: the nickel deposits at Sudbury, with their by-products, platinum and palladium; the corundum mines of North Hastings, South Renfrew and other areas of Eastern Ontario, supplying the bulk of all the corundum consumed in the world; the feldspar and mica deposits of Frontenac, with their accompanying apatite, pyrite, talc, fluorite, barite, gold and silver; the arsenic fields of North Hastings, which a few years ago were the only ones worked in North America. The eastern part of this region is also noted for certain minerals which can scarcely be said to be of economic value, but are of great scientific interest. The largest and finest crystals of the mineral zircon in the museums of the world come from Eastern Ontario, as do also sphenes, pyroxenes, scapolites and other crystals. Sodalite, marble and other decorative materials are also found here. And finally we come to the gold-arsenic ores of Temagami and to the cobalt-nickel-silver arsenides, which so far as known, are unique on this continent, being paralleled only by deposits in Saxony, and Central Europe. These make the main subject-matter of the report under discussion. The wide dissemination of them and kindred ores and the fact that vast areas of Northern Ontario remain still unexplored, would appear to indicate the possibility of future discoveries of a varied and important character.

A little bit of history concerning those already made is given in the following paragraph by Prof. Miller:

> It may be added that one of the oldest known ore bodies in North America, the argentiferous galena, on the east side of Lake Temiskaming, is distant only eight or nine miles from Cobalt station. This galena deposit was apparently discovered by voyageurs over 150 years ago. A map of the lake published about 1778 has a bay marked on it with the name, "Anse à la Mine," thus showing that the deposit was known at least at that date, and probably much earlier, owing to the fact that the ore outcrops at the water's edge, and is of such a character as to attract attention. Some of these veins in the vicinity of Cobalt station were apparently noticed by the men employed in railway construction in the spring of 1903, but, there being no miners or prospectors among them, little interest was aroused and nothing was heard of the discovery by prospectors till October of the same year. At that time, Mr. T. W. Gibson, Director of the Bureau of Mines, was given a sample of niccolite, which the donor thought was copper ore, the color of this mineral being like that of copper as the German name, kupfer-nickel, indicates. Mr. Gibson, however, recognized the value of the sample, and asked Professor Miller to make a report of the locality as soon as possible. This was done, with the surprising results which are now known to all who read the newspapers.
>
> The more important ores in the veins referred to are native silver, associated with which is usually some dyscrasite, argentite and pyrargyrite and other compounds of the metal—smaltite, niccolite and related minerals. Many of the minerals occur mixed in the ores, and for this reason some of them have not been clearly identified. Another character of the minerals which renders their identification difficult, is the fact that most of them occur in the massive form. Crystals when present are small, being almost microscopic in size.

During the quarter ending June 30th last, we are told, the shipments from Cobalt were 537 tons, valued at $394,552, or an average of $734 per ton, made up as follows:

	Per Cent.
Silver	4.158
Cobalt	6.890
Nickel	3.091
Arsenic	30.912

The metals in the ore were sold at approximately the following prices: Silver, 55 to 60 cents an oz. Troy, for 90 per cent. of the contents, cobalt, 65 cents, nickel, 12 to 15 cents, and arsenic about 1 cent a pound.

We must not forget to add that an interesting section of this report by Prof. Miller is that treating of the cobalt deposits in foreign countries, these existing in larger or smaller compass in Austria, Germany, New Caledonia, Norway, Australia, Oregon, etc.

* * *

HALIFAX HAPPENINGS AND NOVA SCOTIA MINING.

Activity in real estate in Halifax continues, and there have been a number of important transfers in addition to those mentioned in this correspondence two weeks ago. Another Upper Province bank is about to locate here, and has been negotiating for a valuable corner property on Granville Street. Messrs. Wood Bros. have purchased the Pattillo-McDougall block in Hollis Street, which will give them the opportunity to extend their premises through from Granville to Hollis. The Chronicle Publishing Company has purchased a fine property on the corner of Prince and Granville Streets, on which a thoroughly modern newspaper and office building will be erected.

So numerous have been the enquiries for property on Granville Street particularly, that this is looked on as the coming business thoroughfare, and values are advancing. A good deal of this is considered to be due to the enterprise of the merchants on that street who formed an "improvement association," had the street put in first-class condition and hired men at their own expense to keep it clean all the time. This has been the means of attracting a superior class of trade to the street, and the merchants and property owners are reaping decided benefits.

The barque "Orion," which was found abandoned and towed in here some weeks ago by the steamer "Exeter City," has been sold to C. F. Longley & Co., for $2,900, and her cargo of salt for $800, to T. A. S. De Wolfe & Sons.

The autumn crop report for the Province of Nova Scotia has just been issued. It shows an extremely satisfactory condition throughout the Province, in marked contrast to last year, when the crops were so poor that the effects are still felt in business circles, and the farmers themselves will not recover therefrom for a year or two. This year we have had a better harvest, with the exception of apples, than for a number of years past. Our most important crop, hay, reaches for the whole Province, an average of 99 per cent.; oats, 95 per cent., and potatoes, 98 per cent. It is observed that in the countries where the farming is conducted according to most modern methods, the percentage is much larger than elsewhere.

Owing to unfavorable conditions during blossom time, the apple crop of Nova Scotia was considerably affected, and the crop varies with a general leaning towards inferiority. The quantity will probably be not more than 60 per cent. of an average, but this is to a large part offset by the excellent prices prevailing in the markets, both here and in Great Britain. The total yield for marketing is estimated at about 400,000 barrels, and they will average about $2.25 per barrel.

The Mining Society of Nova Scotia held its annual meeting recently, the occasion being enlivened by several incidents which made it a more than ordinarily interesting one.

Mr. Hugh Fletcher, of the Geological Survey, who has been working in this Province for many years, was presented with a gold watch, chain, and aneroid barometer, costing $250. Among those in attendance was Nanabhai Dayabhai Daru, a highly educated and cultured gentleman sent out by the Government of India to study the methods of the Geological Survey in Canada.

The Government of Nova Scotia some time ago employed an expert, T. A. Ricard, formerly of the Engineering and Mining Journal, and now of the Mining and Scientific Press, to make an examination of the gold mining districts in the Province. His report will give a pretty fair idea of the condition of gold mining in this Province at the present time. At Goldenville, where such wonderful prospects were found a year or two ago, very little work is going on, the Royal Oak mine being the only one working. At Country Harbor no mining is being done. Two companies are working the new find at Seal Harbor. The belt being operated is thirty-two feet wide, and assays well.

The Mining Society has granted a yearly scholarship of $50, to the highest ranking scholar in the third year of the Mining-Engineering course at Dalhousie College.

Halifax, 4th December, 1905.

FIRE PROTECTION IN MONTREAL.

A notable gathering of business men was held in Montreal on Tuesday last, the occasion being the discussion of the water supply and fire appliances, and fire brigade of that city. It was a Board of Trade special meeting, and eighty-three prominent business men were in attendance, the president of the board, Mr. Gear, being in the chair. A motion urging upon the city council the making of extensive additions to the fire fighting protection of the city was introduced by Mr. F. H. Matheson, chairman of a special committee formed to consider the subject, and seconded by Mr. J. B. Learmont, with a view to getting the rates of insurance reduced. This, however, was not deemed to go far enough, and it was moved by Mr. A. J. Hodgson, seconded by Mr. A. McFee, and carried, that a special cmmittee investigate the matter further, and confer with the fire insurance companies. This was substituted for the former motion. The resolutions approved, providing further pumping capacity for the water supply in view of the annexation of outlying municipalities; a protest against the lax enforcement of the city by-laws governing the electrical installation, storage of explosives, and erection of new buildings, and commended the city council's recent action in adopting a by-law providing for the removal of overhead wires.

FINANCIAL ITEMS.

The British Columbia Electric Railway Company are making an issue of 185,000 five per cent. cumulative perpetual preference shares of one pound each at a premium of one pound ten shillings.

The London and Paris Exchange, stock-brokers, etc., has recently moved its offices from 34 Victoria St., to the third floor of the Temple Building. Mr. Bailey, the former manager, has returned to England, and the affairs of the institution are now in the care of Mr. R. E. Carter.

Three directors of the Bank of Hochelaga, Messrs. Alphonse Turcotte, Hon. J. D. Rolland, and R. Bickerdike, accompanied by the general manager, Mr. A. Prendergast, were in Winnipeg last Saturday, and going further west. Their visit is in connection with the affairs of the bank, and may result in the establishment of branches in the new provinces and British Columbia. They have some idea, too, of acquiring a site and erecting a bank building of their own in Winnipeg. Some of these gentlemen propose to visit commercial centres in Saskatchewan, Alberta, and British Columbia for the purpose of enquiring into business conditions and prospects.

On Tuesday last, Mr. S. J. Moore, vice-president of the Metropolitan Bank, was elected president to fill the vacancy caused by the death of the late Rev. Dr. Warden. Mr. D. E. Thomson was elected to the position of vice-president, and Mr. Jas. Ryrie was elected a member of the board of directors.

The morality of stock exchange transactions was a theme touched upon in a recent action-at-law in Edinburgh. In the first division of the Court of Session, Lord Dunedin (the Lord President), Lord Adam, and Lord McLaren on the bench, in an action in which a Glasgow stockbroker sued a client for the balance of his account for buying and selling stocks, and in which the client met his broker's demand with the plea that the transactions were gambling transactions, and could not be sued on, the judges made some remarks in answer to observations by Sheriff Guthrie who while deciding in favor of the stockbroker regretted "to give decree for sums which in a true, though not in a legal, sense, were gambling debts." Lord McLaren, who agreed with the Lord President and Lord Adam that the Sheriff's observations were uncalled for, said there might be different views of the morality of buying and selling shares on the Stock Exchange for the purpose of making profit, but whatever views were held as to that they were not applicable to a broker. When a broker accepted a client he was bound to carry out the instructions of that client, and would be liable in an action of damages if he failed to do so. Of course, he referred to genuine transactions; and he saw no reason to think that the transactions in this case were not of that character. It would paralyze all business on the Stock Exchange if the brokers were to be held to have a duty to enquire into the legitimacy of their clients' object in giving an order before they ventured to carry it out.

INSURANCE ITEMS.

Says the London publication entitled "Business:" "Amicus is Mr. C. J. Smith, the Oliver Wendell Holmes of life insurance." The compliment is a high one. But Mr. Smith has certainly helped to popularize the Mutual Life among insurants, just as the Autocrat helped forty years ago to popularize the "Atlantic Monthly."

Under the heading "Advertising Pays," "Sunshine" has the audacity to print the following story: An Oklahoma girl advertised for a husband, and got him. The total expense for advertising, wedding outfit, etc., was $11. The husband died within a year, leaving her an assurance policy of $10,000. And yet some people claim that it doesn't pay to advertise.

The announcement that the Ocean Accident & Guarantee has insured Jan Kubelik, the famous violinist against injury, has created interest, chiefly on account of the large amount involved. Loss of life in this case is covered by $160,000; loss of finger or hand, $50,000; loss of toe or foot, $25,000; loss of eyesight, $25,000. The premium on this policy is $480 per year. The Ocean Accident also insures Paderewski to the amount of $4,000 per finger.

Creditors of the Firemen's Insurance Company, of Baltimore, are now receiving a third dividend of 12 per cent. This makes so far 55 per cent. that has been paid by Receiver Wolfe. The principal asset left is the company's building and a few other claims due on account of re-insurance not yet settled. Needless to say, the company's authorities are now profound believers in the conflagration hazard.

"The automobile as a grim reaper," is the title of an article in the "United States Review," which gives a list of names of deaths during eleven months of this year from auto-accidents. The death-roll of the automobile Juggernaut for 1905 already numbers thirty-five victims. The list given includes the dead. The maimed, injured, and bruised for 1905 are legion.

The Nemesis that relentlessly pursues the friendly orders, said the Portland "Oregonian," has thrust upon the Royal Arcanum the old, inevitable riddle: How to meet a growing annual death rate per thousand due to the increasing average age of the membership. Sooner or later this question confronts every co-operative insurance society, and upon its solution depends either continued prosperity or schism.

The United States Review Publishing Co. announces the publication of a volume of short stories by Mr. J. Campbell Haywood, well known to the insurance fraternity through his connection with the National Assurance Co., of Ireland, entitled; "Driftwood and Other Tales." This work, the price of which is one dollar, is a strong example of the author's fanciful style.

These are among the latest T.I.P. pointers. Others were Thanksgiving ones:

Looking forward to Christmas? You may not live that long. But do not let Santa Claus be kept away. Insure for your children.

The man who is waiting for legislation to make cheap insurance will discover that the cost has considerably increased because of the advance in his age.

If your income depended entirely upon the life of another person, wouldn't you try to provide yourself some form of indemnity against loss? That is your wife's position; hence she has the right to want you to be insured.

A letter from Detroit under date 2nd December, says: "The experience of Toronto in the 1904 big fire makes us anxious to know what lessons you have learned as to exposures and fire-fighting generally. Things here in these respects are not all that they should be, and I wish you could send me, if necessary lend me, a copy of the pamphlet compiled in the summer of last year by E. F. Garrow, giving figures of area destroyed, insurance held, claims paid, etc. We have been having the National Board of Fire Underwriters' inspectors working here under the instructions of the committee of twenty. They looked into our fire protection conditions with especial regard to the conflagration hazard in this fair city of ours."

The sensation of a recent week in American life insurance circles was the arrest of Mr. Harold Peirce, agent of the New York Life Insurance Company, on the charge of rebating. It was alleged that Mr. Peirce gave to Mr. Benjamin C. Warnick a policy for $100,000, with a premium receipt therefor for $2,505, although Mr. Warnick testified he never paid a cent for it. It seems that the application was originally secured by Mr. E. A. Reilly, and placed through Mr. Peirce's office with the signature of the latter appearing thereon. At the conclusion of the hearing Mr. Peirce was held under $2,500 bail for appearance at court. Mr. Peirce has for years been the largest individual producer of the New York Life in the entire country. He stands high in the life insurance community.—U. S. Review.

During the past month there have been several fires of an incendiary character in Sarnia, and a few nights ago there were no less than four within a space of a few hours. It transpires that one or more young men of the town have been under suspicion for several days, and on the night in question, one of them was caught in the act of applying the match. This man, Jas. Milne, can give no motive for his actions, beyond a desire to be avenged on the town for his discharge from the fire brigade for drunkenness. Such men need to be taught very drastically the lesson that some better excuse is needed for endangering life and property. As it was, eleven horses were burned to death at one of the fires, and one man was saved only with difficulty.

FOR GROCERS AND PROVISION DEALERS.

Verret Stewart & Co., Limited, will take over the business of V. Stewart & Co., Montreal, dealers in salt and other materials, and are authorized to take over any other business of a like character. The capital stock is placed at $75,000.

C. Dignard & Co., Limited, is the name of a company recently incorporated under Dominion laws, with the object of taking over the business of the now dissolved firm of C. Dignard & Co., Montreal, and manufacturing all sorts of cakes, jams, biscuits, and confectioneries.

Bowie & Company's Brewery, Limited, has received from the Ontario Government a charter empowering it to take over the business of Bowie & Co., in Brockville, and to carry on the trade of brewers and maltsters in all branches.

The tidy sum of twenty-five millions of dollars is the estimated value of Canada's dairy products shipped from Montreal during the navigable season of 1905. This is made up from $18,029,000 worth of cheese, contained in 2,121,101 boxes, and $7,397,000 worth of butter in 573,449 packages. The corresponding figures of quantity in the same period of 1904 were 490,300 packages of butter, and 2,114,639 boxes of cheese.

The United States Department of Agriculture has issued an order providing for the importation of Canadian cattle, sheep, and swine for exhibition purposes at the International Live Stock Show in Chicago, from December 16th to 23rd next. The order exempts Canadian cattle from the tuberculin test, provided they are accompanied by a certificate from a Canadian official veterinarian, stating them to be free from disease, and all such cattle not sold in the United States to be returned immediately to Canada at the close of the exhibition.

* * *

AUSTRALIAN LUMBER INDUSTRY.

It is probably not generally known by Canadians what large dimensions have been already attained by the lumber industry of Australia, especially in the States of New South Wales, and Western Australia. This applies, of course, to hard woods; and in some lines of these it is altogether likely that present attempts to build up an export trade with Canada may be successful. The annual lumber industry of the Commonwealth now amounts in value to £2,251,000, while New Zealand contributes another £972,000, these figures representing the value of the rough lumber as it leaves the mills. Mr. D. H. Ross, the Canadian commercial agent, stationed at Melbourne, offers to place any Canadian importer of hardwood in communication with the principal mills. The exports of rough lumber from Australia last year, we may mention, were 130,000,000 feet, valued at £818,482, or £828,000 including minor wooden products. Canada and the United States took, comparatively speaking, very small quantities.

At the same time, while Australia stands in readiness to ship large quantities of timber to Canada, she in her return already receives considerable from this country. The principal lines of Canadian and United States dressed timber shipped to Australia are clear pine shelving and tongued and grooved boards. Norway and Sweden supply Baltic flooring, lining and weather boards. The Customs duty is 3s. (73 cents) per 100 sup. feet. The Australian imports of dressed timber in 1904 amounted to 54,456,327 sup. feet, valued at £395,000. The freight from British Columbia to Australia, compared with the freight from Puget Sound points, is somewhat higher, and, Melbourne importers complain that there is almost invariably some trouble in chartering ships on the Vancouver side, which is detrimental to an increase in the exports of Canadian pine from Pacific Coast ports.

It is of such importance, in developing a trade between such countries as Canada and Australia, to have a proper system for the giving of particulars in quotations, etc., that we give Mr. Ross's specifications in full. The following apply to spruce: State the average lengths of spruce deals, What the fall of widths are. Percentage of Nos. 1, 2 and 3 grades. Reduction for ends, 4ths and scantlings. Time when Canadian port of shipment is open. Discount and brokerage rebates. A guarantee that timber is well seasoned prior to shipment, An undertaking to be given that deals are cut full widths and thickness, free of wane, as all have to be re-sawn again. The usual specification and particulars of sizes and percentages of quantities of spruce deals in sending orders from Melbourne are as follows: Sizes, 6 x 3 = 10 per cent.; 7 x 3 = 15 per cent.; 8 x 3 = 10 per cent.; 9 x 3 = 30 per cent.; 10 x 3 = 20 per cent.; 11 x 3 = 10 per cent.; 12 x 3 = 5 per cent.

Again, the following are hints for the exporters of British Columbia:

1. British Columbia shippers are not making an effort to secure at least a fair proportion of the Australian lumber business. It is absolutely essential that they should keep "in touch" with the leading Australian importers of Oregon pine, and the requirements of this country with the same energy and devotion as San Francisco lumber brokers.

2. The reputation of the grading and sawing of British Columbia lumber has to be re-established, making the marketable condition at least equal to shipments made in Puget Sound.

3. That a representative of the British Columbia lumber mills should visit Australia and ascertain the local conditions and why the trade is not larger. In every way he would accomplish much more than reams of correspondence could possibly do.

4. Melbourne lumber importers are strongly British in sentiment, and would, all things being equal, prefer to obtain their supplies from British Columbia rather than from Puget Sound ports. Shippers should remember this and endeavor to increase their Australian business by constantly studying the trade.

—The Canadian Forestry Association has issued a report, finely illustrated, of its sixth annual meeting, held in Quebec City. The papers read at the meeting appear in full, and include "Forest Fires in British Columbia," by Professor R. W. Brock, of Queen's University; "Forest Insects," by Rev. T. W. Fyles; "New Brunswick's Forests," by Col. T. G. Loggie; "Forestry in Nova Scotia," by Hon. J. W. Longley; "Forest Wealth of the Province of Quebec;" by J. C. Langelier. The report also includes a lecture on "The Forest as a National Resource," by Dr. Judson F. Clark, Forester for Ontario. This is an able presentation of the important place held by the forests among the great resources of the country, which lie at the basis of national prosperity and well-being. Every student of Canadian affairs will find it interesting and well worthy of perusal.

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, December 7th, 1905, as compared with those of the previous week:—

	Dec. 7.	Nov. 30.
Montreal	$30,270,786	$26,999,761
Toronto	22,094,908	21,780,967
Winnipeg	11,233,294	11,120,874
Halifax	1,972,412	1,764,633
Hamilton	1,675,140	1,529,357
St. John	1,262,100	968,416
Vancouver	1,966,052	1,982,272
Victoria	659,865	719,497
Quebec	2,498,440	1,762,726
Ottawa	3,238,014	2,608,262
London	1,268,938	899,438
Total	$78,139,949	$72,136,203

Mercantile Summary.

The Ridout Gilbert Carpet and House Furnishings Company's large store in Winnipeg has been destroyed by fire at a loss of $100,000.

The A. M. Forbes Hardware Company are putting up a large can factory and sheet-metal works in Vancouver at a cost of $50,000. All sorts of tin cans will be turned out; to the quantity when working to full capacity, it is said, of 25,000 per day.

The steamer "Henriette" last week brought a full cargo of ore from Hadley, which is on Prince of Wales Island, off the British Columbia coast, to the Britannia smelter at Ladysmith, and she will likely be engaged in similar work all winter.

We are informed by the Robb Engineering Company, that owing to the increase of business and growing importance of Montreal as a centre for distribution of their products, the company has decided to change its agency at Montreal into a branch office. Mr. Watson Jack has been appointed manager of the branch and Mr. Alister Maclean will continue in the capacity of engineer for the Montreal district. The Robb Engineering Company will have their quarters in the handsome suite of offices occupied by Watson Jack & Company in the Bell Telephone Building, corner of Notre Dame and St. John Street.

ANOTHER MERCANTILE AGENCY SCHEME.

The purchase of the good-will, books, etc., of the International Mercantile Agency of Canada, Limited, by Charles Henderson, for the sum of $2,100 at the liquidator's sale in Toronto on the 2nd inst., calls to mind the history of this company and its predecessors. From the starting point one has a vista, short in time, but long in broken promises and financial disaster. The Mutual Mercantile Agency, with a supposed capital of $3,000,000, stated in its prospectus that it would do many things for the business public, but somehow its intentions of universal good-will and benefit did not last. Its so-called assets were purchased from the assignee by T. N. McCauley for a few thousand dollars and became in 1901 or thereabout the basis of a new organization, known as the International Mercantile Agency of New Jersey, capital $2,000,000—subsequently increased to $3,000,000. Quoting from its own literature, we find the reference book of this eminent concern was, as stated in black and white:

> "A perfect guide to credit, resulting from rigid personal investigations, on the spot, by a cash-paid expert," etc—"Supplements issued every 60 days."—"No attempt to compete with inferior service or fire-sale prices.

The directorate, headed by the redoubtable McCauley, numbered thirty, of whom several were well-known Canadians, some of them with long pockets. The supplements and various other component parts of the campaign literature did not arrive, however, and after much notoriety and some curious revelations, including the flight of McCauley, another failure was recorded. The total assets of this $3,000,000 concern brought $26,000, and the "Perfect Credit Guides" for the United States and Canada, as their reference books were styled, were marketed through want-ads in Chicago papers at $7.50 each.

Some of the Canadian directors then formed the International Mercantile Agency of Canada, Limited, taking over the Canadian end of its larger namesake as well as Sprague's Mercantile Agencies of Ontario and Montreal—this time the stationery issued mentioned $250,000 as the capital at stake—and the claims for consideration were principally of a patriotic character. It is estimated that Canadians, in these several ventures, have "considered" and contributed to the tune of nearly $1,000,000, besides many losses in bad credits induced by the grossly misrepresented work. A great part of this money went to Mexico with McCauley, and much of the balance went to fatten the earnings of its managers, etc., whose origin can be traced to any country but Canada. But many of them are very slick talkers.

Thinking that Mr. Henderson, backed by his experience as Third Vice-President of the International Mercantile Agency of New Jersey, may make fresh proposals to Canadian investors, to buy the shares of still another "International" concern of a like kind, we have given the above condensed history, and, besides remarking that $1,000,000 is a lot of money for Canadians to spend in less than five years on this sort of thing, getting a precious small proportion of it back, we have taken the trouble to gather some figures as to the feasibility of the probable new scheme. This is best illustrated by some facts about existing agencies.

The principal of these, in fact the ones on whom the business world of the United States and Canada mainly rely, are Dun's and Bradstreet's agencies, respectively. The former is the oldest and we believe the largest, having been founded in 1841. It has about 200 branch offices in all parts of the civilized world, thousands of employees, and annual expenses of over $3,000,000. In Canada, ten branches are maintained, about 200 people employed, and some $200,000 annually expended for recorded information, travelling expenses in collecting the same, salaries, printing, etc.

The average business man has but an incomplete idea of the part the mercantile agency plays in domestic and foreign commerce. In addition to the furnishing of reports in all parts of the world about traders in all other parts of the world, these agencies publish "Record" sheets, as well as weekly financial reviews in English and other languages. In many localities the expenditures of such wide-spread concerns far exceeded the revenue—one state is said to represent a net annual loss of $20,000 to one of the big agencies—the whole result is nothing more than a fair return for the money and energy expended.

The Canadian staff is composed nearly altogether of native-borns, whose earnings are spent in the country. The revenue is already divided between two large and favorably known agencies who would always be in the field even at a loss. What prospect is there, then, for the further exploitation of concerns with unpractical methods, lacking adequate capital, lacking trained hands, and not having the confidence of the public at home or connections abroad?

* * *

QUEBEC DEVELOPING.

All reports continue to speak favorably as to the probable future development of the northern part of Quebec Province, particularly the mineral areas of the Lake St. John district, 150 miles or so north of Roberval. Here Mr. Peter McKenzie and some other experts have recently found valuable deposits of gold, asbestos, copper, and nickel. The Government inspector, Mr. Obalski, found gold in several places, while pyrites are also seen in pockets which sometimes contain copper. A vein of copper ore two feet thick was also found. On Asbestos Island commercial asbestos is reported to have been found for a distance of 600 to 700 feet. On the Chamouchouan River there is a waterfall a hundred feet high, with an estimated capacity of 100,000 horsepower. Mr. J. E. Hardman who has investigated the field for the United States Steel Corporation, reports that the Chibougamau district is destined to have a large and profiable mineral production. There are four or five seams of asbestos, he says, which can safely be pronounced A No. 1 best quality. The difficulty, however, is lack of transportation facilities. He compares the property which the Steel Corporation has acquired, with the King mine at Thetiord, which has recently been sold for $1,250,000. The latest reports are from engineers who have just returned. They state that other gold seams have been discovered assaying $4 to $30 to the ton, one vein being 1,100 feet long. They also found copper, assays from which yielded $93 to the ton, and rich deposits of nickel, with samples of which Mgr. Laflamme, of Laval University, is highly pleased.

* * *

PRODUCTION OF PETROLEUM IN CANADA.

One section of the annual report of the United States Geological Survey is devoted to a consideration of recent developments in the production of petroleum in Canada. So far as last year is concerned, the new Leamington field produced 25,241 barrels, which was an increase of about 24,000 barrels over that of 1903. This field is located near the former natural gasfield in the south-eastern portion of Essex County. The Moore field is noted for the first time with a production of nearly 37,000 barrels, and is located in Moore Township, Lambton County, which county produced 85 per cent. of the total output of petroleum in Canada. There were several new wells drilled in the New Brunswick field that were productive of a lubricating petroleum. A well producing twelve barrels of petroleum per day was drilled in Southern Alberta, near South Kootenay Pass. There are numerous natural showings of petroleum and natural gas on the eastern flank of the Rocky Mountains, extending from the United States line to the Arctic Ocean, which in the future will, in all probability, produce large quantities of petroleum.

One of the most important events in the history of petroleum production in Canada in the view of the compilers of this report, was the passing of an Act by the Canadian Government, June 8th, 1904, reducing the duty on re-

fined petroleum from five cents per imperial gallon to 2½ cents, and at the same time crude petroleum was put on the free list, which formerly paid five cents per imperial gallon duty. The Government at the same time agreed to give a bounty of 1½ cents per imperial gallon on all crude produce, amounting to 52½ cents per barrel, which has resulted in increasing the price paid the producer of about 12½ cents per barrel.

For the past three years there have been active operations in New Brunswick, near Memramcook, a few miles south of Moncton, by the New Brunswick Petroleum Company. There are two fields now being operated, four or five miles apart, known as the Dover and St. Joseph's College. In both of these fields there have been about seventy wells recently completed, thirty of which were completed in the Dover field, and thirty-five in the original St. Joseph's College field. During 1904 there were from eighteen to twenty-five of these wells pumped in each of the fields, most of the production being from thirty wells, and amounting to about fifty barrels per day. There is considerable variation in the depths of the wells, as they vary from 300 to 500 feet. The petroleum is found in a rather close sand rock. Many of them have been torpedoed. There are two varieties of petroleum produced, one quite black, and the other dark green. The gravity is nearly the same, from 35° to 37° B., and probably of a paraffin base. A refinery has been commenced. Very little has been marketed.

* * *

"WHAT DO WE THINK OF IT?"

A subscriber sends to this journal a copy of the sheet advising declaration by the assignee of a total dividend of 3¼ cents in the 100 on the estate of the Merchants Manufacturing Company, of Colborne Street, Toronto, and asks what we think of it. The question is hardly to be answered in a brief sentence. The first thing we think is that mercantile folk here are about as easy-going as they are in the States in selling goods on credit. Here is a man in a very small way of business, and almost without capital, gets credit for $8,530—at least this is the amount that ranks, though less than half is for ordinary merchandise accounts—from 52 different persons or corporations in a dozen places, in sums ranging from $1 to $450. And these persons or corporations are to be paid to-day from 3 cents to $14 each as their first and final dividends on this precious estate. The concern, the active mover in which was a Mr. McKinnon, did business in grocers' sundries, some of which it made. Those who credited him, as we learn from looking at the list of creditors were makers of, or dealers in, starch, spices, flavoring extracts, dried fruits, vinegar, corks, brooms, pails, paper boxes, and—a curious thing—he owed money to eight printing or stationery firms and to two lithographers. So he must have believed in printers' ink, and recognized the value of pretty pictures or labels as currency in the commercial world of to-day.

The Merchants Manufacturing Company owed to fifty people in ordinary liability, $2,576, an average of fifty dollars each. All that its stock, plant, fixtures and trade marks realized, so the assignee tells us, was $559; the book debts were all held and valued by some discounting creditor as collateral. Out of this had to be paid $203 in preferred claims, leaving $355 to be disposed of. Inspectors' and trustees' fees, advertising, postage, etc., ran away with $78, (and this is not much, we would add, to Mr. Richard Lee, the assignee's credit) and there was $277 left to divide among creditors. How far that went, we perceive by the list and statements before us. "What do you think of it?" asks our correspondent. We think this is a fine, generous country to live in and that times must be good, when fifty people will join to give a man a chance to exploit a small manufacturing and jobbing business, and agree to give him credit for sometimes definite and sometimes indefinite time. They are not all Toronto people either; some Hamilton, and Montreal, and Chicago, and Buffalo concerns are among them. But then, it may be argued, new enterprises ought to be encouraged, and the "tall chimneys" made to smoke. And anyhow, the estate is "only a little one"—so, there.

ANCIENT ORDER UNITED WORKMEN.

A meeting was held in Detroit last week of the Ancient Order of United Workmen. This was a special session, and it levied ten special assessments upon the men over 55 years of age on January 1, 1904. These assessments are levied upon them at their attained ages, January 1, 1905, and are as follows for each one thousand dollars certificate held by them:

55 to 59 years of age, inclusive	$0 60
60 to 64 years of age, inclusive	70
65 to 69 years of age, inclusive	80
70 and over	1 00

It is expected that the proceeds of these assessments will be sufficient to enable the Grand Lodge to pay its death claims with its usual promptness. The action of the Grand Lodge in this matter was unanimous and is significant, because the Grand Lodge is composed of a large number of men in the class above 55 years of age. They realized that the increasing deaths of their own class were the cause of the temporary difficulty in which the Grand Lodge found itself, and they believed the young men were paying all that could be asked of them in their behalf, and felt that it was just and right that they themselves should bear this additional temporary burden.

The Detroit News of 25th November says that the new plan of the A.O.U.W. has been certified to by the leading actuaries in the country as amply sufficient to care for the present and the future for all men 55 years of age and under.

* * *

THE MINING AMALGAMATION.

In view of the amalgamation of the War Eagle and Centre Star Mining Companies, which is now practically complete it may be well to quote from an official notice recently issued, as to the reasons for the step.

The directors of the two companies believe that amalgamation will be greatly in the interests of shareholders by permitting of more profitable and economical working. The whole property and undertakings of the War Eagle are sold to the Centre Star Mining Company, Limited, upon a basis of fifteen shares of the former to every ten of the latter, thus making the price of shares 23⅛c and 35c. respectively. The paid-up capital of the Centre Star is $3,500,000, and of the War Eagle $1,750,000.

Anything that would conduce to a return of these two important Rossland properties to profitable conditions, would mean much for the district, much indeed for British Columbia, and the reputation of Canada as a mineral producing country. The trouble was that the ore found in the early days did not continue at its then high value and thus could not be worked to such advantage. Now, however, with smelter facilities greatly improved and the cost of working greatly diminished, it is felt that the mines may hope to resume their old-time prosperity.

* * *

COMMERCIAL TRAVELLERS' ASSOCIATION.

At a general meeting of the Commercial Travellers' Association of Canada, nominations were made for officers for the current year. For president, T. McQuillan was elected by acclamation for the third term; first vice-president, L. A. Howard, (acclamation). On the directorate, the first vice-president for Hamilton, Mr. J. H. Herring, was elected by acclamation, and so was the second vice-president, E. J. Fenwick. The Montreal vice-president, Mr. S. O. Shorey, was also elected by acclamation. For the Guelph board, director, A. Hill; for the Brantford board, D. J. Waterhouse, and J. S. Hamilton; on the Kingston board, W. H. Graham, and W. S. R. March; for the Winnipeg board, vice-president, G. F. Galt, and director, H. Miller; for Vancouver, J. A. McMaster, and R. Martin, were all elected by acclamation.

* * *

—It is announced from British Columbia that the Canadian Pacific Railway is about to relay the entire Crow's Nest Pass line from Lethbridge to Kootenay Landing, a distance of over 200 miles, with new steel rails, at an estimated cost of $1,250,000. The outcome of the improvements is likely to be a great development of the C.P.R. coal fields, and of export of that commodity from Hosmer to Spokane, Wash., and vicinity. When the charter of the British Columbia Southern Railway was taken over by the C.P.R., that company was expressly debarred from opening or operating coal mines of its own until the year 1907. This condition binds to a certain extent the Crow's Nest Pass Coal Company, but recently it got possession of the Hosmer fields and has developed them in readiness to start operations the moment the conditions of the charter permit them to do so.

—The state of the negotiations between the city of Toronto and the radial railway companies has been for so long a time one better described by the word "dead-lock," than by anything else, that one more hitch does not appear to receive any particular attention.

* * *

—An extraordinarily heavy sacrifice of life has been involved in the three heavy storms on the Great Lakes this fall. A Detroit computation places the loss at seventy ships wrecked, a monetary damage of $7,000,000, and the loss of 149 lives. And the end of the season has not yet arrived.

* * *

—In spite of the many rumors and more or less circumstantial stories which have been heard in recent years respecting the building of a fine hotel in London, Ont., nothing seems to come of them, and that otherwise up-to-date city is going on its way with insufficient accommodation for the travellers and others who visit it—or who pass the night elsewhere on account of that insufficiency.

* * *

—Capt. H. R. Robertson, of Portland, Ore., proposes, with the permission of the B.C. Government, to take out of the province, such rough logs as cannot be used by local mills and engage in the work of rafting them down to the Southern California coast, and sell them there for cordwood. He is the inventor of patent ocean log rafts, which, it is said frequently attain a draught of 25 feet. The captain proposes a site near the mouth of the Fraser River for the making up of the rafts.

* * *

—This year no less a sum than $250,000 has been paid out by the Public Works Department on colonization roads and bridges in New Ontario, and the consequence is that settlers have had fair roads within easy distance almost as soon as they have taken up their claims. In the older sections of Ontario, a sum of about $75,000 has been expended this year for the improvement of county roads, under the Good Roads Act. Seven counties now have such a system, and something like $225,000 has been already spent therein, while seven more will start the system this year. This intelligence in extremely valuable. Few things are of greater importance to Canada than this good roads movement.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

The Securities Corporation of British Columbia,

LIMITED.

INCORPORATED.

HEAD OFFICE: VANCOUVER, BRITISH COLUMBIA.

DIRECTORS:

FRANK S. BARNARD, Chairman, Victoria, B.C., Director of The B. C. Electric Railway Co., Limited.
DAVID R. KER, Victoria, B.C., President Brackman-Ker Milling Co., Limited.
RICHARD HALL, M.P.P., Victoria, B.C., Director of the Victoria Sealing Co., Limited.
ROBERT KELLY, Vancouver, B.C., of Kelly-Douglas Co., Wholesale Grocers.
HON. F. L. CARTER-COTTON, M.P.P., Vancouver, B. C., Managing Editor of The News-Advertiser.
WILLIAM FARRELL, of Farrell & Tregent, Vancouver, B.C., President, of B. C. Telephone Co., Limited.
PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as seems safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

AUTHORIZED CAPITAL, $1,000,000.00

In Ten Thousand shares, of the par value each of $100, are offered for subscription at $110 per share.

Payable $5 per share on application, $5 in 30, $5 in 60, and $5 in 90 days, and thereafter to be subject to a call of not more than $5 per share per annum until fully paid.

Five per cent. interest will be paid on all payments in advance of calls until such time as the applicant may elect to receive such dividend as may be declared by the Corporation in lieu of interest. These shares may be paid in full at any time.

SUBSCRIPTIONS for the Shares will be received at ANY B. C. BRANCH OF THE BANK OF MONTREAL, or at The Bank of Montreal, Quebec, Montreal, Ottawa, Toronto, London or Winnipeg and at the CORPORATION'S offices, Vancouver, B. C.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,050
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

The assignment is noted of S. E. Desmarais, general merchant, of Richmond, Que, with liabilities of $8,000. In 1897 he was of the firm Desmarais & Frere, who failed in that year.

Mercantile Summary

Aylmer, Ont., ratepayers have decided to loan the Aylmer Iron Works the sum of $20,000, to be paid back in fifteen years, with interest at 4½ per cent. per annum, the town taking a mortgage on the entire plant as security.

Up to the spring of 1904 Martial Lavoie, of St. Anaclet, Que., was clerking, and at the date named he determined to make an essay in business on his own account. He, however, has not been a success as a merchant, and has already assigned, owing about $4,000.

A Quebec accountant, Mr. V. E. Paradis, is in charge of the estate of Bouchard & Michaud, in a small general store way at Chicoutimi, Que. Their liabilities foot up to $2,600, with apparent assets of $1,800.

The South Western Traction Company are beginning work on their new general station in London, Ont., where the radial company will make close connections with practically all the city systems' lines.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.

WILLIAM BULLEN,
Manager.

London, Ontario, 1905.

It is stated that the Canadian Pacific Railway is endeavoring to secure part of the Songhees Indian Reserve in the heart of the city of Vancouver, B.C., for terminal purposes, the congestion at the present terminus already being great.

Frequent recent suits have appeared against J. A. Roy, general dealer at St. Cyrille de Wendover, Que., finally resulting in a demand of assignment. He was originally in business at Upton unsuccessfully, and in 1896 he failed at present address as one of the firm of Roy & Robinson.

Achille Michaud, of Cabano, Que., far down the St. Lawrence and near the New Brunswick line, was formerly a sawmill hand. Three years ago he lost an arm through an accident in the mill, and he then took to store-keeping in a small way. He has now assigned to a Quebec accountant, and owes $2,100, with light assets.

Holmes & Arpin's sawmill in Montréal was damaged by fire on the 2nd inst. to the extent of $10,000. The box factory was saved. On the same day, an incendiary fire in Sarnia, Ontario, at the Goodison Thresher Company's works, caused $10,000 injury. A self-confessed fire-bug gives the clue to half a dozen fires in that town lately.

As a farmer and implement agent J. W. Meloche, of St. Denis, River Richelieu, Que., was fairly successful, but last spring his ambition induced him to attempt general store-keeping, and he bought out the stock of Charron Freres Already he has become involved, and is reported to have assigned with liabilities stated at $11,000, and assets estimated at $7,000.

The Canadian De-Tinning and Chemical Company, Limited, capital stock $100,000, has been granted a Dominion charter empowering it to acquire an interest in processes for the production of tin from tinware, scrap or other sources and to manufacture or import chemicals for use in that business, also to carry on mining operations. Head office, Montreal.

The Globe Furniture Company, Limited, Walkerville, Ont., has been authorized to increase its capital stock from $50,000 to $100,000 and to extend its powers as follows: To manufacture and deal in household furniture and interior fittings and furnishings of all kinds, and furniture and interior fittiugs and furnishings for churches, schools, theatres, halls, hotels, offices, and public buildings, and many purposes besides.

It is announced that the Quebec Southern, the South Shore and the East Richelieu Valley Railways, which changed hands recently, were bought for the Delaware & Hudson Railway Company. The object being to get an entrance into Montreal from 'Rouse's Point, fifty miles out. The D. & H. now run over their own tracks as far as Rouse's Point, and thence over the Grand Trunk to Montreal. Some reports have stated that the Grand Trunk Company was behind the purchases.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

Mr. William A. Cooper has been appointed superintendent of the C. P. R. sleeping, dining, and parlor car service, in succession to Mr. G. McL. Brown, who has been promoted to be general passenger agent of the company's Atlantic steamship service.

The Northumberland-Durham Power Company, Limited, has a charter to supply steam, heat, electricity or natural gas for heat, light and power purposes. The capital stock is $750,000, and among the provisional directors are W. J. Crossen, W. J. Maher, and others, of Cobourg. The idea is to develop power from Healy Falls.

In connection with the pending amalgamation of large Canadian wholesale druggists, it is of interest to note that a charter is being applied for for an entirely new drug company, with an authorized capital of $75,000, and head office in Montreal. The new concern, it is believed, will devote special attention to patent medicines and druggists' sundries.

More than a million dollars was realized by the land department of the Canadian Pacific Railway from the sale of Western holdings during the month of November. Acres disposed of amounted to 202,667, the price received being $1,075,166, an average of $5.31 per acre. During the same period the Canada North-West Land Company sold 16,000 acres for $106,800, an average of $6.64 per acre.

The Canadian General Service and Colonization Company is the style of a concern which has been granted a charter by the Dominion Government to do business in Montreal, with a capital of $250,000. Its intention is to instal in Canada and elsewhere exhibits of Canadian products, manufactures, and resources, and to lease space for such a purpose, to disseminate information as to those resources, maintain a library of commercial and industrial literature, act as employment agents for skilled labor, etc. Sir Adolphe Caron, Ottawa, and M. Camille Piche, W. J. Poupore, L. Reinhardt, and Dr. L. J. Lemieux are interested in the enterprise.

A little group of St. John, N.B., failures is noted as follows: Webber Bros., dealing in clothing, etc., have assigned, and are said to show assets of about $6,200, while liabilities are figured at $9,800. They were formerly engaged in peddling throughout the Maritime Provinces.——E. Kominsky & Co., another clothing concern, are reported to be offering 20 per cent. upon liabilities of some $3,500. The business has of late been conducted by David Kominsky, an undischarged insolvent in the name of his wife.——S. Romanoff, who, in January last, took over the dry goods business of his father-in-law, Boris Myers, is reported to have suspended, and to be offering his creditors 40 cents on the dollar, the funds for the payment of same to be advanced by his father-in-law.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

OSBORNE & FRANCIS,

54 King Stree est, Toronto.

Mercantile Summary.

Two former grocery clerks, Cook & Halpenny, started out on their own account in 1903 in Smith's Falls. Their assignment is now noted.

F. J. McCready, formerly a salesman in the clothing department of Bryson & Graham at Ottawa, began business for himself in the tailoring and furnishing line last spring. W. A. Cole, assignee, is now in charge of his estate.

Messrs. C. M. Hays, of Montreal, and A. G. Yates, of Rochester, N.Y., and others have been granted a charter to build, buy or charter steamships, tugs and sailing vessels to convey loaded railway cars, coal, and other goods between ports on Lake Ontario, to buy and deal in merchandise, to enter into agreements with railway companies in Canada and the United States providing for the establishment of a car ferry and other service. The company will be known as the Ontario Car Ferry Company, Limited, with a total capital stock of $500,000, and head offices in Montreal.

Mercantile Summary.

The Provincial Construction Company, Limited, Toronto, will carry on a land company business under the usual restrictions. The capital is $50,000.

J. A. Dupuis, in the tinsmithing and stove business at Crysler, Ont., has assigned to J. Gogo, of Cornwall. He started business three years ago, and was previously working as a journeyman.

Arrangements have been made with the Canadian Cordage Flax Company by the town of Glencoe, Ont., to establish their binder twine factory and fibre mills at that place. The company will expend $75,000 on buildings and machinery, and employ 90 men the first year, increasing to 150 the third. A by-law will be submitted to the electors on December 28th to guarantee the bonds of the company for $4,000, secured by a first mortgage, for 20 years, a fixed assessment of $15,000 and a free site.

TORONTO MARKETS.

Toronto, Dec. 7, 1905.

Drugs, Chemicals, etc.—In the local market for drugs the conditions prevailing are very similar to those which have prevailed for some weeks past; that is to say, that while a normally good trade has been done and prices have fluctuated within reasonable limits, there has been little of a striking character on which to comment. As to the British trade in chemicals, an advice just to hand from Manchester states that the satisfactory tone that had for some time been noticeable was more than maintained, and since then there has certainly been no falling away. A good business has been passing all round during this month, both in the home trade and for export, and there appears to be sound reason for expecting a continuance of this, with the activity in the textile and other trades at home and the reports that are to hand from abroad of improving trade and good harvests. Business in heavy alkalies is proceeding satisfactorily. Values of bleaching powder and caustic soda have continued steady, and consumers who had been holding off in the hope of getting some concession in price have been latterly placing their contracts.

BUTCHART & WATSON,
MANAGERS:—Western Canada and Michigan Branches, Confederation Life Bldg., TORONTO.

Ammonia soda and soda crystals are quite firm. Chlorates of potash and soda are steady at the fixed prices, but consumers show some doubt about contracting, although the trade is so well controlled and present prices are really not high. In the tar products branch the improvement already noted is fully maintained, and the general outlook is regarded as satisfactory.

Flour and Grain.—The tone of the market is firmer in sympathy with cables from the foreign and British markets. Deliveries are somewhat lighter, the farmers probably awaiting good sleighing for bringing in their heavy loads. Both Ontario and Manitoba wheat are at steady prices. Not much business is going on in flour for export. Some sales of ninety per cent. patents have been made at $3.10 in buyers' bags, outside freights. Bran and shorts both continue quite scarce, especially the latter. Oats are easier, buyers seeming inclined to hold off. Barley and rye are in light demand. There is no change in oatmeal.

Groceries.—The market for sugar is firm, but no recent changes have been made in price. Dried fruits are in good, seasonable demand. Prices for California prunes have now been put on a settled basis, and show several advances over last season. Walnuts and almonds also are higher. In teas a normal trade is passing, and prices keep fairly firm. Canned goods, both vegetables and fruits are moving out steadily at high prices. Strawberries are not to be obtained in the market. Tomatoes too are comparatively in light stock. Travelers in the rural districts report prospects good for a brisk season's trading. Payments are reported to be generally satisfactorily.

Hides and Skins.—Local prices have declined as have those in Chicago. Tanners are not anxious to buy. Prices for leather are unchanged, but no great amount of business is being done. It is expected to improve with the general advent of sleighing.

Live Stock.—At last market day there was a distinctly firm demand for butchers' cattle and some stall-fed animals for the Christmas trade fetched $5.25. Prices for the ordinary run of cattle, however, remain about stationary around $4.00 to $4.50 for choice, down to considerably lower for poor to medium. For export trade not many animals were in demand and prices were nominally the same. There is an active demand for good milch cows. The enquiry was quite brisk for sheep and lambs. A rise of 25c. in hogs has been well maintained.

Provisions.—Butter, cheese and eggs among dairy products are all quite firm and selling readily. Poultry is plentiful and selling at average figures for the season. Smoked meats are in fair demand at normal prices.

Wool.—Prices for wools are merely nominal as practically no wool is in the market.

* * *

MONTREAL MARKETS.

Montreal, Dec. 6th, 1905.

Ashes.—Business is now about as flat as it can be, and quotations are more or less of a nominal character at $5.25 to $5.30 for No. 1 pots, and from $7.00 to $7.50 for pearls.

Dairy Products.—The cheese market is stronger than a week ago under bet-

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

ter export demand and firmer cable advices, and from 12½ to 12⅝c. per lb. is quoted for finest Westerns, while it is claimed in some quarters that 12¾c. has been realized. Easterns quote at 12 to 12¼c. for desirable grades. For butter there is a good local demand, with no great plenty of stock, and fancy creameries are quoted at 23¼ to 23½c., and good to choice 22½ o 23c.; dairy is worth about 21c. Completed statistics for the season of navigation just closed show total shipments of cheese from this port at 2,121,101 boxes, of an estimated value of $18,029,000, and 573,449 packages of butter valued at $7,397,000. For the season of 1904 the figures were, 2,114,639 boxes of cheese, and 490,300 packages of butter.

Dry Goods.—Notwithstanding the fact that retail business in both city and country has suffered from the open fall season collections are very fairly sustained and several leading houses report that from 80 to 85 per cent. of their customers' paper, due on the 4th inst., was taken up. A good many houses are engaged in stock-taking, and the actual volume of business, outside assorting Christmas parcels, is moderate. Spring orders continue to come in well. All European advices indicate increasing firmness in almost all lines of goods.

Groceries.—The week has passed without any change in sugars, the quotation for standard granulated being $4.30 in barrels, and $4.25 in bags. Teas are hardly to be called active, but values all around are very steady, and Ceylon greens and blacks may be termed firmer. Notable scarcity is reported of canned string beans and strawberries; tomatoes are held very firm at 95c., and corn at 85. in a jobbing way. Evaporated apples are considerably dearer, and from 9½ to 10c. is asked by some dealers; dried apples are worth about 5½c. Valencia raisins show a little steadying from the strong decline at primary points. Locally fine off-stalk are quoted at 4 to 4½c., according to brand; selected, 5c; Sultanas are firmer a good half cent. Sago and tapioca are high, and would cost 4½c. to lay down. Brooms are advanced 15c. a dozen.

Hides.—Hides continue high in price and though 12c. is the general market rate, 12½c. is being paid in certain cases. Lambskins are steady at $1.00 each.

Leather.—There is far from any sagging in values, but rather continued tendency to advance, though the present demand is not altogether active. For No. 2 manufacturers' sole 25c. appears to be the general figure, and 26c. for No. 2 jobbing. Black leathers are also very stiff, as high as 34c. being asked for harness. Owing to the scarcity and high prices of hides it is reported that a good many of the smaller tanners are being obliged to shut down.

Metals and Hardware.—The continued advance in general metals is a marked feature of the market. Lead goes up by leaps and bounds, an advance of 12c. being established to-day, and the present local quotation is $4.55 for pig, and $5.00 for sheet; copper is again dearer at 19½ to 19¾c., and spelter at 7 to 7¼c.; ingot tin, 38c. Tin-plates are now up to $4.00 for cokes, and $4.25 for charcoals of standard brands and weights; Canada's are now $2.60 for fifty-twos, and galvanized Canada's, $4.10; galvanized sheets, $4.15 for 30-inch, twenty-eight gauge, in case lots, smaller quantities 25c. more. Sheet steel is now quoted at $2.45 for Nos. 8, 10, 12 and 14, $2.35 for 17 and 18, and $2.30 for Nos. 22 and 24. Cast steel is quoted at 7¾c. per lb.; sleigh shoe steels $2.17½, and tire $2.27½.

Oils and Paints.—Stock-taking is now general among houses in this line, and trade is getting to be of a holiday character. The only noteworthy change in values is a decline in turpentine, which is now quoted at 92c. per gallon.

BANK OF MONTREAL.

The eighty-eighth annual general meeting of the shareholders of the Bank of Montreal was held in the Board Room of the institution at noon on Monday, 4th December.

There were present: Hon. Sir George Drummond, K.C.M.G., vice-president; Hon. Robert Mackay, Messrs. R. B. Angus, E. B. Greenshields, A. T. Paterson, R. G. Reid, Hon. J. K. Ward, Dr. W. Gardner, Messrs. G. F. C. Smith, F. S. Lyman, K.C.; Angus Hooper, George Durnford, Richard White, A. Piddington, Henry Dobell, John Turnbull, B. A. Boas, C. R. Black, Henry Morton, G. A. Greene, L. Sutherland, W. H. Evans, M. S. Foley, W. Stanway, M. O'Shaughnessy, W. D. Gillean, D. Morrice, A. G. Watson, G. H. Matthews, P. F. McCaffrey, J. Scott, W. B. Blackader, James Tasker, Percy R. Gault, and John Morrison.

On the motion of Mr. R. G. Reid, Sir George Drummond, vice-president, was unanimously voted to the chair, in the absence of the president, the Right Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. A. Piddington, seconded by Mr. Henry Dobell, it was voted: "That the following gentlemen be appointed to act as scrutineers: Messrs. F. S. Lyman, K.C., and G. F. C. Smith; and that Mr. James Aird be secretary of the meeting."

The report of the directors to the shareholders at their eighty-eighth annual general meeting was then read by Mr. E. S. Clouston, general manager, as follows:

REPORT.

The directors have pleasure in presenting the report, showing the result of the bank's business for the year ended 31st October, 1905:

Balance of Profit and Loss account, 31st October, 1904		$ 583,196 01
Profits for the year ended 31st October, 1905, after deducting charges of management, and making full provision for all bad and doubtful debts..................		1,638,659 40
		$2,221,855 41
Dividend, 5 per cent., paid 1st June, 1905	$700,000 00	
Dividend, 5 per cent., payable 1st December, 1905 .	720,000 00	
		1,420,000 00
Balance of Profit and Loss carried forward		$ 801,855 41

Since the last annual meeting of the shareholders, the bank has acquired the assets and business of the People's Bank of Halifax, with twenty-six branches. The bank has also established since the last annual meeting, sub-agencies at the following points, viz.: Altona, Oakville and Logan Avenue (Winnipeg), in Manitoba; Enderby and Nicola in British Columbia, and Hochelaga (Montreal), and is about to establish sub-agencies at Fort Rouge (Winnipeg), and Ste. Anne de Bellevue.

The headquarters building on St. James Street is now completed and in occupation.

In response to the desire expressed by a number of our shareholders, the directors propose that the dividend should be paid quarterly, instead of half-yearly, viz.: on the first day of March, June, September and December.

All the offices of the bank, including the head office, have been inspected during the past year.

STRATHCONA AND MOUNT ROYAL,
President.

The General Statement.

The general statement at 31st October, 1905, is as follows:—

LIABILITIES.

Capital stock		$ 14,400,000 00
Rest	$10,000,000 00	
Balance of profits carried forward........	801,855 41	
	$10,801,855 41	
Unclaimed dividends ....: . .	701 57	
Half-yearly dividend, payable 1st December, 1905	720,000 00	
		11,522,556 98
		$25,922,556 98
Notes of the bank in circulation............	$12,996,181 00	
Deposits not bearing interest..........	31,438,001 32	
Deposits bearing interest..............	87,725,211 07	
Balances due to other banks in Canada	150,459 14	
		132,309,852 53
		$158,232,409 51

The General Manager.

The general manager then spoke as follows.

I purpose confining my few remarks to the balance sheet submitted to you, and to one or two matters more closely connected with banking, leaving the general condition of business in the country to be dealt with by the vice-president.

The principal features in the statement are the increase, since last year, of $2,000,000 in our circulation, an indication of the universal activity in business, and of $7,750,000 in deposits not bearing interest; but of this latter a considerable proportion was a temporary deposit made at the end of our fiscal year, and since withdrawn. Our deposits bearing interest show a satisfactory increase of $16,000,000. Our immediately available assets stand at $68,000,000, a greater amount than, as a rule, we consider necessary, but in view of the rather uncertain future of Continental finance, owing to the state of affairs in Russia and the somewhat boom condition in this continent, it is well to be strong, and in any case we are in a good position to take advantage of any desirable business offering. Our loans and discounts have increased $7,000,000, accounted for partly by the increased demands of the commercial community, and partly by the absorption of the People's Bank of Halifax.

The low rate ruling for call money in England and the United States during our fiscal year affected our profits adversely, as we are obliged to carry a large portion of our reserve in those markets; but of late there has been a decided improvement, which may be maintained during the winter.

Owing to the magnificent crop and the general activity in business, an unusual strain was placed on the circulation, but at the highest point attained by all the banks, about $79,000,000, there was still a margin of $4,500,000; and with the addition of new banking capital and the increase of branches, it seems as if, for some time to come, the circulation provided will be sufficient for the needs of the country. The advantage of the Canadian system has been amply demonstrated during the late pressure for money. Notwithstanding the heavy demands to move the largest crop in our history, the interest rate to our people has remained normal. We have only to glance at the condition of affairs across the line to see what fluctuations in rates for money the public are subjected to under the system there in vogue.

In March last, the Bank of Yarmouth failed under circumstances reflecting much discredit upon those responsible for its condition, and, for the first time since the incorporation of the Canadian Bankers' Association, that body had to exercise the power conferred upon it by Parliament in 1900, of assuming supervision of the affairs of a suspended bank.

The liquidator chosen by the Canadian Bankers' Association was subsequently appointed by the court sole liquidator.

E. S. CLOUSTON,
General Manager.

Bank of Montreal,
Montreal. 31st October, 1905.

The General Manager.—Continued.

The results have been highly satisfactory, particularly when viewed in the light of what has followed former failures of Canadian banks. The winding up of the defunct bank has been conducted with remarkable expedition and economy, and the rights and interests of the creditors so well protected that the liquidator has been able, in nine months, to pay all of their claims, with interest added thereto. That no loss to the depositors and other creditors of the Bank of Yarmouth has resulted from this failure is, it must be admitted, largely due to the prompt and creditable recognition by its unfortunate shareholders of their liability for the utter insufficiency of assets to pay the debts of the bank in question.

An interesting event in financial circles was the offering here of a portion of the Japanese loan, the first time in the history of Canada of any foreign loan being issued locally, and, considering the short time at our disposal, the success was surprising.

In conclusion, I may say that the one word written large in the records of Canada this year is 'Prosperity." Railways, manufacturing industries, merchants, farmers, all are prosperous. Immigration grows steadily; labor has full employment, and is well remunerated. Probably never before have we had a twelvemonth of such universal prosperity, and it is during a year like this that everyone should set his house in order. Collections should be pressed, and manufacturers should husband their resources and strengthen themselves in every way; for they are to a great extent prosperous by the grace of their neighbors, and when adversity comes to other countries, the American bargain counter will be opened in Canada, and our manufacturers and their employees will surely suffer.

Vice-President's Remarks.

The vice-president, in moving the adoption of the directors' report, said:

The position of the bank is fully exhibited in the statements laid before you and the remarks of the general manager. Following, however, the practice of many years' standing, I venture to offer a few observations.

The remark has been made before, and is now repeated, that the profits of banking, and consequently the cost to the public of the use of money, are steadily decreasing. This is due mainly, I think, to the accumulation of wealth in the country, the consequent increase in the number of banking companies and of their capital, and the resulting keenness of competition. Proof of this is to be found in the following figures:

1st. As to the accumulation of weath. The deposits in all the chartered banks in the Dominion, in 1870, were 49 millions of dollars, in round figures, omitting fractions of a million; in 1880, were 85 millions; in 1890, were 136 millions; in 1900, were 305 millions; in 1904, were 470 millions.

The Dominion Government Savings Bank held in the same year (1904), nearly 62 millions, making bank and Government deposits 532 millions.

2nd. As regards banking facilities. Five new banks have gone into operation since 1900, with an authorized capital of $9,000,000. Five have been absorbed into other banks, but their capital presumably remains, under other control, and one bank, referred to by the general manager, with a capital of $300,000, has failed. It may also be mentioned that charters have been obtained from Parliament during the last three years of eleven new banks, with a capital of $19,000,000.

As regards our own bank, it has been the care of the directors to advance with the times, and I give you a few figures to show the progress which it has made.

In 1863 the capital was $6,000,000; assets, $15,252,000.

In 1873, the capital was $11,296.831; assets, $34,252,000.

In 1879, the capital was $11.999,000; assets, $36,221,000.

In 1887, the capital was $12,000,000; assets, $42,000,000.

In 1890, the capital was $12,000,000: assets, $46,166,000.

In 1905, the capital was $14.400,000; assets, $158,470,000.

Our branches, which in 1863 numbered 29, are now 100.

General Trade of the Country.

A review in detail of the various trade and manufacturing industries may be summed up in the general report of almost unbroken prosperity. Probably never in Canada and the United States have crops of all kinds been better in quantity and quality.

In regard to one of our staple industries, the lumber trade, I am tempted to express the conviction that we are using up our resources in a most reckless fashion, certain to end disastrously, unless we take prompt steps to treat it as other crops, and replant on an adequate scale.

The increase of manufactories, thereby creating a home market for produce of every kind, is most marked. In this city and neighborhood a great number of large factories are springing up, and whatever may be said of our tariff, it unquestionably has had the effect of inducing the manufacture in this country of goods previously imported, with all the advantages of increased employment and circulation of money in this country. A number of these manufactories are branches, or offshoots, of industrial organizations in the United States.

The value of the home market is not sufficiently appreciated if the statistics published by a recent writer be true, that "Western Canada produced two and half times as much oats and thirty-four times as much barley as Canada exported."

The failures in Canada are considerably smaller this year than last, being: 1904, $11,189,223; 1905, $9,511,472.

The feature of the year, however, is the splendid crop which has just been harvested in the North-West Provinces and in Ontario. As regards the former, the most sanguine anticipations have realized, and it seems beyond doubt that the following estimates of this season's crop in Manitoba and the North-Western Provinces are conservative:

Wheat, 90 million bushels, worth on the spot, say, 65c.; oats, 65 million bushels, worth on the spot, say, 25c.; barley, 13 million bushels, worth on the spot, say 30c.; flax, ½ million bushels, worth on the spot, say, 80c.; rye, 1-3 million bushels, worth on the spot, say, 35c. In all, 169 million bushels of grain.

Of course, a proportion of these crops will be consumed by the farmer, as no doubt will all the root crops—of which potatoes alone are estimated at 8,000,000 bushels—as well as hay, but of these I take no account.

At the prices set down, it is not difficult to reach an approximate sum of 75 millions of dollars, or 15 million pounds sterling, to be distributed among a comparatively small population, and won from a soil which was considered barren, and surrendered to the wilderness only a few years ago.

In addition to the foregoing, and not included in the above estimate, 70,000 cattle were disposed of during the year in the North-West.

Incidentally, I may mention that I am informed by expert millers that this year's wheat is so good in quality that 7 per cent. less of it is required to produce a given quantity of flour than an average.

It is asserted that the area so far brought under cultivation does not, from the most accurate information obtainable, much exceed 5 per cent., and certainly it is well under 10 per cent. of the area available, and waiting for occupants.

In this connection I may quote here a sentence from an able and well qualified Government officer, who has just completed a wide survey of the Territories. He says:

"The immense wealth so long stored in the virgin soil of the great Western country will be gradually developed, and the fact that Canada is destined to rapidly become one of the greatest food producing nations in the world will soon become apparent to all, in the volume of her exports."

The great extensions of the railway systems operating in this country must not be passed over. The Canadian Pacific Company is spending vast sums in improvements and extensions. The Canadian Northern is pushing westward, while the Grand Trunk Pacific is preparing for an extension to the Pacific, and the Government of Canada has the railway connection between Quebec and Winnipeg, and is now surveying the line.

With general political events we have nothing to do, except as regards their effect on our financial institutions. A note of thankfulness was heard when an end was put to the mighty war in the Farther East.

It was specially grateful to this community when a friendly understanding was reached between England and France, and we trust that the portentous cloud overhanging Russia may be dissipated by wise and liberal measures. Meanwhile, it remains an ominous factor, exciting the liveliest apprehensions among Russia's creditors, and the deepest interest in the whole civilized world.

I can only, in conclusion, echo the general manager's advice, that the abounding prosperity of our country should be prudently accepted and used.

I move: "That the report of the directors, now read, be adopted and printed for distribution among the shareholders."

The motion was seconded by Mr. A. T. Paterson, and after some appreciative remarks by Mr. John Morrison, it was unanimously adopted.

Amendments to By-laws.

The vice-president then remarked: I have now to ask you to consider amendments to the by-laws, which the directors deem advisable. The first is an amendment to by-law No. 3, the alteration being to make the number of directors ten, instead of nine, as at present. Perhaps you are aware that up to the last session of Parliament, the General Banking Act only permitted the election of nine directors to any bank. They were not to be fewer than a certain number, and not more than nine. That has now been changed, and practically the number of directors is unlimited, if the shareholders so desire. The proposal of the directors now going out is that the number be made ten, instead of nine; and the reason will appear a little later in the proceedings. I would, therefore, move:

"That, whereas it is advisable to increase the present board of nine directors to ten; by-law No. 3 is hereby amended by strking out the word 'nine,' as appearing in said by-law, and inserting in its place the word 'ten.'"

This was seconded by Mr. A. T. Paterson, and was unanimously agreed to.

The vice-president—The next alteration is:

"Whereas it is advisable that power be given to the shareholders to elect an honorary president, by-law No. 6 is hereby amended by adding to it the following words:

"The directors may also, at their said first meeting, elect by ballot one of their number to be honorary president."

It is due to you to say that this has special reference to Lord Strathcona. He has occupied the post of president for eighteen years, and last year he expressed a desire to be relieved of it. The directors were unwilling to have his name severed from the bank which he had so long and usefully served. The creation of an honorary president was authorized in the amendment of the Banking Act, and under that authority this can now be done. I will, therefore, move that the resolution which I have just read be adopted.

This was seconded by Mr. A. T. Paterson and was concurred in unanimously.

The vice-president—It seems proper at this stage that the long and valued services of Lord Strathcona, in connection with this bank, should be acknowledged by the shareholders, and I have the honor and pleasure of moving, seconded by Mr. E. B. Greenshields, that a cordial recognition, in suitable terms, be sent to Lord Strathcona expressing the appreciation in which the shareholders,—and they include the directors—hold him and his services to the bank.

Mr. E. B. Greenshields—I have very much pleasure in seconding the resolution just proposed. We all feel that the bank has been honored in the past by having Lord Strathcona as its president. When he first went to London as Canadian Commissioner, he hoped to be frequently on this side of the Atlantic and at our meetings; and it was with much regret that he found himself unable to be here as often as he had expected. Not only should his great services to the bank be noted; but we also wish to put on record as shareholders of the bank and as citizens of Montreal and the Dominion of Canada, our very high opinion of him as a man. We feel proud of having had him as president of this bank, and it is with very great regret that we hear that the connection is to be to a certain extent severed. But we are all pleased that he is to remain with us as the honorary president of the bank, and that his name will still be associated with this institution. I know I express the feeling of every shareholder when I say that we all have the greatest admiration for him in his public capacity as High Commissioner for Canada, and appreciate all he has done for this country, but besides this we would like to assure him that we have a very warm feeling of personal regard for himself.

Mr. John Morrison—I give my cordial assent to the motion, for a more deserving gentleman it would be hard to find.

The motion was unanimously and cordially adopted.

Resolutions of Thanks.

Mr. B. A. Boas then moved.

"That the thanks of the meeting be presented to the president, vice-president and directors for their attention to the interests of the bank."

This was seconded by Mr. W. Stanway, and was carried unanimously:

Mr. E. B. Greenshields moved:

"That the thanks of the meeting be given to the general manager, the assistant general manager, the inspector, the managers and other officers of the bank, for their services during the past year."

In making the motion Mr. Greenshields remarked:

I wish to say that the opinion of the directors is unanimous that in the general manager, the assistant general manager, the inspectors, the managers and the other officers of the bank we have a thoroughly efficient and reliable staff to carry on the work. I had the pleasure last year of meeting a number of the managers, from Winnipeg to Victoria, and I also know many of those nearer Montreal. I am very much pleased always to see among them a fine "esprit de corps," that inspires the feeling that the Bank of Montreal is the institution to work for, and that ability and con-

scientious work will always be recognized and rewarded.

Hon. Robert Mackay seconded the motion, which was unanimously adopted.

Mr. C. R. Black suggested that it would be in the interests of the shareholders generally if the management would consider the mailing of cheques for dividends, as other banks did, now that the dividend was to be quarterly, instead of the shareholders having to go to the bank.

The general manager—I will take that into consideration, and see if it cannot be carried out. I also beg to thank the shareholders on behalf of the staff for the very kind way they have spoken of us.

The vice-president—The suggestion of Mr. Black will be referred to the board.

Mr. John Turnbull moved, seconded by Mr. George Durnford:

"That the ballot now open for the election of directors, be kept open until 2 o'clock, unless 15 minutes elapse without a vote being cast, when it shall be closed, and until that time, and for that purpose only this meeting be continued."

This was unanimously concurred in, and a very cordial vote of thanks was accorded the chairman who acknowledged the same.

The Directors.

The ballot resulted in the election of the following directors:

R. B. Angus, E. S. Clouston, Hon. Sir George Drummond, K.C.M.G., Edward B. Greenshields, Sir William Macdonald, Hon. Robert Mackay, Alexander T. Paterson, Robert G. Reid, James Ross, Right Hon. Lord Strathcona and Mount Royal, G.C.M.G.

At a meeting of the board of directors held at noon on Tuesday the resignation of Lord Strathcona as president was accepted. The elections resulted as follows: Hon. president, Lord Strathcona and Mount Royal; president, Sir George A. Drummond; vice-president and general manager, Mr. E. S. Clouston.

Mercantile Summary.

Our Halifax correspondent writes that the Cumberland Telephone Company in liquidation has been sold to Dr. C. O. Hewson for $14,000.

J. Dussault's dry goods store in Quebec was burned on the 3rd inst., the stock valued at $20,000 and insured for $15,000 being totally destroyed. Faguy, Lepinay Brothers' dry goods store, next door, was also damaged to some extent.

The workshops of the Prince Edward Island Railway at Charlottetown were on the 30th ult. burned down. The buildings included the car shop, the machine shop and blacksmith shop. The first was totally destroyed, with two cars partly built, and all machinery and tools. The other buildings were gutted. The works employed about 120 men. The loss is roughly estimated at $65,000. All the construction and repair work in the railway is paralyzed for the winter by the fire.

L. Rabiewitch's general store at Belwood, near Guelph, has been destroyed by fire at a loss of $5,000, partly insured.

A terrible disaster occurred on the 4th inst. to the old Nova Scotian coasting steamer "Lunenburg" on the reefs of Magdalen Islands. Six of her crew of seventeen were drowned, as well as Robt. J. Leslie, M.P.P., who owned the vessel, and who was senior partner in the firm of Leslie, Hart & Co., lobster packers, etc., Halifax.

It will be unwelcome news to many Canadians that the well-known old hostelry, the British-American Hotel, is to close this week. There are bonds to the extent of $50,000 in the British American and Frontenac societies combined, and the interest is two years in arrears. The hotel is owned by the Kingston Real Estate Company.

Amazing is the only word for the growth of the import business in agricultural machinery into Siberia, says the "Mercantile Guardian." My figures relate solely to consignments by rail, and they show that by a gradual progression, the 1,200 tons of 1897 became the 21,000 tons of 1903. As has been pointed out so often, the trade is done from local depots on lengthy credit terms. The butter export trade of the country has provided peasants with the means to make these colossal purchases. That business improves, and no doubt the demand for machinery will be continuous.

On Tuesday night last the large and important cigar factory in Montreal of S. Davis & Sons was gutted by fire. The building was owned by Mr. James Robinson, who will lose between $15,000 and $20,000, covered by insurance. The manufactured stock and raw material were completely destroyed at a loss of approximately $100,000, large quantities of goods being in hand for the Christmas trade. It is understood that the firm will carry on business so far as possible at their "Cuban" factory, which is also in Montreal. The former building, which is a very solid stone structure, has been gutted by fire on two previous occasions.

Mackenzie & Mann are said to contemplate, as one of the links in their scheme for a trans-continental line, the placing on Lake Superior of a fleet of ice-breaking car ferries. The idea is to keep navigation open during the winter months between Port Arthur and Batchawaning Bay, which is described as a splendid harbor on Lake Superior, about thirty miles from the "Soo." Thus the company would have an almost direct line from Edmonton, Alberta, to Ottawa, for in connection with the proposition to place the car ferry service on Lake Superior is that of taking over the rights of the Manitoulin and North Shore Railway, which was one of the Clergue schemes. The Manitoulin and North Shore Railway right-of-way runs between Sudbury and Searchmont on the main line of the Algoma Central Railway, a short distance north of the "Soo." From Searchmont a line would be built into Batchawaning Bay.

We observe that Mr. H. Waddington, formerly managing director of the London Mutual Fire Insurance Company, has established himself as a trustee and financial agent in the Confederation Life building, Richmond Street, Toronto.

November just past was a record for the fall building season in Montreal. The permits for new buildings reached the value of $313,645 or $86,965 more than November 1904, while in addition the permits for alterations were $26,871 against $8,225 a year ago.

On Thursday night last week there was an alarming fire at Shea's Theatre, Toronto, which started about an hour after the audience had departed. It broke out in the roof and originated apparently through defective electric wires connected with the large central chandelier. The stage was saved through the instrumentality of the asbestos curtain, while the roof and ceiling will need replacing, and the orchestra chairs and boxes and much of the parquet were almost completely destroyed. The building is owned by the McGee estate and leased to Michael Shea, of Buffalo, for vaudeville purposes. The loss is estimated at $15,000, covered by insurance.

Messrs. Marion & Marion, patent attorneys, Montreal, and Washington, U.S., furnish the following list of Canadian patents secured through their agency: 96,226, Messrs. Roy & Godbout, Quebec, shoe; 96,232, Myer Moss, Lunenburg, N.S., wrist protector; 96,233, Wm. F. Earl, Athens, Ont., acetylene generator; 96,268, Albert Collet, Paris, France, motor vehicles running on road or rail; 96,278. Frank E. Holt, Vancouver, dust guard; 96,283, Dr. Wilhelm Michaelis, Villingen-Baden, Germany, sound producing and recording apparatus; 96,288, Amedee Tardieu, Brussels, Belguim, vehicle wheels; 96,314. Malcolm B. Jackson, Hamiota, portable book rest.

Some of the St. John, N.B., mills have resumed operations, a raft of 1,000,000 feet of logs having arrived from the booms and about 2,000,000 feet more being expected. There is no hope, however, of getting out the many millions that are hung up on the Upper St. John River, and accordingly there will be a great scarcity of lumber next spring. There has been much activity in shipping to the United States, the figures for the three months ended September 30th being $537,175.17, as compared with $336,178.64 for the corresponding time in 1904. These periods represent shipments of lumber, clapboards, shingles, lath, pulp-wood, etc. There were received at Boston in one week recently twenty-four schooners from the provinces loaded with lumber, shingles and lath. The demand continues active and the available supply seems to be steadily decreasing. The shingle market, on the other hand, lacks snap, which is the only reason why prices are not higher, as the supply is light. Extras are still offered at from $3.30 to $3.40 for Boston delivery.—Canadian Lumberman.

Mercantile Summary.

According to the Amherstburg "Echo," the first tobacco-buying flurry, in Colchester township at least, is over and the price of leaf has dropped to six cents per pound. Farmers thereabout have a notion "that they are being discriminated against in favor of a combination among the tobacco buyers of this district," and it begins, says the "Echo's correspondent, to look as if this is so.

The Donaldson Steamship Line has awarded a contract to a Clyde shipbuilding firm for a 10,000-ton passenger steamship, fitted with twin screws, quadruple expansion engines, and equipped with all the latest comforts and conveniences for passengers. Cold-storage accommodation has also received special attention in the plans. This new steamship is intended to run direct between Montreal and Glasgow.

In former days, Henry R. Thompson was the secretary of a Montreal fire insurance company operating in the St. Francis district of the Eastern Townships. In 1899 he began country storekeeping at Ulverton, subsequently opening branches at French Village and Kingsey Falls. He has not always been found prompt pay and during the current fall several suits have appeared against him. He has now assigned upon the demand of a Montreal creditor, and a meeting of creditors is called for the 11th inst.

The traffic through Lachine canal, for the season which has just closed, was considerably in excess of that of last year. The number of Canadian steam-

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

ers which entered the canal basin was 1,050, as against 799 in the preceding season, being an increase of 251; Canadian barges numbered 1,477, against 1,334, an increase of 143; American vessels numbered 135, against 151, a decrease of 16, and the total tonnage of vessels was 482,684, against 436,079, an increase of 46,605. The passengers totalled 55,032, as against 47,335, an increase of 7,697, and the tonnage of all classes of merchandise was 105,436, against 88,208, an increase of 17,228, while the number of feet of lumber was 117,026,075, against 107,016,867, an increase of 10,009,208 feet.

Several important mining deals have been made in Cobalt during the past few days. The Imperial Mining Co., we understand, has bought a 40 acre claim on Cross Lake, from Mr. Green, of Sudbury for $60,000. Considerable silver has already been obtained from it. Another report says the McLeod and Glendenning mine in the same district has been purchased by Mr. Hanson, of Los Angeles, for $250,000. The claim lying half way between Peterson and Cross Lakes owned by Glendenning and Sinclair has been sold, we hear, to Ottawa parties for $60,000. These last two properties lie on opposite sides of the claim on which is located the E. Watts' mine. An assay made by the Cobalt Assay office in November on 25 tons of ore taken 25 feet below the surface, gave 23.717,82 ounces of silver per ton, which at sixty cents per ounce is $14,230.60 per ton value.

* * *

THE BEAUTIES OF THE FOREST.

Consider the beauties of the Canadian forest. I do not know what experience of forest life some of you gentlemen may have had, but in my youth I played Indian for several years. The forest was my home winter and summer, and to this day, and at any hour of the day, I can lay my memory tribute for scenes that make me long to be lost once more to civilization, a stranger to worry, to work and to noise. When I call up the scenes I have witnessed as I floated in a bark canoe along myriad streams and lakes innumerable, their shores clothed in living green from the highest hills to the waters' marge, not a scar or mark of fire visible, the whole landscape absolutely perfect, wholly quiet, and inexpressibly lovely, just as it came from nature's hands, one of the most beautiful of nature's beautiful works, and then think of the dread probability of this earthly paradise being blotted out and burned into a blackened waste by the carelessness or folly or worse of man, I am stirred to my innermost depths with the desire to prevent such sacrilege, and I have motive enough, putting everything else aside, to enlist me in the cause of forest preservation.—Aubrey White, in an address before the Canadian Forestry Association.

* * *

CHRISTMAS FIRE DANGERS.

At Christmas time, the dangers from fire are appreciably increased. The Canadian Fire Underwriters' Association in recognition of this fact, has issued a circular to insured merchants, saying:

"The use of Christmas greens, harvest specimens and other inflammable materials, such as draperies, scenery, cotton to represent snow and the like (especially in connection with electric and other lighting systems), is decidedly an increase of hazard, it being impossible to make displays of that nature perfectly safe. In addition to the danger to property from the displays referred to, the danger to life in crowded stores or places of meeting, by reason of a panic occasioned by a fire, even though it be small and easily controlled is so great that the underwriters, who have made a study of such hazards, would fail in their duty should they not give this warning."

A second circular is addressed to the clerks of the municipalities and warns them to keep their fire appliances in good order. Thus:

"The approaching cold weather warns us that a lack of attention to fire extinguishing apparatus might result in a great and unnecessary loss should a fire occur under such circumstances. Therefore it is essential that every precaution should be taken to have fire-fighting appliances in such shape that they are always immediately available for use, in first-class condition. Fire halls should be sufficiently heated to prevent freezing of chemical and other appliances. Frequently fires have reached large proportions before being brought under control, which would have been trifling had it not been for frozen appliances and other defects directly chargeable to lack of care and attention, particularly during the cold weather."

* * *

—Architects and builders are now recognizing the utility of the western or mountain larch for interior finish, says the "Canadian Lumberman." It is very similar, although considered by experts to be much better, than the famous American or Idaho larch. Speaking of the latter, Mr. E. T. Chaplin, the well known lumber expert, said:—Larch lumber is of a reddish color, resembling fir in grain and quality. It is as hard as fir, but carpenters claim it does not split as easily. It is a better lasting wood when exposed to the weather.

THE INCREASING CONSUMPTION OF WOOD

So that none of our readers may rest under the delusion that the subject of forest conservation is one of merely academic interest, it will be well to give a resumé of some of the points made in a very striking address, by Dr. Judson F. Clark, Forester of the Province of Ontario, before the Canadian Forestry Association.

It is an admitted fact that other materials, such as iron, steel, cement, etc., have largely taken the place of wood in construction work. At the same time, while this is undoubtedly going on, the ratio in which the consumption of wood increases is growing larger than ever. In most, probably all, countries of the civilized world, the per capita demand for wood becomes larger with every year, notwithstanding the substitution of other materials.

Dr. Clark gives the case of Great Britain as a notable illustration in point. That country offers a good test, for she imports practically all her lumber, which is thus apt to be used with economy, and she is also a leading country in the consumption of iron and cement. Surely, there, if anywhere, would be shown a falling off in the consumption of wood commensurate with the increase in price. The exact contrary, however, is shown to be the case. The increase in the consumption of wood by the United Kingdom in the fifteen years from 1886 to 1900, was eighty per cent. Not only this, but per capita tables show that the average man increased his use of that material by sixty per cent. in the same period. The per capita consumption of cabinet woods also increased one hundred per cent., while that of wood pulp actually increased by three hundred per cent. In the United States a similar story is told, with heightened emphasis, the consumption of wood having grown from 160 feet board measure per head of population in 1850 to 460 feet in 1900. Dr. Clark avers that, were it possible to limit the annual cut in North America to a volume equivalent to the annual growth, as is now commonly the case in Europe, there would be such a shortage of supplies that not only would exportation be impossible, but prices would advance to unheard-of figures. The gradual exhaustion of the remaining forests and the continued devastation by fires, will soon, he prophesies, force this result; and the day will come, not so far ahead, when North America will import at high cost a poor substitute for the cargoes of the finest timber in the world, which she has been sending abroad at little more than the cost of cutting and transporting.

Coming still closer home, Dr. Clark refers to the forest resources of Canada, which he acknowledges to be very great. However, speaking of what a mistake it would be to declare that these resources are inexhaustible, he says:—

> Twenty years ago the white pine in Michigan was regarded as inexhaustible. To-day six million acres which thirty years ago carried the finest white pine forest in the world have been abandoned by their owners for taxes, and lie almost wholly waste, a man-made desert, the combined result of a reckless use of the axe and a still more reckless use of fire. While it is very improbable that any considerable body of men hold that the forests of Canada are inexhaustible, I believe that not a few over-estimate the national forest wealth. True, we have some hundreds of millions of acres of forest lands—lands which on account of their non-agricultural character must, or at least should, always remain under forest cover. Such an area is almost beyond human comprehension. So, too, I fear is the destruction of the forest by fire in this northern vastness. I have read with some care the stories told by explorers, surveyors and trappers, and all tell a tale of forest destruction by fire during the last twenty or thirty years, which, if the total could be brought together, would stagger belief. I have myself made a somewhat extended trip beyond the height of land in northern Ontario, and during the three weeks' travel I did not see a square mile of forest which did not show traces of having suffered by one or more fires during the last 150 years. A section of Banksian pine, cut near Mattagami, on the western border of the Temagami forest reserve,

showed positive evidence of having suffered from severe fire four times within the last sixty-six years, at intervals of nine, thirteen and forty-two years respectively.

To this, nevertheless, Dr. Clark adds. . . . . "We still, without a doubt, however, have in our woodlands an asset which, if conserved by wise use, will make of Canada one of the richest of nations. . . The insuring of an adequate supply of timber for the development of the resources of our country is a matter of the greatest importance to us."

* * *

BELGIAN FARMERS FOR CANADA.

Among letters of enquiry about Canada which have come to us recently from Brussels, Liege, and Amsterdam—mostly, however, from merchants and professional men—is the following dated from Forest-Bruxelles, Belgique, 18th November. It is doubly interesting because it is from a farmer who proposes to bring to Canada a family of trained farmers. It is farmers this country wants. If experienced in intensive farming, as Belgians are likely to be, all the better.

> Dear Sir,—I beg to inform you that some relations of us and I would like to start for Canada in Ontario in order of cultivating and farming.
>
> I beg to ask you if it is not too much trouble to you to let us know where we could for such a time find any employment near some great farmers? What could be the rewards in return of our services? Each of us being thoroughly farmer in our Belgian cultivating manner, but not acquainted with Canadian use and custum. In such an idea be kind enough to let me know what is to be paid to you as regarding the engagement you could procure to us.
>
> We should prefer such a percentage on our wages paid. If another manner is yours please let me know about it and also if you could not care for such a purpose be kind enough to let me know some address where we could send our ask.
>
> I must tell you all of us are sons of best Belgian farmers' families.
>
> Excuse me for such a trouble to you and, believe me, Dear Sir.
>
> Yours sincerely,
>
> P. LIMBOURG.

It will be observed that Limbourg says that he and his fellows are all of good Belgian farming families. and thoroughly informed about Belgian methods of farming. But, perceiving that these methods may not be understood here, or may possibly not be best adapted for Canada, these intending immigrants propose to get employment with (or near) some of our large farmers. This proposal indicates good sense. Such people, adaptable and willing to learn, ought to be encouraged. We shall write Mr. Limbourg and hand his letter to the Ontario Department of Agriculture. If any of our readers are disposed to give a hint of encouragement to this Belgian, we shall be glad to hear from them.

Acknowledging our letter and enclosure the Director of Colonization for Ontario, Mr. Thomas Southworth, says:—

> I also had a previous letter from Mr. Limbourg writing on behalf of a number of Belgians who desired to form a colony on a sort of co-operative basis. I was obliged to write him that our land regulations would not permit the holding of land here in just the way he wished, but advised him to correspond with the Dominion authorities regarding land in the North-West.
>
> * * * * * * *
>
> As to the question he asks you, I have no doubt whatever that he could secure employment for him and his friends on farms in Ontario; and if they thought of taking up land here ultimately they would all be wise to take service with a farmer in old Ontario for a year or longer before doing so. Our farm labor bureau in connection with the Department of Agriculture would be pleased to assist them in securing situations on their arrival here.

* * *

WESTERN MERCHANTS AND THE C.P.R.

The merchants of Vancouver decided, in a largely attended meeting last week, to fight the alleged discrimination by the Canadian Pacific Railway against them, and in favor of the distributors of Winnipeg to such points as Calgary and Macleod, by doing everything in their power to oppose the interests of the great corporation, and by putting business as far as possible in the way of the American roads, the Great Northern, and the Northern Pacific. They practically declared a boycott of the C.P.R. until justice should be done Vancouver. The merchants of Victoria have declared themselves to be in sympathy with the movement. The business men of the Coast, have, it may be said, been for a long time trying to obtain such reduction in freight rates as would permit them to compete with Winnipeg in such places as the Alberta towns. The C.P.R. on the other hand declares that the conditions which underly the making of a freight schedule are not properly understood, and that the rates enjoyed by Vancouver distributors, particularly in view of the heavy cost of transportation through the Rockies, are already as low as they can be made, consistent with a fair profit to the company.

* * *

MINING MEN'S VIEWS.

This week there has been held in Toronto an important conference of mining men to discuss with the Ontario Government the needs of the mining industry of the Province, and the best direction in which to revise the mining laws. An overwhelming sentiment was expressed at this meeting against the payment of royalties, though a few of those present had the courage to express the reasonable view that the Government, which represents the people as a whole, is entitled to some revenue from the mines. A resolution to the effect that there should be only one mining law for the whole Province carried unanimously. It was decided to form an Ontario Mining Association, the question of affiliation with the Canadian Mining Institute to be considered later.

* * *

EASTERN TOWNSHIPS BANK.

A good report was submitted by this bank at its annual meeting last week, both in respect of earnings and of the extension of the bank's business. The net earnings are larger than in the year before, which is not to be wondered at, seeing that by an increase of almost two millions in deposits, the bank was able to increase its loans by nearly the same amount. And the addition to rest is doubled this year. We observe with pleasure the item in profit and loss account, "Bonus to employees," which is the sort of recognition that a diligent staff is always proud to receive, and which a shrewd manager ought to be glad to pay. As evidence of still further addition to the bank's agencies we note six new branches and eight sub-branches.

It has been decided by the board, in view of the increasing business of the bank, to issue the other half of the million of additional capital authorized some two years ago. Accordingly an issue of $500,000 new stock will be made on 2nd January, at 160, which is likely, we should think, to be readily taken, especially as the calls will be monthly ones. It is worthy of notice that this bank has joined the group which will hereafter pay its dividends quarterly in place of half yearly. The Eastern Townships Bank has now reached total assets exceeding eighteen millions of dollars; its deposits are almost twelve millions, its circulation $2,262,000, (it was $2,454,000 at highest point in November), and it has not far from four millions in easily available assets. If to this we add that it has forty branches in four provinces of Canada the growth of the bank will be perceived.

* * *

THE FIRE WASTE FOR NOVEMBER.

The losses by fire in the United States and Canada for the month of November last are the greatest for five years, being $16,178,000, where in the previous November they were $11,515,000; in November, 1903, $13,589,000; in November, 1902, $10,546,000; and in November, 1901, $15,469,000. These figures, as well as the table given below, are from the "New York Journal of Commerce." This table shows the losses by months for the first eleven months of three years:

	1903.	1904.	1905.
January	$13,166,350	$21,970,200	$16,378,100
February	16,090,000	90,051,000	25,561,000
March	9,907,650	11,212,150	14,751,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
June	14,648,350	10,646,700	11,789,800
July	12,838,600	11,923,200	13,173,250
August	8,428,350	9,715,200	11,435,600
September	9,939,450	14,387,650	13,715,250
October	10,409,800	12,866,200	12,267,000
November	13,589,550	11,515,000	16,178,200
Total 11 months	$138,970,900	$232,941,700	$159,881,200
December ...	17,224,700	19,422,350	....
Total for year	$156,195,600	$252,364,050	....

The losses of eleven months were $150,865,050 in 1902, and $134,644,350 in 1901; so that this year's fire-waste is greater than any of these, save the conflagration year, 1904. It is rather startling to gather from the records of the journal quoted that there were last month 350 fires, each of which burned up property worth $10,000 or more; and thirty-five of these fires destroyed $100,000 to $600,000 each. The big fires were all in the States. The "Journal of Commerce" is not discouraged, however, but considers that notwithstanding the heavy losses in 1905, it bids fair to be a good year for the fire insurance companies unless some remarkably large conflagration should take place this month.

LABOR AND IMMIGRATION.

We suppose the day will come in Canada, as it has in the neighboring Republic, when people will be found not only to call in question the value of immigration, but to do everything in their power to restrict it. Indeed, the attempt has already been made, thought it is true in a somewhat half-hearted manner; and made by the very men who, one might imagine, would be the ones to sympathize with their almost hopeless confreres in other countries in efforts to better their condition. We refer to some of the trades unionists; not to the laborers and mechanics whom they claim to represent, for there is no need, we believe, as yet, to make out these classes to be so selfish, let alone short-sighted, as their self-appointed leaders would have us think.

A few days ago there was held in New York a sort of conference on the immigration question, in which men of such diverse ways of thinking as President Eliot, Archbishop Ireland, Samuel Gompers, and many others, took part. The last-mentioned, with that curious inconsistency which disregards the fact that he himself is not a native-born American, but simply one who availed himself in the past of the liberality of the American welcome to new-comers, and with the startling, inconclusiveness of reasoning, which seems to distinguish so many of his fellow-unionists, styled the average workingman of the United States an oppressed and down-trodden person who ought to do everything in his power to prohibit the importation of those who would still further press him down.

It seems absurd, in the face of all that immigration has done for the United States, to have to argue on such premises or to ask of what value the resources of that country would have been if an influx of people had not come to develop them. But has it ever struck Mr. Gompers and kindred gentry that, though the incoming of each fresh arrival from Europe may mean the addition of another worker, it also means the addition of another consumer, the addition of another unit to the market for other workers' productions. It seems to us quite palpable that, while it is in order for the nation from whom the able-bodied emigration proceeds, to object to the process, it is certainly not in order for the country which receives the benefits accruing from that ingress, to raise objection to the proceeding. Nor, though it is quite apparent that the leaders of the laboring element are possessed of an ingrained idea that they are by far the most important section of the community, in fact the only section of it to be taken into consideration, should it be necessary to point out that an increase in the national assets of something like $1,000 per head, represented by each able-bodied new-comer, is of so much value to the well-being of the whole nation that the latter cannot be expected to trouble itself seriously about the whims of a small fraction of it.

Above we have alluded more particularly to the attempted exclusion of European immigrants, to efforts made by some so-called labor leaders to form a close reserve against men and women of their own flesh and blood, of their own race and color at any rate. In large measure, however, similar arguments may apply to the immigration of other races, to that of the Chinese for example. Undoubtedly there are arguments which may be legitimately used in favor of the exclusion of these people, which do not apply to better-class Europeans. But even with Orientals, we doubt whether the same generous policy will not in the end be found to be victorious. The manner in which educated, healthy Chinese have been treated at their entry into the United States is already regarded by thoughtful people as a disgrace to that country. And latterly, not only thoughtful but ordinary, practical business men have begun to see, even from the point of view of their material interests, that such a policy was calculated to do untold harm. The sight of forty millions of Japanese rapidly learning within a short space of years to have and develop western wants, has suggested to them the question, what will happen when China, a country of three or four hundred millions, does likewise; a thing which is practically certain to happen sooner or later. United States manufacturers and traders, particularly those on the Pacific Coast, where the great coming development in the Orient will naturally make itself most felt, are realizing the import of such queries as these; indeed they have felt it to their cost already. The development of a good market among the teeming millions of such countries as China and Japan may well create a pause before the carrying out of further drastic restriction schemes. And one thing is sure; that the nation which treats those people as the United States—and to some extent Canada—has been in favor of treating them in the past, is not likely to be the nation to get and hold that trade.

Labor vote or no labor vote, we do not think any government will so stand in the way of its own people's well-being, as to carry out the behests of the unionist leaders. We fancy that in the end the saner, more human views of the "non-popular" thinkers will prevail.

* * *

LIFE ASSURANCE CONDUCT.

The exposures of venality and extravagant management in connection with certain large life assurance companies of the United States has made a great many people suspicious of the good faith and proper administration of life companies whether Canadian or American. And various things have been said or hinted in Canadian journals which are not warranted by anything that has become known about life companies on this side of the Great Lakes. For one thing, no single company or group of companies has grown so big and bold as to wield the influence of hundreds of millions in the financial markets, as has been done in the United States—a condition, as we think, unjustifiable and utterly foreign to the purpose of life assurance funds.

It is distinctly unfair to Canadian life companies to suggest that they have been guilty of the sort of manipulation of funds that is found to have been going on in life circles in New York. And to attempt to attack the principle of life assurance, to deny its humane aspect, to shake faith in it, is dastardly. We are glad to see that a protest against this iniquitous prejudging of a case was made by Mr. J. K. Macdonald, manager of the Confederation Life Association, in an address on Life Insurance in Canada, before the Canadian Club of Ottawa. Said Mr. Macdonald:—

No excuse or palliation could be offered for the gross betrayal on the part of those charged with the management of the New York companies; but was it fair to charge the management of life companies generally, and especially of the Canadian offices, as being equally guilty with those of three or four companies in New York? In his opinion there were two leading causes which led up to the conditions revealed by the investigation. One was an ambition to become the biggest company in the world. The second reason was the application of tontine to life insurance, animated by the senseless ambition to outstrip in size all other companies, and utterly ignoring the fact that the interests of the policyholders were of infinitely greater importance than mere bigness. The push was made for new business at a high ratio of expense, which increased from year to year.

The chief reason for American conditions the speaker regarded as the application of tontine to life insurance. Prior to this "the American companies were in the habit of paying annual dividends to policyholders, a system of doubtful wisdom, and one which the companies were glad to get rid of. The tontine plan did this for them, and from the time of its adoption in 1868 onward the tontine surplus went on increasing until it has reached many millions. It led to extravagance and a large increase in expenses. It has also led to the demoralization of the insuring public through a system of rebating. This will be better understood by giving the ratio of expenses to total income for the years 1875 and 1905, as follows:

Equitable—1875, 13.52 per cent.; 1904, 19.70 per cent.
Mutual Life—1875, 7.10 per cent.; 1904, 20.86 per cent.
New York Life—1875, 9.18 per cent.; 1904, 20.17 per cent.

As to the Canadian companies, Mr. Macdonald was unable to see what more could be done in the way of Government supervision than was already in practice. The expenses of the Canadian life offices were far too high, but the management of the home companies was really not responsible for the high cost. The Canadian law allowed the American companies to come in and transact the business of life insurance without any limit as to the cost of securing the same. Canadian agents must be paid such remuneration as would prevent their going over to the American companies, which would, if such were to happen, get the major part of the business. It must be borne in mind also that the insuring public had become wise in the matter of taking advantage of the utterly wrong practice of rebates. So that in reforming companies the public should also be reformed. Moreover, the cost of living has largely increased, and the agents' remuneration must be in keeping with that cost. Again, the best agents, even with the vicious practice of rebating, are unable to write a volume of business equal to that of former years.

Mr. Macdonald, in discussing the question of remedying the defects in existing conditions, expressed himself as follows:

"The question is, How is the expense rate to be brought down? It is easier to ask than answer the question. The distribution of surplus at reasonable intervals of five or seven years, instead of allowing accumulations for long periods; and by making rebating a punishable offence, if that is possible, will do much to that end. As entrance to our country is open for foreign life companies, the reform must include the American offices operating here.

"With regard to the investments of the Canadian companies, I think it may be safely assumed that the Superintendent of Insurance has satisfied himself in regard to them. In my judgment the field for investment of the life companies' funds could be reasonably extended with perfect safety and with benefit to the company; and it is needless to say that what will benefit the company will also benefit the policyholders.

"The extension in the field for investment should be such as to place the Canadian companies in no less favorable position than the American companies operating in Canada. In view of what is taking place in New York permit me to say that in my opinion no director or manager should occupy any position in which he receives benefit in connection with the purchase or sale of securities of any kind in which his company is interested, or be interested in anything of a speculative character by which his judgment may be influenced or his company's interests affected."

MONTREAL ALDERMEN'S PECULIAR VIEWS.

In spite of the reasonable representations of some among their number who knew better, a majority of the Montreal city council showed so little breadth of view or business sense as to reject the earnest representations of the Board of Trade on the subject of water supply and fire protection. Their answer to the pleas of merchants and bankers was a resolution proposing to take action against the Fire Underwriters' Association on the ground that they have formed a combine in restraint of trade. The following pungent reference to the subject is made by Mr. Matthew C. Hinshaw, local chairman of the board:

"The procedure adopted seems to me peculiar and must be the outcome of a misconception as to the relations existing between the different insurance companies. The decision arrived at by the Aldermen, however, to submit the matter to their legal advisers will, no doubt, result in their ultimately being able to take a more correct view as to the actual relations existing between insurance companies and the public. They should not by the raising of any side issue permit their attention being drawn from the main question, which, after all, is the efficiency or otherwise of the fire protection afforded in the business section of the city. This is a matter which is of vital importance to the whole city of Montreal."

* * *

—Incidents are never wanting, and indeed they seem to have grown more numerous of late, to show that the sense of fidelity in those holding positions of trust is weakened now-a-days by modern temptations that sap the morals of young men. Graft among manufacturing staffs, embezzlement in counting houses, stealing from warehouses, the robbery of bank safes, are recent instances of this. The unusual in the way of theft was displayed last Sunday by a young man named E. St. George Banwell, who robbed the Crown Bank, in which he was a clerk, of $1,430 in gold, and $20,000 in unsigned large notes, in order to get married to a country girl, and run away to the States. Presumably the couple are using the booty to enjoy themselves on a honeymoon tour. They must be two silly fools to imagine that the thief can long escape justice. The pity of the thing appears when one reflects upon the blighting of two young lives, and worse still, the sorrow this crack-brained crime brings to the respected relatives of both.

* * *

OUR SAINT JOHN LETTER.

The Bank of New Brunswick shareholders at a meeting on Saturday last debated the proposal to increase the capital stock from $500,000 to $1,000,000. There was some objection to the scheme, chiefly from the representatives of estates with large holdings of bank stock, the fear seeming to be that the change would depreciate the stock, and perhaps impair its dividend earning power. The directors said the bank would continue to pay 12 per cent., and gave it as their opinion that any drop in the stock would be quickly recovered from. It soon became apparent that the meeting would endorse the proposal, but in view of the objections offered the directors consented to a motion of adjournment for a week, so the subject will be further considered on Saturday morning next. Mr. W. E. Stavert, the late general manager of the bank, left to-day for Montreal to enter on his new duties in connection with the Bank of Montreal. The directors of the local institution showed their confidence in him by presenting him with a beautiful piece of plate.

Rumors are rife that the Bank of Montreal still hopes to acquire control of the Bank of New Brunswick. A young man, well known in local financial circles, is declared to be acting as their agent in a project to buy the stock outright, and he is said to have interviewed a number of shareholders, asking them if they would take $350 cash per share for their holdings. When the amalgamation scheme was up recently the Bank of Montreal not only offered to value the local bank stock at $350 per share, but to pay the directors for life, and to put all the employees on the pension rolls, just as if they had been Bank of Montreal employees for all the years they have been with the Bank of New Brunswick.

The St. John Street Railway Company to-day announces a dividend of 3 per cent. for the six months ending October 31st. The company has made some important additions to its plant and rolling stock during the year, and is now, better than ever before, equipped to fight the winter storms.

The employing printers of St. John have been presented with a demand for an eight-hour day after January 1st next. The owners are protesting against this proposal, and considering means to combat the demand. Only a few months ago the printers were given a raise of $2 per week in their wages, and it is figured that the shorter day added will equal an advance of 33 per cent., which is considered too much for one year. It is said the St. John printers are mostly in accord with the views of their employers, but are acting under directions of the International body.

The carriage factory of Messrs. Jamieson Brothers at Campbellton, N.B., was completely destroyed by fire on Monday night. The factory was quite an important industry in Campbellton, and the loss is upwards of $10,000, with insurance of not more than $3,000.

Announcement was made a few days ago that Messrs. Robertson, Trites & Co., dry goods merchants in St. John, had been compelled to suspend payment. No statement of their assets or liabilities has been made public. It is thought the firm will be able to arrange a compromise, and to continue in business. They have made an uphill fight against conditions that are said to have been most unfavorable, resulting from the reorganization of the business after the retirement of a former partner.

The London House, wholesale dry goods and millinery, suffered an unusual and very heavy loss a few days ago. The drain pipe on the roof of their premises became blocked during a heavy rain, and the water made its way through the roof, and, soaking through four floors, ruined three or four thousand dollars' worth of stock. The loss is one on which there was no salvage, as the insurance did not cover accidents.

A special committee of the Board of Trade of St. John is now considering ways and means of inducing manufacturers to locate here. There is quite a strong feeling in favor of tax exemptions and other concessions, but no definite plan has yet been worked out to submit to the citizens. At the same time another committee is considering means to harness the reversing falls, and to see what power can there be developed.

Messrs. L. Higgins & Co. recently purchased the plant of the defunct Yarmouth shoe factory, and now the towns of Yarmouth and Moncton are bidding against one another to see which will get the industry.

Advices from the North Shore are that the fishermen are making money "hand over fist" in catching smelts. There have been some phenomenal catches, and it is reported that individual fishermen have cleaned up more than $400 in a week.

A meeting is being held here to-day of the new owners of the Maritime Nail Works. It will be remembered that the Capewell people, of Hartford, Conn., recently purchased a controlling interest in this industry. Eben Perkins, the late manager of the plant, has tendered his resignation, and it will probably be accepted at once. It is known that Mr. Perkins has plans under way to start a new factory. He is an inventor of some note, and it is reported has a new process for making nails that will be used in his factory

Mr. R. N. Hickson, of Montreal, has become a director of the Lepreaux Iron Works. It is announced that the engineers report there are at least 18,000,000 tons of superior grade ore in the deposit at Lepreaux. The company is now sinking a shaft and preparing to undertake further development work.

* * *

St. John, New Brunswick, 12th December, 1905.

* * *

BANKING AND FINANCIAL.

The Bank of British North America advises us that a branch of that bank has been opened at Duncans, British Columbia.

The Bank of Ottawa has opened a branch at 367 Broadview Avenue, Toronto. This new branch is a few doors north of Gerrard Street in a growing part of the city.

We are informed that the Bank of Hamilton has opened a branch at Ethel, Ont., under the management of W. N. McKay. Ethel is a village in Huron County not far from Brussels on the one side and Wingham on the other.

A despatch of Monday last from Detroit says that counterfeit ten dollar bills of the Canadian Bank of Commerce and of the defunct Mechanics Bank are in circulation in Detroit, though only a few have been detected so far.

We are informed that branches have been opened by the Canadian Bank of Commerce at Parry Sound, Ont., also at Ottawa. The Ottawa branch of the bank is placed at the corner of Bank and Somerset Streets, and is in charge temporarily of Mr. C. R. Armstrong. The Parry Sound branch is under the management of Mr. E. M. Lockie.

We are pleased to see the custom maintained by the Bank of Nova Scotia of arranging to have its directors, or some of them, visit different parts of Canada at intervals. A number of them reached Montreal on Sunday last and went on to Toronto next evening. The party is composed on this occasion of Messrs. J. G. Payzant, president; Charles Archibald, vice-president; J. Walter Allison, Hector McInnes, and George S. Campbell.

"I should say they were on easy street," is the remark made yesterday by a financial man on perusing the statement of the Bank of Toronto. And indeed the remark was not unwarranted, for the statement is one which shows that the bank has been sharing in the prosperity of the country. The totals of assets and liabilities have been advanced by five and a half millions during the year. The increase in deposits is $4,300,000; in circulation nearly $300,000. These figures are noteworthy. The net earnings are larger, and the rest has been swelled out of profits as well as by $459,000 of premiums received on new stock.

Word comes from Boston of the sudden death of Edward Atkinson, the well-known social and political economist, after an attack of acute indigestion, affecting the heart. Mr. Atkinson filled a large place in scientific and statistical circles of the United States. His experience as an insurance man was wide, and he helped greatly to bring the New England Mutuals to the stage of success they have reached. He was a member of the American Academy of Arts and Sciences, a fellow of the American Association for the Advancement of Science, corresponding secretary of the American Statistical Association, and a member of the International Statistical Institute. Since 1877 he has been president of the Boston Manufacturers' Mutual Insurance Company. He was also a member of the Cobden Club of Great Britain.

In that busy north-western town of Edmonton things move promptly. We learn from the "Bulletin" of last Friday that Hon. J. D. Rolland and Mr. R. Bickerdike, directors of the Banque du Hochelaga, have purchased Lot 159, Block 2, H. B. R., for $30,000. The bank will erect a suitable building in that city to be occupied by themselves. Lot 160 in the same block was also sold to Winnipeg capitalists for $400 per foot, totalling $20,000. Mr. J. W. DeC. O'Grady, general manager, and Capt. Robinson, vice-president of the Northern Bank, purchased last week the Stovel property on the corner of Jasper and Queen's Avenues, Edmonton. The price was $14,000. A branch of the bank will be opened up in the present building about January 1st, and a suitable building will be erected in the spring. A further paragraph says that Messrs. McDougall & Secord have given a fifteen days' option to the Bank of Hochelaga on the property occupied by J. Hehsdoerfer's meat market in Edmonton. Are we not right, therefore, in saying that things move swiftly nowadays in the West?

The general manager of the Bank of Montreal, in the course of his speech at its recent annual meeting, remarked that the one word written large in the records of Canada this year is "Prosperity." This is assuredly confirmed by the annual statement of the Canadian Bank of Commerce, which is one of the prominent records of the conditions of the country's business. The net profits for the year ending 30th November amount to $1,376,000. In 1904 they were $1,124,000, and in 1903 slightly less. But these present year profits are earned on a capital which has been gradually increased during the year from $8,700,000 to $10,000,000, but none the less the growth of net profits is quite striking. Between premiums on stock, ordinary profits, etc., there was a total of $1,969,000 available for distribution. Dividends absorbed $666,000, while $219,200 was written off bank premises. Adding last year's and the year before, no less than $532,000 has been taken out of profits in three years to provide for the new buildings which the bank has erected in many parts of the country. After providing for the usual contribution the general statement records substantial growth during the year, the total liabilities having increased from $91,000,000 in November, 1904, to $98,000,000 in November, 1905. The most striking change is in loans and discounts, the total now standing at $75,500,000 as compared with $61,900,000 a year ago. This important bank has 125 branches in Canada, stretching from Halifax to Vancouver and Dawson.

* * *

FIRE INSURANCE NOTES.

At a meeting of the board, held in Halifax on Monday night last, the estimates for the Halifax fire department for the coming year were passed. They amounted to $34,632, an increase of $3,732 over last year's figures. Besides this, for new equipment the sum of $21,900 is to be borrowed on capital account.

Mr. H. H. Beck, formerly managing-director of the Manitoba Assurance Company, of Winnipeg, has been appointed managing-director of the Anglo-American Fire Insurance Company. Mr. Beck was for some sixteen years manager of the Manitoba company, up to the time when it was taken over by the Liverpool, London and Globe some months ago. We understand that the Anglo-American under Mr. Beck's care is to undergo a thorough reorganization and be put upon a sounder and more thorough basis.

A late report of the National Board of Fire Underwriters shows that the city of New York, from a fire protection standpoint, is in a very serious condition. There are, it says, several vital defects in the various branches of the fire department and water supply, which at any time might, in combination, form a very grave menace to the greater part of the city. With its vast congestion of values and narrow and obstructed streets in the business section, a dangerously unreliable fire alarm system, insufficient water supply and poor distribution, antiquated and defective hydrants, absence of sufficient number of fire engines and inefficiency of some of those in use, there is decided opportunity for a sweeping conflagration in New York. Captain John Stephen Sewell of the Corps of Engineers, United States Army, who was detailed by President Roosevelt to assist in the work of the committee of the Fire Underwriters, adds that the type and occupancy of buildings in the worst sections, their mutual exposures, the narrowness of streets, inadequacy of water supply and distribution, together with the enormous values involved, combine to make the situation in Manhattan by far the most serious fire and conflagration hazard he has ever seen. In view of the enormous interests involved and the almost international character of the catastrophe which would be represented by a sweeping conflagration in Manhattan, no time should be lost in putting into effect all the proposed improvements, and all the recommendations in this report, or their full equivalent.

* * *

LIFE INSURANCE NOTES.

The principle underlying the organization of an insurance company, whether it be life or casualty, is the principle that insurance is good, and right, and just.—"Continental Agents' Record."

The British policyholders in the Mutual Life Insurance Company, who number approximately thirty thousand, are making a move to protect their own interests. They are urging upon the officials that Mr. McCurdy's successor in the presidential chair must be a qualified man having the confidence of British business men, and that the policy-holders of that country must be represented on the board of directors.

In addition to its ordinary department in Georgia, the Union Mutual Life, of Maine, has decided to open a branch in the State to be devoted solely to developing its recently created monthly payment plan. The monthly payment plan of the Union Mutual differs from industrial insurance not only in period of premium payments, but the premium is a fixed one for all ages, the death benefit and other values varying with the age of the assured.

Mr. McCurdy's resignation of the presidency of the Mutual Life Insurance Company of New York could hardly be called dramatic. His explanation is that he had contemplated the step for several years, then resolved to leave when he was seventy, postponed this step because of the investigation, and took it now because medical advice warned him that it was necessary for him at his advanced age to seek relief from business cares.

We note elsewhere the formation of a life agents' association in Montreal. It is a good move in many respects. Standing by one another, the members of such a body can be of decided service in not only forwarding good measures but in checking improper ones. An esprit de corps can be formed amongst them which will be found, if maintained, to gradually improve the standard of field-men in the profession. And it is of moment to the interest of life assurance, as well as to those of its representatives and the public, that its men in the field should have the confidence and respect of the public.

The rapid development of industrial insurance in the past has, of course, been largely due to the push and energy of the companies engaged in it, but even these characteristics could not push the system to the front unless it possessed especial merit. This it does possess in a marked degree. By furnishing a small amount of insurance for a small stipend, which can easily be spared from the family income, it brings life insurance within the reach of a very large number of persons who could not otherwise secure it. And to the vast majority of its millions of patrons industrial insurance is about the only protection they can be sure of. It is all the bread-winner can leave his family in the event of his death, and so industrial companies are often of more value to the great mass of population, than are the ordinary life companies to the middle and wealthier classes. For the people it is designed to reach, industrial insurance is the greatest blessing the present century has developed, and its popularity is certain to increase as its peculiar benefits become better understood. The business has developed to such an extent that the industrial companies already rival the great life insurance companies of the country in magnitude and volume of business.—Indicator.

THE JAPS IN AN UNFAVORABLE LIGHT.

Amidst the columns of adulation that are being poured forth endlessly by the British and American presses, about the virtues of the Japs, it is almost refreshing (a cynic might say), to hear a little derogatory criticism. Such comes from two men who ought, from their very considerable personal contact with the enterprising nation to which they refer, to have a wide, unbiassed knowledge of their subject. A British ex-consul to Japan and the Anglican Bishop of Tokio, both bear testimony to the low standard of commercial morality prevailing in that country, and one of them goes so far as to declare that a Japanese would value the promise of an Englishman more than the bond of one of his own countrymen. Undoubtedly there have been many cases of dishonesty in the matter of trade-marks and labels, and this seems to be all the more surprising in view of the highly favorable reports practically universal in the case of the Chinese, as given by men who know those people best. Yet, according to the newly prevalent idea among many of the western nations, it is the Japanese who are the ideal people, and the Chinese who are the barbarians.

* * *

—A feature of the navigation season just closed on the great lakes of North America was the remarkable shipments of Lake Superior iron and copper ore in 1905. From April to the end of November there were 33,000,000 tons of iron ore brought down from the mining districts, or 6,000,000 tons more than in the record year 1902.

—The Temiskaming Herald informs its readers that an expedition is being planned in New Liskeard to prospect the gold resources of the yet unexplored territory of Ungava, the vast stretch of low-lying land forming the peninsula west and north of Labrador and east of Hudson Bay. The moving spirit in the enterprise is Gordon McGee, a well known prospector. It is proposed to form a syndicate to pay the expenses of the enterprise, which will be about $2,500. The men would be away from civilization for about two years. The party would strike north by dog train to James Bay and there build canvas boats with which to navigate the numerous rivers opening through the fourteen hundred miles of Ungava's eastern coast line.

—The Winnipeg Free Press makes an interesting comparison of the value of building permits which have been issued during the past four years in Winnipeg and Toronto. In 1902, the permits issued in Winnipeg were $2,408,125, and in Toronto, $3,854,923. In 1903 Winnipeg forged ahead of the elder and larger city, as permits in that city were $5,689,400 against $4,356,457 in Toronto. This lead was increased in the following year when to Winnipeg must be credited $9,809,900 compared with Toronto's $5,902,720. Up to date, however, this present year Toronto has done relatively better, her permits having been valued at $7,945,784, and those of Winnipeg, $9,720,080. In both cities, however, extraordinary activity is shown.

—Bulletin No. 1 of the British Columbia Bureau of Mines has come to hand. It is on the subject of the Windy Arm Mineral Locations in the Atlin district by Mr. W. F. Robertson, the provincial mineralogist. Windy Arm, we may explain, is a branch of Tagish Lake, close to the boundary line between British Columbia and the Yukon, and some very successful prospecting was done there during the past summer. The property on which the most important development work has been done so far is that of the Conrad Consolidated Mines, who hold some eight or ten claims at an elevation of some 3,000 or 4,000 feet above the lake. Bulletin No. 2 from the same office is by Herbert Carmichael, provincial assayer, and treats on the mineral locations in the Big Bend district near Revelstoke. It appears that several important gold discoveries were made in this region as long ago as 1865-66 and that a veritable boom occurred in those days. The bulletin describes some of the more important of the present-day properties.

—A nugget weighing 250 pounds, of what is claimed to be almost pure silver, has just been discovered on a property on Giroux Lake, near Cobalt, Ont. The property belongs to A. M. Wylie, of Port Arthur, and J. B. Pardee, of Sault Ste. Marie. The "find" still further stimulates, of course, the efforts of miners. Prospectors and claim-owners in that rich Cobalt silver region feel elated over the results of the diamond drilling at La Rose mine. The drill has gone down 340 feet and it is said the vein has been found to be still as rich as ever in cobalt and native silver. This has been the chief doubt to assail the minds of owners, that is, as to whether the rich ore is likely to hold out, very little real development work having so far been done, at least beyond a very shallow depth.

—The gist of an important judgment rendered last week by Mr. Justice Anglin in Toronto, was that the railway companies must defray the cost of erecting a bridge across the foot of Yonge Street in Toronto, where the large numbers of people constantly crossing the Esplanade to and from the passenger boats make disastrous accidents only too probable some day. What seems to the layman a somewhat peculiar defence was raised by the counsel for the railways. He argued that no street crossed the railways at the point in question, but the court held that the companies were debarred from raising that point by their having acquiesced in the jurisdiction of the railway committee when the matter was before that body. It is too bad that a matter of such extreme importance to the public safety should be bandied about by the companies in this nonchalant way.

—The charges of gross discrimination on the part of Canadian railways in favor of American and adverse to Canadian manufacturers are so many and so apparently well-supported that the members of the Railway Commission, before whom such cases are being heard, will have, it would seem, but little difficulty in making up their minds. At the session in Windsor last week, the manager of a prominent paint and varnish company stated that the freight rate on dry paints was actually $6.00 per ton less from Montreal to Detroit, than from Montreal to Windsor. A Walkerville brewing company also made strong points, by giving instances where the freight rates on some articles were fully a hundred per cent. higher than in Michigan. Shippers of that State too are, it is alleged, given considerably lower rates to Canadian points than are local manufacturers.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, December 14th, 1905, as compared with those of the previous week:—

	Dec. 14.	Dec. 7.
Montreal	$27,522,122	$30,270,786
Toronto	24,568,883	22,094,908
Winnipeg	10,176,684	11,233,294
Halifax	1,962,086	1,972,412
Hamilton	1,543,066	1,675,140
St. John	1,047,604	1,262,100
Vancouver	1,995,618	1,966,052
Victoria	755,442	659,865
Quebec	1,732,015	2,498,440
Ottawa	2,336,489	3,238,014
London	1,112,384	1,268,938
Total	$74,752,393	$78,139,949

Vault doors in Bank of Montreal and Royal Trust Company, Montreal Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

Mercantile Summary.

One of the worst storms in thirty years was experienced along the Cape Breton coast on Tuesday last. Several fishing boats were sunk, a lobster cannery demolished, and many small houses along the coast ruined.

The shareholders of the Le Roi Mining Company, at a somewhat excited meeting in London a few days ago, rejected the proposal for amalgamation with the Centre Star. During the year at the mine, it was reported, 114.960 dry tons of ore had been raised. A balance was shown in favor of profit and loss of £49,741. This was arrived at after paying to the bank £4 254 interest on advances, and after writing off £21, 345 for exploration and development, and £14,139 for depreciation of machinery, etc. During the year an extra profit of about £19,000 was obtained, £1,000 by a better price for matte at Tacoma, about £7,000 by increased price of copper and about £2,000 by cheaper coke. The ore mined during the year was of higher value than in the previous year by $1.47 per ton, or. say, £34,843 on the tonnage mined. The liabilities on June 30th last amounted to £54,394. and the liquid assets to £126,483. This is an improvement in surplus liquid assets of £56,886. The body of high-grade ore reported as having been discovered in the 1,450 foot level, averaging $30 per ton in value, has not been so productive, it is stated, as was expected.

City of Moose Jaw, Sask.

DEBENTURES

Sealed Tenders addressed to the undersigned will be received up to five o'clock on Monday the eighteenth day of December, 1905, for the following Debentures of the City of Moose Jaw.

$30,000: fifty year five per cent. Debentures issued by the above Corporation of the City of Moose Jaw, in extending the System of Waterworks and Electric Light already constructed in the said City.

Said Debentures, Principal and Interest, are payable at the Canadian Bank of Commerce, Moose Jaw annually.

Further particulars may be obtained on application.

Highest or any Tender not necessarily accepted.

A RECENT VISITOR TO EUROPE.

For some months Mr. B. E. Walker has been in the British Islands and on the continent of Europe. He has just returned and gives to an interviewer his impressions formed while abroad. The result of his observations on financial and industrial conditions in European countries are of interest at the present time. Money is tight in England, in Germany, and in France, practically because of the tremendous cost of the Russo-Japanese war following the South African war. But business in England is excellent in both manufacturing and distributing lines in spite of the great number of unemployed people. As to the large number of the unemployed in the face of business prosperity, trades unionism has, in his opinion, resulted in creating a surplus, not of working mechanics, but of unskilled workmen in some way. As far as he knew skilled men find employment, but at the bottom of the industrial ladder there are a lot of men who in a time of prosperity do not seem to find work. That is the anomalous condition of things in England to-day.

"I do not think," said Mr. Walker, "that any part of the world stands so high in England at the moment as Canada. There is a point of danger in that situation that we may not live up to the high expectations, because the condition has changed from one of indifference and disbelief to one of a feeling that out here there is no trouble in meeting any obligation and doing anything almost." That the idea entertained by some that decadence has set in commercially and industrially in Germany is accurate, he does not believe. "Germany," he said, "is very prosperous. I travelled from Hamburg to Stuttgart, and I saw hundreds of important manufacturing cities and towns there that I, for one, had never heard of. And when you see also Berlin and other magnificent cities, with the grand buildings, it is no use to say that Germany is not prospering."

Discussing the future of British trade, Mr. Walker pointed out that England is prosperous in trade. But she is selling her coal to other countries that are rivals in manufactures; she is trading her raw material for the manufactures of other countries, which, in spite of her present prosperity, he regarded as a drawback. When asked about the political situation in England Mr. Walker remarked: "You have noticed no doubt there is at least an extraordinary quantity of literature about Imperialism. These various contributions to the literature of Imperialism have produced several views, not antagonistic, but alternative, as it, were, to Chamberlainism. Now, my feeling is that the question of England's relations with her colonies is so thoroughly grounded that unless the Liberal party has something to offer in the place of Chamberlainism, they may not stay long in power."

* * *

ONTARIO LUMBER INTERESTS.

A deputation from the Ontario Lumbermen's Association waited on the Hon. J. P. Whitney and other members of the provincial cabinet last Friday and discussed several abuses of the Free Grants and Homestead Act, and defects in the carrying out of the law which cause a loss to the country of considerable revenue. The apt suggestion was made that the Government should appoint an inspector to report on the locations selected by grantees. If 50 per cent. was not suitable for agriculture and easy of access, it should not be opened for settlement. Instead of granting certificates at once the Government should require the persons taking locations to enter upon land, erect a house and perform the duties before receiving any patent. Finally notice should be given to the limit holders of the intention of the Government to open up territory for settlement in order to give an opportunity for removing the lumber. Mr. Miller supplemented these requests by one asking that in view of the present loss owing to the removal of hemlock, the latter should be placed under the same regulations as pine on lands under timber licenses. Premier Whitney in reply showed sympathy with the views of the lumbermen, though, as he said, it was only recently that lumbermen themselves had begun to realize that the forest resources of the country were being dissipated too rapidly.

QUEBEC ACTIVITIES.

Important plans are being formulated for improving the facilities of Quebec as an ocean port. The Canadian Pacific Railway, it is understood, have already purchased from the Board of Trade of that city at a very moderate price, the property of the board on St. Paul and Dalhousie Streets, and will erect thereon offices and warehouses in connection with the summer terminus for their steamship line. It is said that the company have in mind three lines of ocean steamships for the trade of the St. Lawrence with European ports. One will make the port of Montreal its terminus, the other Three Rivers, while the port of Quebec will be utilized for the larger ships under construction for the passenger trade from Liverpool. The Quebec Transport Company in the meantime are energetically preparing for business. Mr. Wm. Power, M. P., has been elected president, Mr. J. G. Scott, manager of the Quebec & Lake St. John Railway, vice-president, and Mr. T. Harling, of Montreal, managing director. The president and managing director expect to leave for England next month to secure a line of steamers for this exclusive Quebec enterprise, which proposes to operate a fortnightly steamship service next season between Quebec and European ports.

FISHERMEN'S BAIT SUPPLY.

Here is what the Truro "News" has to say about bait in cold storage at Canso, Nova Scotia. There has been erected and equipped at that place, which is on Chedabucto Bay, at the eastern edge of Guysboro County, a plant that marks a step in advance for the fish business of Nova Scotia. Bait is an essential to the fisherman who fishes with hook and line, and about all our cod, haddock, pollock and hake are so caught, and the question of bait is a serious one. The article is of perishable character and uncertain supply. Salted bait is of little value compared with fresh bait, and the addition of any chemical or preservative is objectionable. Some eighteen years ago the Whitmans, of Canso, undertook to solve the bait problem by freezing the bait in times of plenty and storing it away for a time of scarcity.

They put up a small experimental freezer, which was successful from the start, and they increased its size. Finally the Dominion Government undertook to assist in the solution of the bait question by contributing one half towards the cost of bait freezers, a number of which were erected along the coast on these terms. As the demand continued to grow, the Government offered to pay half the cost of a larger freezer centrally located, adapted to supply the wants of the banking fleet, and the Whitmans accepted the offer. They put up their building at Canso last year spending the winter in getting machinery. The building was designed by Herbert Gates, of Halifax. Pipe-fitters were obtained from Sydney and from Boston. By the end of September the plant was in working order. The building is 125 feet in length, 46 feet wide, and three stories high, with an engine room and boiler house extension 125 feet by 31 1-2 feet. It has a coal storehouse and electric light plant. The machinery was obtained in York, Pa. Cold is produced by the compression and expansion of ammonia gas, the compression of the gas being done by a pair of duplicate compressors of 90 tons. There are, says a writer, three essentials to a successful ammonia plant, good compression capacity, good and plenty cooling water, and good insulation, to which might be added a fourth, plenty of pipe in the rooms. The Canso Cold Storage Company's plant is said to have all these.

So far about 2,000 barrels of squid, the best of all baits, have been stored in perfect condition, and as the squid season lasts until Christmas, there is a fair prospect of the plant being filled to its full capacity of about 10,000 barrels.

LE ROI AMALGAMATION PROPOSALS.

At last the directors' report of the Le Roi Mining Company, Limited, and full details of the much-attacked amalgamation scheme are to hand. Unfortunately, this latest and most bulky addition to the recent flood of literature on the affairs of the unfortunate Le Roi is probably only the prelude of a fresh rush of circulars to be inflicted on shareholders before next Friday's meeting. Whether among the many counsellors they will find wisdom, or whether they will give up in despair the task of making a decision, it remains for the meeting to show. In the meantime, the situation is one of the most confused that we have ever met with in the case of a public company. Allegations have been hurled right and left as to strings being pulled on one side by the Canadian Pacific Railway, and on the other by the Great Northern Railway, while local opinion in British Columbia has been complicated by patriotic sentiment as to Canada v. the United States. Actually all these matters are entirely outside the question, which so far as Le Roi shareholders are concerned is entirely a case of whether they are more likely to recoup their past losses by joining the amalgamation, or by going on as they are. Whether the terms offered are fair is one which can perhaps only be threshed out by a strong committee of shareholders, assisted by expert advice. There can be little doubt that the directors went beyond their province in to some extent prejudging the case by entering into a definite contract with the Trail Smelter and abandoning the company's own costly Northport plant. The statements as to the saving effected by the course seem to us more in the nature of "ex cathedra" utterances than convincing proofs. It is to be noted that Mr. A. J. McMillan, the ex-managing director, is specially strong in his opposition to this policy, which, of course, is a vital point in arriving at the terms of the amalgamation, as the Trail Smelter is to be taken into the deal. That the scheme does not, even in the official view, present any very glowing prospects is shown by the fact that the probable profits on the proposed capital of the amalgamated concern are estimated at an amount equivalent to only about 12 per cent. annually, even with metals at their recent high prices. The best advice on the whole subject, so far has been given to the shareholders by Mr. McMillan:—"Attend the meeting in person if possible, and hear and judge for yourselves."—"Financial Times," London, November 30th.

LIFE UNDERWRITERS' ASSOCIATION OF MONTREAL.

At a meeting of the life insurance agents of Montreal on the 5th December last, influentially attended, a Life Underwriters' Association was organized, and a constitution adopted. The following officers were elected:—President, Mr. A. H. Vipond, of the New York Life; vice-president, Mr. J. W. Lambly, of the Mutual of Canada; treasurer, Mr. J. F. Stratton, of the Equitable of New York; secretary, Mr. Thomas J. Parkes, of the Sun Life of Canada; board of management: Mr. B. F. Steben, of the Sun Life of Canada; Mr. J. F. Desmarais, of the Great West of Canada; Mr. R. B. Foster, of the North American; Mr. F. Dubeau, of the Royal Victoria; Mr. G. E. Williams, of the New York Life. A considerable number of the leading canvassers of the city have already joined and the roll is daily being added to and the ultimate success of the association is deemed to be assured.

The objects of the movement, as set forth in the constitution, are the promotion of harmony, good-will, and cooperation amongst the members, and to devise and give effect to measures for the protection of their common interest. The members express the hope that other cities will form similar associations and that in the near future an amalgamation of all such unions may be formed under a federal and central body, so as to improve the status and prospects of life agents as a whole. The secretary, Mr. Thos. J. Parkes, 11 Guardian Building, Montreal, will be pleased to hear from any representative who would wish to help along a similar movement in his own vicinity, or would be glad to have the addresses of the secretaries of any association already working.

* * *

—The Department of Agriculture, Ottawa, announces through Dr. Saunders, Director of Experimental Farms, that another distribution will be made this season of seeds for farmers. They were grown mainly at the Experimental Farms at Indian Head, Sask., and Brandon, Man., and consist of oats, spring wheat, barley, Indian corn (for ensilage), and potatoes.

* * *

—The revenue of the Dominion continues to increase largely. Last month the receipts were $3,790,471, compared with $3,358,267 for November, 1904, an increase of $432,204. For the five months ended with November 30th last, the revenue was $19,106,300, compared with $17,844,033, or an increase of $1,262,267 over a similar period last year. For Montreal the figures were $1,183,092 for last month, and $967,749 for November, 1904.

* * *

—A very good season is reported by the Richelieu & Ontario Navigation Company in 1905. An increase of 113,427 over the previous season is shown in the number of passengers carried. There was also a heavy increase in freight business. The company ran twenty-four steamers in 1904, and twenty-six this year. The new steamer "Montreal," claimed to be the finest passenger boat in Canada, increased the passenger service of the company, and in August the steamer "Irenee," built for the Saugenay route. Specifications and plans of a new "Quebec," a sister ship to the "Montreal," and for the same route, are being considered, and it is hoped she will be ready for the season of 1907. The company's hotels are being improved for next season. A salt water swimming pool, 60 x 40 feet, is being installed at the Manoir Richelieu. During the season of 1904 the steamers of the company carried 850,523 passengers, while this season they carried 963,950, showing an increase for this year of 113,427. Important additions to its already extensive fleet have been decided on. A contract will be closed for a new St. Lawrence River rapid steamer, 230 feet long, by 44 feet beam, over the guards. This steamer will have a carrying capacity of 1,000 passengers and be built specially to suit the service, with 100 staterooms.

EASTERN TOWNSHIPS BANK.

The forty-seventh annual meeting of the shareholders of the Eastern Townships Bank was held in the board room of the bank in Sherbrooke at 2 o'clock on Wednesday, December 6th. In addition to the directors, there were present:—Judge Alfred, Newport; Hon, M. F. Hackett, Stanstead; A. N. Thompson, Stanstead; F. Spaulding, Burlington, Vermont; C. M. Sherman, Newport; Rev. A. Lee Holmes, Stanstead; C. W. Mansur, Stanstead; R. F. Morris, H. D. Lawrence, Col. Felton, Dr. F. J. Austin, J. W. Woodside, C. W. Cate, Capt. Bennett, C. D. White, of Sherbrooke, and others.

The president took the chair and the general manager acted as secretary.

Mr. C. W. Cate and Mr. C. D. White were appointed scrutineers of votes.

The directors' report was read as follows:—

Report.

The directors have much satisfaction in presenting to the shareholders the accompanying balance sheet and profit and loss statement, showing net earnings exceeding 12½ per cent. Considering the low rates of interest which have prevailed and the necessity of keeping a good cash reserve, they consider the results very satisfactory.

Out of the balance of profit as shown, provision has been made for two semi-annual dividends at the rate of 8 per cent. per annum, one paid 2nd July last and the other payable 2nd January next.

One hundred thousand dollars has been carried to reserve fund, making that amount up to $1,600,000, being 64 per cent. on the capital, leaving a balance of $24,566.18 to be carried forward.

Branches have been established during the year at Actonvale, Hemmingford, Lennoxville and Waterville, in the Province of Quebec, and at Vancouver and Midway, in British Columbia. Sub-agencies have also been opened at Valcourt, Beloeil, Iberville, Clarenceville, Lacolle, Scotstown, Howick and Stanstead, in this Province. They are also about to open a branch on Wellington Street, in this city, in order to accommodate the growing business in that section. Previous reports have foreshadowed the opening at Vancouver, and although the branch has only been opened for a few months a very satisfactory business is being done. The Midway office is at a point where large expenditure is being made by the construction of two railways and is a central point in that section.

Deposits have increased during the year nearly $2,000,000, being largely in excess of any previous year, showing the increasing growth and prosperity of the country, which is very gratifying.

In view of the increasing business of the bank, the directors have decided to issue the balance of the $1,000,000 capital authorized at the special meeting of shareholders in February, 1903, viz.: $500,000, the calls being payable 10 per cent. monthly with the premium commencing on second day of January next, the issue being at 60 premium.

As there appears to be a pretty general desire by investors for more frequent division of profits, your directors have decided to meet this demand, and in future dividends will be paid quarterly, viz.: January, April, July, and October

The inspections of the various offices have been made as usual.

In conclusion the directors have much pleasure in testifying to the zeal and fidelity of the general manager, inspectors, managers, and other officers of the bank.

The whole respectfully submitted.

WILLIAM FARWELL,
President.

Profit and Loss.

The statement of profit and loss account for the year ending November 15th, 1905, is as follows:—

Balance at credit of profit and loss brought forward from November 15, 1904		$ 30,217 74
Profit of head office and branches, after deducting charges of management, interest due depositors, and provision for bad and doubtful debts		317.279 84
Premium paid on new issue of capital stock		14,055 00
		$361.552 58
Appropriated as follows:		
Dividend of 4 per cent., paid 2nd July, 1905	$ 99,986 40	
Dividend of 4 per cent., payable 2nd January, 1906	100,000 00	
Transferred to reserve fund	100,000 00	
Applied in reduction of value of securities	29,000 00	
Bonus to employees	8,000 00	
		$336,986 40
Balance carried forward		$24,566 18

J. MACKINNON,
General Manager.

The president addressed the meeting and covered very fully the points mentioned in the report, after which he moved its adoption, seconded by vice-president Wood.

The general manager followed and reviewed the financial statement which was presented, and spoke of the general prosperity which Canada had enjoyed during the past year.

The meeting was also addressed by Judge Alfred, Hon. Mr. Hackett, A. N. Thompson and other shareholders of the bank, all of whom expressed themselves as being highly pleased with the report that was submitted and with the bank's position.

Votes of thanks were passed to the president and directors for their attention to the affairs of the bank; also to the general manager and staff for the efficient manner in which they had performed their duties during the year.

The Directors.

The ballot resulted in the election of the following directors:—Wm. Farwell, Israel Wood, N. W. Thomas, Gardner Stevens, C. H. Kathan, H. B. Brown, K.C., James S. Mitchell, S. H. C. Miner, A. C. Flummerfelt and Frank Grundy.

At a meeting of the new board Mr. William Farwell was re-elected president and Major Wood vice-president.

General Statement.

The General Statement at 15th November, 1905, is as follows:

HON. F. L. CARTER-COTTON, M.P.P., Vancouver, B. C., Managing Editor of The News-Advertiser.
WILLIAM FARRELL; of Farrell & Tregent, Vancouver, B.C., President, of B. C. Telephone Co., Limited.
PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.

2. To loan money on advantageous terms on first class security including real estate.

3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.

7. To transact such financial business as seems safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

AUTHORIZED CAPITAL, $1,000,000.00

In Ten Thousand shares, of the par value each of $100, are offered for subscription at $110 per share.

Payable $5 per share on application, $5 in 30, $5 in 60, and $5 in 90 days, and thereafter to be subject to a call of not more than $5 per share per annum until fully paid.

Five per cent. interest will be paid on all payments in advance of calls until such time as the applicant may elect to receive such dividend as may be declared by the Corporation in lieu of interest. These shares may be paid in full at any time.

SUBSCRIPTIONS for the Shares will be received at ANY B. C. BRANCH OF THE BANK OF MONTREAL, or at The Bank of Montreal, Quebec, Montreal, Ottawa, Toronto, London or Winnipeg and at the CORPORATION'S offices, Vancouver, B. C.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,050
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

Mercantile Summary

A contract has just been let for deepening the winze from the 1,550 ft. level at the Le Roi mine, Rossland, down to 1,750 ft, owing to the apparent productiveness of the ore at that depth.

A recent letter from Ottawa states that an order-in-council had been passed authorizing the cession to the city of St. Helen's Island for the sum of $200,000. It is to be used for park purposes.

Lawson & Wilson, Limited, will take over the stationery business now carried on by W. T. Wilson in Toronto, and will make and deal in books, paper, stationery, furniture, office supplies, etc. They will also do printing, lithographing, engraving, etc.

Henry Birks & Sons, Limited, Montreal, appears in the "Canada Gazette" among the companies which have recently received charters of incorporation. It will carry on the business of goldsmiths, silversmiths, and manufacturing jewellers. The total capital stock is placed at $2,000,000.

The Lightning Creek Gold Gravels and Drainage Company have struck what are considered to be some rich values at its property at Wing Dam, on the Cariboo, and intend starting some important development work. A new flume to develop 75 horse-power is being completed, and shortly a new steam hoist, dynamo, pumps, turbine water wheels, etc., will be put in.

It is announced that Toronto people, among whom are Messrs. A. J. Pattison, John Firstbrook and W. S. Dinnick, have taken over control of the Brantford Street Railway, the Grand Valley tramway from Paris to Brantford, and the Woodstock, Thames Valley and Ingersoll Railway, from Woodstock to Ingersoll, and that these roads will be greatly improved and extended.

On Saturday night last the annual meeting of the Quebec Commercial Travellers' Association took place, when the following officers were unanimously elected: President, J. E. Lavergne; first vice-president, Cyrille Proteau; second vice-president, J. Lanonette; secretary, Jean B. Lemieux; assistant secretary, Edm. Belanger; treasurer, J. E. Talbot; directors, P. Seguin, A. E. Dert, O. Hudon, G. Vanfelzen, and J. N. Cloutier; auditors, Sam Richard and L. A. Trempe.

Somebody, apparently a busybody, started a story that the Imperial Dry Goods Company, of Winnipeg, was about to retire from business. The managing director of that company, Mr. A. E. Ham, being asked as to the truth of the rumor that he is selling out denies it *in toto*. So far from intending to give up, he intends that progress and expansion shall be the order of the day in the establishment rather than selling out or retiring, especially, as he declares, the business is now in a healthier and more expansive state than ever before.

WRITE US FOR BOOKLET AND LATEST LIST OF OFFERINGS.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST. EAST TORONTO.

Mercantile Summary.

The Ontario Government has come to an arrangement with the Grand Trunk whereby that company will build a fine hotel in the Algonquin National Park in readiness for next season's tourist traffic.

The November gold brick taken from the Guysboro Mine of the Beaver Hat Gold Mining Co. in Nova Scotia weighs 155¼ ounces, and is worth $3,100. This, says the "Recorder," is the largest brick yet produced by the Beaver Hat corporation.

The failure is reported of J. A. Bouthilette, grocer, at Magog, Que., who has been in business since the spring of 1903. He owes probably not more than $1,000, but the assets are so small that an assignee has declined to handle the estate.

The Canada Pacific Pulp and Paper Company are starting work on the construction of their large pulp and paper mill at Swanson Bay, on the British Columbia coast. The sulphide mill will have a capacity of twenty-five tons daily at the beginning. A large water power in the vicinity is to be developed.

Still another Cobalt mining proposition has received a charter. This time it is the Toronto-Cobalt Mining Company, Limited, with a share capital of $300,000. It intends to take over certain properties in the township of Coleman and carry on a general mining, milling and reduction business. H. B. Wills, of Toronto, and A. McMillan, of Cobalt, are among the charter members.

A noteworthy country failure in Quebec Province is that of Levesque & Fils, general merchants at Ste. Flavie Station, on the Intercolonial, far down the Gulf, who have just assigned, owing, it is said, close upon $40,000. The senior has been twice unsuccessful in the past, but the concern has apparently been able to command of late years liberal credit in many quarters. In October last arrangements were made to transfer the business to La Compagnie Commerciale de Ste. Flavie Station, a joint stock company recently incorporated, but the deal was subsequently declared "off," and insolvency proceedings then followed.

During the week the following group of minor failures has developed at the ancient capital of Quebec Province. On demand, an assignment has been made by J. L. Fortin & Co., shoe retailers, who owe $2,356. Fortin failed in 1904 as the result of giving accommodation paper, and has since operated in his wife's name.—James Campbell, also in the boot and shoe line, has assigned, owing $2,165.—F. Henry, who for nearly twenty years has been engaged in the fancy goods business, with but a limited measure of success, is reported insolvent, and shows liabilities of $2,800.—G. A. Blouin, in a limited tailoring way, and Falardeau & Falardeau, small grocers in the city, have also assigned, the liabilities in each case being about $800.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

OSBORNE & FRANCIS,

54 King Street West, Toronto.

Mercantile Summary.

The Sovereign Cobalt Mining Company, Limited, capital $200,000, has been granted a charter. W. F. Lefroy, Toronto is among the charter members.

The No. 1 crusher building at the Granby Mines, Phoenix, B. C., was destroyed by fire a few days ago at a loss estimated at between $20,000 and $30,000. Two tramways and some machinery were also destroyed.

The grocery and hardware firm of S. Simard & Frere, at Normandin, Que., whose failure we noted several weeks ago, have been able to arrange a settlement with creditors at fifty cents on the dollar. Their liabilities reached just about $4,500.

The Hon. Nathaniel Charles Rothschild has been elected a director of the Grand Trunk Railway Company, to fill the vacancy caused by the death of Mr. L. J. Sergeant. Mr. Rothschild is a member of the well-known banking house which underwrote the bond issue of the Grand Trunk Pacific recently.

Shipments of ore from the Rossland district for last week amounted to the following quantities: Le Roi, 1,740 tons; Centre Star, 2,010 tons; War Eagle, 1,230 tons; Le Roi No. 2, 180 tons, milled 1,200 tons; Jumbo, 200 tons. Total for the week 6,660 tons, and for the year to date 309,843 tons.

The general store firm of M. L. Meloche & Co., Thurso, Que., have put their estate into the hands of an assignee. Marie Louise Meloche is the wife of J. B. Meloche, who failed, in 1898, at Papineauville, and who resumed business a year or two later at present address, making use of his wife's name as a cover.

The Canadian Forty Mile Gold Dredging Company, Limited, total capital stock $600,000, has been incorporated under Dominion laws with the object of carrying on the business of a mining, milling, reduction and development company. J. S. Lowell and S. G. Crowell, of Toronto, are mentioned among the charter members.

We learn that E. Lamy, for some years a dry goods retailer in Montreal, of fair calibre, and who recently blossomed out into a departmental business, is in embarrassed shape, and his affairs have been put into the hands of Kent & Turcotte, accountants, who will distribute receipts *pro rata* among the creditors until after the New Year, after which they will prepare a general statement of affairs, upon which will depend the continuance or winding up of the business. The liabilities are figured at about $35,000.

We have a great variety of

Bonds and Debentures

for sale at present. Send for list just issued.

Half-Yearly Dividend.

Notice is hereby given that a dividend of three per cent. on the permanent preference stock ot this company has been declared for the half-year ending December 31st, 1905, and that a dividend of three pec cent. upon the ordinary permanent stock of the Company has been declared for the half-year ending December 31st, 1905, and that the same will be payable

on and after

Tuesday, the 2nd Day of January next.

The Transfec Books of the Company will be closed from the 15th to the 31st of December inclusive.

By order of the Board.

(Signed). A. J. JACKSON.
General Manager.

Dated this 4th day of December, 1905.

Mercantile Summary.

The Brackman-Ker Milling Company has just completed the erection of a cement elevator at Strathcona, Alberta, with a capacity of 100,000 bushels.

The Mount Royal Incline Railway Company is asking the city of Montreal for an extension of its franchise by twenty-five years. It wants exemption from taxation during that period and offers to reduce return fares to 5 cents during the forenoon.

The Canadian Pacific Soo Railroad, an extension of the Minneapolis, St. Paul & Sault Ste. Marie Railway, has been formally opened for traffic, this week, and the extension, 300 miles in length, runs from Thief River, in Minnesota, to Kinmare, in North Dakota, traversing a large belt of the finest wheat raising country in the Northwestern States. This extension will bring the Soo line system up to 2.100 miles of track.

Joseph Poisson & Co., engaged in a fair-sized general trade in the country concessions south of the St. Lawrence, some miles from Gentilly, Que., have assigned, and are said to owe $12,000 to $13,000. It may be remarked by the way that there are no fewer than seven other businesses of various kinds conducted at Gentilly by persons or firms of the name of Poisson.

It is said that the Grand Trunk Railway has let the contract for the equipment of the Port Huron-Sarnia tunnel with electric power on the third rail system for the operation of trains at a cost of nearly $700,000. Large power houses would have to be built at Sarnia and Port Huron. The move is a good one for the future of Sarnia tunnel traffic.

The Imperial Electric Motor Company, Limited, Toronto, has been granted a charter by the Ontario Government, which empowers it to purchase or otherwise acquire patents for the construction of automobiles, power machinery, etc. Robert McKay and Gideon Grant, of Toronto, have the company's interests in hand. The capital is placed at $200,000.

The Ontario Government has authorized Debenhams (Canada) Limited, which already holds a charter in the United Kingdom, to take over as a going concern the wholesale dry goods trade of Debenham, Caldecott & Co., and to carry on in the Province of Ontario the business of manufacturers' and commission agents. The capital named is $500,000.

The Westinghouse Electric and Manufacturing Company are doing a large business in equipping mines with electric locomotives to replace the older forms of haulage, whether animal or mechanical. Electric mine haulage, considered from either the points of efficiency or economy, has so many advantages, as compared to the older practice, that the time is not far distant when any other method of mine haulage will likely be the exception.

DIVIDEND No. 56

Notice is hereby given that a dividend at the rate of five per cent. per annum on the paid-up capital of the Company, for the half-year ending 31st December, 1905, has this day been declared, and that the same will be payable on the second day of January next.

The transfer books will be closed from the 20th to the 31st proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL, Manager.

Toronto, 23rd November, 1905.

W. A. Weeks & Company's extensive dry goods store in Charlottetown, P. E. I., was damaged by fire on Saturday last to the amount of perhaps $40,000 or $50,000, insured for $30,000.

Important discoveries of gold and copper are reported to have been made on Fitzsimmon's Creek, near the head of Howe Sound, B. C., and about five miles from the surveyed route of the Vancouver, Westminster and Yukon Railway, through Squamish Valley. It is said that capital has been obtained by Mr. Ceperley, in New York for developing the claims. The ore is said to be similar to the mineralized schist on the Britannia, carrying gold, copper and some silver.

Among the enquiries relating to Canadian trade received at the Canadian Government office in London (City Trade Branch), during the week ending 1st December, 1905, were the following: A Scotch firm desires the addresses of Canadian wholesale woollen merchants who might buy tweeds for women's and men's wear. A Manchester firm would communicate with Canadian producers of tallows and fats who seek an export outlet. A Midlands company, making harness and general saddlery is prepared to appoint a suitable Canadian resident firm to act as its agents. A London firm possessing a large connection among builders, ironmongers and engineers, is prepared to represent Canadian manufacturers of goods handled by the trades indicated.

Trusts

This Company executes trusts of every description, its duties being performed under the supervision of a Board of Directors of representative men of the highest business standing and experience.

TEXTILE CENTRES.

Manchester.—The past week in Manchester, says an English exchange, has been remarkable for the almost hourly fluctuations in raw American cotton in Liverpool, and we have experienced another big rise, spot being advanced 22 points. Under these disturbing influences business has been considerably upset, and buyers have hardly known what to do from day to day. In piece goods for export, transactions have been very difficult to arrange, and the offers coming through are not based on current values. There is still no practicable demand from India, and buyers for that outlet appear to have very few orders to place.

Dundee reports speak of gradually hardening rates for jute. Calcutta cables have been stiffer, and the week closes firm with 47 rupees indicated for November cracks. Demand for jute for shipment is slow, but afloat and near at hand parcels are still more or less wanted. A firm tendency pervades the yarn section, and demand is solid, with dealings into next year.

A German thread manufacturer has visited the Irish flax market, and is credited with having made somewhat extensive purchases, says "Commercial Intelligence." This flax being well adapted for thread on account of its breaking strain and other useful qualities, is becoming a prime favorite with thread spinners. There is not much alteration in the aspect of flax markets generally. Enquiries and repeat orders from Canada for all kinds of linen goods are brisk, but fabrics for embroidery and manufacturing purposes are most in evidence.

AGENTS WANTED in every unrepresented District in Canada.

The "New York Dry Goods Economist" reminds its readers that this is the last chance before Christmas, and advises them not to forget that all-important item, the attractive window display. One who knows has stated that a good display in a show-window is worth one hundred thousand newspaper circulation, and results have time and time again proved the truth of his remark. If one would attract the children, and through them, the mothers to the store, a new idea would be to place a Christmas tree in the middle of a show-window and upon its branches hang a goodly array of infants' stockings filled with things that appeal to youngsters, such as nuts, candy and one or two cheap toys.

Buying of raw silk has shown a slight improvement during the week, but business is far from being on a large scale. It is believed that a large proportion of the business done on American account was due to the desire to cover short sales made some time ago and which it was feared would have to be bought at a loss were there further delay. These operations have had a tendency to stiffen prices in the Yokohama market, advances amounting in the majority of instances to about 2½ cents, though even higher prices were paid in exceptional instances.

Not for many years has the position of the linen market in Belfast been so strong as at present. Spinners, manufacturers and merchants all report business as good, stocks at a minimum, prices high and rising, and the outlook promising. In the local flax market supplies have been readily bought up at prices which should be satisfactory to

Toronto, Ont.

the farmers. The uncertainty with regard to the Russian crop continues, and has an appreciable influence on the Belgian and Dutch flax markets. Business in the brown cloth market continues satisfactory, the new orders totalling a substantial amount. Dress goods, unions, damasks, and handkerchiefs are all in improving request, and prices continue to tend upwards. There is a further increase in home orders for bleached and finished goods and fancy goods for the Christmas trade are in active demand. Canadian business is described as substantial.

Bradford.—The consumption of the coarser-fibred crossbred wools in both the Huddersfield and Leeds districts, as well as in Scotland, continues to be on such a large scale, and all the available stocks of last season's clip are so very nearly expended, that it does not seem possible for any serious decline in the prices of these lower wools to set in at present, although, of course, the present prices are unusually high. Pure merino colonial wools will be offered in London in large quantity that has been the case at these sales for some years past, but as this increase will not exceed 20,000 bales, and both home and foreign users are still hungry for wool, and the consumption of merino wools is still on the ascending scale, it is probable that any hesitation on the part of buyers at the opening will quite have vanished before the end of the sales.

* * *

TORONTO MARKETS.

Toronto, Dec. 14, 1905.

Chemicals, Drugs, Etc.—With the exception of there being a slight lull, such as is not infrequently the case just before Christmas, trade, generally speaking, may be described as good. Prices remain at steady figures and the volume of transactions is about normal. There is no special feature making its appearance in connection with the staple drugs.

Dry Goods.—There is considerable activity in dry goods circles, though perhaps not more than has been usual in recent years at this time of the year. All lines of dress staples and fancy goods are in good demand, and the tendency of prices is upward rather than down. There is brisk enquiry for carpets and house furnishings. Payments are reported fairly satisfactory.

Flour and Wheat.—The market for flour is a little on the quiet side. Holders of ninety per cent. patents ask about $3.25 in buyers' bags, but buyers refuse more than $3.10 as a rule. Not much change has taken place in the wheat situation during the week. Millfeed continues very firm. Peas are scarce and in demand. Barley, rye and oats are rather dull.

Fruits.—A holiday demand has begun for fruits, which hold very steady at about the following quotations: Apples, barrel $2.25 to $3.50; grapes, Tokay, $2.25 to $2.50; do, Malaga, keg, $6 to $7; bananas, bunch, $1.50 to $2; lemons, box, $2.75 to $3.25; oranges, Jamaicas, barrel, $4 to $4.50; do, Florida, case, $3 to $3.50; do, navel, $3.75 to $4; do, Mexican, $2.35 to $2.50; grape fruit, $4 to $4.50; cranberries, barrel, $12 to $13; celery, dozen, 35c. to 40c.; tomatoes, 10-lb. basket, $2.25 to $2.50; sweet potatoes, barrel, $3.25 to $4; do, kiln dried, $4.50 to $5; onions, bag, $1.15 to $1.25; onions, case, $3.

Groceries.—Sugars are firmer, and yellows have advanced 10c. per cwt. The movement is quite brisk. For canned goods of all kinds there is also a good business doing with prices in most lines very firm. In teas only a nominal trade is being done. Coffees, on the other hand, are wanted more freely. Travellers' reports in the rural districts speak favorably of the prospects.

Provisions.—Dairy products remain firm, and good grades sell readily. Cheese is a trifle firmer. New-laid eggs are practically out of the market, though a few small lots continue to come into the city. Smoked meats are steady and meeting with a pretty good demand.

Live Stock.—Cattle at the markets this week, especially at the Junction yards, were in good demand, and exporters were too few for the demand. High-class butchers' animals for the Christmas trade were also wanted at good prices. They were fairly firm.

Wool.—Prices are but nominal, as really there is no business being done.

SWEET CAPORAL

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

MONTREAL MARKETS.

Montreal, Dec. 13th, 1905.

Ashes.—There is almost an entire absence of business, and quotations continue more or less nominal at $5.25 to $5.30 for first quality of pots; second pots, $4.70, and from $7.00 to $7.25 for pearls.

Dairy Products.—A fair local demand exists for butter, as well as some orders from outside points, and prices are steady at 20 to 20½c. for dairy; fresh rolls, 20½c.; good to choice creamery, 22½ to 23c., and 23 to 23½c. for fancy. Cheese values rule very firm at 12⅝ to 12¾c. for fine Western makes; Townships, 12⅜ to 12½c., and 12¼ to 12⅜c. for fine Quebecs. Local stocks are becoming concentrated in few hands.

Dry Goods.—Little that is new can be reported in this line. Stock-taking is the order of the day, and a good many travellers are getting home from the road. Many country letters speak of a lack of snow in certain districts, which is needed at this season to make good Christmas retail business in the country, but notwithstanding this money is coming in very fairly to wholesale houses.

Fish.—Active demand for Advent is noted in fish. Labrador No. 1 herring is firmer at $6.00 per barrel, stormy weather on the coast having curtailed supplies; Nova Scotia salmon in tierces, $18.00; ditto in barrels, $13.00; British Columbia salmon, $12.50 per barrel; large green cod, 4c.; sea trout, $9.50; mackerel, $2.00 a pail; fresh steak cod, 5 to 5½c.; haddock, 4 to 5c.; frozen herring, $1.90 to $2.00 per hundred; smoked haddies, 6½ to 7c.

Furs.—Receipts are gradually increasing, and we quote the following prices for prime skins only: No. 1 large beaver, $6.00 to $7.00; medium ditto, $5.00 to $5.50; kilts, $2.00; black bear, $15.00 for large No. 1, $10.00 for medium and $5.00 for small; badger, 40 to 60c.; fisher, $6.00 to $7.00 for fine dark; red fox. No. 1 Northern, $3.50; Eastern and Ontario No. 1, $3.00; No. 1 silver fox, $100 to $175.00; cross fox, $7.00 to $10.00 for dark; wolverine, $7.00 for No. 1 dark, other grades, $2.00 to $5.00; lynx, $6.00 to $7.00 for No. 1; Marten, Western and British Columbia No. 1, $6.00 to $7.00; Eastern ditto, $4.50 to $5.00; mink, $6.00 to $8.00 for large No. 1, and $4.00 to $5.00 for medium; winter rats, 15 to 18c. for large; other, No. 1 large dark Labrador, $30, and $15 for Western; coon, 1.75 to $2.50; skunk, $2.00 for No. 1 prime black, $1.50 for short stripe, other grades, 30 to 75c.

Groceries.—The sugar market has stiffened up a little, and local refiners have established an advance of 5c. in yellows and soft grades, making No. 1 yellow $3.85, instead of $3.80, but granulated is unaltered at $4.30 in barrels, and $4.25 in bags. Molasses is steady at 35c. per gallon for Barbadoes, in single puncheons. There is a great scarcity of candied peels, and 18c. is quoted for citron, lemon and orange 12c. Canned apples are also in light supply, and it is reported packers have advanced 3 pound tins to $1.10, and gallons to $2.50; evaporated apples are being quoted as high as 9½c. in a jobbing way. In teas there is no special movement, but the statistical position of Japans and all kinds of green teas is a very strong one.

Hides.—Receipts of beef hides are now fairly liberal, and are being freely absorbed. Quotations rule firm on the basis of 12 to 12½c. per pound for No. 1. Lambskins are quoted $1.05 each.

Metals and Hardware.—In general hardware lines there is a quieting down, but in all sorts of builders' and plumbers' supplies an amount of activity prevails which is unusual at the season. Lead continues to be the feature in the metal list; pig lead is now quoted up to $4.65 to $4.70, while shot and lead pipe have been again advanced, the discount on shot being now 5c., and on pipe 20 per cent. Sheet lead. $5.00 to $5.50, according to thickness. Tin keeps on stiffening, and is firm at 38c.; copper, 19¾ to 20c.; spelter 7 to 7¼c.; antimony is the only article on the list showing any easiness, being now quoted at 14c. Wire nails are advanced in price to $2.15 base.

Oils and Paints.—Travellers are now all home, and the business passing is entirely of a holiday character. Linseed oil is firmer at 47 and 50c. per gallon for raw and boiled respectively, in a jobbing way. White lead is firmer owing to the strong advance in pig lead, and $5.75 is now quoted for chemically pure. Other lines show no change.

Wool.—A number of the woolen mills are shut down in part or wholly, and the existing demand is of a very limited character. Cape wools are quoted at 17½ to 21c.; fine B. A., 40 to 44c.; North-West. 20c.; domestic fleece, 26 to 28c.; pulled, 28 to 30c. per pound.

Mercantile Summary.

The Grand Trunk Pacific Railway is calling for tenders for 30,000 telegraph poles to be placed along their line west of Winnipeg.

The Beach Calculating Machine Company, Montreal, capital $50,000 has been incorporated. It will manufacture office supplies and specialties. Among the charter members are J. A. Lauren, O. Herbert, and P. E. Lamarche, of Montreal.

Mr. Frank Wootten, the publisher, has sent us a copy of the handsome Christmas issue of the "Canadian Churchman," 44 pages. There are no fewer than fifteen page or half-page illustrations, many of the subjects having especial reference to the Christmas season, and being reproduced with great delicacy. The cover contains a group of the Holy Family, surrounded by the green leaves and red berries of the holly tree. A few copies are to be had at the publisher's office, 36 Toronto Street, Toronto, price 25 cents each. It is a nice piece of holiday literature to send to friends in this country or the old.

The first number of "Moody's Magazine," price 25 cents, published at 35 Nassau Street, New York, goes far to justify the expectations to which its prospectus gave rise. Besides an article on "Pit-falls of Speculation," by Thos. Gibson, and one by Charles A. Conant on "Unprecedented Prosperity as Shown by Facts." It contains a valuable symposium on the Increasing Supply of Gold, to which contribute such eminent men as Horace White, Frank A. Vanderlip, M. L. Muhleman, Professors J. B. Clark and Irving Fisher, occupying the chairs of Political Economy at Columbia and Yale respectively. The charts illustrating gold production, prices and wages are very serviceable.

THE AGENT WHO COULD DRAW PARALLELS.

His Experience With the Banker.

"No," said the banker, positively, "I won't sign any application for insurance and you might just as well save your breath!"

"Why?" demanded the agent.

"Because I don't propose to risk my money in any skin game and unsound institutions, such as insurance companies have proved to be," and the banker turned back to his desk with an air of finality.

The agent reluctantly turned and started towards the door that led to the street. To reach this he was obliged to pick his way around a kit of tools belonging to some workmen who were replacing a pane of glass that had been broken in the door.

He stopped suddenly and then whirled about and strode to the paying-teller's window, which was within almost arm's reach of the desk of the head of the institution with whom the agent had been conversing.

In a voice which carried much further than the teller's ears, the agent demanded:

"What's my balance?"

The teller quickly gave him the amount, and, in spite of hard times, it was not insignificant.

"Count it out," said the agent, as he filled out a check for the full amount, "I want it all."

"H'm!" came nervously from the banker's desk where every word had been heard, as was intended. "I hope you were not offended by my refusal—"

"Oh, no," interrupted the agent, "of course not. I fully appreciate and commend your good judgment in declining to risk your possessions in so porous a receptacle as a life insurance company. Fact is, your prudence was contagious, and it is for that reason I am drawing my money from your bank."

"What do you mean?" demanded the banker. "Do you doubt the stability of this bank?"

"Well, do you suppose I am going to risk my savings in a bank with the glass in its front door broken?" the agent questioned with well affected surprise.

"But," stammered the banker with surprise that was genuine, "you don't consider a broken pane of glass a hazard to a bank's credit, do you? And, besides, you see they are mending it," he ventured, half jokingly.

"Just a moment ago," and the agent turned to him with an expression which set all joking aside, "you told me that the company I work for is a skin-game and unsound institution when, as all fair-minded people know, it is simply a case of broken glass in the front door and, furthermore, they are mending the glass right now."

The banker eyed the agent and a quizzical smile caught the corners of his mouth as he said: "Say, come around here, take this chair, let's look into that proposition of yours once more."—Rough Notes.

AN INTERVIEW WITH CARNEGIE.

An American who was recently a guest of Andrew Carnegie at Skibo castle sends to the "World" an account of his visit, from which the following, a conversation at the breakfast table, is an excerpt:

The subject of education came up. A learned Dutch baron declared that many people are over educated.

"Yes," remarked Mr. Carnegie, "Lord Reay, here, who speaks five languages, knows too much."

In reply to a question, the philosopher of Skibo launched out in this way:

"One of the aberrations of the age is the sacrifice of time to ancient classics on the part of young men preparing for a business career. A man with a university education is a man lost to commerce. A man who begins business at eighteen is much better off than he who spends three or four years in a university studying old ruffians who lived 2,000 years ago. Studying skirmishes among savages in the classics is no preparation for a man going into the iron, steel or coal business. Greek and Latin are no more use than Choctaw, except to the few. Why should English sailors have to learn the language of Virgil, Horace and Cicero? English officers study classics. What's the result? They have foolish courage. Instead of saving themselves they allow themselves to be shot and say they are dying for their country. I prefer an officer who would make an intelligent run when necessary and then come back and live for his country."

"Do you condemn university education for all?"

"By no means. I am speaking of the uselessness of university education for the young man who has to make his way in life. The man who is born to wealth can do as he pleases. He has no interest for me. He rarely amounts to anything anyway. Those preparing for professional pursuits should go to the university by all means."

"Do you make any exception?"

"Yes, clergymen."

"University education injures them. It leads them to higher criticism. They begin to pick flaws in the Bible. The moment they begin that they are done for; they are no good for religion. They lead to intellectual and religious anarchy."

A remark by Mr. Carnegie about looking to the masses of the people to cure social ills led to a conversation upon democracy.

"Are you still as devout a believer in the people as when you wrote 'Triumphant Democracy,' Mr. Carnegie?" I queried.

"Yes," he replied. "Years have made me love that teaching more and more. If democracy does not succeed, than there is no hope for humanity. The classes have failed, now democracy is getting a show. I have no fear for democracy in America. When things begin to go seriously wrong there the people set them right with a sudden jerk."

IRON AND STEEL MARKETS.

For the partial breathing spell which has come to the iron and steel markets the past few days, the trade generally is profoundly thankful, says "Iron and Machinery World." There has been comparatively little new buying. Aside from a desultory patter of small orders, though fairly large in the aggregate, there have been several transactions of great note, affecting next year's trade. At least one western railroad system, according to present plans, will be hurried through to the Pacific coast as fast as tracks can be laid, and judging from the orders already placed with mills for the rails, most of the 1,500 miles of track to be constructed will be completed in 1906. There is every prospect that the building of railroad trackage next year will be very active, and this

railroad work is one of the most potent influences that can touch the metal trades. For a heavy tonnage of iron and steel will be needed not only in rails, but in bridges, in equipment, and in shop work.

Advances in the prices of iron and steel this week have been comparatively unimportant. A few of the minor shapes have been marked up, but the main products are unaffected by fluctuations. Because of the rise in the price of iron bars, there has been considerable pressure to advance the price of steel bars and eastern reports have it that the nominal quotation of 1.50c., Pittsburgh, for steel bars will be advanced at least to 1.60c. and perhaps higher. However, as nearly as can be learned the largest producers of steel bars are radically opposed to any further advance in this product and because of it are booking orders for future shipments on that basis. They are considerably behind in their orders and the user who needs an early delivery must go into the open market and pay whatever prices he encounters, which means a premium of varying extent.

The tremendous buying of iron ore this past week by furnacemen has been at an advance of about fifty cents over the contract prices of last year. This will entail an added cost to pig iron of at least a dollar per ton from that source alone. The ore producers have shown moderation in the limitation of the advance to fifty cents and judging by past experiences it will redound to their own advantage, for it will tend to prolong the period of the active consumption of pig iron.

* * *

—Manager Dalrymple, of the Glasgow street railways, having heard that Mayor Dunne, of Chicago, refused to make public his report on municipal ownership of the Chicago street railways, has written offering to send a duplicate copy if requested to do so by the city council. The transportation committee has, accordingly, made the request, and we shall presumably have the pleasure of learning that municipal ownership of a public utility can never be made a success until it is managed on business principles. That is something we already know, but we too frequently forget. If the adoption of municipal ownership was made conditional on the existence of even ordinary business ability in the management of the usual municipal services, municipal ownership undertakings would be few and far between on this continent.—Montreal "Gazette."

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, over $2,600 000.00

More Than $7,000,000.

Over and above premiums received, more than $7,000,000 has already been paid or credited to its policyholders by the

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY
THE ROYAL-VICTORIA Life Insurance Co.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A. I. A., F. S. S. General Manager

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

TRADE COMBINATIONS ANALYZED.

The prosecution of the Plumbers' Supply Association, which resulted in the imposition of very heavy fines upon that body, and smaller fines upon the individual members of it, and the present inquiries into the operation of various other trade combines, has caused people to ask:—Is any kind of a trade combination legal? To this we reply: the union of a number of working men to protect their own interests, and even to keep up the price of their own commodity—labor—is recognized as perfectly legal in itself. For a number of employers to unite their interest and regulate their own business. is also legal.

Why then do we find them being prosecuted?

In a broad way, the difference between legality and illegality in this connection is the difference between conspiracy, as defined by the Criminal Code, and lawful combination. So long as a number of men with lawful objects in view, and so long as they pursue those objects in a legal manner, they do not come under the ban of the law. But so soon as they adopt illegal means to accomplish either a legal or an illegal object they become conspirators, and are liable for an indictable offence.

Thus six men may join together to acquire a piece of property; this is a legal object, and these men may in a legitimate way bring their influence to bear on the owner in order to get it at a low price. Such a step is perfectly legal. But if they combine together to murder the man and steal the property, this at once becomes a conspiracy. If therefore the object and the means adopted are legal, the combination to effect this object is legal, and will not be disturbed by the law.

In the case of the plumbers of Toronto, they united to keep up prices and to prevent lawful competition in the plumbing business, thus not only "bleeding" the public, but forcing the smaller plumbers out of business and preventing them from earning a livelihood. Such procedure, of course, is contrary to public policy and is forbidden by law. When in addition, the plumbers adopted illegal means such as their system of rebates, etc., this made their actions all the more unlawful, and consequently they were punished, as has recently been seen.

CHRISTMAS JUSTICE.

Again comes round the joyous time of Christmas, with its letters, its presents, its meetings, its good wishes—all the pleasures that are so bound up with the very idea of the day. And what a world of happy meaning does Christmas bear, to the children, to long-severed relatives or friends who choose this time to come together, to the Christian, to the poor who are hoping to receive some gift peculiar to the day. Truly Christmas is, as it has been described by a master hand: "A Kind, Forgiving, Charitable, Pleasant Time." And may it be a Merry time as well for all our friends.

This is the week when we plan surprises for our households. And it is a good thing to make presents to relatives. A noble thing to subscribe to a hospital fund. A delightful thing to make poorer folk happy by the ready hand in pocket as well as by the cheery word. But there is a higher law which says: Before you ever dispense charity or scatter pleasure with pence or pounds, *do your duty* to those who are your creditors.

Ladies, the sewing-girl who has toiled faithfully in your upstairs room should be paid her due: the down-town millinery woman should have her money for producing your handsome Sunday turn-out; and be sure that you settle with your butter-woman or your vegetable man, or your furnace-tender, before spending all your purse contains on Christmas shopping.

And you men, whether you have ten thousand dollars a year or are trying with only two thousand to out-vie your neighbor with five, before you make plans for Christmas travel or Christmas generosity to your daughter or your son, pray remember to be just to those whom you should first pay. How about that life policy; is the agent carrying it for you? How about your unpaid tradesmen's bills? Do not put off their payment with the plea that such and such a grocer or tailor is in no immediate need. You do not know that. And while you are thinking of a handsome subscription to a deserving charity (which will look well in Tuesday's newspapers), do not forget the trifling present or the Christmas call for a neighbor who is either genteelly or abjectly poor.

Cases sometimes become known which justify the hints we have here given as to the need of remembering common justice when meditating bounty.

We have lately heard with extreme pain of an instance which throws a baleful light upon what has been said above. A man of distinction and of good position in Ontario died a few years ago. His affairs were found to be in an unexpected state of debt and chaos. He owed a livery bill of $250; his wife had run bills of several hundred dollars for such merchandise as fashionable women cannot live without; accounts were long outstanding with grocer, milkman, baker, butcher, for articles we all know as necessaries of life, and these have not been fully paid to this day. We have no means of knowing whether he had kept up his club dues, but he certainly did not pay his doctor or his dentist for years. And as to his wine-merchant —well as to this we say nothing, for the dead man belonged to that section of dissent whose members are not supposed to keep any wine or even beer.

This, to plain people, is all very shocking. Our own opinion is that it was dishonest. A man who from his position should have been an exemplar to the community, had no sort of right to squander his income on fashionable fads—whether his wife's or his own, no matter—while he neglected for years to pay tradesmen for their supplies of his household.

* * *

THE CANADIAN HOG INDUSTRY.

That was an almost dramatic contest of wit and speech last week in Guelph when the farmers and the meat-packers held their argument upon the subject of the Canadian bacon hog. The importance of the industry referred to and the high character of the disputants rendered the argument a peculiarly interesting one. On the one side were the up-to-date farmers, who argued that the producer should be paid for his hogs according to quality, and that the range of prices paid by packers for the same quality of animal was altogether too high. If a man puts special care and skill into the raising of his hogs, and then finds he is paid no better price than if these had been poor or average, he has little incentive to continue his extra care.

The immediate subject of the discussion was the importation of hogs from the United States by Canadian packers, who now manufacture them in bond for the British market. At the time this privilege of purchase in bond was first obtained, Canadian farmers were not producing the right kind of animal, though during the last few years they have done so to such an extent that better-grade Canadian hogs are practically without a peer. American hogs latterly have been arriving in very small quantities, until the present year, that is. The farmers at Guelph argued that this increased importation was unfair. The packers retorted that had it not been for their power to get American hogs in an emergency, when needed, owing to a scarcity of supplies in Canada, the packing industry would by no means have attained its present large proportions. As to the inequality of prices, they claim it is due to variations on the British market, and that therefore they are not responsible.

The farmers argued that it was precisely this power and disposition on the part of the packers to buy American hogs that kept them from paying according to quality. Whereupon a prominent packer retorted that the question of grading was one for the farmers, not for themselves; and, to the interpolation that buyers paid the same for bad as for good hogs, pointed out the large number of culls in each litter, and explained that the rate was fixed on the average quality. As a matter of fact, however, we believe that the better class of hog raisers make a practice of doing their own culling and keeping the poorer pigs apart until they should reach a proper standard.

The situation is distinctly unsatisfactory, and looks to the layman like a case of six to one, and half a dozen to the other. The farmers are asked to supply all the hogs the packers require, and they will then buy only Canadian animals; the packers are asked to pay in accordance with quality, and the farmers will then raise all the animals needed. The bringing of representatives of the two classes thus face to face at Guelph is calculated to make each side understand the motives of the other, and may quite easily prove the cog-wheel on which the whole rehabilitation of this important branch of agriculture depends.

A late report from Ottawa states that the Dominion Government, impressed by the presentation of the farmers' case, has decided to prohibit the importation and slaughter in bond of hogs from the United States. One reason for this step is the necessity for preserving the health of Canadian hogs, since hog cholera prevails in the United States. Another is the importance of maintaining the high reputation of Canadian bacon in the markets of the United Kingdom. There is reason to believe that United States bacon has been brought into Canada, exported from here to Britain, and sold there as Canadian bacon, which, seeing the superiority of the latter, is apt to prejudically affect our reputation.

* * *

COMMERCE ON THE LAKES.

Remarkable growth has been the watchword of Canadian commerce on the Great Lakes during the last year or two, and in the present year all records have been broken. This has been the case even in spite of inadequate railroad facilities, and the insufficiency of cars to handle the traffic at Depot Harbor, on the Georgian Bay, and elsewhere. It is said that had it not been for this unhappy fact, the grain-carriers could have transported fully 3,000,000 bushels more than they actually did, a loss which represents not only dollars and cents to the vessel owners, but unsettlement in prices to the farmer.

The dimensions to which the lake carrying trade has now grown are shown by some figures compiled by Canadian vessel-owners as to the shipments of grain during the navigation season just closed. They make apparent that the eastward movement of grain for export has reached such proportions that it equals the entire western crop of a few years ago. Shipments from Fort William and Port Arthur were as follows:—

Shipment, Crop of 1905.

	Bushels.
Wheat	30,235,000
Oats, barley, etc.	828,000
	31,063,000
Old crop (1904)	6,000,000
Total season's movement	37,063,000

Through the crowding consequent upon the grain blockade at Depot Harbor 11,200,000 bushels of Canadian grain went through the United States traffic routes. It was forwarded as follows:—

	Bushels.
To Buffalo	10,600,000
To Erie	600,000
Total to United States ports	11,200,000

Ninety per cent. of the grain shipped to the United States ports was carried in United States bottoms.

It may give the reader some idea of the magnitude of the grain business of Western Canada to state that at Port Arthur and Fort William on Lake Superior on the 2nd of December there were waiting to be loaded steamers with a combined capacity of 2,780,000 bushels. It is worthy of note that, while navigation usually closes on the upper lakes about December 5th, steamers loaded this year at the twin ports up to the 12th, and one left Fort William as late as the 17th, the insurance being extended to meet the lengthened requirements of the season. It is not unlikely that a longer season of navigation will become the rule in future.

* * *

SOCIALISM AND ITS DANGERS.

As a rule the socialism with which the people on this continent are most familiar is the milder form of municipal ownership, the cause no doubt being the continued "good times" which seem to give every man, even though he be not born to the purple of millionairedom, a chance to earn or scheme for a competency. In the older countries of Europe, however, in Germany, and to large extent in Britain, these chances are fewer, and less likely, and the line of demarcation between class and class is much more strongly marked. It comes about, therefore, that the improvement in condition which is not probable to approach the individual through natural means or the exercise of his own abilities, is looked for (by a certain class) as the result of some artificial interference by an outside source, such as the Government. Now, this is absurd when looked at from a strictly economic point of view, or when reduced to its logical issues; but, looked at from the point of view of men, who, with their families, are kept constantly on the borderland of a bare pittance and starvation, at the same time that they see next to them continual evidence of the superfluous luxuries of wealth, it is not so absurd. At any rate the absurdity is swallowed up in the very human feeling that economics make but a poor showing when compared with any system which shall put all on an equal footing, especially when that system means the taking away from the other fellow and giving to the *me*, who am in great need of that exchange. This is the real meaning of the spread of socialism in England, about which more than one keen observer has expressed alarm in recent years.

An old definition stated that a socialist was a man with a red tie and a loud voice. This is true maybe, of the Hyde Park brand of socialist, who loves to "spout" on Sundays and at demonstrations of the unemployed. But behind him of the red tie and the loud voice, there is the man who has studied Karl Marx and a dozen others of the really able thinkers who have brought one or another of the various systems of socialism almost up to the level of a science. Many of these men, besides being of considerable mental capacity, are undoubtedly sincere; and herein lies their danger to the community.

It must be said, too, referring again particularly to the older countries, that the absolutely hopeless conditions of life surrounding a vast proportion of the populace, lead many otherwise clear-headed thinkers to sympathize in a measure with schemes which would appear to offer some alleviation, however hopeless in the end they may be. But has it occurred to business men to think out what must be the inevitable result of any real triumph of the principles of socialism over individualism, which has ruled the world ever since its inception? To the whole structure of the business world, the recognition of socialism would be the death-blow. It would mean, leaving out of consideration any plan for the equal division of a nation's or a community's wealth, that the careless, the incompetent, the ignorant, would receive just as much recompense for their labor—or their idleness—as the able man who puts his whole thoughts and skill and energy into his pursuit. It would mean in the ultimate that the industrious would work, and the idle would "rest," and that both would be in the same boat as regards the enjoyment of their wage. Where would be the incentive to progress, and what would happen to the whole fabric of business and society?

* * *

BANK OF OTTAWA.

Comment upon the transactions of this bank and their results for 1905 need not be lengthy. The analysis of them and observations upon the trade conditions of the country made by the general manager and the president and manager are full and instructive. Deposits show the unusual increase of $2,763,000, and we are told are very generally distributed. Current loans are some two millions larger, while readily available assets are greater. The net profits were about the same as in the previous year, but a higher dividend was paid last half.

It is shown in the report that nine branches and sub-offices of the bank have been opened during the year. They now number, we believe, fifty-one in all, with a likelihood of one or two more presently in Western Ontario and the newer provinces. One half of the million dollars new stock authorized in 1902 was allotted in 1903, and it is the intention to issue the remaining half million. The reserve is equal to the paid capital, $2,500,000. While the president is disposed to "thank God and take courage," seeing the future bright with promise, Mr. Burn sees elements of danger in the very prosperity of to-day, and tells his auditory that "there must be no relaxing of vigilance."

* * *

SOME NOTIONS ABOUT ADVERTISING.

To sell more, tell more. This is good advice in these days when so much advertising is put out which tells practically nothing regarding the article advertised. Real advertising is "salesmanship on paper," and calls for the application of scientific principles. Such a statement will not please the man who makes an idol of "general publicity." Most advertising is designed primarily to sell goods; it makes no difference how funny or artistic it may be, it must do that or it is a failure. The only kind of advertising that will accomplish this is intelligent, reason-why copy, which tells something definite and uses such convincing argument as to be irresistible.

Time and place in advertising are two very important things. It always pays an advertiser to be in touch with the season and surroundings when placing his copy. An ill-timed word sometimes breaks the strongest hold which convincing copy would otherwise have—while on the other hand a word fitly spoken that shows a familiar understanding of conditions, often instantly establishes a bond of sympathy between advertiser and reader. You cannot expect the same advertisement to do equally good work in a metropolis and in Mudtown. Different localities and different conditions call for different methods of treatment. Avoid the habit of making people laugh in the wrong place.

The art of advertising is coming into its own more and more every day. Men in all walks of life are beginning to realize that it pays to "toot" one's own horn to a greater or lesser degree. The competition of modern days is keen and shrewd, but there is always some business coming to the man who will go after it in the spirit of the following lines:—

> The man who simply sits and waits
> For good to come along
> Ain't worth a breath that one would take
> To tell him he is wrong;
> For good ain't flying 'round this world
> For every fool to sup,
> You're got to put your seers on
> An' go an' hunt it up.

Advertising, to be effective, must be persistent. The following incident, vouched for by reliable authorities, goes to show the effect that persistency in advertising has upon the public mind; Johnstown, N.Y., was settled away back in the early days of the eighteenth century, one of the oldest places in the United States, and is famed as being the place where the last battle of the Revolution was fought. It was founded by Sir William Johnston, and certain events which took place in the early days are annually celebrated by dinners, speeches, songs, and stories. Some little time ago at one of these dinners a famous after-dinner speaker was called upon for a few remarks. Evidently he was not as happy as was his custom, and he appeared to halt and stammer. Finally he brightened up and made this confession: "The fact is, I know a lot of nice people living here, but for my life I can't think of a single interesting thing for which your city is famous, except that it is the home of Knox's gelatine."

To be effective, advertising must be definite in character, having an absolutely certain purpose. The advertiser who studies a purpose and makes his media and copy to fit it, is bound to be successful. He cannot afford to wobble about from one thing to another; he must adopt a policy and make all things contribute to the carrying out of his original purpose.

* * *

—Year by year, if success is to be judged by results, Guelph proves its fitness for its present important position of being the holder of Canada's great live-stock show. Last week's exhibition was the climax to a series of fine shows that have helped to raise Canada's reputation as a producer of fine stock to a high degree. It is called by everyone who was present the most successful yet held, in point of attendance, number and quality of exhibits, educational interest, etc. Some high-class papers on agricultural subjects read by experts, both of Canada and the United States, were a treat to those who listened to them. Among the visitors was His Excellency Lord Grey, who displayed a lively interest in the proceedings, as well as in the Macdonald Institute.

* * *

SYSTEMATIC THIEVING DISCOVERED.

Three groups of thieves, in three different Canadian cities, have engaged the attention of the authorities within a week or two past. On Tuesday last, Judge Desnoyers, of the Court of Special Sessions in Montreal sentenced nine young men to terms of imprisonment varying from four months to six years for burglary, theft from dwellings, and theft from warehouses. One fellow stole fur-lined overcoats on Notre Dame Street, and got six years; four were shop-breakers, and got two to four years; one stole silver plate and got six years. Nearly all these had previous convictions against them.

The case of the young men in John Macdonald & Co.'s in Toronto, some nine or ten in number, is a glaring one. They had systematically robbed the warehouse for months, and truck-loads of merchandise were found in their homes. After partial confession and attempts at evasion, they admitted their guilt, first in the warehouse and afterward in the police court. They are now out on bail, and are to come up for sentence later. We have heard sympathy expressed from the pulpit for these young men and have read it in the press, together with some strictures on the harshness of the firm. After careful enquiry into the whole circumstances we say emphatically that this sympathy is entirely misplaced. Messrs. John Macdonald & Company were being systematically robbed. They had already detected a score of instances, and had in former years let off a dozen or more of their clerks found stealing. But at last, after instances extending over years they were forced to take action to protect themselves. And we think them perfectly right. Some of the details given us of these thefts and the callousness of their authors are enough to make one ill. If those who have commented upon the harshness of employers, and under-payment of their hands, knew as much as we now know about this and other similar cases in Toronto, their compassion would not be all expended on thieving employees.

The third instance is related by our correspondent in Halifax. Much interest is taken thereabout, and no wonder, in a case which has been before the police court of that city for some weeks, prolonged from repeated adjournments. The firm of A. & W. Smith, one of the leading grocery houses in Nova Scotia, discovered that two of their clerks had been robbing them systematically for two or three years, and they estimated their loss up in the thousands. The method employed by the clerks was to send goods to the railway freight sheds under fictitious addresses. They had an agreement with one of the men there to look out for the goods, which were distributed from that point by a truckman to different retail firms in the city. Large bills were also sold to captains of trading schooners. All the sales were made at much below the market value. The clerks and a number of their customers are now in custody. It has long been a surprise to many in the trade of Halifax, our correspondent tells us, how certain grocers advertised goods at prices which appeared to be below even jobbing quotations. It is partially explained now. The trial is at present in progress, and the revelations being made are decidedly interesting.

It seems unhappily true that these various examples of dishonest employees indicate a declension from the standard of honesty among young men in our city warehouses. Possibly their detection has arisen from a more careful looking into the system of checking in these establishments; possibly through some especial activity on the part of detectives, aroused by suspicious circumstances which came to the knowledge of the employers. In any case the effect must be an uncomfortable feeling on the part of wholesale merchants as to the standard of honesty among their clerks, and naturally, greater vigilance in looking after possible loop-holes in the delivery departments.

* * *

LUMBER CONDITIONS IN CANADA AND BRITAIN.

Prices are steady in the Ontario and Quebec lumber markets and a good trade for the season of the year is being carried on. There has been little, however, of a new character developed since our last report on the subject. Several dispatches from New Brunswick speak of extensive lumber operations being carried on in Albert county this winter. Some have thought that the supply would soon be exhausted by the way the forests have been depleted during the last few years, but people on the spot cannot remember any year when so many men were in the woods as at the present time. And the weather has been favorable for the two months past, and the predictions for a mild winter are welcome.

The last circular from Liverpool by Farnworth & Jardine says that the arrivals from Canada for three years have been almost exactly the same, viz., 464,000 tons each year. The indications of improvement in the trade have been fairly borne out, but the volume of business has not been large. Imports during the past month were light, and, with fair consumption, stocks, with a few exceptions, are now moderate; values generally are firmer, and for some of the leading articles have advanced. The circular then goes on to speak of the Canadian trade as follows: The arrivals have been more moderate, and again chiefly for Manchester, on merchants' accounts; the deliveries have been large, but stocks are ample; values rule firm. Square Pine—There have been no arrivals; the demand is quiet, and stocks are light. Red Pine—There is little enquiry, and the stock, though small, appears sufficient. Oak.—No fresh arrivals; the consumption has been fair, and the stock is light; prices are steady. Elm has not been imported; the demand is rather quiet, but stocks are moderate; values rule high. Pine Deals.—The arrivals have been on a much reduced scale; the deliveries have been satisfactory, but stocks are large; there is little change in value to report. Red Pine Deals.—The demand continues dull. New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals to the Mersey during the past month have been 4,650 stds. against 5,760 stds. during the corresponding month last year. The deliveries have been satisfactory, and values show a further slight improvement; stocks, although fairly large, are about 3,000 stds. less than same time last year, but Quebec spruce deals and galatz whitewood are 3,000 standards in excess. Pine Deals have moved off a little more freely, but prices rule low. Of birch logs there have been no arrivals; there has been more enquiry, however, stocks are very light, and prices have improved; there is a fair opening for fresh imports. Planks.—There has also been more enquiry; stocks are light, and recent sales have shown improvement.

* * *

FIGURES AND FACTS DON'T ALWAYS PROVE CONCLUSIONS.

Editor Monetary Times:

Sir,—A lengthy article entitled "The Business of Canadian, British and American Life Companies Contrasted," has recently appeared in a Canadian insurance monthly. From the statements made, and comparisons set up, this article seems to me to be so contrary to generally accepted opinion that I would esteem it a favor to have your views upon the question, and for that purpose I am sending you a copy of the paper.

I would direct your attention especially to the comparison in the table which states that the cost of new business in Canadian companies is $51.15 per thousand, while in British companies it is $108.04 per thousand, and in American companies $48.42 per thousand. Is there not a screw loose in this some place? Is there any foundation for the conclusions arrived at in the article and tables, or is the whole thing a case of "drawing a herring across the track," and deceiving the unwary by a great mass of undigested figures?

Yours truly,
A BRITISHER.

Toronto, Dec. 19th, 1905.

[We have read the article referred to, and have marvelled a good deal at the claims made by the author. He seems to think that the mass of figures he gets from Blue Books and other books and opposes in columns, maintain his contentions. We, however, do not. It is never difficult to get statistics to prove a certain thing, if you exclude all considerations, or facts, or figures that interfere with what you want to prove. But we think that to "lump" the figures of scores of companies, of all ages from ten to seventy years, and doing different kinds of business, is to confuse the data for a problem, and to contrast matters not properly comparable. Then the conclusions attempted to be drawn, for instance, that Canadian companies save a larger percentage of income than British or American, that their new business costs less than half that of the British, that their premium rates are lower than either, that their expenses and death claims are 38 per cent. less, are absurdly untrue. And we protest against such unwarrantable glorifying of our native companies at the expense of the British ones. Not having space for a lengthy article on the subject this week, we shall devote some articles to it in the immediate future.—Ed. Mon. Times.]

* * *

MERCHANTS' DAY.

There is something in the idea of the merchants of a town setting aside a certain day for an unusual display of their wares to the public, and taking extra pains to induce people from a distance to come and "shop." The same sort of thing is done in large cities, as when New York arranged for special railway fares, or when Montreal or Hamilton had their holiday rates. We have just heard from Windsor, Nova Scotia, of a Merchants' Day in that town last week, which passed off most successfully in all departments of trade and commerce that go to make up Windsor's business life. The early morning hours were made lively by the busy scenes enacted in all the stores; but more especially in the dry goods emporiums, where additional help had been provided. W. H. Roach & Co. had a staff of forty-four for that day, including errand boys. G. H. Geldert had about twenty, J. W. Elliott the same, and the "2 Barkers" were up to the standard.

The "Tribune" agrees with the general opinion that a Merchants' Day for Windsor is a splendid thing. It advertises the town and demonstrates in a more emphatic manner that Windsor is the very best place in which to obtain bargains on Merchants' Day. Crowds of people came to Windsor from the surrounding towns and country. The Avon boat came in on the early morning tide and remained until evening, returning with a large number of passengers, tired but triumphant. The merchants were satisfied. An account of this success at Windsor having gone abroad, the Summerside, Prince Edward Island, Agriculturist, says: "Why not have a Merchants' Day in Summerside. It will be impossible to have it now before Christmas. Why not have it about the middle of January; the roads will likely be in good order." Certainly, have a Merchants' Day anywhere; if the merchants need stirring up, if there is stagnation in trade, or if the residents are beginning to do their shopping in larger places. The people like novelty, and are likely to support the enterprise that offers them bargains and "a good time" both at once.

* * *

ESPERANTO—THE PROPOSED UNIVERSAL LANGUAGE.

Car ciuj Kanadanoj konfesas ke nenic estas trovebla pli bona laboristo ol la Anglo. In this cryptic sentence perhaps some reader with an acute linguistic nose will scent the meaning: "Because every Canadian confesses that nowhere can you find a better worker than the Englishman." The language is Espéranto, that "international auxiliary tongue, the easiest in the world to learn," as the advertisements of the Espéranto Association say. A few of us take the invention with deadly seriousness, and with a view to improving Shakespeare, translate his masterpieces into this engaging patent slang. You learn the language while you wait. Substantives are made by adding *o* to a root-word, adjectives by adding *a*, and adverbs by adding *e*. Plurals are shown by the terminal *j*, and words are built up in sections as a toy house is constructed with bricks. For instance, with these odds and ends, anyone with a little spare time, can build up the word "weakness." *Mal* denotes opposites; *fort* obviously means strong; *ec* signifies qualities; and *o* is the hall-mark of a noun. Hence the combination *fortico* spells strength, and *malfortico* stands for weakness.

Espéranto has its uses, on emergency, even in trade, and by means of it the industrious man may make himself understood, say, in Belgium. Some tables are at hand showing Canada to have a Belgian trade. The Belgian market has this to recommend it for exporters, that its tariff is low, its credit is good, and singularly little prejudice against imported goods exists. But in Brussels buyers "buy low", they are as keen as anybody in Glasgow or Belfast, and one can name no acuter buyers in the United Kingdom than those of the said two cities.

* * *

BANKING AND FINANCIAL.

The Merchants Bank of Canada has opened a branch at Fort William, Ont.

It has been resolved by the directors of the Standard Bank of Canada to increase the capital of that bank from $1,000,000 to $2,000,000. A meeting of the shareholders will be called to authorize the new issue. The directors purpose an immediate issue of $250,000 at 200, being a premium of 100 per cent.

The Bank of Hamilton shows a gratifying statement. The earnings for the year have been large, namely $357,000, after providing for Hillhouse Brown's heavy defalcation, besides which a large sum accrued from premium on new stock issued. After dividend they were able to put $135,000 to rest besides nearly twice that much in the shape of premium. It is proposed to increase the capital by half a million.

Because of change in the date of the bank's year from the close of May to the close of November, the statement of the Hochelaga Bank is for eighteen months ended with the latter date. The net profits for that period have been $492,992, which is equal to $328,661 for twelve months, and at the rate of more than 16 per cent. on the paid capital. After paying dividend, $250,000 was carried to reserve, which is $1,450,000, and $10,000 placed to officers' pension fund.

There is a project of amalgamating the Chatham Loan & Savings Company with the Reliance Loan & Savings Co., of Toronto. Meetings of the shareholders to consider the proposal, will be, for the Reliance, on January 8, and for the Chatham company, January 9th. The Chatham company has an authorized capital of $1,000,000, of which $309,000 is paid up. It is understood that the Reliance Co. will pay for the assets of the Chatham Company by issuing $175,000 debentures and $133,000 in stock in the Reliance at par.

It is announced this week from Winnipeg that the Canadian Co-operative Investment Company has assigned to the Northern Trusts Company. Liabilities are estimated at about $160,000, and assets at $200,000. "The cause of the assignment was that contract holders took advantage of withdrawal claims and the moneys received were not equal to the amount necessary to meet the withdrawals." Money was borrowed from a bank to the extent of $24,000 on mortgage securities, with the expectation of being able to pay it back gradually from money received from contract holders. This was not found possible, and an assignment resulted. It is supposed that apprehension caused by the difficulties of the York Loan Company caused depositors in the Winnipeg concern to withdraw deposits.

The amalgamation of the Huron & Erie Loan Company and the Canadian Loan and Savings Society was agreed to by the required number of shareholders of both a fortnight ago. Then the amalgamated company chose a board of five directors from the Huron & Erie, and four from the Canadian. The five representing the Huron & Erie, are, we are told: Col. Little, Messrs. V. Cronyn, K. C., Frank E. Leonard, John Labatt and T. G. Meredith, K. C. Those from the Canadian are Messrs. Robt. Fox, A. T. McMahen, John Christy and Dr. Eccles. Adjusters who are to examine the last annual reports of the assets of the companies have been appointed. They are: Huron & Erie, T. G. Meredith, K.C., and George A. Somerville; for the Canadian, Messrs. J. S. Blackburn and A. T. McMahen.

* * *

LIFE INSURANCE NOTES.

We hear that Mr. George Moffat, formerly of the Manufacturers Life, has been engaged as insurance editor of the "Expositor," Newark, N.J. George makes a breezy paper wherever he goes.

The Continental Life Assurance Company has purchased the brick structure known as the Medical building on the corner of Bay and Richmond Streets, Toronto, owned by the College of Physicians and Surgeons. It will be refitted, in part for the company's purposes, and in part for commercial offices to be rented.

Mr. J. S. Wallace, provincial manager of the Imperial Life Assurance Company at Winnipeg, is being worthily congratulated upon having closed and delivered a $75,000 policy this past week. This is one of the largest policies, if not the largest policy ever issued on any one life in the Canadian West, and speaks well, not only for Mr. Wallace, but also for the company.

Among those who have already remembered the editor with dainty Christmas cards are Messrs. David Burke, of the Royal Victoria; Mr. A. L. Eastmure, of the Ontario Accident. Calendars have reached us from the Guardian Assurance Company, the Maryland Casualty Company, the Canada Paint Company, the Canada Permanent Loan Corporation, the Great-West Permanent Loan Company and the Confederation Life of Winnipeg. For these and all other similar compliments we offer our friends thanks.

We learn that a joint committee representing the National Fraternal Congress and the Associated Fraternities of America has prepared a plan of consolidation and a constitution which was unanimously adopted by both committees. This is to be submitted to special separate meetings of the two organizations, to be held in Chicago early next year. If each organization approves the plan, both are to meet together to perfect the proposed consolidation.

It is now stated by the United States "Review" that special assessments are to be levied upon the old members of the Ancient Order of the United Workmen in Michigan, the Grand Lodge being $150,000 behind on its death claims, largely owing to excess mortality among the older members, who are paying inadequate rates. It has been decided to levy ten special monthly assessments on the members over fifty-five years old, which are expected to realize $75,000, and against these collections $50,000 is to be borrowed to clear up some of the old claims. The increase made in rates last year turns out to have been inadequate, hence the above step.

Mr. George W. Perkins, of J. P. Morgan, & Co., N. Y., has resigned his offices of first vice-president and chairman of the finance committee of the New York Life Assurance Company. He is succeeded as first vice-president by Alexander E. Orr, president of the New York City Rapid Transit Commission, and as chairman of the finance committee by John Chaflin, head of the H. B. Chaflin Company. Mr. Charles A. Peabody, a prominent New York lawyer, who has been appointed president of the Mutual Life Insurance Company of New York, has issued the following statement: "I desire to communicate directly with the policyholders of the company, for whose benefit a great trust is being administered. No private interest controls this company, and I enter upon the discharge of my duties as the representative solely of the policyholders, chosen unanimously by their elected representatives, the board of trustees. The new administration stands pledged to economy, to lawful methods and to reform of existing abuses. Much has already been accomplished to carry out these pledges, and all will be done that is necessary to fully redeem them. The board of trustees is harmonious and united upon these matters. The company possesses financial resources far beyond its liabilities. Lapses and surrenders of policies mean abandonment of accumulations and the savings of years of thrift. Policyholders are urged to continue their policies in the company, and not to withdraw from it."

* * *

FIRE INSURANCE NOTES.

Fair warning has been given by the insurance commissioner of Pennsylvania, Mr. Martin, to all life insurance companies doing business in that state that they must file written agreements abolishing giving of rebates, dismissing agents who do so and refusing to employ such agents for three years after dismissal.

Consequent upon the death of Mr. Walter Kavanagh, of Montreal, a new appointment has been made to the agency there of the Scottish Union and National Insurance Company of Edinburgh, and the German-American Insurance Company, New York. The appointees are Essinhart & Maguire. This new firm is composed of Mr. Henry J. Essinhart and Mr. Charles H. J. Maguire, who have been associated with the late chief agent of these companies, Mr. Walter Kavanagh, for years past. They are spoken of as energetic men, with a fair knowledge of fire underwriting.

We are favored with one of the nicely-colored calendars for 1906 of the Northern Assurance Co., of London, England., of which Mr. Robert W. Tyre is Canadian manager. Its illustration bears the legend, "Canada Enthroned," and represents a helmeted, but rather characterless blue-eyed Britannia occupying a joint throne with Canada, who is a spirited-looking creature, wearing a coronet very audaciously conventionalized out of maple leaves. This joint imperial throne has been placed by the artist—alas! what a drop from the sublime to the commonplace—upon a wharf on which is some of the inevitable "Manitoba No. 1 Hard," and also some "No. 2 Northern," while an Allan liner fills the ocean distance.

* * *

GROCERIES AND PROVISIONS.

Several capitalists of Winnipeg and St. Thomas have joined together to organize a company under the name of the Dominion Produce Company, for the purpose of carrying on a trade in eggs, butter, cheese and provisions. Branches will be established in Winnipeg, St. Thomas, Calgary, Nelson, Vancouver and Fort William. G. W. Prout, of Winnipeg, is to be manager, we undertsand.

A despatch to the Halifax "Chronicle" from Yarmouth, N.S., dated 12th inst., stated that the four lobster factories formerly owned by George A. Shand have been taken over by the George A. Shand Company, Limited. The following board of directors was elected: Geo. A. Shand, president; M. Neville and J. A. Neville and Lewis Mood. E. H. Armstrong is secretary. The company is capitalized at $50,000 and includes several Halifax capitalists. At present the new concern intends to operate four factories in connection with which they will run a steamer.

* * *

DRY GOODS NEWS.

J. R. James and Robert Roy Moodie, of Hamilton, have formed a company under the name of the Eagle Spinning Mills, Limited, with a capital stock of $250,000, with the object of spinning, manufacturing, buying and dealing in cotton, merino, and woolen yarns and to make yarns of every description, also of buying, selling and dealing in all kinds of cotton, woolen and other materials used in the above-named business. An Ontario charter has been obtained and the head offices are to be in Hamilton.

* * *

—The civic revenue of Montreal shows a marked increase up to the close of November. A statement prepared at the city hall shows the increase in revenue up to December 1 to have been a million over that of last year. The increase in property assessments alone is about $200,000, and increases under other heads are in proportion. The grand total collected on revenue last year was $3,417,082, while this year it is $3,919,738, an increase not far from thirteen per cent.

* * *

—An unsatisfactory condition of things in the important realm of technical education is revealed by the recent statement of Principal Pakenham, of the Toronto Technical School, before the Toronto branch of the Canadian Manufacturers' Association. He stated that the pupils were obliged to work too much in theory, and have not enough practical demonstration. The Association, we note, appointed a committee to go into the whole matter of technical education.

* * *

—Evidence accumulates as to the practicability of navigating Hudson's Bay for a large proportion of the year, and now that two or three railways are being projected to reach its coasts, the importance of the question becomes proportionately greater. Early in the spring of last year, an expedition was sent out under the joint auspices of the Mounted Police and the Marine Department, under the command of Major Moodie, and one of its chief objects was to ascertain during what period of the year navigation of the bay is absolutely safe, so far as freedom from ice is concerned. The Major's conclusions are that for four months in the year the Hudson's Bay route is open to ordinary navigation, but that, to make it safe for commercial shipping, it will be necessary to establish coal depots, as well as wharves, together with lighthouses and other aids to navigation.

* * *

—It was thought that the height of elegance had been reached in steamboat accommodation on the Great Lakes of America, when James J. Hill built those swift and splendid steamers, the "Northwest" and "Northland," 370 feet long, to ply between Buffalo, on Lake Erie, and Duluth, on Lake Superior. But what do our readers think of a steamer 440 feet in length, of 91 feet from guard to guard—for she will be a side wheel boat—having a guaranteed speed of twenty miles an hour? For such a boat, the directors of the Detroit and Cleveland Navigation Company accepted the plans of Frank E. Kirby, last week. She will cost, it is said, a quarter of a million dollars more than was originally intended, making her cost one million two hundred and fifty thousand dollars. The new boat will have engines of 700 horse power, four decks, 312 staterooms, and 22 parlors. Her advent in 1906 or 1907 will still further encourage the luxury of latter-day fresh-water travel.

* * *

—Enquiries relating to Canadian trade received at the Canadian Government Offices in London: By a London firm about Canadian exporters of dried cod, and green apples, and by another London firm for the names of Canadian importers of salt, also for the names of Canadian exporters of fur cuttings. The makers of a well-known bicycle would write to Canadian importing firm prepared to introduce their cycles. A London firm possessing a wholesale connection could handle a Canadian brand of condensed milk; and also Canadian canned goods and dried fruits and vegetables. A Cardiff firm with a connection among ships' store merchants in South Wales ports would represent, on commission, Canadian producers of canned goods, soups, etc., and other goods suitable for ships' stores.

—German life assurance prospered during last year, for there were, at the close of December, 5,000,000 life policies, (assuring, in round figures, 920,000,000 marks capital) held by the German life companies, who, apart from ordinary life business also transact popular life assurance. The two companies that have achieved the greatest development are the Victoria and the Friedrich Wilhelm. We are given to understand, says the "Insurance Record," that the amount of new business contracted in 1904 reached a figure heretofore unknown, amounting to 147,500,000 marks (or £7,370,000) in sums assured as against 137,500,000 in 1903 and 127,500,000 in 1902. Another proof of the rapid strides that have been made in popular life assurance lies in the fact that five years ago the assured capital stock, possessed by the German companies was 477,000,000 marks, whereas to-day it is twice as much. The average assured value per policy in 1904 was 180 marks. A "mark" is about equivalent to an English shilling.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, December 21st, 1905, as compared with those of the previous week:—

	Dec. 21.	Dec. 14.
Montreal	$28,463,149	$27,522,122
Toronto	22,614,118	24,568,883
Winnipeg	9,820,272	10,176,684
Halifax	1,890,143	1,962,086
Hamilton	1,558,668	1,543,066
St. John	1,185,823	1,047,604
Vancouver	2,028,366	1,995,618
Victoria	781,797	755,442
Quebec	1,921,179	1,732,015
Ottawa	2,809,661	2,336,489
London	1,004,389	1,112,384
Total	$74,077,565	$74,752,393

TANNERS IN COUNCIL.

The Tanners' Section of the Toronto Board of Trade held their annual meeting Wednesday last. Mr. R. M. Beal, the retiring chairman, in the course of a more than usually interesting address, stated that the dying days of 1905 still found the tanner trying to make cheap leather out of dear hides. Next to this, he declares, is the difficulty in securing a supply of suitable hides. It is probable that the population of the earth is increasing faster than the production of cattle. The Chinese, Japanese and Russians, too, are demanding greater comforts, and this had something to do with the unusual demand. Owing to the depletion of the hemlock forests the tanners are being brought face to face with new conditions. The following officers were elected: Chairman, Chas. King; vice-chairman, G. P. Beal; secretary-treasurer, Agnes C. Gray. Executive Committee—J. C. Breithaupt, C. G. Marlatt, G. C. H. Lang, John Welsh, Wm. Craig, R. M. Beal, W. D. Beardmore, George McQuay. Legislation Committee — S. R. Wickett, L. J. Breithaupt, A. O. Beardmore, G. C. H. Lang, C. G. Marlatt, A. R. Clarke.

THE BANK OF OTTAWA.

The thirty-first annual meeting of the shareholders of the Bank of Ottawa was held on Wednesday, the 13th day of December, 1905, in the bank at Ottawa. Among those present were: Messrs. H. K. Egan, J. Roberts Allan, A. O. Anderson, H. N. Bate, Newell Bate, Hon. George Bryson, A. H. Edwards, John B. Fraser, Rev. Thomas Garrett, George Hay, W. D. LeSeur, David Maclaren, D. Murphy, John L. Murphy, George H. Perley, M. P., Colin Rankin, (Mattawa); C. E. Russell, Sheriff Sweetland, F. G. Wait, J. G. Whyte, Neil S. Robertson, (Arnprior); John Christie, W. C. Hughson.

Moved by Mr. George H. Perley, M. P., seconded by Mr. Henry K. Egan, "That the president take the chair, and the general manager be requested to act as secretary."

The chairman then asked the secretary to read the report of the directors.

Report.

The directors beg to submit to the shareholders the thirty-first annual report, showing the result of the business of the bank for the year ended 30th November, 1905, together with balance sheet to that date:

The balance at credit of profit and loss account on the 30th November, 1904, was		$ 73,332 26
Net profits for the year ending 30th November, 1905, after deducting expenses of management, and making necessary provision for interest due to depositors, unearned interest on current discounts, and for all bad and doubtful debts		360,187 57
		$433,519 83
Appropriated as follows:		
Dividend No. 58, 4½ per cent., paid 1st June, 1905	$112,500 00	
Dividend No. 59, 5 per cent., payable 1st Dec., 1905	125,000 00	
Applied in reduction on bank premises and furniture	46,998 86	
Transferred to officers' pension fund	5,000 00	
		289,498 86
Balance carried forward at credit of profit and loss account		$144,020 97

Branches of the bank have been opened during the year at Stoughton, Saskatchewan, and the following points in Ontario:—Ottawa, corner Bank St. and Gladstone Ave.; Toronto, corner Gerrard St. and Broadview Ave.; Chesterville, Martintown, Richmond, Peterborough, and a sub-office to Virden, Manitoba, has been opened at Lenore. It is the intention of the directors to open a branch at Rouleau, Saskatchewan, at an early date, and arrangements are also being made for the establishment of an office at Powassan, Ontario, to be, for the present, under the management of the manager at North Bay.

At the annual meeting of the shareholders in 1902, authority was given to increase the capital stock by $1,000,000, of which $500,000 was issued in February, 1903, and your directors have thought it advisable to issue the remaining $500,000 at a premium of 100 p.c.

The usual inspections of the offices of the bank have been made during the year.

The officers of the bank continue to perform their respective duties to the satisfaction of the directors.

All of which is respectfully submitted.

GEORGE HAY,
President.

THE GENERAL STATEMENT.

The general statement of liabilities and assets as on 30th November, is as follows:—

The President's Remarks.

The president, Mr. George Hay, then said:

At the time of our last annual meeting the general outlook was clouded by the disastrous war between Russia and Japan. The treaty of peace which was concluded at the close of that war was regarded as an omen of universal national concord, and an assurance of general financial prosperity. This "consummation, so devoutly to be wished," has, unhappily, not been realized; on the contrary, a condition of unrest and insecurity has prevailed in the great financial world centres, and the captains of finance are confronted with a situation manifesting the wisdom of continued care in maintaining the security of their position.

Notwithstanding this condition of general financial affairs, Canada has enjoyed a year of remarkable prosperity.

The tide of immigration, so important to our new country, has continued to flow in increasing volume, and with improved character as regards its suitability for absorption into our population.

The enterprise and industry of our people in all great departments have been followed by success.

Anticipated railway construction has proceeded with a satisfactory celerity.

The lumber trade, of so much local importance, has been carried on with successful results.

Our farmers in the older provinces have enjoyed a goodly share in the general prosperity of the year. But as a contribution to the exceptionally good position in which the business of the Dominion now stands, we regard as first in importance, the unprecedented wheat crop, grown and secured in the Prairie Provinces of the West.

Such share in the general prosperity as has been secured by the Bank of Ottawa may be ascertained by reference to the report which is now submitted for your approval.

At this time, when Russia, yet reeling from the stunning blows dealt by her despised rival, is still menacing the peace and prosperity of her neighbors; at this time, when, in another important quarter, transactions of a character subversive of all confidence in commercial integrity, have been unveiled; when money market quotations, indicating a stringency, calling for a rate of interest up to 27 per cent., have been noted, we, here in Ottawa, Canada, have been enabled "to pursue the even tenor of our ways," supplying the requirements of our clients with a liberal accommodation at a normal rate of interest.

We have maintained our rest at an amount equal to our paid-up capital of two and one-half millions of dollars.

During the year we have responded to the demands for greater banking facilities, by opening nine new branches at widely different points.

We have paid two semi-annual dividends, the former one at nine and the latter at the rate of ten per cent. per annum.

We have carried forward at the credit of profit and loss account $144,020.97, and in order to meet the increased demands for circulation, we have decided to call up the last $500,000 of the capital still authorized, this call being responded to with gratifying promptness.

These are some of the factors which enable us to submit with confidence the report of the 31st year's management of the Bank of Ottawa for your approval, conscious that we may well "thank God and take courage," looking into a future bright with promise of continued business prosperity for the Dominion, and all our own immediate interest in this institution.

Before putting the motion for the adoption of the report, the president asked the general manager to give some statistics regarding the position of the bank.

The General Manager.

The general manager said: In reviewing the work of the bank for the year, it is usual to turn first to the showing of profits. The percentage of earnings to capital is 14.40, being slightly over the percentage of last year.

While the loans of the bank have been well maintained, on the whole, during the year, there was a period when loose money was somewhat plentiful, and could not be as profitably employed as it has been lately.

Turning to the balance sheet before you, the circulation of the bank is at the moment $50,738 less than it was a year ago. Since the last annual meeting it has, however, frequently occurred, that we have been so close to the limit of circulation allowed by the Bank Act, that we have been compelled to pay out the bills of other banks. (Total, $2,000,000.)

It will be satisfactory to the shareholders, I am sure, to observe, that the deposits of the bank show an increase during the year of $2,763,037, being the largest in any one year in the history of the bank. This growth is not confined to any particular locality, but is well distributed throughout the branches.

Among the items known as liabilities to the shareholders, there will be noted an increase in the dividend already alluded to by the chairman; increases in the necessary reservations amounting to $7,378, and in the balance at credit of profit and loss account of $70,688. Turning to the assets side of the balance sheet, we have increased our holdings of specie and legal tenders by $436,779; our balances due from other banks by $211,102; and call loans, $61,802, while our securities are less by $154,234, and notes and cheques of other banks held are less by $62,667, making a net increase in what are technically known as "quick assets" of $492,783.

The commercial loans of the bank are greater by $1,922,375 than they were a year ago; the real estate other than bank premises, $19,751; the overdue debts and mortgages are less by $7,761, and the bank premises greater by $60,000. This increase has been occasioned by the completion of the offices in Carleton Place and Montreal, the procuring of safes and office fittings for the new branches, and the acquiring of premises where it has been thought by the directors more advantageous to the bank to own its buildings. The properties so acquired since last meeting are at Kemptville, Kenora and Renfrew; lots have been bought at Prince Albert, Sask., and on the corner of Gloucester and Bank Streets, in Ottawa, on both of which we hope to be able to build at an early date, as our present accommodation in both places is limited. In order to meet the growth of business in the main Ottawa office and at Winnipeg, it has been found necessary to increase the floor space in both these buildings at a very material cost.

To turn for a few moments from our own condition to that of business generally, some years ago the present Minister of Finance, in his budget speech, asked whether Canada had not about "reached the top of the wave" in prosperity. If one may judge by the increases in the bank clearings and in the deposits of the country, an answer in the negative may very well be given to this query.

I called attention last year to the fact that the deposits of the banks generally had grown at the average rate of a million dollars a week. I find that this year the growth is even greater, the total public deposits in the chartered banks being $69,000,000 higher than a year ago, of which $14,000,000 is from other countries, held by Canadian banks having agencies outside of Canada. Comparing the 31st October, 1895, ten years ago, with the same date of this year, the growth is $361,102,000, or an average increase per annum of $36,000,000, no small sum, considering our population.

A careful review of the increases as far as can be judged from the Government returns indicates that the growth in deposits is general throughout the Dominion.

The current loans in Canada of the chartered banks have increased during the year $34,000,000, or about $20,000,000 less than the increase of Canadian deposits.

The question many people are asking is, how long is this growth in material wealth to continue? It seems to me so long as we have good crops throughout the country, and prices maintain a fair average, we may expect good times. At the same time we realize that there must be no relaxing of vigilance. The temptations to over-trade, to lay in too heavy stocks of goods, and to speculate in lands, etc., are serious, and not every merchant can resist them. Those of us who have passed through some of what are known as "hard times", know full well that the foundation of many a loss has been laid in times of prosperity.

It was then moved by the president, seconded by the vice-president, and resolved: "That the report of the directors and statements now read be adopted, and printed for the information of the shareholders."

Moved by Sheriff Sweetland, seconded by Mr. J. G. Whyte, "That the thanks of the shareholders are due, and are hereby tendered to the president, vice-president and directors for their careful attention to the interests of the bank during the past year." Carried.

The vice-president in returning thanks, said:

On the part of the directors, I thank you for your resolution of confidence. It is the aim of all, that the Bank of Ottawa should be governed on conservative lines, and we know it is.

I have seen it inscribed as the motto and heading of a great daily newspaper, "Eternal vigilance is the price of liberty," but, as bankers, and in banking, we might read it, "Eternal vigilance is the price of sound administration."

Let me add, as between the directors, the general management and the staff, there is an "esprit de corps," and a united loyalty to the interests of the bank, which speaks well for its future.

The good will of our shareholders is welcome and helpful and will encourage us to maintain the standard.

Moved by Mr. Thomas Garrett, seconded by Mr. John L. Murphy, "That the thanks of the shareholders be tendered to the general manager and other officers of the bank for the efficient manner in which they have performed their respective duties." Carried.

The general manager replied on behalf of himself and the other members of the staff of the bank.

Moved by Mr. Newell Bate, seconded by Mr. J. Roberts Allan, "That a ballot-box be now opened and remain open until five o'clock for the election of nine directors for

the ensuing year, and that Messrs. C. E. Russell and A. O. Anderson be appointed scrutineers, the poll to be closed whenever five minutes shall have elapsed without a vote being tendered."

The scrutineers reported the old board re-elected, and at a meeting of the newly-elected directors, held subsequently, Mr. George Hay was re-elected president, and Mr. David Maclaren vice-president for the ensuing year.

* * *

OUR HALIFAX LETTER.

As the year draws to a close, nothing but the greatest satisfaction is expressed by nearly all classes of business men at its results. Although the first few months of the year were decidedly against all business, the country has shown wonderful recuperative powers and with good crops and revived demand, there is very little to grumble about in making a retrospect of the year.

The loss of the "Lunenburg" and the drowning of R. J. Leslie, M.P.P., in that wreck, has aroused many expressions of regret here. Mr. Leslie was one of the most enterprising and popular of our business men, and represented the Magdalen Islands (where his business interests largely lay) in the Quebec Legislature.

The Nova Scotia Exhibition Commission has been in session here, revising the prize lists and making preliminary arrangements for the Dominion Exhibition next year. Addition will be made to the main building and the newly built woman's building will be enlarged for subsequent occasions.

What is probably the highest price ever received for Nova Scotia apples in the London market, is reported from Wolfville. An orchardist at Port Williams, in Kings County, shipped twenty barrels to London (the varieties being "Coxe's Orange Pippin," and "Kings") which netted him $7.85 per barrel. This, of course, is an unusual price and was due to an extraordinary scarcity of those varieties on the English market.

J. Owen James, an English mining and civil engineer of note, sailed for England on the "Virginian" last week and took with him a series of gold mining propositions which he considers the largest scheme of the kind ever presented to English capitalists. He has been all over the Provincial gold fields and considers there is a great future for deep gold mining in Nova Scotia.

The news from England that Hon. R. Prefontaine is trying to secure the dockyard for Canada is heard here with great interest. The closing of the dockyard has been a heavy blow to the laboring men of Halifax, and has withdrawn a large amount of trade and money from the place.

The Winter Fair and show of fat cattle at Amherst in this province was a great success this year. Attendance and exhibits were large, and a number of prominent agriculturists from different parts of the Dominion were present. Hon. Sydney Fisher expressed himself as much pleased with the progress made. He said the Amherst Fair has come to be recognized throughout Canada and the United States as a great factor in the agricultural progress of the land.

Business men are much agitated concerning the proposal of the Customs Department to put a new arrangement into effect here on January 1st, which will seriously affect the bonding warehouse privileges. The practice hitherto has been to group two or three bonded warehouses close together under the supervision of one customs locker, whose services were available at almost any time when a merchant desired to withdraw goods, and the fees were reasonable. Under the new management the holder of a bonded warehouse privilege will be required to pay about twelve times the present fees. It is claimed that regulations which may be suitable for the trade of the Upper Provinces will not apply here, because holders of the warehouses only have them for their export trade, being obliged to carry stocks in hand in order to supply Newfoundland and West Indies as well as the Nova Scotia fishing fleet, which gets ship's stores free of duty. The merchants hope to get the objectionable rule revoked.

Halifax, N. S., December 18th, 1905.

THE BANK TROUBLES IN CHICAGO.

The discovery of a state of affairs in connection with three financial concerns in Chicago, which gave great anxiety to depositors, and the means promptly taken to avert panic as well as to secure the payment of deposits, forms an interesting chapter, besides giving a lesson as to the danger of latter-day methods in savings bank and trust company finance. A summary of the situation is given in the following announcement thus made on Monday last by Mr. J. B. Forgan, of the First National Bank, head of the clearing-house committee of the Chicago associated banks.

"The Chicago National Bank, the Home Savings Bank, and the Equitable Trust Company, which have been controlled, officered and managed by John R. Walsh and his associates, have concluded to wind up their affairs and quit business in the city of Chicago. After a thorough and careful examination of their affairs by the Chicago Clearing House banks, it is stated that all of the depositors of these institutions will be paid in full upon demand, the Chicago Clearing House banks having pledged themselves to this result, thus putting all the resources of the Chicago banks behind the depositors of these three institutions. The difficulty with all three has been that their investments have been made in assets connected with the railway and coal enterprises of John R. Walsh. Those assets were not immediately available to meet deposits, and have been taken over on terms which enable the three institutions to pay their depositors in full."

* * *

—Thomas A. Edison expects to live to see the world's electricity produced by a direct process, without the intervention of steam. His belief is that instead of digging coal out of the earth, loading it on cars and carrying it great distances, there to put it under a boiler, to be burned, etc., and so to get power, plants will be set up at the mouths of the coal mines, the power there will be generated and carried wherever it is needed by means of copper wires. This means the doing away largely with locomotives and railway cars as coal-carriers. It is interesting to recall the opinion of the late Prof. Thurston, of Cornell, an eminent American scientist, on this very subject. We find the following editorial note in a recent issue of the "Canadian Engineer": The late Professor Thurston, in an article entitled "The Passing of the Steam Engine," set forth the opinion that only three lines of invention were open to the investigator, (1) The production of electricity direct from coal; (2) the making of light without heat; similar to that of the glow-worm and fire-fly; (3) aerial navigation.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

The Securities Corporation of British Columbia,

LIMITED.

INCORPORATED.

HEAD OFFICE: VANCOUVER, BRITISH COLUMBIA.

DIRECTORS:

FRANK S. BARNARD, Chairman, Victoria, B.C., Director of The B. C. Electric Railway Co., Limited.
DAVID R. KER, Victoria, B.C., President Brackman-Ker Milling Co., Limited.
RICHARD HALL, M.P.P., Victoria, B.C., Director of the Victoria Sealing Co., Limited.
ROBERT KELLY, Vancouver, B.C., of Kelly-Douglas Co., Wholesale Grocers.
HON. F. L. CARTER-COTTON, M.P.P., Vancouver, B. C., Managing Editor of The News-Advertiser.
WILLIAM FARRELL, of Farrell & Tregent, Vancouver, B.C., President, of B. C. Telephone Co., Limited.
PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as seems safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

AUTHORIZED CAPITAL, $1,000,000.00

In Ten Thousand shares, of the par value each of $100, are offered for subscription at $110 per share.

Payable $5 per share on application, $5 in 30, $5 in 60, and $5 in 90 days, and thereafter to be subject to a call of not more than $5 per share per annum until fully paid.

Five per cent. interest will be paid on all payments in advance of calls until such time as the applicant may elect to receive such dividend as may be declared by the Corporation in lieu of interest. These shares may be paid in full at any time.

SUBSCRIPTIONS for the Shares will be received at ANY B. C. BRANCH OF THE BANK OF MONTREAL, or at The Bank of Montreal, Quebec, Montreal, Ottawa, Toronto, London or Winnipeg and at the CORPORATION'S offices, Vancouver, B. C.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1 000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,050
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

P. DONNELLY, GENERAL MANAGER, Vancouver, B. C.

HOLIDAY READING

A WESTERN IDYLL.

It was long ago, and far away. The buffalo roamed the plains, and the reindeer was not even harnessed to an Esquimaux sleigh. The arctic fox and the polar bear, the moose and the wapiti, the beaver and the otter, wandered at will, their only foe, the Indian, for the white man and his "fire-tube" had not reached these great wastes. Neither for food nor for furs were these animals chased, since man, proud man of the civilized sort, was yet far away from the region.

Half way from Hudson's Bay to the Pacific—half way from the "Mexic Bay" to Arctic waters—in the great territory between the Rocky Mountains, Lake Athabasca and Lake Winnipeg, stretched the great territory that so lately was made a state. Summer bloomed and died; Winter came and went among the quiet lakes and rivers, and still the hardy European explorers who searched the ocean on either side—the interior sea as well—and who crossed the continent farther south from the Ottawa to the Mississippi and beyond, had failed to visit this great interior land, and left it to the habitation of animals.

But the civilizer was coming; the explorer and trader would not be denied. Scientist and priest in one, he sought the secret of the Great West. In 1776, we are told Hearne planted a fort on the lower waters of the Saskatchewan river. Not long afterward Edmonton House was placed near where Edmonton now stands, and became, ~~we are told~~, the central post of a district extending 200 miles north and east, and almost to the Rockies on the west. Up from the south, to look for quarrel with their foe, the Cree, or perchance to trade for furs, came Blood, Piegan, and Blackfoot Indian. "Many were the alarms and excursions which startled the pickets of the lead-bespattered old stockade, many the successful ambuscade along the winding trail of the river, many the long-drawn skirmish which flickered and crackled fitfully among the wooded slopes back of the fort." These savages gone, life went on quietly enough with the Hudson's Bay Company folk, carpenters, blacksmiths, boatmen, traders, the great event of the calendar in this far outpost of trade and civilization being the arrival of the "brigade" of boats and later of the annual steamer with the year's supplies.

In the early sixties came the miners, from far Montana, Kootenay and Cariboo, looking for placer gold on the banks of the great river, and a dozen years later the Mounted Police to establish Fort Saskatchewan. And in the hope that the Canadian Pacific Railway would take the northern route, which two lines its successors are now exploiting, came in 1880 settlers to Edmonton. "Their arrival," writes Mr. G. E. Grogan, "was the first beginning of things in Edmonton as a town, as distinguished from a trading post. Traders, missionaries, miners, soldiers, are all necessary as pioneers of a new country, but it is the settler, the man of cows and crops, who really counts." "Presently," he adds, "a little irregular cluster of log shacks and small frame buildings began to rise on the bank of the river, where now stretches the east end of Jasper Avenue. There was another small business centre on the hill just west of the fort. Along the trails, through the woods between, one came upon a church, a saloon, a store, as the chance of the road might happen."

But a railway was to come. George M. Grant and Sanford Fleming made the trip from ocean to ocean and told the people of Eastern Canada what English hunters and explorers had already told the world of the vast possibilities of our North-West Territories. The Calgary and Edmonton railway was built and immigration into what is now Northern Alberta began. And the growth in the neighborhood of Edmonton, plus its splendid position on the high bank of the great river led to the choice of that place as the capital of a province destined for a great future. Already the Canadian Northern Railway track runs into Edmonton, and soon it will be connected by the Grand Trunk Pacific with the far East and West.

Not to deal too much in figures of distance, startling as there are, we come to Edmonton of to-day, stirring, picturesque, modern. Ten years ago it was the merest village, the black mud of the prairie forming its streets; and nearly three quarters of it have been built during the last four years. The census of 1901 showed a town of 2,652 people, while to-day it has 8,000. The assessable value of the town in 1901 was $1,395,912, and the assessment figures of the city for 1905 will approach $6,000,000. From this point can best be reached the distant regions along the North Saskatchewan, the mighty Athabasca, Peace and Mackenzie Rivers, their numerous tributaries, and the great northern lakes. Says Mr. F. T. Fisher in a recent pamphlet: "The changing of the creaking cart, and canoe and York boat for railroad and steamer; the retirement of the red man to make room for his white brother; the replacing of the buffalo, which once made the prairie resound to the thunder of their hoofs, with the more useful, if less picturesque, Shorthorn and Hereford; the exchanging of the trap and rifle for plow and self-binder; the transition from tent and wigwam to comfortable farm house and stately city home, all this has not discredited the judgment of the early traders. Edmonton is still, and will remain, the gateway of the North-West. Edmonton is still one of the greatest primary markets for fur on this continent, and the volume of its trade with the great north is very large."

Nor are the ranch, the farm, and the fur trade the only features which must make this district rich. Among the potential elements which at first were likely to upbuild the town, coal was not thought of; but coal lies in plenty in the very streets of Edmonton, whose residents can place it in their cellars at $3.00 per ton for grate bituminous, while factories can have "slack" for half that price. Sewerage, water-works, electric light, fire-fighting appliances, the telephone—all these are undertaken by the city. More than this, a dozen villages are already connected by wire and there is a farmers' telephone line through Clover Bar and Agricola settlements, so that these Western agriculturists and merchants have "bettered the instruction" of their Eastern exemplars.

Nothing that a vigorous, enterprising community needs for comfort and convenience has been neglected by this modern town, whose residents wisely have supplied themselves with means of education and social advancement.

The scale upon which all this development has been launched, the rapidity of its extension, the romantic character of its transition, the extraordinary confidence of its people, justify us in calling the conversion of this distant community from a mere stockade into a prosperous city, An Idyll—or, better still, A Matter-of-Fact-Romance. Not a creation of the imagination, but the construction by strong minds and willing hands of a great and interesting reality out of what was for long a prairie dream. The possibilities of that wide Canadian West are immense. Its wonders are untold. Its interest is endless.

ALEX.

* * *

TWO CHRISTMAS LETTERS.

Both of them were young fellows, twenty-three or thereabouts, and both had been brought up in the quiet old English town of Medland-on-the-Marl. Both also had experienced the difficulty of finding the opportunity which makes the man in that old land, where opportunities are so few, and the men waiting eagerly to seize them, alas! so many. When, therefore, some pamphlets telling of the limitless opportunities, the virgin lands, the untouched resources of Canada, fell into their hands, what wonder is it that both were tempted by the prospects, and that they made up their minds to sail on an early steamer to the land of promise.

First, however, they wrote to James Johnson, whom they remembered as a former neighbor, who had gone to Canada years before, though his letters home since then had been few and far between. This he explained by the remark that he had been too busy. Now, in writing to James Johnson, the two young men had been possessed of similar and also with divergent reasons. The similarity lay in the fact that both wanted information and a confirmatory view of the roseate promises of the immigration pamphlets; while the dissimilarity was to be found lying at the roots of their respective characters. For these were very different. While each found it difficult to get an opening in crowded England, Jack Winter was doing his level best to *make* one even there; but Theodore Mason was quite content to have made up his mind that, as no such thing existed, it was no good to look for one. And so when they wrote to Johnson, one letter asked him to be kind enough to explain what he considered to be the best manner of going to work for a newly-arrived Englishman, and the other asked whether, as a friend of the family, Johnson could guarantee to find a genteel, well-paid situation for "Yours truly, Theodore Mason."

James Johnson, in his reply, wrote the same letter to them both. He said Canada was the coming country for untold millions, that it was progressing more rapidly than men could be found to fill the openings which imperatively needed filling; that, nevertheless, it was a case of the man being the greater part of the equation; and, in short, that the fellow with the long, strong pull at the oar, and the common-sense view and an eye to the raising of a new-born opportunity, was the one who would reap the benefits. For Jack Winter this was enough; all he asked for was the ghost of a chance. Theodore Mason, on the other hand, thought the "old boy" was a little "rough," and he asked peevishly, "Why couldn't he tell a fellow what he has to offer?"

"But he hasn't anything to offer," replied his neighbor Jack. "All we wanted was to find out if what we've heard about Canada was half-way true. And it is—old Johnson says so; only, a man has to hew out his own trail. Over here there's no room for a new trail. And that's the difference 'twixt there and here."

The upshot was that they both started for Canada on the good ship "Normandia," and after a few days in Montreal, sight-seeing, they lost touch with one another. This was about six months ago, and the doings of our two new visitors have been lost sight of in the interim. However, this week there will arrive in England a couple of letters which do something towards telling the history of each of them since starting out in earnest on the search for a new life-career.

Letter from Theo. Mason.

Toronto, Dec. 15th, 1905.

My dear———

This will be my first Christmas letter away from dear old England. How I miss you all, and how I wish I were once more among you. If only I had enough money, you bet I would soon be there! But in this thieving country, it is a wonder I have enough left to pay postage. I wish I could give you some idea of how these blooming colonials treat a fellow from the old country. If he has any money, their first thought is to get it out of him in some slick way, and their next how to make him slave for nothing. But I'll begin from the beginning. You remember old Johnson. Well, when I first arrived, I went to him, thinking, of course that, knowing the governor as he did, he would give me something I could catch on to easy. Well, all he did, was to size me up, as they say, and tell me I had better hook on to some farmer in the country, who would give me $20 a month and my board for "doing chores." I, of course, told him that I couldn't stand the country or the hard work. Why, would you believe me, a fellow has to get up long before daylight to milk the cows! What I wanted, of course, was a good position in the town. I had heard, you know, that lots of fellows not much older than I were getting £20 and even £50 per month for managing businesses. Old Johnson replied they had worked their way up by degrees, and that their present positions were due to their own energy and fitness. He didn't seem to grasp the fact that I had been to Cambridge, whereas these chaps over here—well, you couldn't expect them, living all their lives in a new place like Canada, to know very much. Anyhow, I soon came to the conclusion that old Johnson was a thick-head who couldn't understand what I had come to Canada for. Would to heaven I hadn't! What do you think one man said to me—he was superintendent of a big works here in Toronto, to whom I applied for something to do when my money gave out. He said he didn't approve of Englishmen for jobs in his department, as so often they were no good! That's pretty saucy for a blamed colonial, eh? And then, when he did finally engage me on trial, he said the first time he heard of me making a fool of myself through beer, he would discharge me. How's that for cheek?—but I know who put him up to that idea. It was——where I worked two or three days last month. I must close now, in the hope that some kind friend will send me enough for my passage-money home. Canada is no good, and you can warn any fellows who talk of coming not to believe a word they hear about it. That's a straight tip from

Yours truly,
THEODORE MASON.

P.S.—I heard the other day that Jack Winter was working even harder than he would have to in England, but then Jack always was a bit of a fool.

Letter From Jack Winter.

Winnipeg, Dec. 12th, 1905.

Dear———

There's so much to do that I am afraid I have not time to write you much of a letter. But Canada is a great country. All you have to do is to take the work that's offered—and generally you can pick and choose. I could have found something in Montreal or Toronto if I had waited around a little, but thought the best thing for me to do was to take the first thing. This happened to be on a farm in Manitoba, for which Johnson recommended me—you remember old Johnson?—a splendid old fellow, who has worked his way up from nothing to a half million in the last twenty years—well, this farmer offered me $15 and board for the first month just to see what I could do. Since then I have been on six months' contract at $25, and have learned quite a bit of the way they farm. The old boy wanted me to stay on for another year, and I was tempted to do so, for this country is *wonderful* for farming. But I came to the conclusion that I could make more during the winter in the city. In fact, I had a good offer. What I want to do is to save enough by working either in the city or on a farm to buy land for myself. And there's not the slightest trouble about it. Dozens have already done it, but of course they have had to work hard. That's the quickest way out of it, however, so far as concerns

Yours,
JACK WINTER.

WANDERINGS IN LONDON.

The irregularities of the streets of London trouble strangers. And although the people whom you ask to direct you are always civil you do not find them always intelligible. This may be because you are not used to their jargon. "Top o' the street," they will call the end of a regular letter—S of a narrow passage. "Go right to the bottom and through the court, and then turn right," they will say, expecting you to know which is up and which down, and what court to enter. One day I was looking for a former Toronto friend who was at No. 2 Copthall Avenue, and from the bus driver I got an inkling it was near the Bank. At the corner of Bartholomew Lane, the bobby said: "Yes, Sir, down to the bottom—turn the right, then the left." (His predecessor had said: "Go round by the Bank, then turn right—near Throgmorton Street."). Off Throgmorton Street I turned into Angel Court, well-known to fame, and went "straight along" to the end of a passage, sometimes six feet wide, sometimes as wide as Leader Lane in Toronto full of arches and recesses, in which were hidden (as it were) important firms by the score. This admitted me to Copthall Court, following which I made a right-angled turn to get to Copthall Avenue. But no, I was off the scent. Enquiring again I learned that back I must go and pass Great Swan Alley and other places whose names are familiar to brokers—plenty of whom, or their clerks, were to be seen engaged in kerbstone business or conversation, many of them without their hats, which is a common thing, we were told, in the hot weather. Finally, with much wonderment and doubting and after more enquiries and more turnings, I found my friend, who straightway took me to a respectable and dingy hole-in-the-wall, sacred to brokers, and gave me a delicious lunch. I came to the conclusion that Tom Hood's "Straight down the crooked street and all round the square" was no joke, but a rhyming statement of an actual and very puzzling fact to one who would thread the streets of 'The City" when on a visit to London.

How to Cash a Draft.

Having a letter of credit on Lloyds' Bank, Limited, I found the headquarters of that venerable and much respected institution in the district of the city whose centre is The Bank of England. But not without numerous enquiries did I find it; for the bump of locality possessed by an American or African pioneer would be required to trace out, in the labyrinth of streets, courts, lanes, and "places" in that maze of passages to find any one office from the original directions of Robert, the policeman. Once inside the bank building on Lombard Street I walked decorously through the ground floor offices, remarking the old-fashioned counters, and boxes, or whatever they are called, wondering where I was to present my modest letter. At the end was a door-way leading into a hall which ran transversely to another street. Beyond this door-way was a stone staircase, down which was coming a man who, with allowances for change in the fashion of garments, might have been Jasper Lorry, of Tellson's Bank, in the Tale of Two Cities. He was carefully dressed, precise in his movements, and bore himself with an air of respectability and quiet confidence. Observing that he was eyeing me, I asked him to say where I should apply to get some money by means of my letter, which was from a bank in Toronto.

"Take the lift, Sir, to the next floor, the foreign department."

And I took the lift, which pursued the slow and even tenor of its way under the guidance of a man who looked to possess the dignified repose which pervaded the whole establishment.

"Foreign depawtment, Sir, yessir, straight through—end of the room," said the lift man.

Arriving at a chamber upstairs, separated by a partition, I approached a smiling personage and produced from an inner pocket my deep yellow-colored missive, seeing which in my hand the polite clerk instantly said, anticipating my request, "Ah, the—— Bank, of Canada." Taking the paper from me, and noticing my name, he went on: "Yes, Mr. H—— we have had advice of your coming. How much do you wish to draw?"

Calling a subordinate, and instructing him, the clerk caused me to be presently handed a cheque for the sum requested. As I was about to take it, the still courteous official said: "I must trouble you for a penny." Luckily I had the coin, and he explained that it was for the stamp—for I was to contribute to the revenues of the United Kingdom, which the receipts, drafts and bills of exchange tax augments by something like a million sterling a year, in addition to the imposts upon deeds, legacy duty, succession duty, license and other stamps that help to make up the heavy revenue of John Bull.

How to Handle Gold.

"I shall have to ask you to sign this document, Sir—— Yes; thanks; very good," and I found myself in possession of a cheque. To get this cheque cashed I had to go to another part of the building, up a stairway and through a door, civilly directed at every point where in doubt. In this final subdivision of the disbursing mechanism of the office there were, at a brown mahogany counter, three men in a row, each with a pair of brass scales and a scoop before him. I mean no disrespect to the financial machinery of the United Kingdom when I use the word "scoop," for really the implement looked like the tin thing grocers use for dipping up flour or sugar. If there is a proper term to apply to the utensil I would use it if I knew. Meanwhile let me say that the handsome official who took my cheque used his scoop and scales with a dignity that made those polished brass fittings quite harmonize with his gentlemanly position.

"How will you have it?" said he, mechanically, looking at my cheque, and the answer was, half paper, half gold. The teller plunged his scoop into a pile of gold and weighed out so much of the sovereigns into the scale, and shoved them over to me, together with some £5 bank notes, carrying on, all the while, a brisk conversation with his neighbor about, if I remember rightly, a coming event at Ascot. His manner changed, however, to one of actual interest in modest me when I took out my note-book and made a minute of the numbers of the notes.

"Ah," was his remark, "you are very wise to do that, I wish more people would follow your example."

And nodding he bade me good-day! The courteous impulse, the civil word, from this cog in the pin wheel of the financial engine—as, I think, Walter Bagehot has described such a man, he was a handsome cog, as I have said—made me feel less lonely in this Lombard Street, Threadneedle Street, Grace Church Street maze. And I confess to some such emotion as the puir auld decrepit body up on Dee side who, peering out of her cottage window as Queen Victoria drove by, was recognized by a nod of Her Majesty's head. How much more benign seemed the world, how much less hard her lot, from that moment. "She noddit tae me," cried the delighted old crone, proudly describing the homely incident to a neighbor, and the story has been commemorated fitly in a Scots poem.

A Message from Home.

Wandering along the Strand in a sort of daze, trying to recall the many places in old buildings or on side streets that you had read of and resolved to see, and now when you were close to them, could not recollect. Drifting along on top of a bus, at the leisurely pace prescribed by the dense traffic of that thoroughfare, half recognizing land-marks that every man who calls himself an Englishman ought to know, but often cannot name. Hurrying in a hansom to keep an appointment in the city, but forgetfully stopping the cab here and there to ask what church this is and what quaint building that is, the unaccustomed visitor to London is bound to get "mixed" and probably miss his dates.

Going one day by bus from Trafalgar Square to the Bank I remember passing St. Clement Dane's church, for the name of which I was indebted to the bus driver, whose ear was secured by a sixpenny tip. Along side it, to the left, rose the impressive range of grey stone buildings, the law courts. Next, further towards the city, the church of St.

Dunstan's in the west, at which point you can see the dome of St. Paul's rising before you in its grandeur. Presently, in Fleet Street one began to see the names of the great daily newspapers of the city, the Provinces and Scotland, on buildings which were occasionally stately and modern, but oftener old and quaint. "The Scotsman," the "Yorkshire Post," the "Manchester Guardian," the Liverpool "Courier," and a dozen more. The offices of the "Graphic" and the "Illustrated News" we had already passed, but what dozens of periodicals of all kinds now threw out their signs: organs of all sorts of interests, by the score, not so flaring as in American great cities, but sufficiently distinct. Among them it was home-like to see the domicile of the Toronto "Globe" and to recognize in white letters on a third story window: "The Maclean Newspapers, Canada."

J. H.

* * *

VARIOUS BITS OF CORRESPONDENCE.

A Canadian who has gone from Montreal to one of the Carolinas to live favors the editor with some glimpses of conditions in that part of the Southern United States which strike people from Canada as unnatural and menacing to peace or comfort: "The more I see of the South the better I will like home, the people here imagine they live in a free country, but they are mistaken. We have more freedom and justice in our lumber camps of Canada than in any part of the States, particularly the Southern States. The rule here is that the man who shoots first is right; the other fellow gets a funeral. Everyone carries 'shooting irons' and uses them for the most trivial matters. The elections down here have given the people an impression that honest Government is at hand, but I think all they will have is the impression; many people high in financial matters have told me the South is about to become prosperous at the expense of the North when things are not what they seem."

When the Editor was coming over from the Old Country in August on the "Tunisian," two or three among the passengers attracted him in particular. One was a clever Irish barrister, with a winning way; another a Scottish engineer with great good sense but without warmth; another an Englishman, who in addition to abundant information proved to have amenity and fervor. At Quebec it fell to the happy lot of the Editor to be of some service to the last-mentioned gentleman, who wrote as follows in November from Nottingham, in which city he is a manufacturer:

"That Western country of yours I was loth to leave. Crossing the Great Lakes was a great treat, the prairie land of Manitoba a surprise, but the gorgeous scenery afforded by Banff, Laggan, Field, Glacier, and the railway line is too big, too beautiful for a poor business man to put into words. The future of the vast continent is in the hands of the 'people.' I believe that riches vast are there for the getting and everything that can give human nature its highest state in beauty and loveliness and that the future if wisely directed will make Canada a more important state than the great United States of America. It is only the weakness of our proud nature which can retard and there are no signs at present. What grand courtesy I met with from Quebec to Victoria will ever live with me; all I had to do with were kindness itself."

Mr. Lindley Jones, the editor of the "Mercantile Guardian," of London, gets hold of some spicy letters now and then. Here is one which he prints on 21st November.

"Noting that I occasionally publish amusing commercial letters in these columns a Glasgow subscriber has been kind enough to send me the following, which was sent to a friend of his in South Africa by the writer, who was anxious to obtain a vacant situation. The letter speaks for itself.

I humbly beg your honor to read this petition up to the end.

Respectfully sheweth,

With due respect and profound submission that your honor will favor me and take me into your saintly service, that I may have some kind of situation under your personal supervision for the support of my soul and my poor family.

Wherefore I falls on your honor's family's bended knee, and implores to you of this merciful consideration to a miserable damnable like your honor's unfortunate petitioner.

That your honor's damnable was officiating in several capacities during past generations as a Copying Clerk under Executive Engineer's office of Ceylon Government Railway, Ceylon, Colombo.

That your honor's petitioner, not drunkard, nor theif, nor swindeller, nor any of these kind, but was always pious and affectionate to my numerous family, that your honor's servant humbly beg of you to render me any kind of situation, or as Night Guard, or Messenger.

Therefore, your honor, will give to me some situation under your department, for which act of kindness your noble honor's poor servant will, as in duty bound, ever pray for your honor's longevety.

I am your, obedient servant,

NATIVE OF CEYLON.

"BLOOM."

Dr. W. H. Drummond, the well-known author, has been visiting Cobalt, and it has inspired him to write the following lines, under the above title, which the "Canadian Mining Review" prints:

A Song of Cobalt.

O! the blooming cheek of beauty, tho' it's full of many a peril,
Where's the miner doesn't love it, for he thinks he knows the girl,
While the bloomer, O! the bloomer! of emancipated She,
May it bloom and promptly wither every seventh century.

O! the early bloom of blossom on the apple tree in June,
Is there mortal having seen it, can forget the picture soon?
And the wine of red October where Falernian juices flow,
I have sipped the blooming beaker (in the ages long ago!)

O! the bloom along the hill-side shining bright among the trees,
When the banners of the Autumn are flung out to every breeze,
How it blazes—how it sparkles, and then shivers at a breath,
What is it when all is spoken but the awful bloom of Death?

O! I've watched the roses' petals, and beheld the summer sun
Dipping down behind Olympus when the great day's work was done,
But to-day I'm weary, weary, and the bloom I long to see
Is the bloom upon the Cobalt—that's the only bloom for me!

W. H. D.

Kerr Lake, Cobalt.

* * *

—Nova Scotia gold mining propositions, while often very promising, have sometimes proved disappointing, although some people believe the cause has been poor management, rather than anything really pertaining to the mines themselves. One of these persons is Mr. J. Owen James, an English mining engineer, who has been on an extended trip of investigation through that comparatively unexplored rich part of the Dominion. Mr. James has assured himself that, by "bunching" several of the gold-bearing areas and offering the proposition as one of low-grade, he can induce moneyed men in the Old Country to go into the enterprise of mining in Nova Scotia with a vim and with plenty of capital. He is a believer in deep working, which he claims to be practically untried in the Maritime provinces. He has also one or two iron and coal properties in view.

Mercantile Summary

The Natural Gas Company, of Calgary, have gained control of a large block of land near that city. Operations are likely to be started in the near future.

The McGill Chair Company, Limited, of Cornwall, has received an Ontario charter. Its capital is placed at $100,000. Thos. McGill and Peter E. Campbell, of Cornwall, are among the members. It will manufacture chairs and other furniture, also acquire any other business similar to its own.

The Department of Trade and Commerce has been notified by the Elder-Dempster Company that the steamer "Angola," of the Canada-Mexico service, has been lost outside Havana harbor, bound south. The steamer "Canada Cape," of the Elder-Dempster line, now at Trinidad, is going to call at the Mexican ports, and will make the northern trip in place of the "Angola."

Several companies which are interested in water power from the Chaudiere are applying for permission to let water into the new slides channel. This is a serious matter for the city of Ottawa. The city engineer last July drew the attention of the council to the fact that if the water were allowed to enter the channel the head of water available for the city water works would be prejudicially affected, as the water will be drawn so low that insufficient power would be available to operate the system.

The Rand Drill Company and the Ingersoll Sergeant Drill Company, of New York, who together operate a factory in Sherbrooke, Que., under the name of the Canadian Rand Drill Company, have decided, owing to the greatly increased call for their specialties in compressed air machinery, etc., as well as structural steel work, to build a new foundry and to make other extensive additions to their works. Mr. Geo. Doubleday, of New York, is president of the company, and Mr. E. W. Gilman, of Montreal, vice-president and general manager.

An attractive Christmas number for 1905 has been issued by the "Farmers' Advocate and Home Magazine," of London, Ont. Aside from its pictorial attractions it contains articles by C. W. Young, British Columbia; G. H. Parsons, England; Rev. Father Burke, president of P.E.I. Fruit-Growers' Association; Hon. John Dryden; Mr. Linus Woolverton; Thomas Southworth, Director of Colonization for Ontario, upon such subjects as "The Live Stock Industry," "The Niagara Fruit Industry," "Dairying and Horse Breeding," "Northern Ontario Suited for Successful Agriculture." Our contemporary is to be congratulated on its new building in Winnipeg, a picture of which appears on the front cover of the Christmas issue.

26 KING ST. EAST TORONTO.

Mercantile Summary.

The Dyment Hotel at Dyment, Northern Ontario, was on the 18th inst. destroyed by fire at a loss of $4,000, insured for about half that amount.

The Canadian Pacific Pulp and Paper Company are busy making preparations for the erection of a large pulp and paper mill at Swanson Bay, British Columbia. The sulphide mill is to have a capacity of twenty-five tons per day, besides which there will be a sawmill, etc.

Th organization of the National Drug and Chemical Company, which is the name under which the merger of drug companies is being formed, was completed in Montreal last week. Mr. D. W. Bole, M.P., is president; Mr. James Mattison, London, secretary; Mr. J. W. Knox, Montreal, vice-president; Mr. C. W. Tinling, Hamilton, treasurer. The combine comprises sixteen firms in Vancouver, Victoria, Montreal, St. John, Halifax, Kingston, Toronto, Hamilton, London and Winnipeg. The capital authorized is $6,000,000.

Among the things to be found in "The Canadian Almanac," which cannot be so readily found anywhere else, are the Canadian tariff of Customs; a list of the foreign consuls in Canada—and no one who has not looked them up has any notion what a large number of United States consuls there are; points and inspectors of the North-West Mounted Police; list of municipalities and registrars in Manitoba; of officials in the new Provinces; county officers in Quebec; synopsis of fishery laws, the game laws, the law of intestacy, description of the Royal Society of Canada, of the Law Society of Ontario, and of many societies and associations all over the Dominion. It contains 450 pages, and its price is only 40 cents.

The Canadian General Service and Colonization Company, of Montreal, to which we referred in a recent issue, has elected the following officers: Sir Adolphe P. Caron, Messrs. William J. Poupore, Camille Piche, M.P.; Dr. Louis J. Lemieux, M.L.A.; Lothar Reinhardt, P. Poulin and Charles J. Stilwell. At a subsequent meeting Mr. William J. Poupore was elected president, Mr. Camille Piche vice-president, Mr. Pierre Poulin secretary-treasurer, and M. C. J. Stilwell general manager. The company was formed for the purpose not only of assisting in bringing in a desirable class of settlers, investors and visitors into Canada, and in promoting trade and commerce with the Dominion, but of establishing a permanent exhibition hall and commercial museum in the city of New York, where an attractive display of Canadian products and manufactures will be maintained. The company will also publish a weekly periodical dealing with Canadian commercial affairs and noting all events that will mark the progress and prosperity of the Dominion.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Toronto Electric Lighting Company have again been awarded the contract for civic lighting in Toronto for three years, the price being $63.34 per light per annum.

Abraham Webber, of Halifax, N.S., who has been doing business for the past year or two as the Halifax Cloak and Skirt Co., has assigned, and is reported as offering 25 cents on liabilities of $10,500. He was originally a pedlar, and later of the firm of Carney & Webber, clothing, etc., St. John, N.B., who failed in 1898.

Articles of agreement between the Canada and Michigan Bridge and Tunnel Company and the Michigan and Canada Bridge and Tunnel Company, providing for their consolidation under the name of the Detroit River Tunnel Company, have been filed with the Secretary of State for Michigan. Work upon the actual construction of the tunnel has been under way on the Windsor side of the river for the past three weeks.

We observe the announcement of Mr. Walter S. Andrews, F.C.A., that he has resigned the position of comptroller for the Canadian General Electric Company to engage in the practice of his profession as a public chartered accountant, under the firm name of W. S. Andrews & Co., after 1st January, 1906, at 23 Jordan St., Toronto. Mr. Andrews has resided a long time in Toronto, and has a good reputation as a competent and trustworthy man.

During the week there have been several fires of more or less importance throughout the Dominion. The Western Clothing Company's premises in Montreal were on Friday seriously damaged by fire, the total loss to them and some adjoining buildings being $15,000. On the same day one of the oldest and most fashionable churches in Halifax, St. Luke's Cathedral, was destroyed completely at a heavy loss. The organ alone was worth $10,000, and was insured for $6,000, the insurance on the building being $25,000. The indications are said to point to an incendiary origin for the fire. In Winnipeg the Stuart Machinery Company's shops were partially burned at a loss of $10,000. In another fire in Montreal the machinery shop of R. H. Buchanan and the printing establishment of W. Heaton & Sons suffered a total damage of $5,000, and Hugh Allan's cold storage plant was injured to the amount of about $4,000.

MONTREAL

Mercantile Summary.

The failure is reported of Schaffer Bros., dealing in clothing and dry goods at Campbellton, N.B. They recently made an offer of 30 cents on the dollar, which apparently was not favorably entertained, and they have assigned to the sheriff. They are said to owe $18,600, largely to Montreal houses.

A voluntary assignment has been made by V. Berthiaume & Co., dry goods retailers in Montreal, the firm being composed of V. Berthiaume as general partner, and P. Vanier as special partner to the amount of $1,000. They owe about $5,000.—Gervais & Maille, small retailers in the same line in Montreal, have assigned, owing about $1,500.

A fire which broke out in Loewen and Rempel's store in Rosthern, Sask., on Monday night last, spread to the Klondyke Hotel, B. W. Wright's jewelry store, the International Harvesting Co.'s office, and A. D. McIntyre's store. The total loss is figured at nearly $18,000. On the same day the large warehouse of the Port Huron Threshing Machinery Company, in Elmwood, Man., was destroyed at an approximate loss of $40,000, of which $31,000 is covered by insurance.

Recent country failures in the Province of Quebec are noted as follows: Mitchell & Son, quite a prominent carriage-making concern of Lachute, who have been sued quite frequently during the past summer, have finally assigned.—O. Desjardins, trading as a general storekeeper in a small way at Otter Lake, in Pontiac county, is reported to have compromised liabilities of about $2,000 at 35 cents on the dollar, getting the assistance of a relative to do so.—J. A. Leclerc, a tinsmith, of Shawinigan, is reported as trying to compromise his small liabilities, and J. A. Carignan, who opened in a small grocery way at Shawinigan Falls in 1902, has assigned.—Thomas Roberts, doing business under the style of the Imperial Furniture Co. at Hull, would like his creditors to accept 50 per cent. on their claims, which aggregate about $3,200.—An offer of 35 cents on the dollar is made by P. Cote, a harness-maker, of Thetford Mines. He has been reported slow pay for some time, giving no attention to drafts, and his visible assets are very light.—Last spring Joseph Sauviat opened in a small grocery and provision way at L'Islet, having previously been clerk for a local merchant. Already his venture has proved unsuccessful, and he has assigned.—A year ago Florida Jean started in a small general store way at St. Moise, in Rimouski county, coming from St. Damase, a few miles away, where he had previously done a small confectionery business. He has now assigned, and shows assets of $1,450 to pay liabilities of $2,394.—Emile Carpentier, a tinsmith, of St. Felix de Valois, who has been undergoing some recent pressure from creditors, has put his estate into the hands of an assignee. He is said to owe about $2,000.

TREATMENT OF COBALT ORES.

A rumor is given currency by the Globe to the effect that a financially strong syndicate has secured the rights to a German patent for the treatment of such ores as those of Cobalt; and, acting in conjunction with the Royal Prussian Geological Institute of Berlin, will erect refining works in that district at an early date. In the past the trouble has been with the Cobalt ores that there has been no process on this side of the Atlantic by which they could be refined. Indeed it is stated that the refiners at Newark, N.J., who have been purchasing Cobalt ores, have fully two million dol-

are as necessary in business as fire insurance.

The smooth operation of a business system is liable to many interruptions, and recent reports would indicate that fire is not the only element which encroaches stealthily and makes devastating sweeps.

Every employer should protect his own interests under the form of insurance a guarantee bond affords.

Every employee in a trusted position should extend to his employer the protection and security a guarantee bond insures.

In this matter write or consult with the institution most widely and favorably identified with this class of business.

lars' worth on their hands which they are unable to treat. According to good authority the best treatment that can be secured in Canada at present brings the value of ore down to about $300 a ton. As a consequence only the highest grade ore has been shipped, the miners preferring to throw the lower grade ore on the dump for future treatment. The ores shipped out during the first three months of 1905 realized on the average $829 a ton, and for the second three months $734. A Canadian smelter, it is pointed out, will not only increase the value of the output, but tend to prevent any sharp fluctuations.

WOOL AND COTTON.

The prospects for the home trade, says a report from Manchester to the Drapers' Record, continue generally satisfactory, and the outlook for the spring is decidedly encouraging. The tone in nearly all directions seems to be much better than a few months ago, and there is every reason to expect an improvement during next year. For some weeks now the demand for velveteens has been on the increase, and this department in the home trade houses is experiencing a most active time. It is reported that corded descriptions have been very fashionable in London and Paris, and this is now being felt throughout the provinces and the North of England. The demand has almost amounted to a boom, and makers of fustians and similar cloths in the Oldham district are exceedingly busy, turning out goods as fast as possible. Quilts and covers are selling fairly well, and all kinds of mercerized cloths, such as lawns and voiles, are in very good request, and the prospects for next year are very promising. Of course, the raw cotton situation makes it difficult for buyers to purchase to their advantage, but the outlook is so healthy that goods have to be obtained even at higher rates. Very little is being done at the present time in cloth for export. The outlook for most of our markets abroad is fairly encouraging, but the higher prices now being asked appear to restrict business to small limits.

The satisfactory tone of the linen market in Belfast has been fully sustained during the week. Demand in all sections has been good, and values, though unusually high, are still tending upwards. The deplorable state of affairs in Russia and the uncertainty regarding the future have made continental spinners rather uneasy, and their eagerness to buy has advanced the prices of flax still further. Export business keeps well up, and there is not the falling off that is generally experienced at this season of the year. Demand from the United States, though easier, is substantial, and the South American markets are buying steadily. Canadian trade is improving, and there is a stronger inquiry from Australasia. The European markets are doing a steady business.

After a careful examination of the wool position in Yorkshire before the opening of the present series of colonial wool sales in London the forecast of the course of values then given was to the effect that, although there might be some slight weakness shown in the prices of both merino and coarse crossbred wools at the opening of the sales, values would show a distinct recovery before the end. To sum up the whole situation briefly, this is actually what has happened, for although slight concessions could be obtained here in the quotations for combed wool tops of both merino and crossbred colonial wools before the sales opened, holders of stocks have now raised their prices until these are to-day practically the same as they were at the conclusion of the very excited sale at the end of September. As the new coarse-fibred crossbred Australian wool has hardly begun to arrive yet, it is, of course, impossible to tell what effect on the market the arrival of the new clip may have on values; but it is a significant fact that woolcombers here, who a fortnight ago were offering wool for March delivery at a reduction on to-day's rates, have now withdrawn all these lower quotations for future delivery, and the opinion is certainly growing that there will be little decline in the price of the coarser kinds of crossbred wools for some months to come. These high prices are seriously hampering the manufacturers of Bradford dress fabrics, as it is from these wools that all the cheap wool dress serges and similar fabrics are made. The abnormally high prices of these wools have carried the prices of the above classes of dress goods quite beyond the reach of the bulk of working-class consumers.

FOR SALE.

The Retail Business of T. Long & Bro., Limited, Collingwood, consisting of dry goods, millinery, carpets, clothing, gents' furnishings, shoes and groceries, as we are going into wholesale business exclusively.

This is one of the oldest and most successful businesses in the Dominion of Canada, and has a very large connection in town and surrounding country. The stock is all new and seasonable, none of it being over a year in our possession, and the stock at present is not heavy. The town is progressive and we are enjoying an active business. The stores are new with latest fittings, and can be leased for a number of years. A grand opportunity to get into an old and well-established business. Can give possession in January.

Apply

T. Long & Bro., Limited,
Collingwood, Ont.

A material change in prices of raw silk has resulted from certain speculative happenings in the producing markets, and practically the whole situation is much firmer, says the "Dry Goods Economist." While there is no great appreciation in demand from manufacturers, both the buyer and seller are much more sanguine over the future than they have been for some time past. A good many more looms are in operation, and demand from consumers on certain classes of merchandise is on the increase. This is especially true of ribbons and narrow goods generally. Banking interests are responsible for a firmer feeling in Yokohama and Milan especially. The stock in Yokohama has been somewhat reduced, but still amounts to about 18,000 bales.

The situation in the hosiery market at Chemnitz has not changed very much during the past week. All manufacturers have a great many orders on their books, and a large number of duplicate orders which came in were refused by them on account of inability to get the goods made up in time. Prices are now higher than they were at the time the original orders were placed, and in most instances importers are not able to pay the difference and sell the goods at the former price.

The white goods situation this year in the United States, says an exchange, presents some very unusual features. For several years past converters have gone in very heavily on certain sorts of white goods, particularly India linons. To such an extent has this been the case that, while early in the season they were able to secure fair prices, later on they were compelled to make sacrifices in order to get rid of their stocks. They finally concluded that there was not much money to be made in India linons, and some who had been heavy operators in this field turned their efforts entirely into other directions, while others considerably cut down their output. This season has consequently found the supply of India linons very much shorter than usual.

TORONTO MARKETS.

Toronto, Dec. 21, 1905.

Chemicals, Drugs, Etc.—The market locally this week has been somewhat quiet, though representatives of the wholesale houses in rural districts continue to speak quite encouragingly of the prospects. Opium and quinine, as well as the other staples, are rather dull just now, though the latter has picked up a little.

Dry Goods.—The mild open weather is having a quietening effect on the movement in many lines of dry goods, the chief call for which comes generally at this season of the year. For example, heavy overcoatings, blankets, woolen and flannel underwear, etc., have distinctly dragged. On the other hand, there has been a good holiday demand for lighter goods and for all articles that can be made presents of. Handkerchiefs, umbrellas, neckties, fur goods, etc., have all been wanted in large numbers and, as has been the case during the last two or three years, people seem to want the best. Millinery also has been a strong feature. No doubt it will take but a very small amount of real wintry weather to give a strong impetus to the whole trade, for there is by no means any feeling of despondency.

Flour and Grain.—Prices for Manitoba flour keep steady, and a fair export business is passing. Ontario flour, however, is dull, and $3.10 for ninety per cent. patents is about the limit. The demand for bran and shorts is very pronounced, and there is a scarcity in shorts. The quotations for wheat, both Ontario and Manitoba, are a little easier. In fact all grains are rather on the dull side just now. Peas, however, are holding up well.

WANTED

An energetic, responsible young man desires to hear from reputable firms who require a representative in Toronto.

Address Box 13, Monetary Times.
Toronto, Ont.

Groceries.—With the exception of the 5c. advance in yellow sugars last week there has been little of special interest in the grocery trade lately. Of course there is a heavy demand for dried fruits, but this is only natural at this season of the year, and it does not appear to be extraordinary. In teas a fair trade is passing, especially Japans. The position of canned goods continues strong, with prices tending upward; but there is little of special interest.

Live Stock.—Good export cattle are wanted, and the prices for the same hold about up to the level of a week ago. Best fetch about $4.80 or $4.85, but there are not many worth that price. A slightly easier feeling is manifested in butchers' animals of all but the very best quality. Sheep and lambs are in fair demand. Milch cows of choice grade sell well.

Provisions.—The enquiry for smoked meats is about normal for this time of the year. Davies' products of choice quality sell readily, but some of the butter now coming in is hardly up to this standard. Cheese is firm.

Wool.—No business is passing, and quotations are merely nominal.

100% INCREASE IN FIVE YEARS.

The Great-West Life increased its net business in force from
$10,111,959 on January 1st, 1900
TO
$20,472,800 on December 31st, 1904.

This increase is the result of the low premiums charged, and high profits paid by the Company. Inquiries will have prompt attention.

MONTREAL MARKETS.

Montreal, 20th Dec., 1905.

Ashes.—Business in this line is practically dead just now, and there have been no offerings for a fortnight past. Quotations are more or less nominal at about $4.30 for first quality of pots, and $7 to $7.25 for pearls.

Cements and Firebricks.—Stocks of cements are now all in store, and winter quotations are firm at $1.90 to $2.10 for Belgian brands; English and Canadian, $2 to $2.20, but there is little present. Firebricks are in very fair request, and are held at $18 to $23 per thousand, as to quality.

Dairy Products.—A good, steady local demand is reported, fairly absorbing receipts, and there is a steady market at 23¼ to 23½c. for the choicer grades of butter; good to fine, 23 to 23¼c. The movement in cheese is seasonably quiet, but values are firm at 12⅝ to 12¾c. for fine Westerns, and 12¼ to 12½c. for fine Easterns.

Dry Goods.—The figuring up of results for the year is the present main occupation of most wholesale dry goods merchants and few buyers are to be seen among the warehouses just now. Complaints are heard of the slowness of deliveries from manufacturers here, as well as abroad.

Furs.—Fair receipts are now reported, principally composed of skunk, coon, mink and fox, and there appears to be a good deal of competition among buyers. We quote for prime skins: No. 1 large beaver, $6.00 to $7.00; medium ditto, $5.00 to $5.50; kilts, $2.00; black bear, $15.00 for large No. 1, $10.00 for medium, and $5.00 for small; badger, 40 to 60c.; fisher, $6.00 to $7.00 for fine dark; red fox. No. 1 Northern, $3.50; Eastern and Ontario No, 1, $3.00; No. 1 silver fox, $100 to $175.00; cross fox, $7.00 to $10.00 for dark; wolverine, $7.00 for No. 1 dark, other grades, $2.00 to $5.00; lynx, $6.00 to $7.00 for No. 1; Marten, Western and British Columbia No. 1, $6.00 to $7.00; Eastern ditto, $4.50 to $5.00; mink, $6.00 to $8.00 for large No. 1, and $4.00 to $5.00 for medium; winter rats, 15 to 18c. for large; other, No. 1 large dark Labrador, $30, and $15 for Western; coon, $1.75 to $2.50; skunk, $2.00 for No. 1 prime black, $1.50 for short stripe, other grades, 30 to 75c.

Groceries.—The recent slight advance in sugars has been steadily maintained, and the lowest quotation in yellows is $3.85. There is reported scarcity of these grades, and some large purchases of molasses have been made within the past week or so for refining purposes. Standard granulated in barrels is quoted at $4.30, and $4.25 in bags. Molasses in a jobbing way is quoted at 35c. for Barbados. There are reports of possible disruption of the rolled oats combination.

Leather.—Very fair enquiry is reported from Britain, and local boot and shoe manufacturers are buying moderately freely. Values continue very firm, notably in all kinds of black leathers. No. 2 manufacturers 'sole is quoted at 25c., and No. 2 jobbers' at 26c.; slaughter sole, 29c.; Western splits, 22 to 23c.; Quebec ditto, 19 to 20c.; buff and pebble, 13½ to 16½c.; glove grain, 12½ to 14½c.; Scotch grain, 33 to 37c.; harness, 32 to 33c.; russet, 40 to 45c.; black sheep skins, 8c.; colored ditto, 8½ to 8¾c.

Metals and Hardware.—Owing to the open weather building operations are being actively prosecuted, and in all sorts of builders' supplies there is a continued good demand, though other lines are now comparatively quiet. A fair amount of business is reported in pig iron, with strong quotations prevailing. No. 1 Summerlee is quoted up to $23.50 to $24; No. 1 Middlesboro, $21; Londonderry domestic, $21.50 to $22. Bars are firm at $1.95 to $1.97½; boiler plate, $2.20; iron pipe, $4.37 for inch. Lead keeps away up in price, $4.80 to $4.85 being quoted now in an ordinary way; sheet lead, $5 to $5.50; copper is again higher at 20¼ to 20½c.; spelter, 7¼c.; tin, 38c. Sheets of all kinds are firm at last quotations.

Oils and Paints.—Business is now of a very quiet holiday character. Turpentine remains at 93c. per gal., in single barrel lots; linseed oil, 47c. for raw, and 50c. for boiled. In fish oils there is really no movement; castor, 7 to 8c., as to lot. The tendency in ground white lead is towards advance, $5.75 now generally the price; putty, $1.40 in bulk.

* * *

A 400 horse-power compressor plant is being installed at the Atikokan iron mines, near Port Arthur, Ont., by the Canadian Rand Drill Co., of Sherbrooke.

Mercantile Summary.

These are great days for railway enterprise. We hear that Owen Sound citizens are approaching the Dominion Government for aid in building a railway connecting that place with Meaford.

At a meeting of the council of the township of Stanstead, Que., arrangements were made for the care of roads during the winter under the money-tax, roller-worked system, which was found satisfactory last year.

Our attention is called to the fact that on page 743 of last issue we referred to the Soughees Indian Reserve, of which the C.P.R. are anxious to secure a part for terminal purposes, as being in the heart of the city of Vancouver, whereas we should, of course, have stated that it was adjacent to Victoria.

Mr. E. Copps, of Detroit, and several English and American capitalists propose to build a railway from the north shore of Lake Superior to some point beyond the height of land. They wish to obtain from the Government concessions regarding pulp-wood, so as also to erect pulp mills and carry on other industries.

Two thousand pounds of dynamite exploded without warning at the Centre Star mine, Rossland, B.C., on the 17th inst., killed one man and so damaged neighboring mines that it is thought necessary to close down for some days. The loss is estimated at $40,000. Every pane of plate glass in Rossland is said to have been broken by the explosion.

This year the Kingston council announces a surplus of $4,604 in the operation of its municipally-owned water system, the largest in its history. The revenue was $35,684.65, and expenses $13,471.55; debentures paid from revenue, $17,608.50. This year the revenue increased $600, and the consumers in number by 60. The debenture debt is $237,750.

Dr. Haanel, Superintendent of Mines at Ottawa, has just received a specimen of the first pig iron turned out at the Government experimental electric smelter at Sault Ste. Marie. It is stated to be of very superior quality. Operations have been suspended to permit of the instruments for measuring the electric current being adjusted. The object of the experiments is to determine whether the electric process is applicable to the economical smelting of Canadian hematite ores.

A week ago the annual meeting of the Montreal Wholesale Dry Goods Association was held, when the president submitted his report of the business transacted during the year, showing that the year had been a very active one, and that much work had been done for the benefit of the trade. The treasurer, Mr. Robert Henderson, submitted his statement, which was satisfactory. The officers elected for the ensuing year are: President, Wm. Agnew; vice-president, R. A. Brock; treasurer, Robert

COMMERCIAL EDUCATION.

Mr. C. E. Town, president of the Education Department of the London Chamber of Commerce, recently delivered an address on the subject of the practical aspects of education, which will bear repetition, and we take a few excerpts from it, therefore, as reported in "Commercial Intelligence":

Commercial education in the United States has been carried on, through its business training colleges, for a very much longer period than in this country, one school in Cincinnati dating back to 1834, and now, at the present day, while in this country there are not more than a dozen business colleges of any status, there are in New York State alone 500 organized business colleges, and in every other city and State throughout America similar institutions. Most of these colleges make a great feature of practical work, and part of their buildings are fitted up as model business houses.

The progress of commercial education in the German Empire is very marked. In the past twelve years the number of commercial schools of all descriptions has increased from 125 with 12,000 pupils to 429 with 48,000 students. The increase in the number and attendance at the commercial schools for women is still more pronounced. In 1892 there existed but three schools with 325 pupils but in 1904 these had increased to 79 schools with 5,000 pupils. On a perusal of the curricula of these schools it is truly remarkable how all the branches of knowledge are condensed and focussed upon the one central and prevailing purpose of commercial utility, and the special attention devoted to foreign languages, particularly to English.

The little kingdom of Saxony stands in the front rank of nations, as far as commercial education is concerned. With a population less than London, we find fifty-one finely-organized schools. In these more is done for the encouragement of Oriental languages than is done in the whole of the United Kingdom, although, as all will admit, our responsibilities in the East are much greater.

In Switzerland, commercial education has very rapidly developed during the past ten years. This advancement, Mr. Town reminded the members of the Ashford Chamber of Commerce, has been mainly due to the activity of the Merchants' Unions of that country. The first commercial school in Switzerland was established at Zurich in 1855. In 1900, seven commercial schools were established, and now similar schools are being established in all the cities of importance throughout that country.

The same activity with regard to commercial education is being carried on in the Netherlands, Austria-Hungary, Belgium, Norway, Sweden, and France. As an illustration of the practical application and character of the commercial education given in Belgium, Mr. Town referred to the practice of the Institute of Commerce at Antwerp, from which students who have passed their final examinations with credit may offer themselves as candidates for a stipend, which permits them to remain for three years in some foreign country for the purpose of studying economic conditions, and acquiring a practical knowledge of business methods and of the language. The Belgian Government requires such students to report from time to time the results of their observations. Over 100 students, at a stipend of $1,000 a year, have gone out in this way in the interests of Belgian commerce to Brazil, China, Japan, Mexico, Philippine Islands, Australia, New Zealand, India, United States, and Canada. Some of these have made permanent homes in the countries to which they went, some have become merchants, others commercial agents, whilst others have entered the service of the Japanese and Chinese Governments as educators. To Belgium, however, they remain the pioneers of her commerce, and the money thus spent on their commercial training draws ample interest in the far-reaching results, whilst the wisdom of such a policy is self-evident.

In Paris there are three of the finest Continental Schools of Commerce. One is a preparatory school for boys up to 15 years and the others are higher schools for boys up to 16 or 18.

* * *

ITEMS FROM B.C. MINES.

According to the "Kootenaian," published at Kaslo, B.C., Mr. S. S. Fowler, of Nelson, was in that city last week on his way to the Whitewater mine. The same paper adds that work has commenced on the lease of the Whitewater and Whitewater Deep mines, which has been taken for two years by S. S. Fowler and W. E. Koch, of Nelson and John L. Retallack, of Kaslo. "The lowest level of the Whitewater is to be driven ahead, and a contract will shortly be let to drive the main tunnel of the 'Deep' mine. There are two or three sets of sub-leasers in the old workings, and the outlook for continued and profitable working of this old producer is very favorable."

There are sixty tons of zinc ore and thirty tons of lead ore ready for shipment at the Goodenough. The new exploratory tunnel to tap the ore at depth is in 170 feet, and is being run through the Grey Copper to reach the main ore body under the Goodenough.

Bert Wright (Whitewater Camp) has just completed a shipment of twenty-three tons of zinc ore to the Frank smelter from the Charleston and Sunset. Fifteen and a half tons were taken from the Charleston and seven and a half tons from the Sunset.

Eric Johnson has struck a fine showing of high-grade silver ore on his property on the South Fork, the Jessie and Bluebird, near the head of Woodberry Creek. Assays from the strike average 250 ounces silver. Mr. Johnson is delighted with his find, and will work the property all winter.

Among Whitewater notes are these: J. W. Power has a team hauling 1,200 tons of zinc from the Jackson mine to the Whitewater station.—It is reported that Messrs. Power and Erickson, the owners of the Silver Glance, will close down the mine at Christmas.—Gus Adams has 300 sacks of high-grade silver ore from the Miner Boy lying at Bear Lake ready for shipment.

Over thirty men are working at the Cork mine, South Fork. The mill is running spasmodically at present owing to a shortage of water. A large turbine wheel has just been ordered to secure more driving power. There is enough feed stored in the bins to keep the mill running steadily, and by spring time the Cork should be a regular shipper.

YORK COUNTY LOAN COMPANY.

The conditional offer of the Dominion Loan Company to purchase the assets of the York County Loan Co. has been withdrawn. Therefore the real estate assets will have to be realized upon by other process. Affairs have moved rather quickly with this concern since we last wrote. On Saturday last an order of court was granted by Jus-

tice Teetzel for the liquidation of the company, and the National Trust Company was named as liquidator, with Mr. Home Smith in immediate charge. It is significant of what is deemed further necessary in behalf of the many thousand shareholders of the York County Loan Co. that the Ontario Government has appointed Mr. W. H. Cross to investigate the company's affairs. This step, while it can hardly be expected to satisfy the apprehensions of the shareholders, who have long wanted to know what they had to expect from the company which had been putting them off so long, will in a few weeks or months probably enable them to know definitely what assets exist and what their value is—information which they declare has been asked in vain for the past two or three years.

We understand that offices of the York Loan Co. in Sydney, Halifax, St. John, Montreal, Ottawa, Hamilton, London, Winnipeg, and Vancouver have been notified by wire of the liquidation, and instructed to announce through the press that shareholders pay no more money to agents. Besides this, agents are advised that their employment is ended, but they must remit balances in their hands, books, stock registers, etc.

What a memorable instance this company affords of the credulity of human nature, and still more of the disposition to risk one's savings in a novel or speculative venture which professes to yield eight per cent. where steady-going and respectable concerns offer only five or six. Long ago we pointed out the unsafe features of the York County Loan Co. and the dangerous notions of Mr. Joseph Phillips, whose picturesque examination is even now proceeding before Mr. McLean at Osgoode Hall. But he was able to get scores of glib talkers, male and female, to canvass servant girls and country bumpkins by the ten thousand, promising them the impossible. The thing as now exposed is a prodigious scandal, but it only exposes afresh how far the cupidity of fools will lead those who are fairly crazy for an extra one or two per cent.

* * *

—A school mistress in England received the following interesting letter from the mother of one of her pupils: "Dear Miss,—You write me about whipping my son. I hereby give you permission to beat him eenytime it is necessary to learn him lessens. He is juste like his father; you have to laern him with a club. Pound nolege into him—I want him to get it, and don't pay any attentshun to what his father says; I'll handle him."

* * *

—A clergyman was holding a children's service at a continental winter resort, says the London "Globe." During the lesson he had occasion to catechize his hearers on the parable of the "Unjust Steward." "What is a steward?" he asked. A little boy, who had arrived from England a few days before, held up his hand. "He is the man, sir," he replied, with a reminiscent look on his face, "who brings you a basin."

* * *

—It is a gratifying explanation which Mr. W. T. R. Preston gives concerning the supposed discrimination by the immigration branch of the Department of the Interior against British settlers. Agents in the Old Country are paid 7s. per head for immigrants of British origin, while those gaining new comers from continental Europe are paid $5. There cannot, says Mr. Preston, be any fair comparison between the work in Great Britain and the Continent, because in the former the Government can carry on a propaganda openly, and in the latter (except France and Belgium), the Government would neither be allowed to advertise nor distribute literature. On the Continent, therefore, the $5 (which is only paid on agriculturists and domestics) includes all the cost of a general propaganda. Taking the full immigration returns under the arrangement, the result works out that the British agriculturists cost the department about thirteen dollars per head, and the Continentals of the same class, less than five dollars per head.

* * *

Fire in the building occupied by the British American Import Company on St. Paul Street, Montreal, caused a loss estimated at $44,000. Gilmore, Nephew & Co.'s dry goods stock was also damaged considerably, the loss being figured at $15,000. The Salada Tea Company's premises adjoining were also injured.

Lowest Expense Ratio
The Government Blue Book, just published, shows that
The Mutual Life Assurance Co. OF CANADA.
had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

Accidents vs. Fires
It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.
A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.
The most liberal accident and sickness policies are issued by
The Employers' Liability Assurance Company,
Temple Building, - Toronto.

SUN LIFE ASSURANCE COMPANY OF CANADA

Head Office, MONTREAL.

The man who has ability as an assurance producer and will conduct his business on strictly honest and honorable lines has an excellent opportunity with this "Prosperous and Progressive" Company. Write the Superintendent of Agencies at Montreal.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY TH STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid in 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

JOHN MILNE, - Managing Director.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain additional security of $300,000 and what is of greater importance, are assured of careful and conservative management as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a voice in the management of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE
ROYAL-VICTORIA LIFE INS. CO.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

UNION MUTUAL Life Insurance Co. of Portland, Maine.

THE METAL MARKETS.

At the present moment, in the midst of the holiday season, a slight lull is discernible in the movement of metals. But this is not sufficient to impair the truthfulness of the statement that the market during the last month has been remarkably active: indeed, one of the busiest on record. Our Montreal correspondent speaks of the assertion of the head of a leading metal house in that city to the effect that this has been the busiest December he has known in fifty years. It has been distinguished, too, by the number of advances in price which have been made in some of the chief staples.

Copper has been rising steadily for the last two or three weeks, and is now at a figure higher than has prevailed since the boom days of Amalgamated in 1899. All branches of the copper trade have felt the influence of this strongly upward tendency. Rivets and burrs have been advanced sharply. Tin also has been advancing rapidly, so that the aggregate rise during the past three weeks has brought tin to a level higher, it is said, than at any time during the last twenty years. At the present time the situation is slightly easier. Lead, too, made the remarkable advance last week of 25 cents per 100 pounds.

In iron, while there have been no such phenomenal movements as in some of the other metals, the position has been sufficiently strong. Iron goods, of course, feel the effect, not only of the strength in raw materials, but of the active demand for building and general purposes. In wire nails a ten cent advance was registered two weeks ago, and the tendency is still upward. Cut nails are quiet. Galvanized iron remains much as before, but a shading up of prices is by no means improbable. Bolts and nuts, as is natural at this time of year, are hardly in such keen demand as a month ago, but no complaint is in order. Orders for other general lines are coming in satisfactorily.

As stated above, no complaint is heard among the metal merchants as to the state of things existing in their business. The demand has been exceedingly good at, generally speaking, high prices, and, so far as one can tell, there is no reason for a near discontinuance of these conditions. The smaller towns report equally promising conditions with those prevailing in Montreal, Toronto, and the larger centres. Payments are reported to be very good.

* * *

LOAN COMPANIES AND—"LOAN COMPANIES."

The comments made of late upon lending companies of all kinds as a result of the suspension of the York County Loan and Savings Company, of Toronto, compel us to think that a large section of the Canadian public and not a few of our newspapers need to be informed of the widely different nature and functions of Canadian loan companies. There are mortgage loan companies, whose charters impose restrictions intended to protect depositors, and whose obedience to the spirit and letter of the law make them pre-eminently safe to deposit in. There are others the nature of whose business should prevent their accepting deposits at all. And there are still others who will take anybody's money, and promise him or her to return it with big interest and a great, fat profit inside of six to ten years.

A number of responsible mortgage loan companies in Ontario, such as the London and Canadian and the Canada Landed and National, have refused, or ceased, to take deposits at all, and properly enough, for the acceptance of them implied the keeping on hand of a large sum in cash or quick assets, so as to be able to return the deposits if necessary. They preferred to issue debentures which had three to seven years to run. Others receive deposits at a slightly higher rate than is paid by banks, but to an extent strictly limited. This wholesome restriction has long prevailed—it had occupied the attention of banking committees of Parliament for years—that the amount of deposits taken should never exceed the amount of the company's paid-up capital as provided by the Dominion statute. What may be called old line legitimate mortgage loan companies are such as the Canada Permanent, the Huron and Erie, the Hamilton Provident. They borrow in Great Britain on debenture, as well as in Canada. They may accept deposits or they may refuse, but their strength and the extent of their experience renders them secure, to deposit in, if they will accept money on deposit. Of late years, too, the Government has authorized these companies to lend upon call on the listed stocks and bonds of banks and other corporations. This constitutes a second line of defence to a company or bank in the event of a run.

Then there are companies which buy and sell stocks, bonds, and debentures, etc., more largely than they lend on mortgage. A large part, probably the largest part, of their assets consists of securities such as those mentioned. They sometimes offer to depositors a larger rate of interest on money than the first-mentioned group of companies, justifying their doing so by the often considerable profit they are able to earn by the purchase and sale of portions of their assets. Among these are the Central Canada Loan and Savings Company, the Home Loan and Savings Company, which last is now, however, being converted into a regular bank.

Another group includes companies with considerable borrowing and lending powers. They take money on debenture as well as by way of deposit, with which money they buy large blocks of land in the suburbs of towns or cities and break it up into building lots for sale. Of such of these companies as borrow on debenture is the Land Security Company, of Toronto. It is possible for such companies in periods of prosperity or in "boom" times to make rapid profits. But it is equally possible, should a "boom" burst or a time of depression come, to find these concerns unable to pay their depositors without relying upon a bank discount—not always available if financial pressure exists.

Lastly, we have companies, too numerous unfortunately, which take money from thousands of people all over the Dominion on what are called instalment terminating shares, accumulating shares and so-called permanent shares. They have, or rather had at first before a statute forbade it, power to cancel shares and appropriate the money paid in, power to fine their members, to defer payments at their own sweet will. Of such are the York County Loan Company, whose pitfalls for the unwary and the greedy find illustration to-day. Its depositors may get 66 cents in the dollar, or they may get 40, but they are not likely to get 100.

* * *

FINANCIAL REVIEW.

We present below a condensation of the monthly statement of Canadian banks for November, 1905. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, and average holdings of specie, Dominion notes, etc.

Canadian Bank Statement.

LIABILITIES.	Oct. 1905.	Nov. 1905.
Capital authorized	$100,646,666	$102 646,666
Capital paid up	83,864,828	84,542,598
Reserve Funds	57,493,307	58,529,624
Notes in circulation	$76,890,863	$72,592,543
Dominion and Provincial Government deposits	8,854,210	10,274,546
Public deposits on demand in Canada	150,868,116	157,548,539
Public deposits after notice	349,822,859	354,393,953
Deposits outside of Canada	47,077,167	43,987,686
Bank loans or deposits from other banks secured	323,662	577,865
Due to other banks in Canada	5,933,696	6,413,169
Due to agencies or other banks in Great Britain	6,097,460	5,280,560
Due to other banks in foreign countries	1,824,646	2,159,488
Other Liabilities	10,953,077	11,099,904
Total Liabilities	$658,645,830	$664,328,327
ASSETS.		
Specie	$20,157,280	$20,701,503
Dominion Notes	39,254,738	39,712,009
Deposits to secure note circulation	3,841,520	3,875,499
Notes of and cheques on other banks	27,578,519	25,325,795
Loans to other banks, secured	374,900	573,784
Deposits with other Banks in Canada	8,431,852	7,977,408
Due from agencies or other banks in Great Britain	9,212,549	11,421,005
Due from Banks or agencies in foreign countries	19,849,856	15,886,242
Dominion and Provincial Government securities	8,356,672	8,957,075
Other securities	59,493,371	59,493,371
Call and short loans on bonds and stocks in Canada	48,164,851	48,792,009
Call and short loans elsewhere	62,280,939	59,508,234
	$306,997,047	$302,223,925
Current Loans in Canada	$450,413,017	$457,008,145
Current Loans elsewhere	29,125,309	32,080,027
Loans to Dominion and Provincial Governments	1,622,714	1,858,859
Overdue debts	1,836,042	1,696,723
Real estate	652,566	661,081
Mortgages on real estate sold	524,817	530,780
Bank premises	11,059,303	11,220,397
Other assets	9,569,048	9,836,267
Total assets	$811,800,039	$817,149,132
Average amount of specie held during the month	19,266,175	19,776,046
Average Dominion notes held during the month	38,468,630	37,533,332
Greatest amount notes in circulation during month	78,464,648	79,226,877
Loans to directors or their firms	8,665,792	8,594,105

An addition has this month been made to the list of banks reporting to the Government, the Northern Bank being the latest recruit. It shows capital subscribed $1,000,000, and paid up, $466,921; it has $47,000 of notes in circulation, and has obtained deposits of $79,000. It is understood that for the present the policy of this bank will be to confine its energies to Western Canada, and that it will in the near future open branches at Vancouver, Edmonton, Brandon, and other points in the West. With ordinary good luck and with careful, conservative management there is no reason why it should not succeed.

Except for the inclusion of the figures of the Northern Bank, capital subscribed and paid up shows little difference from last month, but, as several banks close their books for the year on 30th November, there has been an increase of something over $1,000,000 in the Rest. Of this the Canadian Bank of Commerce contributes $478,000, La Banque d'Hochelaga $250,000, the Bank of Toronto $123,000, and the Eastern Townships Bank $100,000. The total Rest now stands at $58,500,000, being 69 per cent. of the paid-up capital. At this time last year it was $53,400,000, or 67 per cent.

Notes in circulation have decreased during the month by $4,298,000, thus conforming to what may now be considered the invariable rule, that the point of greatest expansion in bank circulation is reached at the end of October or early in November, and that before the end of November a reduction begins. This is exemplified by the figures for the last five years:

	September.	October.	November.
1901	$56,027,000	$57,954,000	$57,741,000
1902	60,965,000	65,928,000	64,497,000
1903	63,741,000	70,480,000	67,425,000
1904	63,795,000	72,226,000	69,426,000
1905	69,831,000	76,890,000	72,592,000

It is worth noting, however, that the amount of notes in circulation at any time during the month is larger in November than in October. The figures given above are for the last day in each month.

Deposits in Canada still continue their upward course, the total of all classes for November being $522,217,000, as compared with $509,545,000 last month, and $459,083,000 a year ago. An increase of $63,134,000, or 12 per cent. during twelve months, is not to be despised. Deposits outside Canada are down about $3,000,000, almost the entire change being in the figures of the Bank of Montreal.

The specie and Dominion notes held show little change, being $60,413,000 against $59,411,000 at the end of October, in each case 9 per cent. of the total liabilities.

Balances due from agents in the United Kingdom have increased from $9,200,000 to $11,400,000, while balances due from agents elsewhere than in Canada and the United Kingdom have fallen off from $19,800,000 to $15,800,000. This reduction is shared by the banks generally, with the exception of the Bank of Montreal, and the balances thus drawn in from abroad have been used to help meet the demand for advances to the various Canadian industries. Call and short loans in Canada are practically unchanged, while call loans elsewhere are reduced by nearly $3,000,000. They are still, however, about $15,000,000 higher than they were a year ago, the chief increase being in the figures of the Bank of Montreal, which has $32,100,000 in call and short loans outside Canada, as compared with $24,400,000 a year ago. Other increases are: Quebec Bank, from $100,000 to $1,200,000; Bank of Nova Scotia, from $2,500,000 to $3,000,000; Bank of British North America, from $4,200,000 to $4,800,000; Royal Bank of Canada, from $900,000 to $2,500,000. The Bank of Toronto and the Bank of Hamilton, which in November last year had no call or short loans outside Canada, now show $1,625,000 and $800,000, respectively.

Current loans in Canada continue to increase, the total now being $457,000,000, a growth of some $6,600,000 during the month. In the same month in previous years the changes have been as follows:

1901—Decrease	$ 600,000
1902—Increase	2,800,000
1903—Decrease	100,000
1904—Decrease	1,000,000

For the twelve months ending 30th November there has been an increase of $41,700,000, as compared with $34,600,000 in 1904 and $63,500,000 in 1903. The Canadian Bank of Commerce is responsible for more than one-fourth this year's increase, its current loans in Canada now standing at $62,200,000, being an increase of nearly $12,000,000 since 30th November, 1904, when the figures were $50,300,000.

Current loans outside Canada have increased by $3,700,000 during the month, and by $15,000,000 during the year, the chief increase in each case being in the figures of the Bank of Montreal.

Deposits in Canada still continue to grow at a somewhat faster rate than current loans, but if, as seems likely, we have before us two or three years of exceptional business activity, current loans will probably grow more rapidly, and easier money rates in Canada can hardly be expected. While there is at present no sign of trouble ahead, it should not be forgotten that it is in times like the present that unsoundness and undue expansion develop and the seeds of future trouble are sown. Too much stress cannot be laid upon the fact that now is the time to clean up, to get rid of personal indebtedness, to see that all business liabilities are brought within proper compass, and thus to be ready to take full advantage of whatever further prosperity the future may have in store for us. We may then go forward, confident that we can cope successfully with all the difficulties and responsibilities which the rapid development of an immense country must inevitably bring.

* * *

AN UNFORTUNATE COMPILATION.

We referred briefly last week, in answer to a correspondent, to a series of comparative ratios in the figures of life assurance companies lately published in a Canadian insurance monthly. The article in question attempted to compare the relative cost of Canadian, British and American life companies. At the time, after a somewhat hasty perusal, we characterized them as based on false premises. A closer study but deepens the impression that their compilation was a mistake, and their publication unfortunate. We have always stood for what was legitimate in life insurance, and with good cause have steadfastly advocated the merits of our home life companies; but we feel that they can derive no real or lasting benefit through the dissemination of comparisons which every manager of a British life office will at once characterize as fallacious, and which no competent insurance editor would admit to his columns.

We do not for a moment believe that the author was constrained by any motives other than a desire to help the interests of our Canadian offices: but unfortunately his zeal in their behalf has carried him away, and when the fallacies of his compilation have been brought to his notice we do not doubt that he will promptly admit the errors into which he has fallen.

The truth is, conditions in Great Britain and Canada are so very different that any comparisons such as were sought to be made must of necessity be delusive. Owing to that difference in conditions, including the cost of living, British companies can and do conduct their business at a lower ratio of expense than Canadian companies. But, on the other hand, the rates of interest earned here are materially higher, and the forms of contract sold to Canadians are much more desirable than those of the British companies. Not only do they contain fewer conditions, but they grant a number of valuable privileges, such as extended insurance and guaranteed loan and cash surrender values for each policy year.

The article in question makes three assumptions in favor of Canadian companies, illustrating them by figures and ratios, which are intended to be taken as proof. These assumptions are as follows:

> 1. "Lower average premium rates than either British or American companies, although having a larger percentage of endowment assurances.
>
> 2. "Larger percentage of income saved than either British or American companies.
>
> 3. "Cost of new business less than one-half of the British companies. In the case of the American companies if the amount of re-assurances and not-taken business is considered, their cost would undoubtedly be in excess of Canadian companies."

The first of these, namely, the lower premium rates of Canadian companies, is true to a moderate extent, while the second and third assumptions are entirely erroneous, and the tables purporting to prove them are palpably absurd.

The first tabulation (placed in wrong order, as it refers to the third assumption) purports to show that the cost of new business in British life companies is excessive. Ten British companies are tabulated, headed by the Equitable. The management expenses of this old company for the year are given as $12,858, and the new premiums as $8,431. The ratio of expenses to new premiums is, of course, very high, but that in itself proves nothing. As every insurance man knows, the Equitable employs no agents, and the relative amount of its new premiums to old is very small. The method, approved by actuaries generally, of assuming that the expenditure on account of new premiums is ten times as much per cent. as that on renewals, if applied to the old Equitable, brings out a ratio of 4.66 per cent. on renewals and 46.60 per cent. on new business. This latter ratio is very different from the ratio of 152.5 per cent. brought out by the author's fallacious tables. He overlooked entirely the fact that in 1903, the year under observation, the percentage of new premiums to total premiums in this company was only 5.16, and the further fact that there is always a percentage of expense in the collecting of renewal premiums.

The fallacy above pointed out applies to all the British companies in the list, and the ratios brought out are of no significance. To show, however, the utter absurdity of this tabulation, let us look at one other case, that of the London, Edinburgh and Glasgow Life. Applying the 10 to 1 ratio to this company, we find the cost in 1903 to be 5.90 per cent. on renewals and 59 per cent. on new business. The article brings out for cost of this company's new business the amazing ratio of 1,316.6 per cent. Was absurdity ever carried to a greater length?

The third assumption, that the percentage of income saved in Canadian companies is greater than in British companies is based on a tabulation whose misleading nature has been very often exposed. The total disbursements are deducted from the total income, and the difference is called the proportion of income saved.

In this comparison 88 British companies, having an average age of 61.82 years are pitted against 20 Canadian offices having an average age of 17 years. It is obvious that death claims must form a very large percentage of the outgo of the much older British offices, but in the article we object to they get no credit or allowance whatever on account of that.

A statement in the article immediately following this tabulation effectively disposes of it, though that fact was doubtless overlooked by the author. He says: "Death claims for 1900 (Canadian), 97 per cent. less than British." We are surprised that a life insurance man of any experience would fall into such a palpable error as that exposed above.

The article closes with a summary of comparisons, only one of which, that of rates of interest earned, is legitimate, or of any practical value. The whole tabulation, being the bringing together of a mass of heterogeneous matter, must of necessity be misleading in its conclusions.

Taking the business all in all, Canadians have every reason to be satisfied with the excellent values offered them in the contracts of our home companies; and there is not the slightest necessity of bolstering up domestic life offices with comparative ratios which will not bear criticism.

Insurance journals have a duty to perform in seeing that only fair and legitimate matter is printed by them, and it is a pity that the interests of our life offices should be made to suffer through ill-informed publications. There is strong reason to hope that no intelligent or fair-minded Canadian manager will countenance the circulation of this misleading article.

* * *

THE REWARD OF "DOUBLE DEALING."

It may not be out of order to advise the shareholders in the Monarch Life Assurance Company other than those in the inside ring to make a point of being present at a certain trial which is set down for disposal early next month. The pending action is one to which The Monetary Times has already referred. As we intimated in our issue of October 6th last, the allegation is made by thoroughly responsible parties that some time ago Mr. T. Marshall Ostrom, the gentleman who is trying to foist his queer systems of finance and insurance on a long-suffering public, disposed of a certain interest in six so-called "copyright policies" to Mr. George Stevenson, of Toronto, who in turn subsequently assigned it to Mr. Ewen Mackenzie. A law suit is now being instituted by the last-named against Mr. Ostrom and the Monarch Life Assurance Company to set aside the alleged sale by Ostrom to that company of the plaintiff's interest in such copyrights, and to obtain an injunction restraining that company, or its officers or agents, from advertising an exclusive interest therein, or in the alternative claiming the sum of $5,000.

Harsh names are accorded the business procedure of a man who will sell, say, a horse to one man, and then, while his back is turned, tries to sell the same animal to someone else. And horse-trading is looked on by some as a profession in which the finer shades of business ethics are apt to be lost sight of. What, then, is to be said of one who will treat high-flown patent copyrights in such derogatory fashion?

Whatever may be the immediate outcome of the trial, however, in regard to the disposal of these properties, if indeed the "copyright policies" may receive the dignity of such an appellation, the proceedings are sure to be worth watching, not only by actual shareholders in the company, but by the general public with a few dollars to invest, who are often made the butt of similar schemes. The witnesses will all be under oath, so that it is probable we shall hear facts rather than big talk about the acorn and the oak. The "acorn" of the advertisement is supposed to represent the assets in April, 1894, of a company in the United States with "plans" similar to those of Mr. Ostrom; and the "oak," to represent these assets ten years later. History—or at least the advertising sheet in question—does not enlighten us as to how many times the copyright plans were disposed of in this case. Perhaps there was only one acorn. But we believe Canadian investors as a rule will be quite content to leave acorns alone, although these *may* become oak trees, and put their money instead in some mere bramble with a good-sized root on it.

OUR SAINT JOHN LETTER.

Merchants all over New Brunswick report the best Christmas business in years. No doubt the exceptionally fine weather that has prevailed all month contributed largely to this. The week preceding Christmas had only one unpleasant day and even that was not so disagreeable as to interfere with shopping. Every line of trade reports sales ahead of last year and some of the leading houses declare the business done and the character of the purchases made indicated that the people are better supplied with money and more ready to spend it then ever before.

The trouble referred to in my last letter between the Allan Line and the Longshoremen's Association culminated in the organization of a new ship laborers' society with about a hundred members, most of them former members of the old society. This new organization is now loading the steamers of the Allan Line, while the parent body is handling the other lines running to this port. The split was an outcome of the recent strike.

That business is booming in the Canadian winter port may be gathered from some figures made public on Saturday by the Canadian Pacific Railway Company. These showed that so far this season upwards of 1,600 more cars of freight have arrived here for export than to the same period last year. The indications, the railway company say, are that all previous records will be broken, both in the volume of export and import business. The city of St. John is this year imposing a small tax on this business, which it is hoped will yield sufficient to pay interest on the expenditure that has been made in providing wharves, etc.

The Canadian Pacific Railway Company has announced that during the coming year a very large sum of money will be spent in extraordinary work on the lines in this division. New steel bridges are to be built, heavier rails laid on the branches, round houses to be enlarged, passing tracks extended, new warehouses built at McAdam and other points, snow fences erected and other work done. The expenditure will be a large one and will materially improve the line in New Brunswick and Maine.

The Treasury Board of St. John has agreed to recommend to the City Council a vote of $400 to be spent in securing the opinion of an expert on the best means of harnessing the reversing falls here so as to convert their power to practical use. Since the matter was mooted there has been quite a discussion about these reversible falls and the tides. There are those who think the high tides prevailing here put at the service of the city a power much greater than the falls and that it would be money well spent to see how this power could be utilized. One suggestion is that the city offer a purse of, say $10,000, for the best practical solution of the problem. This, it is believed would induce some of the world's greatest scientists to grapple with the interesting subject. Even harnessing the falls is a problem of some magnitude, for the tide there turns every six hours and the strength of the current varies with every minute. Local engineers do not think an expenditure of so little as $400 will land the city anywhere at all.

Messrs. Robertson, Trites & Co., Limited, a local dry goods firm whose difficulties were recently referred to, have been unable to secure additional capital, and are to be wound up, one of the company, F. G. Trites, having made application for an order which will be argued this week. Another provincial company that is in difficulties is the J. W. Dumas Company, of Grand Anse and Shippigan, carrying on a large general trade. They owe considerable money to J. W. Dumas and he is asking to have the business wound up.

Announcement was made to-day that Fred. H. Tippet, a local brokerage agent, had suspended payment. His liabilities will not be heavy.

Mr. David Russell, of Montreal, who is the owner of the St. John "Telegraph" and "Times," was most generous this Christmas, presenting every St. John newsboy, irrespective of the paper he sold, with a new suit of clothes and a new reefer, all were made to order. This is only one of many generous acts of Mr. Russell to the poor of St. John. A couple of years ago he sent here 1,000 barrels of flour for distribution, and he is always a generous giver to local charities.

* * *

St. John, N.B., 26th Dec., 1905.

BOWMANVILLE.

A remarkably creditable issue is the edition of the "Canadian Statesman," of Bowmanville, for 13th December. It consists of twenty pages, eight of them on fine paper profusely illustrated. The motto of the "Statesman" is—and the paper has nearly reached its fifty-second volume,—"Our Town and County first; the World afterwards," and we commend to other country journals this order of procedure. Much that is of interest is to be learned from these pages. They do not show, they cannot show, the landscape beauty of the County of Durham; but they illustrate what creditable features Bowmanville possesses in its churches and schools, its handsome residences, and further, the manufacturing establishments which the enterprise of its people have planted there in recent years. The Bowmanville Organ and Piano Company has made itself known in many quarters of the world for the excellence of its products, and possesses diplomas from various exhibitions, including London, Paris, and Antwerp. The Durham Rubber Company is another of the town's industries; besides which are the Foundry Co., the Evaporator Works, the Stott & Jury Drug Co. The history of Bowmanville, by J. B. Fairbairn, P.M., in which the author speaks familiarly of sixty years ago, causes the editor of the Monetary Times to look up the family Bible to see where the years have gone. Messrs. James & Son are entitled to congratulation on the admirable tone of the "Statesman," maintained for so many years.

COMMERCIAL TRAVELLERS.

The Dominion Commercial Travellers' Association held their annual meeting in Montreal on the 16th inst., and elected Mr. F. L. Cains, president; Messrs. J. S. Thompson, W. J. Cleghorn, E. S. Bois, J. B. Giles, and Arthur Terroux, directors. An animated discussion arose during the meeting as to the manner in which the ballot papers were distributed and this will be investigated later.

The North-West Commercial Travellers' Association held their annual meeting in Winnipeg on Saturday evening last, and a resolution was passed instructing the new Executive to continue the fight for repeal of the British Columbia and Quebec legislation imposing a tax on travellers. They also decided to erect an association building having sample and club rooms. They now have available assets totalling over $97,000, and 1,843 members.

"A LIFE ON THE INLAND WAVE."

The editor has received from a newspaper correspondent in Cleveland, a paragraph clipped last week from one of the daily papers of that city. We quote a part of it.

"One of the most certain reminders that navigation has closed for the season was visible in the Cleveland harbor yesterday in the shape of the str. 'Kewaunee,' the flagship of the Lake Carriers' Association, otherwise known as the Southeast shoal lightship, 'Lake Erie.' Captain Hackett and his crew of four brought her into port under her own steam." And the paper goes on to speak of the neat appearance of the ship, and the excellent care Captain George P. McKay takes of the navigation aids under his supervision. We are so fortunate as to get a letter from Captain Frank J. Hackett, who refers as under to some adventures of himself and crew in the light-ship aforesaid.

Our readers will remember a letter under this heading which was printed in a November issue. It had reference to the loss of life and property on the Great Lakes in the violent storms of October. Up to that date, 3rd November, there had been twenty-nine vessels wrecked, and forty lives lost in the gale of the 20th and 21st October, on Lakes Superior, Michigan, Huron and Erie. In the whole season of navigation, we are told, the loss of life has been some 200 souls. We received last Friday another letter describing the dangers of the deep. It is dated Cleveland, on the south shore of Lake Erie, but relates mainly to the South-east Shoal, Lake Erie. The reader must bear in mind that at this point there is the whole sweep of the lake, two hundred miles, for the sea to make when the wind is from the eastward, and there has been known in 1904 a "breeze" from the north-east that attained a velocity of more than seventy miles an hour.

Captain Hackett writes on 20th December: "You are kind enough to want to hear from me, but I don't know what to tell you, as I am out of my latitude altogether, writing letters. Well, any how, we arrived here the evening of the 18th, after one of the roughest and worst fall seasons I ever put in, and I have been sailing for thirty years. Have talked to old skippers about the fall just over, and they say they never saw the like of it for weather; and the loss of life and property was something terrible. But the owners are greatly to blame for that, and I'll tell you why. They have boats yet that were built some years ago to load to sixteen and seventeen feet. but we now have a twenty-foot channel in the lake and river stretches, and these same boats are loaded to 18½ and 19 feet draft. This is not the square thing. Besides, you see, as soon as they get caught in a gale of wind, it is all off with them if they cannot make a harbor.

"We had a dickens of a close call ourselves on the morning of November 15th, through a fellow colliding with us. I better make a little yarn about that. It was blowing about thirty miles an hour at the time, with a big sea running. A steamer was coming down the lake with two consorts in tow; he turned eastward too close to us, and pulled his tow bang into us. They hit this lightship a glancing blow and carried away only some of our light wood-work, but when those great big brutes of consorts hit poor little helpless *us*, I tell you we were wondering for a while what kind of looking angels we were going to make in the mighty quick by and bye. This is the second time the same thing has happened, and I suppose the third time they will put us out of business, and maybe get all hands into kingdom-come. But I would rather take a chance in this little boat than in the average steamboat nowadays.

"The last boat to pass us on the shoal brings us word to go home, which message we received this season on the 18th December, and you can bet we were not long in getting under way and pointing her nose for Cleveland, where we arrived the same evening. It felt rather funny to get our feet in mud again, as none of us had been ashore since September 5th, and you can bet it was a relief to the mother and wife to hear of our safe arrival. Say, I would almost as soon you did not print any more of my yarns. By gum, the first thing we know I will be a journalist, and that is about the last thing. I have been bothered to death ever since we came ashore with reporters wanting stories, and to take my picture. I guess they must have seen my yarn about the October storm, in the "Monetary Times." Maybe the Detroit fellows will be wanting my cast steel pen too, since you do.

F. J. H."

* * *

BANKING AND FINANCIAL.

The Crown Bank announces the opening of new branches at Odessa, Ontario, and on Agnes St., in Toronto.

A Winnipeg despatch states that the Fleming block, corner of Eighth Street and Rosser Avenue, was sold a few days ago by the proprietors to the Bank of Hamilton. The price paid for the property was $75,000. It will be occupied by the bank.

The power of saving was shown a few days ago in the announcement that Thomas Rogers, an old man who made his living as a bill poster in St. John, N.B., had died leaving an estate of upwards of $16,000, all in cash. He was in early life a sailor, but had always carefully kept his earnings, banking them, and in his old age was able to retire and live comfortably. Thrift is a lesson many Canadians need to learn.

Mr. F. W. O'Flynn has been appointed manager of Canadian Securities, Limited, which has offices at 18 Toronto Street, Toronto. Mr. O'Flynn has considerable experience in financial matters, having been a member of the late banking firm of E. D. O'Flynn & Sons, Madoc, and latterly been connected with the Dominion Bank. He has purchased a seat on the Toronto Stock Exchange, and will qualify as a member in due course.

The Bank of Montreal, through Mr. E. S. Clouston, has made public, at the request of the Bank of New Brunswick, a statement that it is not in any way connected with efforts being made by Mr. W. B. Tennant to secure options on the bank stock at $350 per share. This we learn from our St. John correspondent. The general belief has been that Mr. Tennant is acting for that organization. He is still at work and causes it to be understood that when a sufficient number of shareholders are willing to sell at the figure quoted the cash will be forthcoming.

* * *

FIRE AND MARINE INSURANCE.

Two insurance journalists were honored by the New York Press Club at the last annual election. Chas. J. Smith, of the "Insurance Record," was chosen president, and St. George Kempson, editor of the "New York Insurance Journal," to a three year term as trustee.

We hear of some changes in the staff of the Royal Insurance Company in Toronto, Mr. C. McLean Stinson, who has been local manager for some time, has resigned, to be succeeded by Mr. Percy J. Quinn, formerly joint manager of the Winnipeg branch, with Mr. O. A. White, of the same branch as assistant manager.

A disastrous season on the great lakes of America is chronicled by the "Marine Insurance Bulletin." In fact it breaks all records. The total loss is estimated at $4,625,000, of which $750,000 was on cargoes. Seventy-nine vessels were lost, with 740 casualties, as against 430 casualties last year. The property loss in the storm of November 28th is estimated at $1,750,000.

A serious loss has arisen from a fire in the premises of the "Oxford University Press" on Richmond Street in Toronto on Wednesday morning last. The damage to the building is small, possibly $3,000 to $5,000; but the stock, which included expensive books and papers, Bibles, prayer-books, hymn-books, suffers loss to the extent of possibly $40,000. We have been told that the insurance loss will be $36,000, mostly, if not entirely, in English companies.

As to loss of life and property by fire, Mr. Alcide Chausse, in his paper before the American Society of Municipal Improvement at Montreal, recently dramatically said: "If the loss of life is appalling, the loss of property is disgusting. Our fire losses are equal to a tax of $25 per year per family. We have burned up one thousand millions of property in six years. Most losses, so called, are really but exchanges, one product being turned into some other form, a loss, perhaps, to many, but a gain to some one. Not so with fire. That loss is final, absolute, and the visual one is actual. New York averages 8,700 fires a year, Chicago, 4,100. We burn up three theatres, three public halls, twelve churches, ten schools, two hospitals two asylums, two colleges, six apartment houses, three department stores, two jails, twenty-six hotels, one hundred and forty flat houses, and nearly sixteen hundred homes every week of the year. * * * The increase in deaths by fires has been growing steadily," he says. "Our present ratio is about 9 lives lost by fire every year for every 100,000 of population. In 1900 the ratio was 8, and in 1890 it was 5. Unless something drastic be done, what will be the ratio in 1950?"

LIFE ASSURANCE ITEMS

Mr. William Harvey, Western manager of the Excelsior Life, sends us from Winnipeg a copy of the large colored calendar of that company for 1906.

We learn from the New York "Chronicle" that admission to Canada has been granted the Masonic Mutual Relief Association of Washington, D.C., the organization having made the necessary deposit and complied with the governing laws of the Dominion.

We are informed that the Continental Life Assurance Company, of which Mr. Geo. B. Woods is general manager, has bought for the sum of $100,000 the Medical Council Building in Toronto, and will remodel the edifice by making the entrance level with the street, and adding four or five stories to its height.

A New York exchange tells us that as a holiday reminder all employees of the Empire State Surety Company of New York, were on the 15th inst., given a bonus of an extra month's salary. Shareholders of the corporation were remembered at the same time by the declaration of a quarterly dividend of 2½ per cent.

The admissions of Mr. Francis Hendricks, superintendent of the New York State Insurance Department, before the Legislative Committee the other day, bring up a query as to what that department was supposed to do as its raison d'etre. When closely questioned by the Investigating Committee, Mr. Hendricks admitted that he had only followed the practice which had prevailed in the department for many years; in other words, he left the companies, so long as they were solvent, absolutely alone. He "presumed" the management thereof was successful from an economic standpoint; and "imagined" that policy-holders were receiving the returns to which they were entitled, and had never "thought" that general agents received undue amounts. But he did not trouble to make sure that these things were the case. In other words, this branch of the Government was turned into a mere figure-head; its service purely perfunctory; the office of superintendent a sinecure.

A good point is made by a writer in the United States "Review" referring to the proposals that certain men who were known to newspaper readers of the United States as "big men" in finance, or politics, or manufactures, should be put in control of the big American life insurance companies now under examination. Says that journal: "If fitness could govern the choice of those who are in important official relations to our great life insurance companies, and if suitable appointments only should prevail, this could hardly come about by the use of methods now prevalent. The names of Thomas F. Ryan, Paul Morton, Grover Cleveland, Westinghouse, O'Brien, in the Equitable, and now Peabody in the Mutual, are not reassuring to policy-holders from any knowledge that these people have of the life insurance business. There are many men in the service of the life insurance companies in this country whose services to the policy-holders, because of their fitness to conduct the life insurance business, would be very much more valuable than is likely to be the case with these new officials. It is not clear that any of these men is fit to guide the destinies of great companies like the Equitable and the Mutual Life. It was the bane of the old managements that they paid for the great names to command the confidence of the public and to swell a long list of directors who did not direct."

TRADE ENQUIRY.

At the Canadian Government office, in London, during the week ending 15th December, 1905, there were enquiries by a Turkish firm at Constantinople for Canadian buyers of olives and oil, and the names of some Canadian shippers of apples are asked for by a London importer desiring to do business in this line. A London company wishes to hear from Canadian shippers of silver lead ores and desilverized lead.

* * *

—We hear with satisfaction of a move, which is one of the most important that could have been made in the interests of the beautiful city of Fredericton, New Brunswick. Its authorities are about installing a sewerage system, and have received a number of tenders for the work, including some from Boston contractors. The J. B. McManus Company, of Memramcook, were the successful tenderers. Their bid was some $10,000 lower than any of the other firms, and considerably below the engineer's estimate. The concern is a large one, with an excellent record, and Mr. McManus has since said he is satisfied their figures are right and that they will begin the work as soon as spring opens. Seemingly Fredericton is to benefit. The improvement comes none too soon for there has long been complaint of the prevalence of typhoid in the city, particularly during the dry season.

—The Canadian Pacific Railway, it is stated, are entering with energy on plans for the electrification of some of their branch lines in the Province of Quebec. The idea seems to be to make use of motor cars for suburban traffic, and for providing more frequent service on sections of lines where an ordinary steam train service would not be profitable, a plan which has found great acceptance in Great Britain and parts of the United States. There is a great deal to recommend it, and it is very possible that, if found successful in Quebec, the C.P.R. will extend it in other parts of the country. In Ontario, for example, where so many city people seem to be following the lead of the American business man, in getting out into the country for residential purposes, there would appear to be many excellent opportunities for the innovation to be put into force.

—It is very satisfactory to be able to refer to the profitable nature of the business already being done by the Temiskaming and Northern Ontario Railway. From April 1st to October 31st, of the present year, the net earnings of the line were a little over $84,000, an average of $12,000 a month. This was made on the first section of track from North Bay to New Liskeard, and is equal to a rate of 3 per cent. a year on the cost of the section. The receipts from the passenger traffic have been very considerable owing to the rush to the Cobalt mines, and the entry of tourists to the picturesque northern summer resorts. They equalled in all 43 per cent. of the total earnings of the line. For a new railway, this Government property has been extremely successful in the business of carrying timber, in spite of the fact that it competes with the Canadian Pacific line which runs from Mattawa to connect with steamers on Lake Temiskaming, this was quite an item in the receipts. Steel is now laid over forty miles north of New Liskeard, and it is graded for thirty miles still farther north, which takes the road beyond the height of land.

—Among other interesting statements which have been made before the Tariff Commission, was one by the Lake Superior Corporation, to the effect that a coke plant would be built to supply the coke for use in connection with the steel plant of that concern, and another that the directors had authorized the construction of open-hearth blast furnaces for the manufacture of steel for rails and structural purposes. The open-hearth furnaces would use the ore from the Helen mine, which cannot be used in the Bessemer plant which the company has. Representatives of the corporation stated that if the location of the coke plant depends upon the result of a request made by them that the duty on soft coal used for coking purposes be removed. If it is removed the company will build its plant on the Canadian side of the river. Otherwise it will be located in the Michigan Soo. The building of a coke plant here would mean the employment of 300 men, and the expenditure in Canada of an additional $1,500 daily, which now goes to United States railways to pay the transportation charges on coke brought from the Pennsylvania and Virginia fields. The consumption of coke at the company's plant amounts to 500 tons daily.

* * *

—The oil fields of the Far West seem to be looming larger as a possible important additional source of wealth to that section of the Dominion. A year ago Alfred von Hammerstein interested capital in some oil deposits he had discovered down the Athabasca River, west and north of Edmonton. The result of their work of developing them is not definitely known, but it is believed to be promising. In Alberta, on the border of the State of Montana, several large wells have been struck, and one of them is reported to flow at the rate of 300,000 gallons per day, [We do not vouch for the figures.] A thriving town has now grown up at the wells, which is known as Oil City, and already the population of the little oil centre is nearing three thousand. At the present time several railroad companies are having surveys made to the new fields, and it is believed to be their intention to build to the oil districts as early as possible in the spring. Geologists and oil experts claim that there is an immense underground lake connecting the wells struck in Alberta and Athabasca, although they are over 1,000 miles apart.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, December 28th, 1905, as compared with those of the previous week:—

It will be noted that the figures for this week are considerably less than last week's, which is accounted for by Monday's holiday.

	Dec. 28.	Dec. 21.
Montreal	$21,843,888	$28,463,149
Toronto	18,653,377	22,614,118
Winnipeg	7,939,998	9,820,272
Halifax	1,468,574	1,890,143
Hamilton	1,328,717	1,558,668
St. John	917,906	1,185,823
Vancouver	1,873,207	2,028,366
Victoria	501,577	781,797
Quebec	1,635,802	1,921,179
Ottawa	2,135,167	2,809,661
London	984,603	1,004,389
Total	$59,282,816	$74,077,565

Vault doors in Bank of Montreal and Royal Trust Company, Montreal
Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons.** Total weight of lining and doors **260 tons.** Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

PURSES DROPPED BY THE WAY.

"Ladies, while on shopping tours, frequently leave their pocketbooks on our counters," said the manager of the department store, "and there is not a week passes that we do not restore to our patrons hundreds of dollars. About a year ago two young ladies from St. Paul, on their way to Covington, where one was to spend the season in the hope of staving off the ravages of consumption, bought a large bill of dry goods from us. They were sisters. After they had been gone from the store five minutes one returned in a frenzy of excitement. She had missed her purse, containing all her earthly possessions. There was $500 in it, money that she was to spend in an effort to prolong the life of her only sister. I calmed the lady, and told her I would do everything in my power to recover the money. I went to the counter where the purchases had been made. One of the girl clerks was missing. This looked suspicious. I enquired her whereabouts, and was told that she and one of the floorwalkers had followed a negro man out through the rear door. The negro had picked a purse off the floor. I took up the trail, leaving the lady who had lost the money seated in the store. I found the clerk and the floor walker and the negro. The latter had been corraled in a bar-room a block away. He was found in a rear room counting over the money.—New Orleans Times-Democrat.

NORTH OF ENGLAND LETTER.

Canadians have been vigorously assured that "combines" in England are just as prevalent as in the Dominion. It may not be inapposite to give some brief account of the position here. First, in the repugnance of the public are our shipping rings or conferences, and these are not strictly combines, according to our use of the term. They are associations of ship-owners linked together by ties of heavy forfeits, who maintain steamship rates, sometimes at very high levels. That is not so objectionable in itself as their special favoring of continental and American manufacturers at the expense of national rivals. The merchant shipping body is tied to the rings by virtue of agreements, as to rebates which accumulate for eighteen months before becoming payable, and may be estreated if the customer patronizes a rival line. Apart from rebates, the members of the conference are able to harass the unruly by delays and short shipments, while carrying competitors' goods with all proper despatch.

In more trades, great and small, than one can mention, there are associations aiming with more or less effect to curtail production or maintain prices. Some of these are almost wholly beneficent, and none approaches in its tyranny the shipping rings. Then we have our combines proper, or trusts, which, after buying up the preponderant half or whole of existing businesses, in some one line, proceed to administer all as one. Except the wallpaper concern, substantially all of these are in some branch of the textile trade. And every single one of them affords some ground for grievance. If the shareholder is satisfied, the customer, the competitor, or the supply houses, are not; and most of the combines have succeeded perfectly in dissatisfying everybody. The financially weak, with inflated capital, small cash resources and a leaky monopoly, are least disliked by those who have business to do with them. The stronger may have conferred some new benefits on their trade, but hardly in the way of price, and not without some accompaniment of new mischief. Indeed, it needs no argument to show that either Peter or Paul must be ground down and oppressed to provide dividends upon the purely fanciful prices paid for businesses which were well enough in their own earlier way.

One happens to have been shown the inside of various workings of the English combines. I am able to point to one engineering firm broken because it dared to supply machinery to a rival of a great combine, and to the ruin of the competitor so supplied by a disastrous course of cutting prices beneath cost. Also to point to instances of trade "driven out of the country," or at least of imports let in by the stubbornness of another. Again I can speak of the humiliation by threats of most important merchant houses who have been obliged to buy worse articles from one combine than they could from another combine, obliquely competitive with the first. Or again, one could show how a powerful combine keeps its competitors small and poor by incessant sapping and mining to filch away their large accounts. Small ones are heeded less; let the combine have all the large ones, and it can rule the roost.

Happily, we are not likely soon to see any increase in the number of industrial combines. Their results have not been so satisfactory as to encourage a multiplication of them. Looser federations of manufacturers are more manageable, and there is little complaint about such. But we do need to find a means of mastering the shipping monopolists and any action of Canada in the same direction will be noted with interest. Still, it is apparent that, while men are content to sign their natural rights away, and to enter into privy bargains with the monopolizers, the chances of interfering successfully between parties are made small.

There is another notable instance of profit-sharing, or industrial co-partnery, than that detailed by Mr. T. C. Taylor, M.P., on his appearance at the Canadian Club in Toronto. It also is in the woollen trade, and in Yorkshire, and its name is Wm. Thomson & Co., Limited, of Woodhouse Mills, Huddersfield. Manufacturers that are interested in "welfare work" may obtain much that is informative from my friend, Mr. George Thomson. His system has survived the shock of 19 years, and still works well. A singularity is that no piece-work exists, formerly there was payment by piece, but workers are now paid on a basis calculated from their earnings at that time. No married women are employed, but on leaving to be married, women receive a small dowry from the insurance fund. Women at 60 and men at 65 qualify for pensions, and in sickness or at death for after benefits. A minimum wage, based on the cost of living in the district obtains, and no person receives less than this, while most receive more. Capital receives 5 per cent. interest, and the profits in excess of standing charges are divided and added to the capital account of each worker. After a brief probation, designed to demonstrate his desirability as a member of the mill community, each worker must acquire at least one £ share. At Woodhouse Mills the master gets a fair livelihood, a decent return for his investment, and has about him a happy and contented set of partners who do their best to get the work done well and expeditiously. And in some senses that position is perhaps preferable to amassing vast riches.

Before these lines see print, Sir Henry Campbell-Bannerman will doubtless bear a peer's title. If not a mercantile man himself, the new premier is of a commercial family. His father, a founder of the J. & W. Campbell & Co. merchant house of Glasgow, and his maternal uncle, one of the Bannerman Mills Company family, of Manchester, have made Sir Henry one of the wealthiest of Scots-Englishmen. With C.-B.'s elevation to office, and the formation of the uncouthly named "Free Importation of Canadian Cattle Association of Great Britain," the perennial question will be revived. The future is quite inscrutable, for the only parties who bandy words about the embargo are those interested in its removal or retainment. As Liberal candidates in the agricultural districts are always disposed to show themselves the "farmers' friend," a number may be expected to pledge themselves to uphold the existing condition.

Approving note is made in the Manchester papers of the tendency of Winnipeg dry goods buyers to come here, and to Bradford, to make their purchases. It is observed that they, as well as buyers in the Maritime Provinces, exhibit a greater degree of enterprise than is common among customers for similar quantities elsewhere. Their advantage is not limited to price, the endless variety and the prospect of making some unique discovery, are attractions. Our own drapers are regular enough in their pilgrimages, but it is relatively seldom that retailers come from oversea.

NORTH COUNTRY.

Manchester, December 8th.

❦ ❦ ❦

A NEW YEAR THOUGHT.

A prominent Canadian has expressed the opinion and the fervent hope that as the nineteenth century belonged to the United States, so the twentieth is Canada's. He meant to draw a parallel between the marvellous development of the Republic in the century just past, and the surely equal progress on the eve of being made by the Dominion. There are few who do not believe the parallel was a just one. Half a decade of that new century has gone, and even this short period has already done much to show that if immediate indications count, the working out of the resources of this half of the continent will surpass in rapidity the way in which even those of the United States were exploited, wonderful as that was.

The extraordinary influx of new settlers, and the consequent quick doubling and trebling of the wheat and other grain crops in the West; the enormous increase in the country's aggregate trade; the multiplication of industrial establishments; the increase of bank deposits and clearings; lastly, the general high state of prosperity of all classes; all these serve to show how speedily the Dominion of Canada is making its position as a coming great world-nation. And all likewise accentuate the parallel so aptly drawn by Sir Wilfrid Laurier between it and our neighbors.

But, alas! there is another similarity; the growth of the spirit of graft. And unfortunately, in Canada's case, this disease seems to have taken root in the earlier stages of its development, while in the United States, it waited until that country had attained fairly mature proportions. It is an unpleasant subject, but if Canadians are to enjoy the New Year festivities as they are entitled to, they should first of all thresh out the whole matter in their minds, and come to the stern determination to root this evil thing from out the system.

It is all very well to say that we in this country are children in the art of graft compared with our cousins, and that it is only a passing epidemic which is in our midst. The disclosures recently concerning "combines" show that graft is an exceedingly robust infant. That a body of men such as the plumbers and affiliated trades could organize, could inaugurate, and carry through for so long such a system of bare-faced robbery as has been laid bare in Toronto, and that those same plumbers and supply men can still hold up their heads in the community, after what has occurred, —there are, it is true, a few who do blush, and who do not hold up their heads—proves only too plainly that the business conscience of Canada, as of the United States, is at a distinctly low ebb, even if it can be said to exist.

For a New Year's resolution we would suggest a persistent determination to get rid of the spirit which these things manifest, to shake ourselves free of this incubus which threatens to make all our material progress and all our resources of no avail. Let us parallel or surpass the United States in the things which are good, but let us throw off the encroachments of graft before it is too late.

* * *

FUTURE OF NIAGARA FALLS.

Mgr. Laflamme, the well-known geologist of Quebec, has been making on behalf of the Dominion Government a careful enquiry into the process of erosion and retrocession at Niagara Falls. He admits that outside of generalities much regarding the future of the Falls is of a very problematic nature. They are, however, without a doubt, receding every year. At the same time Mgr. Laflamme does not think that the Canadian waters are liable to suffer greatly for a long time to come from retrocession, whatever be its direction; but believes rather that the Canadian side will always have a large share of the hydraulic force of the river. Moreover, he opines, once the falls have reached the upper edge of the rapids—some hundreds of years hence—the retrocession of the cataract will enter into a phase of relative rest, and the erosion take hardly any other form than the wearing out of the lips of the new gorge, particularly on the Canadian side. By that time, however, the American channel will have long disappeared. And the intakes of the Canadian works, after having become gradually impoverished with the rectification of the line of fall, and its identification with the sill of the upper rapids, will end by becoming dry. The notable geologist then goes on to draw an interesting picture as to the future and its relation with the past: "The fall will then be at the first sill of the rapids. It will be higher than the present cataract by some fifty feet, and will noticeably resemble the drawing which Father Hennepin left us of that which he saw in 1678, when the horseshoe did not exist, and the American and the Canadian falls were on one plane. The only difference will be that the fall will then be single, Goat Island having joined the American shore." Another point of great importance on which Mgr. Laflamme dwells with some emphasis is the effect of the establishment of so many electrical works taking water from above the falls. He takes as an illustration the fact that nearly every spring now, the ice from Lake Erie not finding water enough to float, runs aground at the entrance of the American channel and blocks it completely, so that for a few days it practically ceases to exist. This phenomenon, it is stated, was quite exceptional before the electrical works were established, but has become now almost an annual affair. Finally, he says, that the danger which really threatens Niagara Falls is not so much from the wearing of its bed as from the abstraction of a large proportion of its waters by electrical companies, now, or likely to be established.

* * *

—Very wisely it will seem to people who understand the great possibilities likely to be developed in the future of trade with the Spanish American republics, the Dominion Government has authorized the payment of $500 towards the production of a quarterly publication, printed in Spanish, to treat of Canadian commercial matters principally in the special references to Mexican and Cuban requirements. Five thousand copies will be distributed in Mexico, Cuba, and South America.

Full particulars upon application. Correspondence solicited.

Bonds maturing or about to mature taken in exchange.

ANSWERS TO ENQUIRERS.

J. A. M., who is just starting in the fire insurance business, writes asking what is a good book giving information on that subject. We reply: "Moore's Fire Insurance and How to Build."

H. Mc.L.—The case was a most unpleasant one; you will perhaps understand why, knowing as you do how confidential relations may be and how much reliance is placed in such persons. His was one of those cases showing, as King John put it, "how oft the means to do ill deeds make ill deeds done." Not a villainous planner of robbery, but a victim of temptation.

E. Ellsworth, Detroit.—The pamphlet of Mr. Walker contrasting the Canadian and United States banking systems was printed about 1892. We understand it is now out of print. Possibly you can see it in your public library.

* * *

CHRISTMAS REMEMBRANCES.

We acknowledge with pleasure the receipt of Christmas cards from the following, besides those already named:—Union Life Co.; Norwich Union Fire; North American Life; Manufacturers Life; Imperial Bank of Canada; Winnipeg branch Canadian Bank of Commerce; The Standard Trust Co., Winnipeg; the Montreal City and District Savings Bank; Mr. David Dexter, Hamilton; Mr. P. B. Ball, commercial agent for Canada in Birmingham; Mr. Hamilton Grant McMicken, agent Great Northern Railway, of America, in London, Eng., and various English and American friends in Glasgow, Middlesboro, Manchester, London, Brighton, Chicago, Detroit, Boston, New York, Halifax, Montreal, Winnipeg, Toronto.

* * *

—Plans have been prepared by the C.P.R. for the construction of a steamship of unusual size for the Pacific trade, with a larger capacity for freight and passengers combined, it is said, than any steamer now afloat on the Pacific Ocean. The statement made in connection with the building of this leviathan of the deep, makes evident the importance with which a development of Oriental trade with Canada is regarded in influential quarters. It indicates also the nearness of the future when Canada's western prairies will be shipping a large proportion of its produce by way of the Pacific instead of by the Atlantic.

Bankers—Great Britain—The National Bank of Scotland. New York—The American Exchange National Bank. Montreal The Quebec Bank.

The Securities Corporation of British Columbia,

LIMITED.

INCORPORATED.

HEAD OFFICE: VANCOUVER, BRITISH COLUMBIA.

DIRECTORS:

FRANK S. BARNARD, Chairman, Victoria, B.C., Director of The B. C. Electric Railway Co., Limited.
DAVID R. KER, Victoria, B.C., President Brackman-Ker Milling Co., Limited.
RICHARD HALL, M.P.P., Victoria, B.C., Director of the Victoria Sealing Co., Limited.
ROBERT KELLY, Vancouver, B.C., of Kelly-Douglas Co., Wholesale Grocers.
HON. F. L. CARTER-COTTON, M.P.P., Vancouver, B. C., Managing Editor of The News-Advertiser.
WILLIAM FARRELL, of Farrell & Tregent, Vancouver, B.C., President, of B. C. Telephone Co., Limited.
PATRICK DONNELLY, General Manager, Vancouver, B.C., late Manager Great West Per. L. & S. Co. for B.C.

BANKERS:

Bank of Montreal

SOLICITORS:

Barnard & Rogers, Victoria, B. C.
Tupper & Griffin, Vancouver, B. C.

OBJECTS:

1. To carry on a General Trust and Guarantee business.
2. To loan money on advantageous terms on first class security including real estate.
3. To guarantee loans.
4. To issue Debentures.
5. To administer trusts of all kinds.
6. To receive money on deposit.
7. To transact such financial business as seems safe and profitable, much of which Chartered Banks are precluded from engaging in under the Banking Act.

AUTHORIZED CAPITAL, $1,000,000.00

In Ten Thousand shares, of the par value each of $100, are offered for subscription at $110 per share.
Payable $5 per share on application, $5 in 30, $5 in 60, and $5 in 90 days, and thereafter to be subject to a call of not more than $5 per share per annum until fully paid.
Five per cent. interest will be paid on all payments in advance of calls until such time as the applicant may elect to receive such dividend as may be declared by the Corporation in lieu of interest. These shares may be paid in full at any time.

SUBSCRIPTIONS for the Shares will be received at ANY B. C. BRANCH OF THE BANK OF MONTREAL, or at The Bank of Montreal, Quebec, Montreal, Ottawa, Toronto, London or Winnipeg and at the CORPORATION'S offices, Vancouver, B. C.

Reasons Why You Should Invest in This Corporation.

1. Stock in Trust and Securities Companies has proved to be one of the most profitable of stock investments.
2. There is a great opening for a Trust Company in British Columbia.
3. The affairs of the Corporation are subject to inspection by the Lieutenant-Governor-in-Council.
4. The liability of the shareholder is limited to the amount (if any) unpaid on his shares.
5. The following figures are published in the November (1904) issue of the "Business and Finance Journal" as showing the earning powers of various Trust Companies

Name.	Capital.	Surplus.	Dividends.	Last bid or Sale Price of Stock of $100 Par Value.
Central Trust Co.	$1,000,000	$10,881,416	60 per cent.	$2,050
Farmers Loan & Trust Co.	1,000,000	6,185 149	30 per cent.	1,050
Union Trust Co.	1,000,000	6,587,532	32 per cent.	1,400
United States Trust Co.	2,000,000	11,152,346	40 per cent.	1,600

Manager.
London, Ontario, 1906.

Mercantile Summary

The Brackman-Ker Milling Co. have lately erected in Strathcona a huge grain storage tank, made of concrete. It has a capacity of 90,000 bushels.

A report from Pittsburgh states that Toronto and Montreal capitalists have obtained a controlling interest in the stock of the Northern Ohio Traction and Light Company.

The New York Central Railway has entered into a contract with the Niagara, Lockport and Ontario Power Company for electricity to be used in the electrification of the N.Y.C. lines in western New York.

The news comes from Vancouver that the Great Northern Railway has secured land on the waterfront of that city which forms the key to a practical control of the wharf frontage property on Burrard Inlet, to a greater extent in any case than that held by the C.P.R. there, which has in use for its own purposes about 2,700 feet. The belief exists that the Great Northern have in hand some very extensive designs in regard to Vancouver.

The town of Strathcona, Alberta, has recently added to its water supply a steel water tower and tank of a capacity of about 120,000 gallons. The new power house is built of solid brick, on concrete. The boiler-room measures 40 x 64; the dynamo-room, 50 x 64, with brick chimney 90 feet high. The power house is built down by the river, immediately opposite the Edmonton power house, on the south bank of the North Saskatchewan, where there are supply wells 32 feet deep.

The British Columbia Electric Railway Company have decided to expend something like $35,000 on new additional machinery for its sub-station at Vancouver early next year. The chief improvement is a new rotary converter with transformers and equipments, to be used in connection with the tram line circuits so as to leave the machinery at present used for this purpose available for other uses. The result of the change will be the supplying of a better regulated service to the motors, and also the lessening of the fire risk in the establishments served.

The National Drug and Chemical Company, whose formation in Montreal has been watched with great interest, is now organizing for business. The following appointments have been made: Mr. W. S. Kerry, general sales manager, Montreal; Mr. T. B. Wardleworth, general purchasing agent, Montreal, and Mr. James Mattinson, inspector, London. Mr. C. W. Tinling, of Hamilton, treasurer, and Mr. Chas. Lyman, Montreal, as secretary. The building of a large factory in Montreal for the making of chemicals and pharmaceutical supplies is a matter for the company's immediate attention, as at present nearly 90 per cent. of these goods are purchased outside of Canada.

DOMINION SECURITIES CORPORATION LIMITED
26 KING ST EAST TORONTO.

Mercantile Summary.

John Daze, in a moderate grocery way at Arnprior, Ont., and Hugh W. Denyes, a hardware dealer at Carleton Place, Ont., have both assigned.

The Board of Trade of Morris, Man., is drawing attention to the opening which exists in that town for the building of a grist mill. The town offers a bonus of $5,000 and exemption from taxation for a term of years.

The Wilson-Munroe Company, Limited, head office Toronto, has received an Ontario charter. They will import, export, manufacture and deal in printers', bookbinders' and box-makers' supplies, and carry on a general printing and stationery business. The capital is $100,000.

Mrs. M. A. Christin, in a small haberdashery business in the northern suburbs of Montreal since last spring, has assigned, and shows liabilities of about $1,500.—Joseph Godbout began a small tailoring business about the same time in the Point St. Charles suburb, and has also now assigned.

The Mac Mining Company, Limited, Toronto, share capital $350,000, has been authorized by charter from the Ontario Government to carry on all branches of a mining, milling and reduction business. Augustin Frank, of Berlin, and J. H. Frank, of Woodstock, are among the charter members.

The McCormack Cobalt Silver Mining Company, of Toronto, Limited, has been incorporated with a capital stock of $500,000. It will carry on the operations of a mining, milling, reduction and development company. Among the provisional directors are named R. L. McCormack and J. A. McGillivray, of Toronto.

Grading work on the western section of the V., V. and E. Railway is to begin as early as possible next spring. A junction will be effected with the Great Northern at Cloverdale, a few miles out of New Westminster. The work of locating the road eastward from Huntingdon so as to tap the rich Chilliwack valley is also being arranged for now, while it is believed the intention is to extend it as far as the Squamish.

We see by the Coast newspapers that several of the British Columbian sawmill owners are placing extensive orders for fir with Puget Sound dealers. The Nanaimo Lumber Company, one report says, has just purchased some 800,000 feet from this source. It appears to be impossible for the mills on the Coast to secure an adequate supply of fir. On the other hand, it is stated that on the Sound good fir logs are not by any means plentiful. All the fir mills are working to full capacity; indeed, many of them are working overtime, and consequently there is a strong demand for logs. Ruling prices are high, just as high as they are on the Coast. Rough fir is going at $5 per thousand, merchantable at $7.50 and flooring at $9.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

We learn that E. Lamy, dry goods retailer in Montreal, lately reported as embarrassed as the result of spreading out into a departmental business, has now assigned, and that his liabilities are $35,000.

On the Bear Creek claims in the Nikola district of British Columbia platinum has been discovered, the ore yielding, it is said, the phenomenal quantity of four ounces to the ton. Messrs. C. F. Law and W. H. Armstrong, the owners of the above-named claims, are taking steps to have the value of the discovery appraised.

Mr. Alvin Robertson, of the Robertson Lumber Co., Grand Forks, B.C., has, with some wealthy Chicago and Minnesota associates, purchased the Prince Albert, Sask., saw-mill, together with about 250 square miles of spruce timber limits. It is hoped to cut some fifteen or twenty million feet altogether this season. The mill's capacity is to be increased considerably.

It is stated on apparently good authority that, when the ownership title of the Delaware and Hudson Railway Company of the South Shore Railway shall have been fully confirmed, a programme of considerable expansion will be inaugurated. The South Shore road is only constructed as far as Pierreville, Que. The charter contains authority for building to Levis, and it is stated this portion of the line will be at once constructed. An entrance to the city of Quebec will be gained over the Quebec bridge as soon as it is open for traffic. The Delaware & Hudson are expected to seek an entrance to Montreal independent of the Canadian Pacific or of the Grand Trunk, which carries South Shore trains into Montreal from the terminus of that road at St. Lambert, or, in other words, by the construction of the long-talked-of bridge across the St. Lawrence from Longueuil to the eastern part of Montreal. M. Victor Geoffrion, who has been representing the South Shore Railroad's interests, expresses the opinion that the Delaware and Hudson will make use of the wharves at Sorel. There is a first-rate system of docks there which would certainly be made use of for the handling of Sydney coal for the supply of the territory served by the road. As an inducement for the construction of the road from Yamaska to Levis there is available a million dollars in subsidies pledged by the Province of Quebec and the municipalities which would be secured by the extension.

Mercantile Summary.

A general dealer by the name of E. Lalonde, at The Brook, Russell county, Ont., is reported to have sold out his business to A. O. Lalonde, presumably a relative, and is now offering his creditors 30 cents on the dollar. He was formerly a farmer, and was well up in years when he ventured into storekeeping four years ago for a leisurely life.

A demand of assignment has been made upon Sigmund Fischel, doing business in Montreal as a cigar manufacturer under the style of Smith, Fischel & Co. Mr. Fischel has had a very extended experience in the cigar business, but his record has been far from a successful one. He is reported as having been unfortunate in New York before coming to Montreal, some twenty-five years ago, and since then as G. Fischel & Co. in the eighties, and as a member of Smith, Fischel & Co., of St. Jerome, in 1900, he has figured as an insolvent.

Some interesting figures are given out in connection with the running of the Dominion Iron and Steel Company's blast furnace No. 4, which was "blown in" just two years ago. Since then, with the exception of three months, owing to a strike, the furnace has been in continuous operation without repairs or renewal of lining, etc. In the twenty-one months it has been in operation it has turned out 1,143,650 tons of pig iron, or an average of 70,000 tons a month. On the production of this one furnace the Government has paid bounty to the amount of $223,000. The month's record at open hearth is particularly gratifying, and the same is true of the rod mill. The output at the rail mill continues to be satisfactory, both in quantity and quality, and the present year approaches an end with excellent prospects for the future.

REMEDIES FOR POPULAR DISCONTENT—FROM WALL STREET SOURCES.

The "Wall Street Journal" has outlined a series of remedies for the prevailing "epidemic of discontent" as follows:

First—Get rid of the bosses.

Second—Get rid of the grafters in high finance.

Third—Inspire a more wholesome respect for the law by enforcing it equally upon the rich and poor.

Fourth—Establish generally a policy of square dealing in business.

Fifth—Enact laws providing for ballot reform and publicity of campaign expenses.

Sixth—Subject all our monopolies to rigid Government control, so that their methods shall be fair and their charges reasonable.

Seventh — Compel all companies, especially those engaged in interstate business, to file the reports of their financial condition with the Department of Commerce and Labor once or twice a year, with the provision made to ensure honest bookkeeping and honest accounting.

* * *

MEXICAN TRADE.

We recently printed some information regarding the development of trade between this country and Mexico, sent by Mr. A. W. Donly, the Canadian commercial agent in Mexico City, to the Department of Trade and Commerce. This gentleman now adds the following fuller particulars: For all freight shipments the Mexican customs require a Mexican consular invoice. Besides a signed and stamped copy of the bill of lading, covering the goods to be imported, must be presented at the Custom House. This copy is filed at the Custom House, making it necessary for the consignee to also have a signed and stamped copy in order to obtain delivery of the goods. It is also desirable that a copy of the shipper's invoice and a copy of the packing list should also be sent. All these papers should be forwarded to the customs broker or clearance agent at the port where the goods are to enter the republic. If this is done their dispatch will be simplified, and delays and fines avoided. The following is quoted from instructions issued by one of the transportation lines entering Mexico for the benefit of shippers: "The packing list should show marks, counter-marks and numbers of packages, contents of each and the principal material of which article is made, and, if plated, with what; gross weight of each package, and kind of goods in package, legal weight of each package and class of goods, value of each kind of article, total value of package, country in which the goods were manufactured, name of shipper, date of shipment, name of consignee, destination, and the name of the customs broker in whose care the freight is consigned." Packing lists or pro-forma invoices should show all marks as they appear on the packages, as the law imposes fines for discrepancies between marks on packages and those on Custom House documents. A trade mark, or name of factory, uniformly stamped on all boxes, is not considered as a separate mark. The exact nature of each package, whether barrel, bale, or box, should be indicated on the packing list. As duties collected by the Mexican tariff are, in nearly every case, specific, it may be well to say that the tariff recognizes three kinds of weights, viz.,

gross (bruto), legal and net (neto). The only one of these weights that might cause any confusion to shippers is "legal," which means the weight of the goods plus any interior wrapping or packing; in other words, the gross weight less the outside box or protecting case.

* * *

THE WOOL AND COTTON CENTRES.

A report from London of recent date states that at the sales during the past season the quantity of wool sold amounted to 712,000 bales as compared with 747,500 in the previous season. The total clip from Australasia amounted to 1,596,000 bales (377,000 bales from New Zealand), as against 1,370,000 bales in 1904, and 1,450,000 bales in 1903. This quantity is practically identical with that of the 1899-1900 season, but still 363,000 bales short of the 1894-1895 clip, when the total production was 1,959,000 bales. Provided, therefore, that the estimated increase in the coming clip of 250,000 bales be reached, the output from Australasia this next season should only be short of the largest total ever exported by about 100,000 bales. The average value of a bale of wool is to-day £17 as against £15 5s. at the September series, 1904, while for the whole period under review it works out at £16 as compared with £14 10s. during the previous season. The average value per bale during the colonial selling season 1904-05, is returned at £12 13s.

With the holidays the home trade houses in Manchester are experiencing rather a quiet time just at present. The outlook in all departments is hopeful for the spring, and orders are coming in of a most encouraging character. In connection with the boom in velveteens a cloth by a new process has recently come on the market. The lustre is remarkable, and, although rather an expensive material, it is in good favor in most retail establishments. Makers in this section are experiencing difficulty in getting workpeople who understand the trade. Owing to the quiet time of the last few years there has been no encouragement for employment. All kinds of fancy cloths suitable for dresses and blouses are in demand for the spring, and, given favorable weather in the new year, there should be an active business done. Most of these fine fabrics are mercerized, which, of course, adds largely to their attractiveness. The activity of tartan checks in woolen goods is now being followed in cotton cloths, and this style of material is in healthy request. In cotton piece goods for export the demand is not of an extensive character.

According to the American Wool and Cotton Reporter, consumers of wool in Boston are convinced that they are not going to get wools any cheaper in outside markets, as the markets of the world generally show no evidence of any substantial weakening. It is a holiday season, however, and a period of stocktaking here, and it is not surprising that no large volume of business is being done. The trade, indeed, are not expecting any great volume of business at this time of the year. On certain grades and descriptions of stock there could not be a large business transacted, for the reason that the stock is not here in any great amounts, this being especially true of medium territories. Prices are fairly steady, however, although consumers who come into the market aware of the quietness which has prevailed for such a long time, are naturally trying to buy at some concessions, but holders have not made any substantial concessions during the past week.

Owing to the increasing demand for linen cambric and sheers buyers in Belfast are eager to place orders at almost any price, and manufacturers decline to commit themselves beyond a certain quantity, or else take liberty to fix their own time for deliveries. All looms available for making this light material are booked for months ahead, and still fresh business is coming in daily. Most cable orders coming in from American importers call for these grades of linens, and promise further business for shipment in the early part of 1906. Fine

FOR SALE.

The Retail Business of T. Long & Bro., Limited, Collingwood, consisting of dry goods, millinery, carpets, clothing, gents' furnishings, shoes and groceries, as we are going into wholesale business exclusively.

This is one of the oldest and most successful businesses in the Dominion of Canada, and has a very large connection in town and surrounding country. The stock is all new and seasonable, none of it being over a year in our possession, and the stock at present is not heavy. The town is progressive and we are enjoying an active business. The stores are new with latest fittings, and can be leased for a number of years. A grand opportunity to get into an old and well-established business. Can give possession in January.

Apply

T. Long & Bro., Limited,

Collingwood, Ont.

cambric and sheer linen yarns have, on account of this extraordinary demand, advanced in price, and are besides very scarce. However, latest advice promise a revival of the demand on this range early in January. Fine shirting linens in sympathy with, and assisted by demand for lawns have hardened considerably in price during the last two weeks.

The linen branches of the Dundee trade get more disorganized week by week. Communication with Russia is almost entirely suspended, any telegrams coming via Germany. It is therefore impossible to carry through sales of flax; indeed, sellers here cannot name a price or give any indication when the goods may be exported. Spot parcels are being secured at £4 to £6 above recent current rates, but there are only a few lots of good quality to be had. Yarns are all dearer. There has been more doing in linens for home trade, buyers securing any cheap lots available. The export enquiry is also keeping up to a fair extent, but makers find it difficult to obtain even a small advance.

Conditions in the silk market, says the Dry Goods Economist of New York, are improving as the year draws to a close. While the market is not entirely free from lots that have accumulated during recent months, the situation is clearing and the market is in a much better condition. The price situation remains unchanged. Silks sold from stock consist of weaves and qualities in which there has been an overproduction. They do not represent any profit to the manufacturers where the competition to sell is spirited.

Raw silk of a good quality is higher than was the case one year ago, and it is the opinion of manufacturers who use large quantities that little if any change will occur in quotations for some time to come. Manufacturers take this position for many reasons, among which is that notwithstanding the large quantities of manufactured silks thrown on the market during the past six months and sold without profit and the unwillingness of manufacturers to operate except on the hand-to-mouth basis, raw silk has maintained, comparatively speaking, a high price level.

* * *

TORONTO MARKETS.

Toronto, Dec. 28, 1905.

Chemicals, Drugs, Etc.—Absolutely no feature presents itself for comment at this time. A quiet though on the whole fair trade is passing and values keep steady. In New York market, dulness is the rule. Advices from Manchester speak of a rather brisker enquiry for chemicals for export purposes, while the home trade, though keeping up well, is largely of a hand-to-mouth order.

Dry Goods.—The dry goods trade is feeling the effects of the holidays, which have produced the usual lull in business. Xmas trade has been good, but sorting orders, especially for the articles usually so much in demand at this time of the year, have, owing to the very mild weather, been comparatively few. Prices for staple goods continue high, so high indeed as probably to have checked any speculative demand. Payments continue fairly good, though not so much in the West, but it is believed this is largely due to the fact that so much of the crop yet remains to be disposed of.

Flour and Grain.—Both in flour and wheat, export trade is very quiet. Ninety per cent. patents fetch as a rule about $3.10, in buyers' bags. The market for bran and shorts is very firm owing to considerable scarcity and the large demand.

Address Box 13, Monetary Times.

Toronto, Ont.

Fruits.—The movement of fruit is large, and oranges are a trifle easier. Prices are quoted as follows: Apples, barrel, $2.25 to $3.75; grapes, Tokays, $2.25 to $2.50; grapes, Malaga, keg, $6 to $7; bananas, bunch, $1.50 to $2; lemons, box, $2.50 to $2.75; oranges, Jamaicas, barrel, $4 to $4.50; oranges, Florida, case, $3 to 3.25; oranges, navel, $2.75 to $3.25; oranges, Mexican, $2.25 to $2.50; Valencias, $4.75; grape fruit, $4.50 to $5.25; cranberries, barrel, $12 to $13; celery, dozen, 35c. to 40c.; tomatoes, 10-lb. basket, $2.25 to $2.50; sweet potatoes, barrel, $3.25 to $4; sweet potatoes, kiln dried, $4.50 to $5; onions, bag, $1.15 to $1.25; onions, case, $3.

Hides and Skins.—No appreciable change has occurred in hides, and the market is dull with a somewhat downward tendency. Leather, too, is experiencing a quiet time, but the undertone continues steady.

Provisions.—The demand for butter is good and values are stiff. Cheese is steady at 13c. to 13¼c. Easier prices are quoted for eggs, the mild open weather no doubt increasing the supplies. Chickens are easier, and there is a distinct after-holiday lull. Prices are expected to improve, however. Hog products are easier.

Seeds.—Only a quiet movement is visible, and little for export requirements, but this is quite usual at this period of the year. Prices for clover and alsike, however remain much as before.

100% INCREASE IN FIVE YEARS.

The Great-West Life increased its net business in force from

$10,111,959 on January 1st, 1900

TO

$20,472,800 on December 31st, 1904.

This increase is the result of the low premiums charged, and high profits paid by the Company. Inquiries will have prompt attention.

MONTREAL MARKETS.

Montreal, Dec. 27, 1905.

Ashes.—Nothing is being done in this line, nor are there any supplies coming forward. We quote nominal figures as follows:—No. 1 pots, $5.25 to $5.30; second pots, $4.70 to $4.75; pearls, $7.00 to $7.25 per cental.

Cements and Firebricks.—For firebricks there is quite a good demand, this being the season when general repairs are common with many large manufacturing concerns, but cements are dull. We quote Belgian cement at $1.90 to $2.10; Canadian and English, $2.00 to $2.20; firebricks, $18.00 to $23.00 per thousand as to brand.

Dairy Products.—Good enquiry is reported from the other side of the Atlantic, and as stocks are on the low side here, holders are even firmer in their views than a week ago. Quotations for fine Western makes are now up to 13¼ to 13½c., and good qualities of Easterns are quite scarce, and are held at 13 to 13⅛c. per lb. Export trade in butter is light, but local demand is good. Good dairy is quoted at 21c., while creamery runs up to 23½c. for choicest.

Dry Goods.—The week has been a quiet one in wholesale circles, the warehouse staffs being mainly occupied in figuring out the results of the year, and most travelling salesmen are in town having their samples revised. Retail Christmas trade in fancy lines is reported as having been good, but the prolonged mild weather—at the moment of writing almost of a summery character—has been much against the sale of heavy fabrics, and it is feared that a large proportion of goods of this character will have to be carried over.

Furs.—We report quotations for strictly prime pelts as follows:

No 1 large beaver, $6.00 to $7.00; medium ditto, $5.00 to $5.50; kits, $2.00; black bear, $15.00 for large No. 1, $10.00 for medium, and $5.00 for small; badger 40 to 60c.; fisher, $6.00 to $7.00 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario No. 1, $3.00; No. 1 silver fox, $100 to $175.00; cross fox, $7.00 to $10.00 for dark; wolverine, $7.00 for No. 1 dark, other grades $2.00 to $5.00; lynx, $6.00 to $7.00 for No. 1; Marten, Western and British Columbia No. 1, $6.00 to $7.00; Eastern ditto, $4.50 to $5.00; mink, $6.00 to $8.00 for large No. 1, and $4.00 to $5.00 for medium; winter rats, 15 to 18c. for large; other No. 1 large dark Labrador, $30, and $15.00 for Western; coon, $1.75 to $2.50; skunk, $2.00 for No. 1 prime black $1.50 for short stripe, other grades 30 to 75c.

Groceries.—The week has developed little of interest, and the movement at the moment is of a comparatively restricted character. The situation as regards the sugar market is unchanged; standard granulated is quoted at the factory at $4.30 in barrels and $4.25 in bags, with No. 1 yellows at $3.90 in barrels, and $3.85 in bags. Molasses is if anything firmer owing to some free purchasing by sugar refiners for the making of low grade yellow sugars. The demand for dried fruits is now very light, but prices are held fairly steady at former quotations. A rather better demand is reported for Japan teas, and the market for these goods is quite a strong one, while it is claimed that stocks of desirable sorts will be very low before new crop teas arrive.

Hides.—Receipts of country hides are quite free, though city stock is not over plentiful. Quotations are very steady at 12 to 12½c. for No. 1. Lambskins are still being bought at $1.05 each, and it is hardly thought they are likely to go much higher.

Oils and Paints.—Business is very quiet at the moment, but already some travellers have started out on their routes again, and a good spring business is looked for. Quotations show no special changes of late. Linseed is fairly steady at 47c. for raw and 50c. for boiled; turpentine, 93c.; white lead is very firm at $5.75 for chemically pure, and window glass at $4 per 100 feet for first break.

Metals and Hardware.—While wholesale trade in most lines is comparatively slack, as is only natural in these holiday times, the demand for heavy metals and general hardware is unusually active for the season, and the head of one leading house says it is the busiest December his firm has known for fifty years, which is a pretty big statement, but is apparently borne out by reports from other quarters. Quotations in many lines continue to show a strengthening tendency, and that there is a belief that the high prices are likely to

hold for some time to come is borne out by the report that large American consumers of iron are placing their orders for the second half of 1906, and in some respects the British markets are reported even stronger than the U. S. markets. Local pig iron quotations remain firm at last week's figures. Bars are quoted at $1.97½; sleigh shoe steel, $2.10, and tire steel, $2.20. Canadian plates are firm at $2.60 for fifty-twos; black sheets, $2.40; tin plates, $4 for cokes, and $4.25 for charcoals of standard brands. Ingot tin keeps crawling up, 39c. to 40c. being now the jobbing quotation, while copper has gone up to 20½c. to 21c. Lead is quoted as $4.80, and shot is now sold at net list price. Spelter, antimony, etc., are unaltered.

Mercantile Summary.

The Claman Waterproof Company, of Montreal, proposes to establish a branch factory in Vancouver.

C. Lloyd & Sons propose to increase the capacity of their door factory at Wingham, Ont., by adding new machinery.

Halifax advices relate the death at Wolfville, on the 23rd, of Rufus Burgess, the wealthiest man and largest ship owner in King's county, N.S. The eldest son, Earl, is a New York shipowner. The estate of Mr. Burgess is thought to be worth about $300,000.

Talk is again heard on the Coast of an amalgamation of the various holdings of the Britannia Copper Syndicate, including the mines and plant at Britannia Valley, the smelter at Osborne Bay and the Mount Andrews mines on Prince of Wales Island, under the name of the Howe Sound Copper Co., with a capitalization of $5,000,000, to be incorporated under New Jersey laws.

The well-known English publishing firm of Macmillan's are establishing a branch in Canada, and under the name of the Macmillan Company of Canada, of which Frederick and Geo. Augustus Macmillan, of London, G. P. Brett and C. C. Nadal, of New York, and Frank Wise, of Toronto, are charter members, have been granted a charter to carry on the business of general publishers in Toronto.

The plant and buildings of the Brandon, Man., Brewing Company were on Christmas day destroyed by fire with a loss of over $100,000, and but small insurance. The owners were Messrs. Manley & Ferguson. Other fires on the same day were at the Prince Albert, Sask., Lumber Mills when the contents of a large storehouse were destroyed; and in Ottawa the Warnock Confectionery establishment was burned, at a loss of $3,000, covered by insurance.

Late commercial failures are reported among traders in Quebec city as follows: A. T. Simons, who has been in business only since January last as a small jobber of grocers' sundries, is reported as compromising liabilities of about $2,800 at 50 cents on the dollar.—Edouard Fleury, dealing in men's furnishings, has assigned, owing, in all, $3,260, principally to Montreal creditors.—Falardeau & Falardeau, grocers, lately reported failed, have already settled at 40 cents.—Eugene Picher, continuing the dairy supply business of Picher & Paquette, who dissolved last January, has assigned.

⁂

THE RESOURCES OF CANADA.

The more that attention is drawn in the heart of the Mother Country to Canada and its resources, the more interest will British investors take, and the better it will be for Canada and a homogeneous Empire. At the Royal Colonial Institute a couple of weeks ago Mr. E. B. Osborn read a paper on the future of Western Canada, which could not fail to please those who have Canadian interests at heart.

He began by a comparison of the mining areas of Western Canada with those of the Western States. The American and Canadian portions of the Cordillera region, a four-fold wave of geological uplift are about equal in extent and the geologist now knows that there is no geological reason for believing that the one is richer than the other. But the American half has been worked over by a very much larger population for a much longer period, and twenty times more capital has been invested in Californian mines alone than in British Columbian undertakings. But if the records of placer mining—the preliminary assay map of the province—be carefully studied, it is seen that British Columbia must be as rich in precious metals as California. Western Canada may not possess anything equal to the Comstock lode, the history of which is one of the three keys to the economic history of the American West. On the other hand, the American West could never show anything to equal the Klondike mining camp. To-day the mining industry in British Columbia is, he contended, in the same position as was agriculture at Red River thirty years ago.

Given a larger population and the free inflow of British capital and an adequate system of railways and roads, and the mining industry of British Columbia will go ahead by leaps and bounds. Indeed, there are signs that the period of arrested development is already at an end. The mineral production of British Columbia has now increased to 82 dollars per head—considerably in excess of the corresponding index-figure for the Pacific States. The old-time placer miners of the Pacific Slope have a saying to the effect that "the head of the rat is in Alaska and its tail in Alaska," the body of the auriferous beast being in Canadian territory. In the course of the next twenty years the truth of this proverbial scrap of miner's talk will be proved, and those who refused to listen to evil prophets will have their reward. A point to be specially noticed here is the fact that British Columbia possesses the best coal on the Pacific. The force of the advantage will become apparent so soon as the making of iron on a large scale and other industries spring up along the Pacific slope. The fact that Canada has great coal fields right on the sea coast in British Columbia and in Nova Scotia, and will be able to establish a "Pittsburgh-by-the-Sea" at either end of her territory, wlll help her in attaining the economic supremacy of the North American continent. As with mining, so with lumbering, the future belongs to British Columbia and not the Pacific States. The forest wealth of the province is barely touched at present, whereas California and the Pacific States are now being stripped of timber right up to the snow line.

Mr. Osborn then went on to discuss the prairie provinces as compared with the Western States in regard to agricultural resources. His words in this division of his subject are inspiring, and should be reassuring to the few in Britain who may have attached too much importance to the words of academic speculation.

"Here, as in the preceding comparison, the future is with Canada; the past belongs to the United States. But

it is only within recent years that the true value of the Canadian North-West as a field of settlement has been recognized. There can be no harm in warning the political economist not to be in too great a hurry to accept Professor Mavor's contention as to the limits of wheat production in Western Canada. He forgets that the production of wheat for export depends as much on the transportation facilities as on the population. Only Manitoba can be said to have a fairly adequate railway system; Saskatchewan and Alberta cannot be said to possess systems at all. Huge areas of the best farm lands in Manitoba (9.70 only of its acreage is at present cultivated) do not send a bushel of wheat to the market because it cannot be grown profitably, the nearest railway being too far away. Only one two-hundredth part (0.47 per cent., to be accurate) of Saskatchewan and Alberta (excluding Athabasca) is as yet ploughed up. Yet the proportion of good to bad land is as high as in Manitoba. The difference between 9.70 and 0.47 measures the difference between a half-developed and undeveloped system of transport. Western Canada will be able in twelve or fifteen years to provide the Mother Country with all the wheat she needs, and also to assert her right to the lion's share of the Pacific trade."

Finally, Mr. Osborn considers that the centre of gravity of the Western wheat growing industry is travelling towards the international boundary with a

speed that is accelerated every year, and must cross it sooner or later. Mr. Carnegie says that the nation which makes the cheapest ton of iron must win the industrial supremacy of the world. But two better economic epigrams occur. Wheat comes before iron in the list of man's necessities, and the land which can produce the cheapest and best bushel of wheat will certainly have a look in. Moreover, Great Britain can lend a pound of gold at the cheapest rate, and that is no slight advantage. Canada and Great Britain together can confute the Pittsburgh ironmaster's philosophy in a very practical manner. Now what the British investor—the man with the cheapest pound of gold—ought to remember is that the driving power of the great growing industries of the country is behind every sound commercial undertaking in Western Canada. The success of every such undertaking is guaranteed by its future. The lesson of the rise in value of Canadian Pacifics and Hudson Bays during the last ten years will be repeated in a hundred forms.

❧ ❧ ❧

HIGH MONEY RATE IN NEW YORK.

Extraordinary rates for money have again prevailed this week on the New York market. Yesterday, it opened strong for call loans at 30 per cent.; the next quotation was 60 per cent., followed almost immediately by one of 80 per cent. Shortly afterward 100 per cent. was reached, breaking all records since the Baring smash; but this was eclipsed during the morning by a loan at 125 per cent. The cause for this remarkable condition of the money market was that the surplus of the New York banks over the required cash reserves has been practically exhausted, at a time when stock exchange speculation has been heavy and when much money was leaving the banks for the treasury and interior.

Local markets for money in Canada seem to have been little affected by the reports from New York and stock exchange business has been dull, with no special feature.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $128,094,315.24

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 11 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto, Montreal, Quebec and Ottawa.

Significant Facts

This Company's Policy-claims paid In 1904 averaged in number one for each minute and a quarter of each business day of 8 hours each, and, in amount, $102.54 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1904.

391	per day in number of Claims Paid.
6,561	per day in number of Policies Issued.
$1,426,700.50	per day in New Insurance Written.
$114,060.67	per day in Payments to Policy-holders and addition to Reserve,
$73,326.8	Per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain additional security of $300,000 and what is of greater importance, are assured of careful and conservative management as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a voice in the management of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet possesses the advantages of both.

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE
ROYAL-VICTORIA LIFE INS. CO.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION
is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

BANK CLEARINGS FOR 1905.

The returns of its bank clearing-houses are always a good index of the activity of a country's commerce; and if any evidence were wanting to support the general opinion of Canadians that 1905 has been an extremely busy and progressive year in the business of this country it is found in the extremely large clearings of the twelve months. Those of Montreal advanced from $1,065,067,000 in 1904 to $1,325,303,000 last year, and those of Toronto from $842,097,000 in 1904 to $1,047,490,000 last year, showing in each case an increase of 20 per cent. Winnipeg clearings were $369,868,000, a gain of almost one-fourth, Ottawa has been making great strides in recent months, possibly because of considerable lumber transactions, and stands now next to Winnipeg among Canadian cities, with clearings in 1905 of no less than $120,891,000. The transactions of these four represent 85 per cent. of the clearings of the whole eleven Canadian clearing houses.

Clearings at:	1905.
Montreal	$1,325,303,000
Toronto	1,047,490,701
Winnipeg	369,868,179
Ottawa	120,891,876
Halifax	89,251,562
Hamilton	68,385,601
St. John	52,836,333
Vancouver	88,460,390
Victoria	36,890,464
Quebec	86,794,553
London	50,429,511
Total	$3,336,602,170

THE FIRE LOSS FOR 1905.

Excepting years in which occurred great conflagrations, the year 1905 shows a larger amount lost in fires than in any previous period in the history of the United States and Canada. Seeing that there were no extremely large fires, the "New York Journal of Commerce," from which we take some figures, attributes this heavy valuation of the property destroyed to an increased number of medium-sized fires, and to the increased value of stocks. The following are the figures in detail of losses by fire for each month in the United States and the Dominion:

	1903.	1904.	1905.
January	$13,166,350	$21,970,200	$16,378,100
February	16,090,000	90,051,000	25,561,000
March	9,907,650	11,212,150	14,751,400
April	13,549,000	23,623,000	11,901,350
May	16,366,800	15,221,400	12,736,250
June	14,648,350	10,646,700	11,789,800
July	12,838,600	11,923,200	13,173,250
August	8,428,350	9,715,200	11,435,600
September	9,939,450	14,387,650	13,715,250
October	10,409,800	12,866,200	12,267,000
November	13,589,550	11,515,000	16,178,200
December	17,224,700	19,422,350	15,276,600*
Total for year	$156,195,600	$252,364,050	$175,157,800

*Estimated.

In spite of the heaviness of the losses, however, the year is not looked upon as an unsatisfactory one by the fire insurance companies. Rates in general have been adequate, security values have advanced, and the consequence is that so far as net results are concerned, underwriters look on 1905 as one of the best years experienced in a decade.

STOCK EXCHANGE TRANSACTIONS.

In this issue we present a comparative table of prices of securities on the Toronto Stock Exchange during the year just closed, taken from a compilation for which we are indebted to Mr. Lyndhurst Ogden, Secretary of the Exchange. The figures show, as a rule, with few exceptions, no remarkable fluctuations in price, though the course of the market has taken an upward direction. Bank shares have advanced generally, and trading in that class has been perhaps more than usually active. Bank of Commerce advanced from 158½ in January to 171 in August, and kept fairly well to the latter figure until the close of the year. Dominion Bank shares, quoted at 247 in March, were at 270 in September. Bank of Montreal kept within a narrow range throughout the year, the quotations being between 251¾ and 259½. A strongly marked feature, as reflecting the prosperity and buoyancy of the whole country, has been the strength of C.P.R. shares, which moved up from 131¾ of January, to the 176, and a little better of September, while new stock similarly rose from 128½ to 154.

The big industrials of Nova Scotia have presented some satisfactory points, and the movement has been an upward one throughout. For example, Dominion Coal, common, which was 59⅞ early in the year, moved rapidly up to 86½, the highest point reached. Dominion Steel, common, selling at 17 in January, fetched 28 and 28¾ last month. Nova Scotia Steel and Coal also advanced. A feature of the year has been the appreciation in Mackay, of which common stock sold for 37 in January and 60 in December. A strong stock among the tractions was Winnipeg Street Railway, which quoted at 114½ in January, was bringing 192½ in August, near which figure holders have succeeded in keeping it ever since. In Toronto Railway no very strong movement has made itself manifest, in spite of wonderful increase in traffic and earnings. Perhaps the unsettlement of the future, in regard to the city's attitude towards the corporation and the question of its franchise, has something to do with this result.

On the whole, it may be said that, while, of course, the Toronto Exchange has been affected by stock movements in New York, the violent fluctuations of the latter market have had, comparatively speaking, little influence here. Perhaps the lessons learned two or three years ago by local speculators left their mark after all. As to present indications presented by the New York market, there is believed by conservative observers to be some ground for the statement that many securities have become highly inflated, and this applies not so much to the railroads, but more particularly to the industrials. Speaking on this point, Henry Clews, of Wall Street, says that these concerns (some of which represent nothing but water, and yet are selling all the way from 30 and 40 to 50 and upward), are often able under the present conditions (exceptional prosperity of the country and so forth), to make exorbitant profits, which renders it easy to see how the public are deluded into relieving original holders of their surplus stock.

> For some years it looked as if the rich holders of these industrials would be obliged to retain them permanently, and it is a matter of regret that present conditions now favor their distribution among the public. Many of the industrials are still in an intrinsically weak condition. They are heavily over-capitalized and have not yet stood the test of adversity. New competition from more modern plants is constantly growing, and their ability to control the market—one of the prime objects of the trust method—is likely to be seriously disputed when the reaction comes and when the modern establishments prove their superior competitive abilities. This inflation in the stock market is really the weakest spot in the whole situation.

And it is a weak spot that, in view of the predominating character of the New York market over the whole continent, should be borne in mind by Canadian investors, and all those interested in stock fluctuations in this country. One feature which has probably done much to keep speculation within reasonable bounds in New York, and also in Canadian cities, has been the extreme dearness at times of money. The extraordinary rate reached last week in New York for call loans has not been duplicated, even at a distance, in this country, nevertheless the demand for money for crop movement and other purposes has had its effect in a general stringency, more particularly as the banks have become more exacting in their scrutiny as to the purposes for which advances are required.

* * *

BOOT AND SHOE AND ALLIED TRADES

The action of the Quebec boot and shoe manufacturers last month in coming into line with individual Western manufacturers, and advancing the prices of their products by 10 to 25 per cent., has been lived up to, and has had the natural effect of causing an enhanced price to the general consumer. Before, while manufacturers quoted boots and shoes at various degrees of advances to retailers, as a rule the latter sold them to their customers at practically the old prices. During the last two weeks, however, the public has had to pay the piper, and boots for which a month or two ago they paid, say $3, now fetch $3.50, while $4 boots sell at $4.75 and $5. Justification for such a step is not hard to find. For months leather, findings, thread, and all the materials which enter into the making of a pair of boots or shoes have been going up, while labor also has extorted a higher wage. In their turn, the tanners were justified for the step they took in advancing leather by the increased price they had to pay for hides, although why hides have been so high this fall is somewhat difficult to say.

To some extent, this increased cost of boots and shoes has resulted in a contraction of the demand, although some of the Toronto manufacturers report their business to have been even better than usual, taking the autumn trade as a whole. The mild weather has not militated so much against a good movement as might have been imagined, for in one way it has resulted in increased walking and consequent extra call for new goods. This has shown its effect in a satisfactory sorting trade. At the same time this same mildness of the season has lessened the demand for rubbers, though even in this, in the northern parts of the Province of Ontario more particularly, the slight snow-falls, followed by thaws, have conduced to a heavier call than usual for these goods, thus equalizing matters somewhat.

The prospects for a good spring trade in footwear are promising, and factories are busy on spring lines. The newly sprung-up demand for tans seems likely to continue, and in fact to increase, and retailers will be well advised to take measures accordingly. Payments are reported to be satisfactory, and to have improved materially during the last few weeks.

though there is still some complaint as to the North-West.

Of interest to boot and shoe manufacturers was the deputation from those interests to the Tariff Commission in its recent session at Quebec. The chief spokesman of the party was Mr. John Ritchie, of that city, who stated that a serious matter to the eighty odd Canadian manufacturers was the large importation of shoes from the United States, which last year amounted to $1,107,000 in value. If this amount, he contended, had been put into Canadian goods, it would have enabled our manufacturers to specialize further, thus reducing the cost of making and improving the character of the output. On the other hand, Mr. C. Blouin, of Levis, protested that it was all very well for manufacturers of fine goods to demand higher protection against American shoes, but the interests of the manufacturers of pegged work should be considered as well.

The following excerpt from the "Shoe and Leather Reporter," of Boston, will be of interest, as showing the trend of the trade in that important centre of the boot industry in the neighboring Republic:

> Wholesalers have had, and are still having, a good and generally satisfactory volume of business, and in many instances showing a remarkable increase in their total sales. Retailers generally are carrying a large stock of goods which they have been induced to purchase on a steadily climbing market, and on the assurance that shoe manufacturers would be constrained to place a still further advance on account of the high range of prices for raw material and leather. All orders placed for this fall have been filled. Wholesalers have placed practically all their spring contracts, and delivery has been going on to the retailer during November and the current month. Shoe wholesalers' salesmen have concluded their trips among their retail customers and are now at home, and wholesalers do not anticipate many mail orders, for the reason that their customers are carrying large stocks. A large number of shoe manufacturers who have fully informed themselves as to the existing conditions, draw no other conclusion than that there will be a slow trading during April, May, and perhaps June, and while the opinion of a number may be offset by the opinions of those who hold different views, there is a generally expressed sentiment that it is a good time for conservatism.

USURY IN MONTREAL.

The pitfalls which the usurer prepares for his unfortunate victims, and the disgraceful lengths to which he readily goes to gain his inhuman ends have recently been shown up in such a lurid light in the city of Montreal that the authorities can hardly fail to push home the prosecution of such vampires as are now found out there to the utmost limit of the law. Some of the charges brought against one of these money-lending concerns, the Canadian Finance Company, which in reality, we believe is an American, not a Canadian, concern, are so revolting that one can only believe with difficulty that the transactions complained of are modern occurrences, and not the doings of the Middle Ages, or the fictitious inventions of a Dickens.

One poor widow, it is alleged, the keeper of a boarding house, fell under the lure and borrowed $75. To repay this, she agreed to pay $14 odd every month for a year. One day the poor woman had not the money ready when the collector called. He charged her $2 for the extra trouble, and threatened to seize her furniture the next time any delay happened. Delay did happen on another occasion, and to add to the woman's misery, her boarders were informed that their belongings also were not safe from seizure, with the consequence that they all left her house, the final upshot being that her landlord seized her furniture for back rent.

Another favorite plan of this nest of sharks has been to send out to their victims fictitious telegrams insisting upon immediate payment, for which they would charge an extra fee of one or two dollars or more for each one.

Not only this, but the Finance Company, by assignments of salary, threats to expose the borrower, and other blackmailing schemes, have been the means of bringing to wretchedness the lives, not merely of helpless women, but of civic employees, bank clerks, and others. Some, indeed, have already lost their positions through the machinations of these bloodsuckers. Not content with extorting rates of interest varying from a hundred to actually three hundred per cent., they have refused to accept the principal of the money borrowed plus interest to the time at which it is offered in repayment, but have insisted on obtaining the full amount together with compound interest at their exorbitant rates until the expiration of the time for which the money was originally borrowed.

It is a matter for general rejoicing that the Montreal manager of the company in question, who, if all accounts be true, has shown himself peculiarly grasping and inhuman in his methods, has been arrested, and it seems likely that this blot of usury in our midst will receive such a check as to be put out of business for a long time to come.

* * *

THE COMING FORESTRY CONVENTION.

The Forestry Convention which is to take place in Ottawa on the 10th, 11th, and 12th of the present month, under the auspices of Sir Wilfrid Laurier, will be a striking indication of the change which has taken place in the attitude of the public mind towards this important question during the last thirty years. Long before that time, a few thinking men in Europe, more far-sighted than most, had begun to see the nature of the problem which was so surely arising, the double problem presented by the rapidly decreasing timber reserves of the world, and the rapidly increasing demand for timber. Indeed, it would appear that as long ago as 1669, there was held in France an "ordonnance" or convention to consider the various means of conserving forest resources. Only between two and three decades ago, however, can this matter be said to have been taken up in earnest in this country, and it was in 1882 that a regular convention took place in Montreal, the result of which was a new era in regard to public appreciation of the work of the forestry "cranks,"—as it must be confessed that the men particularly interested in the new subject were sometimes called. It was then that the Dominion and Provincial Governments organized systematic plans for administrating, protecting, and renovating the forests of Canada, testing the planting and cultivation of trees in the treeless prairies, and that the forester's and lumberman's interests were seen to be identical. It may be noted as an interesting fact that Mr. A. Harold Unwin, who has achieved considerable fame on account of his experiments in the transportation of trees from the New World to Germany, learned some of his art in this country, having been employed in the forestry branch of the Canadian Department of the Interior.

The transplantation of trees from one region of our own wide Dominion to another, is one of the subjects, by the way, which is to be discussed at the forthcoming convention in Ottawa. Among other of the important addresses which, we see by the programme, are to be delivered, may be mentioned, one by Sir Wilfrid Laurier, who thus enters the field of the Higher Politics; one by Mr. E. G. Joly de Lotbinière; and one by Mr. Gifford Pinchot, Chief of the Forest Service of the United States, who has kindly accepted the Canadian Forestry Association's invitation to be present.

This group of three may be looked upon as being part of the preliminary discussion, introducing the more strictly technical subjects. These are divided in the official programme as follows:—

I. "The Nation and the Forest," with papers by E. Stewart, Dominion Superintendent of Forestry; Thos. Southworth, Director of Forestry for Ontario; Dr. Robt. Bell, of the Geological Survey; and Cecil B. Smith, chairman of the Temiskaming Railway Commission. II. "Forestry and Irrigation," with addresses by Hon. Sydney Fisher and J. S. Dennis, director of irrigation for the C. P. R. III. "Forestry in Relation to Agriculture," by C. C. James, Deputy Minister of Agriculture, for Ontario; Dr. W. Saunders, director of Dominion Experimental Farms; Rev. A. E. Burke, of Prince Edward Island; Norman M. Ross, Assistant Superintendent of Forestry for Canada. IV. "The Forest and the Lumber and Pulp-wood Industries," by Hon. W. C. Edwards, president of the Quebec Limit-holders' Association; F. C. Whitman, president of the Western Nova Scotia Lumberman's Association: F. W. Jones, president of the Mountain Lumbermen's Association; Wm. Little, Westmount, P.Q.; H. M. Price, president of the Pulpwood Association of the Province of Quebec. V. "Relation of Forests to Other Industries," by W. F. Tye, chief engineer of the C. P. R.; C. H. Keefer, C.E.; Fredk. Keffer, manager British Columbia Copper Company; E. B. Biggar, editor of the "Pulp and Paper Magazine"; J. K. Osborne, vice-president of the Massey-Harris Company, and others. VI. "Forestry Education," by Monsignor J. U. K. Laflamme, University Laval; Dr. Judson F. Clark, Forester for the Province of Ontario.

It is seen from the above that this convention is to be held under the very best auspices; and it is to be hoped that its deliberations will be followed by a strong determination on the part of the whole people of Canada to put into practice the precepts which will be laid down. There are few more important problems facing our country than this of the conservation of its forests.

* * *

DIFFERENT KINDS OF LOAN COMPANIES.

Following up our article of last week on the above subject, the following letter has been received from an old Ontario loan man now in the Maritime Provinces:—

Dear Sir,—You perhaps do not understand that in these provinces the average person makes no distinction between the old mortgage companies and the small so-called loan companies or building societies, such as the B. C. Permanent, and York County. Where they are so well known, namely, in Ontario and throughout the North-West, there is not the same difficulty in drawing the line. You would be astonished at the number of enquiries that reach us regarding the affairs of the York County Company, as if they were in some degree inter-related and organized to do business along the same lines as ourselves. The recent collapse of that much-trumpeted concern will—strange as you may think it—have an effect on business down here. It is some time since the York County cut any considerable figure, but there is now on the ground an institution styling themselves the "B. C. Permanent." They advertise extensively in local newspapers. In the Saturday issue of the St. John "Telegraph," "Times" and "Globe" they took up nearly the whole of the last page. They only use the initials "B. C." and emphasize the word "Permanent" for a purpose that is not hard to understand. Otherwise well-informed people in this city have not been able to probe their motives, or properly draw the line between this and a company organized on sound principles, with the result that they have succeeded in getting hold of considerable money, strange to say, from some really good people. Substantial sums have been put into the stock of this B. C. institution.

We know how from time to time good financial journals, like the "Monetary Times," publish articles warning the public against deposits put into this sort of investment, but history repeats itself. I have thought that it would be in the interest of the innocent public who are in great danger of being fleeced, if some one would write and publish a concise article, or series of articles, placing before the public in a simple manner the basis of organization of the old line companies and other smaller but similar ones, and the plans upon which these terminable building societies are organized."

[We presume our correspondent refers to the British Columbia Permanent Company when he mentions the B. C. Permanent. We cannot find the company as making returns to the Dominion Government in 1905, and it would be well for the investing public in the lower provinces to be careful lest they should confuse new-comers with old and successful institutions bearing somewhat similar names.—Editor Monetary Times.]

* * *

BUILDING IN MONTREAL.

It is believed by those who have followed the course of events in Montreal that next spring there will be a sufficiency of houses to supply the demand for them, even allowing for a natural increase in population, so actively has building been carried on during the past year. More permits were granted in the twelve months of 1905 than ever before in the experience of the building department. They numbered 1,700 with an estimated value of $6,000,000, and it is expected that this large figure will be exceeded next year. M. Alcide Chausse, the building inspector, thinks that the plentiful supply of houses will be true, particularly of the north end of the city, and also of St. Henri. Now that the west end municipalities have been added to the city, there should be a stir in building there. For the time being there will hardly be any movement in Ste. Cunegonde, as that place is fairly well built up, but there is lots of vacant land in St. Henri, and plans are out for new structures, including some factories. These newly annexed towns will maintain their own regulations until May 1st, and after that date they will be amenable to the city's by-laws.

* * *

PREMIUM REBATING TO BE STOPPED.

The astounding but welcome news reaches us from New York that the three largest life companies in that city, the Mutual, the Equitable, and the New York, have agreed to stop rebating premiums. It was high time, for upon the testimony of Canadian life assurance agents they were the worst exemplars of this iniquitous practice. It now appears that Ex-President Grover Cleveland has agreed to serve as a "rebate referee" for these three. Mr. Cleveland will be the court of last resort in the settlement of all disputes between the companies and their agents or between the company and policyholders in reference to rebating cases, and is to receive for his services a yearly salary of $12,000. The despatch goes on to say that before Mr. Cleveland would agree to accept the refereeship he insisted upon pledges by all the companies that he would be seconded in his efforts to stop the practice. The Equitable, the Mutual, and the New York Life have, accordingly entered into an "ironclad" agreement with each other to put a stop to the rebating of premiums.

They have decreed that any agent found guilty of rebating shall be summarily dismissed from his company's service, and will thereafter be barred from employment by any of the three big companies. This arrangement looks well in print, and ought to go far, if rigidly carried out, to rid the community of the unjust and injurious practice of rebating. But the American's ingenuity is great, and "the devil may yet be whipped round the stump," unless some able and strong man shall circumvent the plotters, who will be sure to try some new dodges to evade the stoppage of rebating. Mr. Cleveland has, we believe, the ability and strength.

* * *

YORK COUNTY LOAN COMPANY.

An investigation into this company's affairs ordered by the Ontario Government has been conducted by Mr. W. H. Cross, and although it is perhaps not completed, at least has not been submitted as yet to the Government, a synopsis of it which we find in a morning journal declares that it will show that there was no system of books showing the real liabilities of the business to the shareholders, and that the officers of the company did not know their real position in that regard.

No clear idea of the amount which had to be earned in order to fulfil the company's agreement was held by the officers of the company.

The books were not audited. The auditor's certificates were untrue. The statements contained in the annual report were wholly untrue and misleading, particularly with regard to the amount of the liquid assets of the company.

In the report the assets are placed at $2,000,000, and the liabilities somewhat in excess of $3,000,000.

Whether the loans of the company to subsidiary companies are ultra vires or not will be settled in the courts in the course of the liquidation.

Queer ideas of the functions and responsibilities the auditors of the York Loan must have had not to have seen how wildly this huge concern was conducted and how needful it was to warn the public of its condition. This journal warned the public time and again to beware of its fly-trap, and we have the satisfaction of knowing that our words of caution have saved money to various persons in different provinces.

* * *

BANKING AND FINANCIAL.

We are informed that the Bank of New Brunswick has opened a branch at Fairville, N.B.

We are advised by the Bank of British North America that a branch of that bank has been opened at North Vancouver, B. C.

Merchants Bank has opened a branch at Stettler, Alberta, also sub-agencies at Alix to Lacombe and Gainsborough to Carnduff in the same province.

The president of a bank, when asked by a young clerk how he could distinguish the bad bills from the good ones said, "Get acquainted with the good bills, and you will recognize the bad ones at sight."

The Molsons Bank authorities give notice that they have opened a branch, known as the Queen Street West branch, in Toronto. It is situated at the corner of Beaconsfield Avenue.

The manager of the London Clearing House advises us of the following totals for that institution: Clearings for the week ending Dec. 30th, $961,762; for the same period last year, $594,563; for the present month, $4,735,884; for the current year, $50,429,511.

It is interesting to learn that Mr. F. H. Mathewson, manager of the Bank of Commerce, in Montreal, has been nominated for the position of president of the Board of Trade of that city. Mr. Mathewson is first vice-president, and is hardly likely to have opposition. He is the first banker ever nominated for the office in the half-century of the Board's existence.

According to the Montreal "Gazette," a branch of the Molsons Bank will be opened in St. Henri, at the corner of St. Remi and Notre Dame Streets, on Tuesday next, under the management of Mr. Del. Shepherd, formerly accountant at the St. Catherine Street branch of the bank.

At a meeting of the Montreal Stock Exchange a proposal to sell the five unsold seats for $20,000 apiece was defeated, and the opinion was expressed generally that in view of the extremely high prices ruling elsewhere, $25,000 should be the minimum purchase price.

The Sterling Securities Company, Limited, is the name of a concern with head offices in London, Ont., in which B. V. Hole, O. E. Brener and others of that city are members under an Ontario charter, which proposes to acquire, invest in, make loans and advances on all kinds of stocks, shares, bonds, debentures and securities.

Word comes from Winnipeg, under date 28th December, that Mr. Arthur Wickson, one of the best known bankers of Western Canada, will retire from the management of the local branch of the Merchants Bank, a position he has occupied for twenty-four years. Mr. Wickson has been forty years a banker, thirty of which he has been in the service of the Merchants in Montreal, New York and other places.

Last week, on the occasion of his leaving Montreal, where he has been local manager of the Merchants Bank, to represent the bank in New York, Mr. W. M. Ramsay was presented with a handsome gold watch. Mr. Ramsay has been connected with the Montreal staff for seventeen years, and has held the postion of manager for six years. The presentation was made by Mr. C. D. MacArrow, who has been named acting-manager.

A compilation of dividend-paying shares of railways, tramway lines, electric, industrial and mining companies in the United States and Canada has been made by Towle & Fitzgerald of Boston. It gives in the small space of thirty envelope-sized pages the par value, market price, and dividend for the three years 1903, 1904 and 1905, and the yield per cent. to the investor. The "miscellaneous data" added, such as gross and net earnings, amount of funded debt, etc., are very serviceable. The firm offers to send one of these to applicants on receipt of postage.

We have seen specimens of the new bills of the Home Bank of Canada—which institution occupied on New Year's its new and handsome Toronto premises on King Street, near Yonge, with its graceful concrete facade and Ionic pillars—and they are very attractive. The tens bear an illustration of a farm-yard scene and of the soldiers' monument in the Park: the fives have a vignette of Sir Isaac Brock and a figure of Commerce; on the twenties is a canal scene, and on the fifties a farm picture and the South African monument in Halifax, while on the back of each bill is a home-like group. The former premises of the Home Bank at 78 Church Street are maintained as a branch, while the head office is in the new building.

* * *

FIRE INSURANCE ITEMS.

Messrs. Scott & Walmsley have sent us calendars of the Queen City, the Hand-in-Hand, and the Fire Insurance Exchange companies, all neatly lithographed in quiet colors and with the days of the month clearly legible.

The city of Halifax expended $30,000 on its fire department last year. This sum covered the purchase of a new fire engine and the building of a new engine-house. It is intended to expend more than $33,000 on the department during 1906.

The report for November, 1905, of the Boston Manufacturers' Mutual Fire acquired a significance by being the last to bear the signature of "Edward Atkinson, President." Possibly the principal life work of the deceased underwriter could not be better summed up than in the information which appears in the report, that the average cost of insurance from date of organization in 1850 to December 1, 1905, was a trifle less than 17 cents per $100, while for policies terminated during the last ten years it was but a little over 9 cents.—The Chronicle.

LIFE INSURANCE ITEMS

Sentiment and business join in making life insurance popular and necessary—sentiment through the means which it gives of meeting the duty to protect loved ones, and business because the money's worth is given for cash expended.

Among the "Echoes" of the Union Mutual in its last issue is the following: Do widows believe in life insurance? Ask them! Better than anyone else, widows know whether life insurance is good, desirable and helpful, and, after all, they are the most vitally concerned.

Mr. John A. McCall, who has been for fourteen years president of the New York Life Insurance Company, resigned that office on Wednesday last, and Alexander E. Orr was appointed in his place, at a salary of $50,000 a year. The board of trustees also cut down the number of vice-presidents so that hereafter there will be two of these officers instead of three.

Mr. Charles Elliott Long has been appointed assistant manager of the British branch of the Manufacturers' Life Insurance Company of Canada. His insurance career began some 25 years ago in Gloucestershire with the Sceptre Life Association, afterwards in Plymouth. In 1893 he was appointed district manager for the West of England branch of the United Kingdom Temperance and General Provident Institution, which position he resigned in 1902.

Responsible critics of insurance matters in the Old Country are adverting to the danger of appointing inexperienced men to the control of the higher American offices. Without mincing words, some of them are saying that an efficient manager who is also a boodler is positively to be preferred in policyholders' interests, to a highly respectable individual unacquainted with the detail of an exceedingly complex business. It would do no harm to the business of these concerns in England, in the opinion of our correspondent to appoint the manager of some English or Scottish office to supreme control.

A curious prospect is opened up by some recorded doings of British life offices. It was represented to the directors of one that the longevity of a policyholder would almost infallibly be increased by a surgical operation which the man had not means to pay for. The office undertook the charge, and doubtless saved money. To another company it was suggested that the last days of a customer would be made happier if some of the accrued benefits were available at once for medical comforts and the like. Three-fourths of the insurable sum was paid over and the patient recovered, in despite of the opinions of the medical examiner attached to the company. "We seem," says "North Countryman," "to be drifting towards the day when insurance companies will pay us to keep well"

The following words of hearty appreciation of a book of Valuation Tables recently reviewed in these columns are from the "Insurance Record," of London, England.

"It is with genuine satisfaction that we receive what must be regarded as almost certainly the most valuable contribution to the actuarial armory yet made by the colonial sons of the Institute and Faculty of Actuaries, in the shape of a volume which contains a worthy continuation of those admirable tables of valuation functions which actuaries owe to the public spirit of Mr. Ralph Price Hardy. This debt must now be shared with Messrs. Thomas Bradshaw, F.I.A., and Frank Sanderson, F.F.A., who under the ægis of the Insurance Institute of Toronto, have published a set of net premiums and policy values based upon the Graduated Experience of British Life Offices, 1863-1893, on whole-life participating assurances on male lives: (in short, the Om table) at 3 and 3½ per cent. interest, including commutation and valuation columns. . . . The entire calculations were based upon the l and d columns of The British Offices Life Tables, 1893, published in 1902, special permission for this having been granted by the Institute and the Faculty of Actuaries."

DRY GOODS ITEMS.

A Montreal paper says that a number of Montreal capitalists have formed a syndicate with a capital of $250,000, for the purpose of taking over the merchandise, plant, patterns, etc., of the Semi-Ready Clothing Co.

As an illustration of the difficulties and complications with which the Tariff Commission have had to deal, such as were referred to in a recent article in these columns on the tariff question, may be cited their session in Valleyfield, P.Q., the seat of the Montreal cotton mills. A deputation of local farmers came forward on that occasion with a plea to increase the duty on cotton manufactures to 30 per cent., as in the neighborhood of the mills there were so many who depended for their livelihood on the work to be obtained therein. Mr. Louis Simpson, the manager of the mills, who was the farmers' spokesman, said that increases of duty on white and fancy cottons and on goods woven in stripes, checks and brocades were necessary to keep the mills profitably employed.

* * *

GROCERS AND PROVISION DEALERS.

P. Burns & Co., Vancouver, are about to erect a large packing house and abattoir on Burrard Inlet.

The city of Toronto has done well this year in its leasing of market privileges; the price was $36,675, or an increase of $2,575 over last year. The successful tenderer was Mr. R. Hunter.

At the annual meeting of the Montreal Wholesale Grocers' Guild last week officers were elected as follows:—President, Joseph Quintal; vice-president, A. Orsali; treasurer, J. Ethier; directors, S. J. Carter, L. O. Demers, W. Gendreau. The retiring president, Mr. L. E. Geoffrion, was unanimously chosen as the Guild's nominee for election to the Council of the Board of Trade.

It is probably not generally known that Alberta is such a large producer of dairy products. There are no less than twelve creameries in that province under Government control, with an output of 800,000 pounds annually, besides ten creameries which are run privately. The chief markets, not counting the Yukon, are in China and Japan. The industry seems to be not only thoroughly well established, but to be increasing by leaps and bounds.

At the International Live Stock Exhibition at Chicago, Canada received highest honors in the students' judging contest, the Ontario Agricultural College of Guelph receiving a grand total of 4,154.30 for judging horses, cattle, sheep and swine, the next competitor being Ohio, with a grand total of 4,068.33. On the other hand, Canadian sheep-breeders made a poor showing compared with their record in previous years. In championships the Americans won 13 and Canadians 7, while in firsts Americans won 36 and Canadians 7, and in seconds the Americans took 36 and the Canadians 26.

The quantity of wheat already marketed from the West is extraordinarily large, the total which so far has passed out of the farmers' hands being 57,831,000 bushels. Of this the C.P.R. has carried over 46,000,000 bushels. Besides this it is calculated that 7,000,000 bushels have been used for flour and that 8,000,000 bushels will be required for seed, so that there still probably remains in the farmers' hands between 12,000,000 and 17,000,000 bushels. Up to December 28th 38,498,250 bushels of wheat had passed inspection at Winnipeg, 14,452,000 bushels were in store in interior elevators and 2,745,818 bushels in store at Fort William, and the remainder in transit, 1,400,000 bushels being in transit on the C.P.R. system and 737,932 bushels on the Canadian Northern.

The plant which the Ogilvie Flour Mills Company are erecting at Fort William, Ont., bids fair to be one of the most important in the world. The mill proper will have a daily capacity of 5,000 barrels, though at present machinery

is being installed for 3,000 barrels. The steel fireproof elevator will have a storage capacity of 600,000 bushels to take care of all the wheat required for the large Montreal mills. The total frontage on the Kaministiquia river is 650 feet, and has water accommodation for vessels to the depth of 22 feet. The plant also comprises one of the largest flour warehouses in Canada, with a storage capacity of 125,000 barrels. There is also in course of erection a cooper shop, having a capacity of 2,000 barrels per day.

* * *

—A news item from Phoenix, B.C., dated 3rd inst., speaks of labor troubles at the British Columbia Copper Company's smelter at Greenwood, and at the Dominion Copper Company's smelter at Boundary Falls, the men claiming an eight-hour shift instead of one of twelve hours, with the same pay. Three hundred men as a consequence are out of work.

* * *

—Dr. Judson F. Clark, of the Ontario Crown Lands' Department suggests in the "London Times," a solution of the problem of giving work to the unemployed, who this winter seem so numerous in the Old Country. He points out that Britain's importation of wood is increasing, and foreshadows the depletion of the present sources of supply. Canada, he says, will presently need all her resources, and in less than twenty-five years her exportation to Europe will be very small. The United Kingdom has ten million acres capable of producing commercial wood crops, and re-foresting would give permanent employment to thousands for decades.

* * *

—According to the annual report of the Assessment Commissioner of Toronto, the real estate transfers for the year in the city up to Dec. 1st numbered this year 6,878, as against 6,610 in the year before. The increase in assessment of 1905 is $20,376,245, made up as follows:—Land increase, $2,392,586; buildings, $7,257,971; business assessment over personalty assessment, $835,935; income assessments, $3,887,773. It must be explained, however, that twenty per cent. of the increase is due to changes in the Assessment Act. The number of buildings in Toronto is 47,938, of which 16,096 are occupied by owners and 23,489 by tenants. Nine hundred and eight were found vacant by the assessors and 10 per cent. unfinished. The number of stores in the city is 4,894, and other buildings, churches, schools, etc., 1,506. The assessors report the construction of 1,566 new residences, which were not assessed last year.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, January 4th, 1906, as compared with those of the previous week:—

It will be noted that the figures for the two weeks below given are considerably less than previous weeks, which is accounted for by Christmas and New Year's day.

	Jan. 4.	Dec. 28.
Montreal	$26,148,043	$21,843,888
Toronto		18,653,377
Winnipeg	9,133,646	7,939,998

Mercantile Summary.

The bridge to be built by the Canadian Pacific Railway over the Saskatchewan river at Edmonton will be an extensive and costly affair. It is to be what is called a high-level bridge, for one bank of the river is much higher than the other; and the cost of it is stated at as high as a million dollars.

On Friday evening of last week Mr. R. B. Rice, who has had the financial management of the H. P. Eckardt Company since 1887, and is severing his connection with that firm to enter the Featherbone Novelry Company, was tendered a dinner in the Queen's Hotel. Mr. Eckardt, representing the staff, presented Mr. Rice with a handsome diamond and emerald pin and an address.

After a trial lasting 102 days, and which it is estimated cost Cook county $35,000, and the defence almost as much more, seven men have been found guilty and sentenced to terms in the penitentiary. Three of them were charged with beating a non-union man so severely that he died; the other four, officials of the Chicago Carriage-makers' Union, hired and paid for doing the job. The men are not yet in the penitentiary, for a new trial has been asked for, and the Chicago unions are prepared to spend thousands more in fighting for the freedom of the defendants.—Gazette.

AFFAIRS IN NOVA SCOTIA.

Business in Nova Scotia during the past year has, on the whole, been very satisfactory. An extraordinary condition prevailed for the first two or three months of the year in the snow-storms which interrupted trade and traffic all over the province. There was, in addition, the complete failure of some of the crops, notably hay, and the partial failure of others. A very large sum of money was sent out of the province to buy hay, and the effect of this was felt in the collections of the merchants during a large part of the year. Many cattle were killed off as a result of scarcity of fodder, and as a result dairy products were small all season. Had a second season of bad crops occurred, the result must have been serious. Fortunately, nothing of the kind had to be endured. All the crops, with the exception of apples, were extraordinarily good; and the small yield of apples was made up for by the high prices obtained. Prices of farm and dairy products have all been high. Creamery butter is three cents higher than last year, dairy butter, eight cents; cheese, 2½ cents; all poultry considerably increased in price. Apples averaged a dollar a barrel higher than last year.

The failure record for the last quarter of the year particularly, when conditions were more nearly normal, is not at all discouraging. Failures numbered 23, as compared with 37 in the year 1904; the liabilities were only $139,600, as against $703,524 for the same quarter in the previous year.

The rate of assessment of Halifax during the past ten years has advanced steadily from $1.38 to $1.73, that is, nominally; but the chairman of the finance department recently explained to the citizens that in reality the rate has not advanced much, if any. In 1895 the council used the sum of $35,000 of unexpended balances, and sums of considerable amount thereafter each year until 1902, which kept the rate down. In 1902 a law was passed providing that not more than $5,000 of such unexpended balances might be used in any one year. Unexpended balances to the amount of $48,000 have now accumulated, and if this might be used, as formerly, the rate would be reduced to $1.50. The chairman suggests that an improved assessment law would benefit the city. At present personal property "is reckoned by the amount of furniture in a citizen's house or stock in the merchant's warehouse." As an illustration of how inefficiently this works out the case was cited of a citizen who died a few years ago worth over one million, who was assessed on only $2,000 worth of personal property.

As a result of the new Liquor License Act adopted in Halifax last spring, the revenue from this source has increased over $15,000 and the law is much better observed. The city proposes to derive a rental hereafter from hatchways.

The railway double track from North Street to the dockyard is complete and in use, and is a great addition to the facilities of this port. It will enable cars of freight, instead of being crowded up and held over at Richmond, to be shunted right down to the wharves of the city, and emptied of their contents without delay.

The mail steamer "Corinthian" was fined $500 here last week by the customs department. She had landed a Chinaman without entrance papers. The customs officers put him back on board for deportation. The "Corinthian" went to St. John, and the Chinaman succeeded in escaping the vigilance of the customs people there. When the steamer returned here, she was fined as stated.

Fisheries have been fairly successful on the shores of Nova Scotia. The catch was about the same as in the previous year—which was not large—and prices a good deal higher. The price for cod went as high as $6.25, the highest in the history of the business, and the average price for the year was $5.75. The fishery has again suffered severely from the ravages of dogfish, and the proposal to can these pests as an article of food, under some more attractive name, appears to be the only way of diminishing their numbers. The same prejudice exists against this fish as that which once was so prevalent with regard to hake and haddock—a fish now almost as much sought after as cod. There is no good ground for the objection to dogfish, and experts are certain that they will yet be fished, not for the reduction works alone but for food.

Halifax, Nova Scotia, January 1st, 1906.

* * *

OUR NORTH OF ENGLAND LETTER.

The Free Trade newspapers have had great joy of an article signed "St. Lawrence," in an English financial weekly. The main argument is—and one would like to hear more from Canada on the subject—that it is preposterous to think that the Maritime, Middle, and Western Provinces are going to show gratitude for a wheat-tax that would benefit only the farmers of Manitoba, Saskatchewan, and Alberta. Canadians will perhaps take it as sheer perversity that our journal should urge that Imperial Federation must at length land Canada into the lap of the United States. It is the "Manchester Guardian" that takes that extraordinary view; finding justification for its pessimism in the limitation of autonomy that Chamberlain "must bring," as well as in an antagonism, thought to be infallible, engendered between ourselves and Uncle Sam. So long as this sort of prediction is looked on as plausible here, it will not do to assert that the British understanding of Canadian feeling is very thorough. Indeed, one may say roughly that Canadian newspapers and speakers ought to take early opportunity of making the Canadian attitude of mind quite clear.

Time was, within easy memory of the living, when American buyers of carpets came over here to the mills and bought, not only upon patterns, but on the paper sketches of carpet designers. Times and tariffs change, and United States orders for carpets are things almost entirely of the past. English makers of carpets and floor rugs have a respectable Canadian turnover, and one firm testified lately, before Mr.

The FIVE per cent. Debentures issued by this Company afford the following advantages:

- The investment can be converted into cash at any time after two years by giving sixty days' notice.
- The issue of Debentures is limited to an amount not exceeding 75 per cent. of the Paid-up Capital of the Company.
- The total amount of Debentures to be issued will not exceed 20 per cent. of the value of properties under Mortgage to the Company.
- The Debentures issued by the Company will be a first charge upon the assets.

Chamberlain's Tariff Commission, that under the preference its Canadian business had doubled. Our carpet-makers are among the most unanimous of trades favorable to tariff reform. Woolen manufacturers of the finer grades of cloth are largely favorable, but cotton spinners and weavers,—depending on free imports and unobstructed free exports—are almost wholly hostile. Yet it would not be saying too much to urge that the idea of using a British tariff as a menace to other tariff-builders has been gaining ground. Theoretical objections are many, but to the business man there seems something to be said for having an unpleasant alternative to propose in case foreign tariff-makers are obdurate.

Nottingham and Leicester deponents before the Tariff Commission are agreed as to the advantages to them of the Preferential Canadian tariff, and particularly of the German surtax. The latter has had the affect of diverting to Leicester, buyers who went formerly to Chemnitz. Certain makers of plain goods in Leicester kept their plants busy last winter on Canadian orders. One has heard, through friends not wholly out of touch with such matters, that Canada is not behind England in the production of the knitted woollen goods for which Nottingham and Leicester are reputed. Hence it seems the more strange that witnesses should have asserted that "Canadian fancy knitted goods are frequently makeshift and inferior." Our Leicester knitters have had a busy and a profitable season this year, due in some measure to improved home trade, and assisted greatly by the capacity of Huddersfield yarn-spinners to supply material for knitting at phenomenally low prices. Nominally woolen, these yarns do not contain much that a sheep would recognize as wool. Cotton, shoddy and waste wool take the place of the virgin raw material.

More business is being done in Manchester in Canadian fruit; differences between Liverpool brokers and inland retailers accounts for some of this development. But Canadian apples are growing in estimation and certain brands are not reckoned far inferior even to American Newtown pippins, which have a generation of goodwill to their credit. In the fruit salesrooms in Deansgate one day in November, 5,880 barrels of American, and 1,800 barrels of Canadian apples changed hands, as well as 17,000 odd packages of oranges. The day's business involved some 36,000 packages of fruit, which is enough to show that Manchester market has no small absorptive capacity. Canadian fowls have been unshipped in large quantities at the canal docks, and as these have arrived in a time of short supply, turkey-growers in Canada should have no cause to regret their speculation. For Christmas dinners we import turkeys from all countries of Europe, though we raise the best-priced birds at home. Our leading agricultural expert, it may be observed, contends that turkeys are more profitable farm-stock than sheep. We keep, in this country, about 30,000,000 sheep, but vastly fewer turkeys and a strangely insufficient supply of hens.

With the example of neighbors before their eyes, occasional Canadians can be pardoned for supposing that the first duty of mankind is to "hustle." But a large proportion of truth remains in the old adage: More haste, less speed, and the danger of the American community in England has been assuring us that we lose less time than even Yankees in many details of business. Mr. John Morgan Richards, chief engineer in England of a certain line of American pills, has been making comparisons, and in several respects he finds that hustling methods occupy more time than what we call activity. Mr. Richards deals with baggage transport, hotels, meals, reading, punctuality, and such et ceteras. He inclines, however, to believe that less expedition prevails in English workshops. This is a comparison that can only be made by those with full experience. It is the case in many English workshops, if not in all, that work proceeds as fast as work can, and that no men who are merely made of bone and muscle can go faster than the pace determined for many of our machines. Such, at least, is the case when quantity is the prime consideration. When quality is wanted there must be an allowance of adequate time, and quality is, after all, only an equivalent way of returning value.

NORTH COUNTRY.

Manchester, 22nd December, 1905.

INSURE YOUR STOCK.

With the very laudable purpose of inciting their customers to make certain the adequate insurance of their stocks against fire and the methodical arrangement of the terms of insurance policies so as to comply with the requirements of underwriters, Messrs. John Macdonald & Co., of Toronto, have issued a circular, bearing date 1st January. This document is headed, "Insure Your Stock." Some quotations from it will be found below:—

"We have before alluded to the frequency with which fires seem to occur during the winter months, and the fact that stocks will rapidly increase from now on naturally means that every business man will carefully consider the question as to whether he has sufficient insurance in force or not. The points to be considered are, in brief as follows:—

"Read your policies carefully, see that you comply with every condition imposed by the various companies in which you may be interested.

"It is imperative that policies covering the same stock should be exactly alike in all essential particulars, see that the facts material to the risk in connection with your insurance are correctly stated.

"As a protection the total insurance carried should not be less than 80 per cent. of the value of your stock when at its highest point."

In our issue of Nov. 17 we referred to the injury often wrought to creditors of retailers because the latter do not carry insurance enough to cover their stocks in case of fire. This week we have had called to our notice two cases which illustrate admirably how such negligence works out, and what comfort an opposite policy can give.

On 27th December last year Clavitt & Bradbury, general storekeepers at Cooper's Falls, Ont., were burned out. They carried a stock of $7,500 or over, against which there was an insurance of only $3,000. The result was that at a meeting of creditors held in the office of Osler Wade, the assignee, an offer of 50 cents on the dollar was made by the firm.

In contrast with this let us speak of another instance. Stewart Anderson, who conducts a general store at Wheat-

ley, Ont., also suffered from the effects of a fire recently. He had a stock worth in round figures $8,500. But he had the good sense to carry $7,500 of insurance, and as a result he is not going to his creditors cap-in-hand to ask to be let off by the payment of half what he owes.

* * *

LOSS OF LIFE ON OUR GREAT LAKES.

The extent of the steam and sail traffic of the Great Lakes is illustrated in a most unhappy way by the list of deaths of seamen in the storms which come towards the close of navigation. The lives lost in 1905 are given at 215. Of these 116 were drowned off the ships during the three great storms of fall. The remaining ninety-nine were lost by falling overboard and like cases. No such loss of life has been recorded on the lakes in recent years. Last year the number was only forty-nine; in 1903 it was ninety-four; in 1902 it was 140; in 1901 it was 122, and in 1900 only 110. Previous years give a record of 100 in 1899; ninety-five in 1898; eighty-eight in 1897; sixty-six in 1896. But a total of 1,079 deaths in ten years is sufficient to mark the dangers of navigation in these great inland seas.

The largest lake was this year the most productive of fatalities. Lake Erie, which led the list of dead sailors for a number of years, the past season gave place to Lake Superior, where ninety-five sailors were lost, as compared with forty for Lake Erie, thirty-eight for Lake Huron, fifteen for Lake Michigan, ten for Lake Ontario, eleven for the Detroit-St. Clair River passage, and six for the Soo passage.

It is so far satisfactory to know that out of the millions of passengers carried on lake boats, but two were lost this year. One was a suicide and the other passenger simply disappeared. None lost their lives in the autumn storms. The great gale of November was considered by vesselmen as perhaps the most dangerous gale on the Great Lakes for a decade during the season of navigation. The great steel ships which now ply the lakes were absolutely powerless when without cargo and standing up against the fury of the wind.

The question is natural; can nothing be done to prevent such loss of lives of seafaring men? A suggestion on this point was made in a letter in a late issue. That the greed of owners should help to send sailors to their death is unpleasant to think of. A Detroit paper tells us that some changes in the weather bureau service regarding the display of storm signals is considered necessary by vesselmen in order to get full benefit of that important government work. No signals whatever were displayed for the September storm.

* * *

BRITISH COLUMBIA MATTERS.

The activity and growth of our Pacific province imposes added responsibility upon its Government, for there are constant demands for extension of public works and requests for aid from many newly settled districts. We learn from a recent utterance of the premier of that province, Hon. Richard McBride, something at all events of what he does not purpose doing. He told the Nelson "News" some days ago, in answer to questions, that he had a conference with Sir Wilfrid Laurier, during which many matters of detail affecting several departments were discussed. The purport or result of these matters, the premier intimated, would be disclosed in due time.

Acknowledging also that he had conferred with the heads of several transcontinental railway companies, including the C. P. R., the G. N. R., and the G. T. P., but while friendly with them all, he declares that "any suggestion that I am or have been, or have even contemplated, making a bargain with any corporation, or offering special privileges to any is too absurd to require contradiction or comment." He made it plain that his government is not going to antagonize any railway company wantonly. That would be foolish as well as unjust. Perceiving that British Columbia wants railways, many of them, and as soon as possible, "the government will do everything in its power to encourage and assist railroad enterprise. But it will not alienate nor cripple the assets of the province, or any part of them to enrich corporations whose own interest will induce, yes, even require them to build."

Further extracts from this interview show Mr. McBride's intentions with regard to the ownership of railways. On this point he says: "Neither is it the policy of the government to provide the cost of the construction of a road to be handed over afterwards to a private corporation. A thorough understanding of this by the public as well as by the corporations will clear the air and facilitate an understanding. It will also, I believe, expedite the building of roads where industrial conditions make them legitimate business enterprises." He was careful to explain with respect to public works generally, that the members of the government, the cabinet ministers, have spared no efforts to acquire an intimate knowledge at first hand of the really pressing needs of every district of the province. Such will be attended to and provided for as rapidly as the financial conditions permit. Of his brief visits to New York, Halifax and Toronto the premier spoke with animation. They were, however, for the most part on private business.

* * *

OUR AUSTRALIAN LETTER.

Two important contracts have lately been signed by the Premier of New South Wales with the object of developing the iron and steel industry. By one contract an old established Sydney engineering firm engages to manufacture sixty locomotives for the Government railways, at a price estimated about 25 to 30 per cent. more than British and American quotations. In the neighboring state of Victoria locomotives have been made on a large scale for some years, both by a private firm and by the Government. The authorities there claim that it is nearly as cheap to make locally as to import. The other contract referred to is an agreement with W. Sandford, of Lithgow, to supply certain of the steel requirements of the Government and other railways during a series of years. Rails are not included, but it is estimated that several hundred men will find employment. Furnaces and plant are being imported from England. Lithgow is situated 95 miles from Sydney and has iron and coal in close conjunction, but it is not yet known what percentage of ores will have to be brought from other deposits to make a good steel mixture.

Trade in New South Wales remains in an unsettled and unsatisfactory condition. The wool season is now at its height and up to date it promises to make a better return in cash for the State than any previous year. The quality of wool, due to abundance of feed and favorable seasons, is exceptionally good and prices are maintained at high rates. The wheat harvest commences in a few days and it is now safe to predict a fair average crop. The minerals in which this State is particularly interested are also bringing exceptionally good prices. In fact, the total exports are so far in excess of the record figures of last year. These facts seem to be a contradiction of the statement as to unsatisfactory trade, yet such is the case. The fact is that as a result of the heavy exports money has been pouring into the banks. One institution announces an increase of £2,000,000 in deposits and cash held, and a reduction of £27,000 in advances. The money has been made but not distributed, largely because of an uneasy feeling in financial circles resulting from the Socialistic tendency of legislation. This, however, is only a passing phase and you may expect to hear of the return of more favorable conditions shortly.

The Canada Cycle and Motor Company, Limited, has made some important changes during the past few months in the conduct of its Australasian business. Up to a recent date the head office of that company for the Commonwealth and New Zealand was located in Sydney with branch offices, warehouses and retail establishments in the principal cities of each State. Under the new arrangements the head office has become transferred to Melbourne, and the warehouses and direct retail trading will be confined to the State of Vic-

toria. The business in New Zealand was sold some months ago to a locally organized company, which, it is stated, has turned out a very profitable undertaking. In New South Wales and Queensland purchasers have also been found, and the process of transfer is now taking place. It is probable Mr. T. F. Byrne, Australasian manager, will return to Canada early in the New Year.

Mr. J. S. Larke, the Canadian Commissioner, is expected back in Sydney in about ten days' time. His visit has already stimulated correspondence from various Canadian makers; and with improved buying power at this end, you may confidently look towards increased business between the two countries.

The new turbine steamship "Maheno," which will commence running between Vancouver and Sydney in March next, arrived from Scotland on Saturday. This boat is classed as the most comfortably and elaborately fitted out of any leaving this port. It is certain to increase the popularity of the Canadian route to America and Europe.

F. W.

Sydney, New South Wales,
27th November, 1905.

* * *

MUNICIPAL GOOD RESOLUTIONS.

It is reasonable to suppose that not a few conscientious public servants make good resolutions of a municipal kind at the beginning of a new year, just as many ordinary mortals do. In order to help such officers to make a sane choice we reprint from the "Canadian Municipal Journal" the following suggestions made by the mayor of Denver, Colorado, who aspires to a more beautiful Denver, and is doing what he can along practical lines looking to that happy consummation. Believing in the value of personal suggestion and direct appeal, he addressed a proclamation to the citizens, in which he said:—

If your store front, residence, or fence is dull or dingy, order it painted.

If your awning is old, torn, or faded, get a new one.

If your sidewalk, fence, or gate needs repairing, fix it.

If your advertising sign is old and faded, take it down and paint it.

Destroy the young weeds that are starting on your property, and on your neighbor's property.

Resolve never to throw paper in the streets.

Take all dandelions out of your lawn—they spoil the beauty of it.

Burn all the rubbish possible; allow no one in your house to throw it on the streets, alleys, or vacant lots.

Promise not to spit on the sidewalks.

Organize a block improvement society, and permit no weeds to grow on sidewalk, area or vacant property in your block.

Ask your milkmen, grocerymen, and expressmen to have their waggons painted.

Irrespective of the size of your house make your lawn the finest on the street.

Illuminate the front of your store in the business section.

Every effort put forth or dollar spent to improve our city's appearance will be returned twofold.

It is claimed that these suggestions have been cordially carried out by the people of Denver, and that they are perfectly delighted with the result. What has been done there can be done here.

* * *

COMMERCIAL TRAVELLERS' ASSOCIATION OF CANADA.

The thirty-third annual meeting of the Commercial Travellers' Association of Canada took place in Toronto on the 28th ult., when there was an animated discussion on the proposed increase of the mortuary benefit fund to $1,000, and on the proposal to assess members when the funds available from fees should be insufficient to meet death claims. Under the present regulations, only half the annual fees can be utilized to pay death claims, and it was argued by Mr. Fielding, who introduced the resolution, that the power to levy an assessment should be conferred on the directors in order to secure the success of the increased mortuary benefit. Mr. J. F. Ellis, however, claimed that, with the sum of $500,000 in reserve, the Association had a sufficient guarantee that it could pay all death claims, and that provision for further assessments was unnecessary. This amendment, however, was lost, and Mr. Fielding's original motion carried by a considerable majority.

The financial statement of the Association showed that the total receipts for the year ending November 30th last, amounted to $98,521, besides which the sum of $6,560 was held over from last year. The disbursements were: General expenses, $4,495.63; office expenses, $2,864.27; building expenses, $2,129.99; mortuary benefits, $36,337.50; the investments were $57,197.58, leaving a balance of $1,885.39 in hand. The total membership of the order on November 30th last was 7,410, an increase of 578 for the year.

In the election of officers Mr. Thomas McQuillan, Toronto, was unanimously elected president: Mr. Lewis A. Howard, Toronto, first vice-president, and Mr. E. Fielding, Toronto, treasurer. The other officers were as follows:—Second vice-president, George West, Toronto; directors, for Toronto, R. Gemmell, Louis Glover, W. J. Micks, C. J. Tuthill, R. J. Wylie, S. M. Sterling, James G. Cane, A. C. Roger, W. M. Fielding; directors for Hamilton, R. M. Stuart, John Stoneman, P. A. Somerville, E. W. Moore, H. P. Wright, James Hooper; directors for Kingston, W. S. R. March, W. H. Graham (acclamation); directors for Montreal, William Cauldwell, William Creighton; directors for Berlin, A. Foster, J. Knauff: for Brockville, N. Moore; representatives on Toronto Exhibition Board, T. McQuillan, and E. M. Ellis; auditors, W. H. Cross, H. W. Barber.

* * *

TORONTO'S GROWTH.

Every Torontonian believes the past year has been a prosperous one, but various compilations of figures make them know it. The value of building permits issued was $10,347.910, compared with $5,896.120 in the preceding year, or an increase of $4,451,790. The number of permits issued last year was 2,674, as against 1,725 for 1904. A further idea of the enormous growth of the city may be realized by the fact that the permits issued in 1901 numbered only 710, and represented $3,568,883 in values. In 1902 the figures were 1,100 permits and $3,854,903 in values, and in 1903 permits numbered 1,480, and the values reached $4,356,457. The values of last year exceed the joint values of 1904 and 1903 by more than $90,000. In the permits issued in 1905, slightly more than 2,400 houses are represented, and one-half of these cost less than $2,500. Whilst the permits numbered 2,674, the total buildings are more numerous, because frequently two, three, and even as many as a dozen houses when being erected in a row, or by one party, are all included in one permit. The building of new schools, churches, banks, warehouses, factories, and workshops has added largely to the values, the Traders Bank head offices alone representing between $500.000 and $600,000.

The City Engineer's Department, of Toronto, according to a report just to hand, spent the sum this past year of $1,673,018 in various works throughout the city. Of this amount about $250,000 is for the Street Commissioner's Department. The other chief items of expenditure were: Local improvements, pavements, $368,940; concrete and brick walks, $147,940; sewers, $40,679, and wooden walks, $4,836. Waterworks expenditure amounted to $591,608.14, made up as follows:—Maintenance, $167,948.29; construction, house services, $38,652.41; renewals, house services, $5,402.40; short lengths, $2,572; special works, $348,702.03; revenue mains, $28,421.01. Including new and reconstructed track allowances, a little over eighteen miles of new pavements have been laid of which 5.332 are asphalt, 1.635 bitulithic, 1,363 macadam, 1,237 tar macadam and 2,060 reconstructed macadam. No less than 35¼ miles of sidewalk have been laid, of which 33½ are concrete. The maintenance branch of the roadway department had a very busy year. The snow removed from sidewalks during the earlier months represented the clearing of 430 miles.

Mercantile Summary

The Mote Dry Goods and Furnishing Co., of Vancouver, B.C., has just assigned. The amount involved is not yet made known.

The Peterborough Saskatchewan Land Corporation, Limited, has a charter to carry on a land business with the usual powers. E. C. Howson and others, of Peterborough, Ont., are the leading spirits.

The Canadian Northern Railway has reduced the freight rate on grain, flour, oatmeal and mill stuff shipped from Edmonton to Port Arthur. The rate, which was formerly 28 cents per hundred, is on the new basis 25 cents, or 15 cents per bushel.

Mr. Sidney Low tells in the Londo "Standard" a story about a Madra tradesman who brought an action agains another to restrain him from using hi trade name, which was English an high-sounding. The judge of the Hig Court, whom we may call Sir Williar Ramsbury, in giving judgment agains the defendant, explained that he wa quite at liberty to adopt any name but that pre-occupied by the plaintiff. "Ma I use any name I like?" said the defeated litigant. "Certainly," said Mr Justice Ramsbury. The next mornin his honor received a card, announcing that "Ramsbury and Company" wer prepared to supply him for cash on th most reasonable terms.

Debentures issued for 3 or 5 years. Debentures and interest can be collected at any agency of Molsons Bank without charge.

WILLIAM F. BULLEN,
Manager.

London, Ontario, 1906.

The failure is noted of Anaclet Boutin, for several years past trading in flour, grain, etc., at St. Sebastien de Beauce, Que. He is a man well on in life, who has always been a farmer, though a good many years ago he is said to have engaged in trading ventures unsuccessfully.

The Prudential City Property Company, Limited, Hamilton, has been granted a charter by the Ontario Government authorizing it to carry on a land company business under the usual restrictions. The capital is placed at $250,000. G. J. Ashworth, of Hamilton, and H. H. Anderson, of Grimsby, are among the charter members.

Revenue returns for the United Kingdom for the period between April 1st and December 31st, 1905, show total receipts of $481,738,060, or a decrease of a little over $383,000, compared with the previous year. Among the increased items are $3,567,000 additional on estate duties, $3,000,000 for stamps, and $3,650,000 for post-office and telegraph, while on the decrease side are $6,600,000 for customs, mainly due to the reduced duty on tea, and $2,019,110 for excise.

Mr. J. J. Godfrey, of Vancouver, is said to have interested English capital to the amount of £150,000 in a project to establish a large fish-curing factory to handle every description of fish found on the Pacific coast except salmon. A practically unlimited market exists in England for fresh halibut, kippered herring and all sorts of smoked and cured fish. Steam trawlers would likely be used. The works would be located in or near Vancouver, and the head office of the company in London.

A demand of assignment has been made upon the estate of the late R. Birks, druggist, in Montreal, and with the probable winding up of the business there will pass away a name familiar to two generations of Montrealers. The late Mr. Birks first began business in 1828, and continuously carried on, practically in the same stand, for seventy-three years, dying at the age of ninety-five in the spring of 1901, since which date the business has been carried on for the benefit of his widow. Mr. Birks was highly esteemed by all classes, and his deeds of charity to the poor of Griffintown, by whom he was familiarly known as Doctor Birks, were numerous. He was seen at his store early and late, and walked every day from his place of business, on McGill Street, to his residence on the upper levels of University Street up to within a few months of his death. We venture to say that there is no similar record in the Canadian durg trade.

Under the Act respecting the licensing in Ontario of extra-provincial corporations the Ontario Government has authorized the Lake Superior Corporation, incorporated under New Jersey laws, to purchase and construct and op rate canals, sell water and power from such canals, and to engage in manufacturing and mercantile business, develop mineral lands, build boats, etc.

Moore Bros., of Brussels, Ont., furniture dealers, recently assigned to C. H. Broadfoot. Previous to starting this business about three years ago they were farming near Brussels, owning about one hundred acres of land, valued at $6,000, with a mortgage of only $2,000 on it. In spite of their inexperience they purchased, at the time referred to, the stock of Cardiff & Walker, amounting to $2,400, paying $500 down, giving notes for the balance. The sequel to this move is the assignment already referred to.

Upon another page will be found a photographic reproduction of the Canada Paint Company's works in Montreal. It is to be remarked that this company is owned almost entirely by Canadians. The president is Mr. S. F. McKinnon, and the secretary Sir Henry M. Pellatt, with Mr. Robert Munroe as managing director. In addition to the buildings shown in the photograph, this company has extensive works in Toronto, which it is intended to illustrate next week. Their oxide and graphite mines are situated at St. Malo, Que., and St. John, N.B.

Mercantile Summary.

Two years ago J. H. Tougas, of St. Johns, Que., engaged in the hat and fur trade, succeeding his former employer. He started on a limited capital, and has now assigned on demand.

A winding-up order has issued in the matter of the Carleton Foundry Co., Limited, of St. John, N.B. The concern is one of very moderate calibre, incorporated in 1902 with a capitalization of $6,000.

The steamer "Pass of Melfort" was on the 28th December caught in a terrific south-wester off the Straits of Fuca, on the British Columbia coast, and struck on the rocks, with the loss of all her crew.

A Montreal grocery retailer named L. R. Belanger has been put into insolvency. He began business two or three years ago, and had for eleven years previously been in the employ of a wholesale grocery house.

The Shanghai correspondent of the "Daily Telegraph," of London, says that the Chino-Japanese treaty opens the following towns to trade: Fengwang Cheng, Liao Yang, Sinmintung, Tiehling, Tungchangtse, Changtu, Fakomen, Changchun, Kirin, Harbin, Hunchun, Sansin, Tsitsihar, Hailar, Rigun and Monjuria.

A demand of assignment has been made upon Alexis Bisaillon, in quite an extensive way of business as a country carriage-maker at St. Remi, Que. He has been reported hard up for money for some time past, and a judgment recently recorded against him for $1,254 has evidently brought matters to a focus.

The Canadian Pacific Railway has appointed Mr. W. S. Painter to its new office of General Architect, with head offices in Montreal. He will have charge of the designing of the company's buildings erected along the entire route of the railway's lines. Mr. Painter, it is stated, has designed many large buildings in Canada and the United States.

In various parts of the Dominion there were more or less destructive fires on the last two days of the old year. A serious loss was that of Pickering College, the well-known Society of Friends institution near Whitby, which was totally destroyed, the damage being estimated at about $30,000, covered by insurance.—At Wheatley, Ont., Stewart Anderson's general store, with all its contents, was burned, the loss being $8,500.—Lyons' harness store at Flesherton, Ont., burned with a $3,000 loss, fully insured.—Gunn's Opera Block, in Truro, N.S., occupied by Fraser & Co., clothing; A. B. Cox & Co., tailoring; Dominion Atlantic Railway office; G. Johnson, jeweler; D. R. Fraser, boots and shoes; total loss, $50,000, less than half covered by insurance.—R. & T. Hendsbee's factory and fish store at Canso, N.S.; loss, $18,000, partially insured.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary.

The Crystal Hotel, owned by F. H. Gorham, at Buckingham, Que., was a few days ago completely destroyed by fire, and some adjoining buildings injured. The total loss is placed at $9,000, with little insurance.

The Vancouver, Westminster and Yukon Railway Company is preparing to go on with the proposed extension of its line northward to a point near Fort George, and to meet the Grand Trunk Pacific just as soon as it can get its subsidy from the British Columbia Government.

The Spanish Mills Company, Limited, capital $100,000, has been authorized by the Ontario Government to carry on business as timber merchants and growers, and to manufacture and deal in all kinds of articles in which wood is employed. B. W. Arnold, of Albany, N.Y., and W. J. Bell, of Sudbury, Ont., are interested. Spanish Mills is a village in Algoma.

The Canadian Pacific Railway, in conjunction with the Pennsylvania Railroad and with Mr. J. W. Ellsworth, a large colliery owner, of Cleveland, O., have decided to establish a train ferry service between Port Burwell, Ont., and Ashtabula, Ohio. The new service is the logical development of the acquisition by the Canadian Pacific of the Tilsonburg, Lake Erie and Pacific Railway.

Last month the C. P. R. Land Department sold 52,218 acres of land at an average of $5.40 per acre, and in the whole year the quantity sold was 732,332 acres, the amount realized being $4,041,244. During the previous year 520,665 acres were sold for $2,240,529. During the month the Canada & Northwest Land Company sold 11,190 acres for a total sum of $77,870. The sales of that company for the entire year amounted to 144,860 acres, the total amount received being $966,340.

Figures collected by the "Railroad Gazette" show that 168,006 cars were built during the past year for Canadian and United States railways, as compared with 62,950 in the previous year. Of the total, 165,455 cars were for freight service and 2,551 for passenger service. Of this amount, Canadian firms built 2,164 cars, an increase of 22 over 1904. The total number of locomotives built in 1905 was 5,491, compared with 3,441 built in 1904. The amount of money involved in the building of the freight and passenger cars is represented as $17,857,000, and the amount for locomotives $76,874,000.

Mercantile Summary.

The Ontario Cobalt Developing Company, Limited, Toronto, has been incorporated with an authorized capital of $350,000. J. W. Curry, Toronto, and J. Bingeman, of Berlin, Ont., are provisional directors.

The Niagara, St. Catharines and Toronto Railway are to have built in the yards of the Canadian Shipbuilding Company an up-to-date twin-screw steamer for the route between Toronto and Port Dalhousie, to be ready for the season of 1907.

Bucknell Bros. have come to an agreement with the Dominion Government to furnish a direct steamship line beween Vancouver and three New Zealand ports, giving not less than six trips annually. The Government will give them an annual subsidy of £10,000 on condition that the New Zealand Government will do the same.

The tyranny and intolerance of the unions, says the Kansas City "Journal," can no longer make a non-union man an industrial pariah and outcast. In exercising the inalienable right of an American citizen not to join a union, a non-union workingman never deserved the reproach of being a "scab," and hereafter he will be protected from its unjust consequences.

Mr. D. H. Ross, Canadian trade agent in Australia reports that the first shipments of British Columbia salmon arrived in Australia in splendid condition, and have given every satisfaction to importers. He says that orders are going forward to Canada for wood pulleys. The rubber business is unusually quiet for this season of the year, and an improvement in the conditions is anxiously looked for by the representatives of Canadian manufacturers of this line of goods. A line of Montreal shoe polish is meeting with an increased sale, and the quality is giving every satisfaction. Recent shipments of Canadian cheese, in jars, have come forward, he states, in good order and condition.

The liquor and tobacco sales returns of the country, in these days of strenuous temperance, are always of interest. The quantity of spirituous liquor catered for consumption in the last fiscal year was 3,112,843 gallons of the value of $5,947,126, as compared with 3,481,287 gallons in the previous twelve months, valued at $6,656,602, or a decrease of 368,444 gallons in quantity and $709,476 in value. The consumption of malt liquors has grown larger, the quantity manufactured having been 30,330,070 gallons, or an increase of 3,004,085 gallons. The foreign demand for Canadian made spirits is increasing, last year the export having been 211,525 proof gallons against 180,291 in 1903-04, and 148,154 in 1900-01. With regard to the practice of smoking, it is evidently a more prevalent habit than ever. Last fiscal year the consumption by the Canadian people was 8,115,904 lbs. of tobacco, 6,708,800 cigarettes, and 93,084,295 cigars, a gain of 401,199 lbs. of tobacco, 4,522,309 cigarettes and 5,739,266 cigars, comparing with the previous period. We do not like to see the cigarette habit increasing.

❧ ❧ ❧

A CHANCE TO HELP.

The ravages of consumption at our own doors find frequent illustration, and should make us respond with our spare dimes or dollars to the claims of the worthy Ontario establishments represented by Mr. W. J. Gage, or Mr. H. C. Hammond for the cure of that dread disease. From the recent letters of Dr. Grenfell, too, the needs of hospitals to treat cases of tuberculosis at the Labrador coast or on the shores of Newfoundlanr are strikingly shown. Here are two examples:

At Bridore, on Canadian Labrador, I came to a man of 25 years, a Protestant, with two children and young wife. He had tubercular disease of the spine, and having no hospital to go to, or doctor, got it bent badly enough to give him complete paralysis below the waist, and when I saw him, too late to do anything he was dying a miserable death; a mass of bedsores, and no kind of attention, or any means whatever to relieve him.

A week ago I picked up another young man (Roman Catholic). This time eight miles from St. Anthony Hospital. He, too, had tubercular disease of the spine. Just beginning to bend, and commencing paralysis below the waist. Couldn't raise legs from bed. We took him at once, put him in proper jacket; already his paralysis is disappearing, and, of course he will have no bed sores. Note the contrast in these two cases.

❧ ❧ ❧

REPORTS ON TEXTILE MATERIALS.

Of late there has seemed to be a better feeling in the market for dress silks as well as ribbons, and with the elimination of some of the unreliable factors it is believed that the market is on an upward course, with the possibility of absorbing a much larger output of raw silk, says the New York "Dry Goods Economist." Exchange in certain of the foreign markets has been a potent factor in the regulation of price throughout the year, and had it not been for its rapid rise it is probable that much greater fluctuations in raw material would have been experienced.

AGENTS WANTED in every unrepresented District in Canada.

quiet, says a Boston report, although manufacturers of men's wear have been making a number of enquiries about extra hard twist yarns, but the prices named did not suit them. Small orders were received from manufacturers of dress goods. In medium and low-grade yarns, in 20-cut a fair volume of business was done with manufacturers of dress goods, and makers of men's wear took considerable quantities of low-grade yarns. In fact, manufacturers of cheap men's wear are taking the bulk of the low-grade woolen yarns in 12-cut. Knitters are taking some 20-cut, high-grade woolen yarns for eiderdowns and 20-cut two-ply for gloves and sweaters.

Merino yarn spinners are doing a fair volume of business with manufacturers of men's wear, dress goods and knitters. The general run of the demand is for 50-50 yarn, but some few orders are received for yarns containing a larger percentage of cotton.

Referring to prices on woolens, a correspondent of the London "Drapers' Record" writes that there is a great struggle still proceeding in Bradford, as consumers are desirous of acquiring raw material at rates which will enable them to produce their goods at current prices without actual loss, and holders of all classes of wool are more confident than ever, after the recent London sales, that no decline in prices is to be looked for in the immediate future. The increase in the imports of pure Australian merino wool will this season be very considerable when compared with those of recent years, and some reduction in the prices of these very fine wools would under ordinary circumstances be expected, but the prospects of the coming year's trade, both in this country and abroad, are distinctly good, and there are no indications at present of the supply overtaking the demand to an extent likely to materially reduce values for some time to come. It should not be forgotten that a time of prosperity is a time for the wearing of fine raiment, and for the making of these fine cloths merino wool is absolutely necessary, and is, therefore, likely to be in increased demand. The principal factors which go to make up the situation in regard to the coarser fibred wools are the demand for fabrics of the tweed description and the state of the trade in exporting worsted yarns, as a very large proportion of these wools are consumed in these two very important trades. At present all the makers of tweeds and similar fabrics, both for ladies' and men's wear, are, if possible, busier than ever.

As to the manufacturing branches in Glasgow, cottons have been more active and prices have been good, says an exchange. The feeling seems to be sound, and in favor of values holding. There has been a pleasing absence of speculation, while ordinary business has been of wider volume than had been looked for. In linens, some firms have withdrawn their price lists in view of the outlook for flax. The demand has been steady for all descriptions of linens, although manufacturers find buyers irresponsive to the higher prices current. Until the outlook for raw stuffs is clearer prospects are against business reaching large dimensions. Lace manufacturers easily overtake the orders on offer for home uses, but more pressure has been found necessary to execute those for export to the Continent and the colonies. The continued high price of yarns, however, means certain loss to the manufacturer on the season's orders.

In the Manchester home trade houses a rather quiet time is just at present being experienced, owing to the holiday season. Business, however, has been done during the last few weeks, and most wholesale houses are looking forward to a better report for the past year than was expected last January. Nearly all kinds of soft materials, such as lawns and voiles and mercerized cloths generally, are in favor, and tartan checks, both in printed and woven goods. The active demand for velveteens still continues, and makers are exceedingly busy. Linings and sateens, which have not been very active for some time, are showing up better, and a fair business is being done. The high values in raw cotton are against buyers, but orders continue to be given out, as goods have to be secured to meet the demand.

* * *

IRON AND STEEL MARKETS.

A Chicago report says: The present remarkable activity in the metal markets is doubtless as much a matter of surprise to the producers as it is to the buyers. The peculiarity of the activity is its universality. There may be some weak heavier buying of one product than of another, but it is only a matter of slight degree or of small departure from the common conditions. It is stated that there is probably not a steel product made in the west, the purchases of which during the month of December were not larger than was the production. Certainly that condition applies to the great majority of the mill products. There are some steel men who looked for the demand for the metals to reach its climax at about this time and to hereafter gradually taper off until a considerably lesser volume was reached. To them especially this voracious demand for steel during the holiday week comes as a surprise. It throws the perspective of activity farther into the future than they surmised would occur. The market in short seems to be bowling along at its own rapid and self-regulated gait, without regard to precedent:

But a factor in the pertinacity of the demand is doubtless the fact that prices have not been allowed to soar in the flighty manner that they would have done ere this, had there been no strong pressure to keep them down. Motives for this price control may have been mixed, but certainly a desire to perpetuate the insistent demand has been a factor thereto. The consuming public has not expressed disapprobation at present prices, but seems to be a cheerful buyer at these levels for the multifarious needs that are everywhere springing up. The insistence of some of the smaller makers for higher prices is not prompted entirely, if at all, by the desire to gain the last possible dollar from trade, regardless of the future, but in part at least by the relatively higher costs of metal material than of their own mill product. With the one high and the other moderate the margin of profit for them shrinks to a greater or less degree. But for the market at large the main consid-

FOR SALE.

The Retail Business of T. Long & Bro., Limited, Collingwood, consisting of dry goods, millinery, carpets, clothing, gents' furnishings, shoes and groceries, as we are going into wholesale business exclusively.

This is one of the oldest and most successful businesses in the Dominion of Canada, and has a very large connection in town and surrounding country. The stock is all new and seasonable, none of it being over a year in our possession, and the stock at present is not heavy. The town is progressive and we are enjoying an active business. The stores are new with latest fittings, and can be leased for a number of years. A grand opportunity to get into an old and well-established business. Can give possession in January.

Apply

T. Long & Bro., Limited,
Collingwood, Ont.

eration seems to be that the public appetite for the metals is unappeased, if not unappeasable.

Continued open weather has materially aided in the consumption of the metals. Construction work and improvements of all sorts are proceeding briskly, for there is great pressure to complete at the earliest possible date whatever work may be in progress.

* * *

TORONTO MARKETS.

Toronto, Jan. 4th, 1906.

Chemicals, Drugs, etc.—The position of all the staple drugs remains, as far as local markets are concerned, just as before, and but little movement is being experienced. Carbolic acid is easier on a dull market. Iodine may be described as a trifle firmer. New York reports refer to somewhat dull trade conditions. Baltimore advices say the chemical and fertilizer markets are strong. From Manchester comes word that there is a strengthening demand for several important lines of British chemical manufacture, and that the export trade is more than usually satisfactory.

Dry Goods.—A very satisfactory business on the whole is the almost universal verdict of the wholesalers, even in spite of the rather adverse weather conditions. The holiday season, particularly for special lines of goods, was distinguished for a more than usually active demand, and good grade articles were wanted in particular. It is a strange feature of the trade, commented on by many, that very high prices for the staple wool and cotton goods has been simultaneous with heavy demand, the usual course being a falling away in the latter when values go beyond a certain limit. Payments have been good, particularly from Ontario points. In regard to Manitoba and the North-West, reports are more conflicting.

Hides and Skins.—The expected decline has come, but much of it is due to the greater wastage in the hides at this period of the year. At present prices the market is fairly firm, but the movement is not heavy. Tallow remains the same as last reported.

Flour and Grain.—The hard state of the country roads has militated against any heavy movement in Ontario wheat, but prices nevertheless, are easy. Manitoba wheat, however, is fairly firm. Little export business is reported in flour, the highest bid for ninety per cent. patents being $3.15, with most quotations nearer to $3.10. Bran is scarce, and consequently selling at firm prices. There is no special change in oatmeal. There is no noteworthy feature in oats, peas, and other grains.

Hardware.—Little of a new nature is reported in either shelf hardware or the heavier metal branches. Practically all lines keep quite firm, and the trade being done is quite satisfactory. Prices keep firm to strong, as described last week. Payments are quite satisfactory.

Provisions.—Butter is a trifle easier owing to heavier receipts. Cheese is steady. Eggs are easier, owing to the mild weather. Poultry is not so plentiful as last week's holiday supplies would cause one to believe, and the market is satisfactorily firm. Hogs are a little easier @ $7.75 per cwt. Smoked meats and similar products sell readily at unchanged prices.

Seeds.—Comparatively small business has passed this week, owing to the absence of snow generally in the country. Prices remain just about as when last quoted.

MONTREAL MARKETS.

Montreal, 3rd Jan., 1906.

Ashes.—There is a lack of all interest in the market at the moment, and in the absence of business former quotations are repeated as more or less nominal as follows: No. 1 pots, $5.25 to $5.30; seconds, about $4.75; pearls, $7 to $7.25 per cental.

Dairy Products.—The year 1906 has opened rather quiet in the cheese market, though some little enquiry is reported to have resulted in business in fine Ontarios at 13¼c., though there are holders who decline to consider less than 13½c., and advices from England would indicate an advancing market there. Of butter there have been moderate recent shipments via St. John and Portland, and local demand is fair: for finest creamery 23 to 23¼c. is the general quotation; good to fine, 22½ to 23c.; good dairy, 21c., and rolls, 21½ to 22c. per pound.

Dry Goods.—Travelling salesmen are all arranging to get out again on their routes, and wholesale business is quiet at the moment, fall assorting business being at an end, and city retailers having all their attention concentrated on clearing sales, for the weather is unfavorable to the sale of heavy goods. Values in all lines of textiles remain very firm, but no special changes in price are to be noted for the past week or two.

Furs.—All quotations in this line rule firm as follows:

No 1 large beaver, $6.00 to $7.00; medium ditto, $5.00 to $5.50; kilts, $2.00; black bear, $15.00 for large No. 1, $10.00 for medium, and $5.00 for small; badger 40 to 60c.; fisher, $6.00 to $7.00 for fine dark; red fox, No. 1 Northern, $3.50; Eastern and Ontario No. 1, $3.00; No. 1 silver fox, $100 to $175.00; cross fox, $7.00 to $10.00 for dark; wolverine, $7.00 for No. 1 dark, other grades $2.00 to $5.00; lynx, $6.00 to $7.00 for No. 1; Marten, Western and British Columbia No. 1, $6.00 to $7.00; Eastern ditto, $4.50 to $5.00; mink, $6.00 to $8.00 for large No. 1, and $4.00 to $5.00 for medium; winter rats, 15 to 18c. for large; other No. 1 large dark Labrador, $30, and $15.00 for Western; coon, $1.75 to $2.50; skunk, $2.00 for No. 1 prime black, $1.50 for short stripe, other grades 30 to 75c.

Groceries.—As is usual about New Year's week, wholesale trade in groceries is slow, but expectations with regard to spring business are bright. The sugar market is about steady at last decline, but refiners report a very light demand at the moment. The factory figure for standard granulated is $4.30 in barrels and $4.25 in bags; the lowest for yellows is $4.85, in bags. Molasses is steady at 35c. for Barbados, in single puncheons. Rice is advanced 20c. a cental. Sago and tapioca are dearer. Rolled oats show decline under reports of trouble in the combine; factory quotations declined from $5.10 to $4.85 last week, and about $4.60 is now said to be the figure. Evaporated apples continue to advance, packers' price being now 9½c., while 10½c. is quoted in a jobbing way. Tomatoes in tins are getting scarce, some dealers now quoting $1 for standard brands. The large and constantly increasing consumption of all kinds of canned goods in North-West Canada is becoming more and more manifest, and all goods in this line are considered good stock.

Hides.—Lambskins are firmer at $1.05 to $1.10 each. Beef hides are unchanged at 12 to 12½c. for No. 1, with fair receipts from the country, but city hides are in light supply.

Leather.—Many of the boot and shoe factories are entirely shut down this week, the operators keeping up their New Year merry-making up to Epiphany (6th January), and the "swamp" is, therefore, pretty quiet, but all quotations are very firmly held at last given figures.

Metals and Hardware.—Our full report of last week will apply at date, with the exception that lead has made further gain, being quoted at $4.90 to $5, a sale of a ton lot being reported at the inside figure. Tin, lead, copper and spelter are all very firm at figures last quoted, and antimony is about the only easy article on the list.

Oils and Paints.—Business is still quiet, but some few orders are already coming to hand for spring delivery. Nothing new is reported in values since last writing.

ASK your printer to show you the kind of business letterheads he can make from

Royal
Seal
Bond

If you find your printer doesn't keep it in stock, we can furnish him with it, or write us on your present letterhead for our Sample Book of these papers.

You can then see for yourself how they will look made up.

Mercantile Summary.

A change has been made in the managership of the Dominion Steamship Line in Montreal. Mr. John Torrance has resigned the position of manager, which office he had filled for about thirty years. He is succeeded by Mr. James Thom, assistant manager of the line, who will also be manager of the Leyland Line. The new manager has been connected with shipping interests in Montreal for twenty years, and is widely known in business circles, being at present treasurer of the Board of Trade.

The Mexican Light and Power Company held their annual meeting in Montreal on the 26th ult. It was stated in the chairman's report that for over two years the electrical development undertaken by the company in the vicinity of Mexico City had been steadily prosecuted, and at length the first unit of a total of six is delivering satisfactorily about 6,700 horse-power in the capital of the republic by means of a transmission line ninety miles long, the wire carrying 40,000 volts, to be increased to 60,000 when the permanent work is in place. There is also a further extension of seventy-five miles to the important mining centre of El Oro, where a good market for power is assured, and where some is already being delivered. The earlier acquisition by the company of the Mexican Electric Works, now entirely merged, had shown during the current year a satisfactory increase in gross earnings. The entire board of directors was re-elected, with Mr. James Ross as president, Mr. F. L. Wanklyn, J. H. Plummer, F. S. Pearson, vice-presidents.

* * *

NATIONAL BANK OF SCOTLAND, LIMITED.

The report of this bank for its last fiscal year has been forwarded to us. It was to be submitted at the annual meeting of proprietors in Edinburgh on the 21st December. The assets of this bank exceed eighteen millions sterling, equal to ninety millions of dollars our money. The paid capital is a million pounds; the reserve fund, £1,030,000; the note circulation, £891,526. On transactions, the amount of which is indicated by the figures above given, the bank earned a gross profit of £374,670. From this take £153,476, the charges of management at head office and 118 branches, £200,000 for dividend of 20 per cent. and some allotments for Pension Fund and alterations to premises, there is a larger balance to carry forward than in the preceding year. Manifestly, this is an important and successful bank, one of those of which Scotland may be proud. A paragraph in the report expresses regret at the recent death of the deputy governor of the bank, Donald Cameron, Esq., of Lochiel, and of a member of the extraordinary board, Mr. Fletcher Norton Menzies, a director for thirty-two years. Mr. Alex. Wilson, of Bannockburn, is leaving the board by reason of ill-health. To fill vacancies it is proposed to transfer Mr. B. Hall Blyth and Hon. James W. Moncreiff (who retire in rotation from the active board) to the

APPLE SHIPMENTS TO BRITAIN.

Mr. P. B. Ball, Canadian trade agent at Birmingham, says he has watched with much interest the various shipments of apples from Canada into that market, and thinks the proportion used by Birmingham this year is considerably greater than last. The great trouble is that the shortage in crop has prevented people buying to the extent they otherwise would. Apples, however, have reached very much higher prices this year than last, and are likely to still increase. Several of the largest buyers in Birmingham made their arrangements early in the season, and bought direct from Canada, and these shipments have come out much more even than goods bought at auction in Liverpool and Bristol.

A good many complaints have come to hand of careless marking. No one would ever think that people would be so misguided as to ship an apple under another name, because the one marked brought a much higher price than the other. Mr. Ball gives two instances which will be sufficient. One firm states that it had bought a parcel of Russets XXX, and paid a large price, Russets always commanding a higher price in Birmingham than any place in the kingdom, and in the ten barrels purchased four were Greenings, and were not

DIVIDEND NOTICE.

A dividend of 2 per cent. on the preference shares of this company, for the quarter ending December 31, has been declared, payable on January 15, 1906, to shareholders of record of December 31st. The transfer books of the company will be closed from January 1st to 5th, both days inclusive.

By order of the directors.

THOS. GREEN, Cashier.
New Glasgow, N. S., Dec. 29, 1905.

worth within five shillings a barrel of the price of the Russets. On another occasion, in a small lot of XXX Seeks, he found a barrel of Snows and a barrel of small Ben Davis, very inferior fruit. Mr. Ball also states he has received several bitter complaints that Canadian shippers are not carrying out contracts as made. One particular shipper, through his agent in Birmingham, made an offer for apples at from $2.50 to $3 a barrel f.o.b. After looking into the matter, he decided that with apples at their present price he would offer the higher price, namely, $3, and purchased 1,009 barrels of Golden Russets, 500 Kings and 500 Blenheims at an all round price. These apples were to pass Government inspection, and the buyer was to pay $2 a barrel before shipment and $1 a barrel on their arrival. This was cabled, but the seller cabled, replying that the price had advanced so much that he could not fill the contract. Now, this is a reputable firm, and there is likely to be considerable trouble from it in the future. It seems a pity that Canadian shippers should so prejudice their chances of doing future business in Great Britain by transactions of this kind.

* * *

INDIAN TEA INDUSTRY.

British Consul Fee, of Bombay, has transmitted a review of a recent report issued by the British Indian Government on the progress made in the tea industry of that country, in which he says: "The area under tea in India at the end of the year 1904 extended over 524,517 acres, about 64 per cent. of the whole being in the valleys of the Brahmaputra and Surma, in Assam, and about 26 per cent. in Bengal.

"Assam had 131,822 acres under cultivation; Brahmaputra, 205,299; Bengal, 134,585; the Punjaub, 9,342; Southern India, 32,790, and the United Provinces, 7,933. Since 1903 a reduction in area cultivated is noticeable, the more so as for nineteen years previously an annual increase had been recorded.

"The annual output of tea is not only steadily increasing, but is doing so in more than double the ratio of the increase in the area under production. This appears to warrant the assumption that by more scientific methods the land itself is far more productive than formerly. In the last twenty years the area under cultivation has increased 83 per cent., while the increase in production has developed over 211 per cent. Possibly owing to the fall in prices the area under cultivation has remained practically stationary during the last five years. Nevertheless, the total productions in 1904 are nearly 25,000,000 pounds more than in the year 1900. The total production of tea for all India for the year 1904 is given at 222,203,661 pounds, this amount being greater than was produced in any previous year, and just double the production of fifteen years ago. On the average of the last five years, the yield to the acre, dividing the total yield by the area of the land bearing mature plants, has been 400 pounds."

According to the returns of the registrars of Indian joint stock companies and the published accounts of the companies registered in London, the capital engaged in the production of tea amounts to about $60,778,000. It is claimed that 81 per cent. of this capital belongs to shareholders in companies whose head offices are in London. This gives a general average capital of $115 per acre. But the true capital value must be slightly larger, since the amount of private capital engaged in the industry is unknown, while the area under tea represents the private property as well as the companies' gardens. The number of persons employed in the industry in the year 1904 is returned as 475,266 permanently and 76,009 temporarily, or altogether 551,275 persons, which works out to about one person on the average to the acre.

Lowest Expense Ratio

The Government Blue Book, just published, shows that

The Mutual Life Assurance Co. OF CANADA.

had for 1904 the **Lowest Expense Rate** of any Canadian Life Company, the ratio of "general expenses" to "income" being only **17.4 per cent.,** while the **average** of all the Canadian Life Companies for that year (as given by The Globe of 19th inst. is **25.47 per cent.**

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

A Policy-Holder's Company

The North American Life Assurance Company has a Guarantee Fund of $300,000, of which $60,000 is paid up in cash. Interest is allowed on this paid up portion only. Policyholders thus obtain **additional security of $300,000** and what is of greater importance, are **assured of careful and conservative management** as the Guarantors are liable for this amount. By the Company's Act of Incorporation, every holder of a participating policy in the Company, upon which all premiums due have been paid, shall have one vote in person for each $1,000 of insurance held by him. Policyholders are thus given a **voice in the management** of the Company's affairs. In short, it may be said that the North American Life is neither a Mutual nor a Stock Company yet **possesses the advantages of both.**

Home Office - Toronto, Ont.

AN IDEAL POLICY OF LIFE INSURANCE.
The 20-Year Premium Endowment Plan
ISSUED BY THE

ROYAL-VICTORIA LIFE INS. CO.
Head Office, Montreal.

This policy is a model of simplicity. The Endowment feature is the return of the actual premiums received by the Company. The insured has his life insurance for the interest on his premiums and his full premiums returned, if living. **There are no estimates. Everything is guaranteed.** This is permanent life insurance. There is no assessment insurance as cheap. It is the policy the people want.

In introducing this plan, the Royal-Victoria Life Insurance Company has embodied in one policy the best features of the most popular plans of insurance that have received public approval in the last few years.

The adoption of the 20-Year Premium Endowment Plan is due to a careful observation of the requirements of insurers to have combined in one form of Policy, Whole Life Insurance, Term Insurance and Endowment Insurance at the option of the insured.

This policy is the embodiment of full value for the premiums paid, as shown in the **Guaranteed Interval Values** in the Policy, should the premiums **not be continued** during the 20 full years; or the **Guaranteed Options**, should the premiums be continued to the end of 20 years.

David Burke, A.I.A., F.S.S., General M'g'r.

PROTECTION

is what every business man is looking for. We are thoroughly in accord with these views, and to this end have deposited with the Dominion Government **$1,015,180 in Gilt Edge Canadian Securities** for the exclusive protection of Canadian policyholders.

The UNION MUTUAL LIFE INS. CO. of Portland, Maine, protects its Canadian policyholders not only by having more than the reserve called for by the Dominion Government, but also through the operation of the Maine Non-Forfeiture Law only applicable to UNION MUTUAL policies.

MR. WALKER'S ADDRESS.

The very instructive address of Mr. B. E. Walker before his shareholders this week is unusually lengthy, and it contains many paragraphs that do not lend themselves to abridgment. Any business man will be the better of reading it in full; and all we hope to do at this writing is to draw attention to some of the speaker's facts and conclusions. Among the main factors which seem to influence the immediate future of Canada, a supply of cheap money for her development is plainly one. Referring to the abnormally high price of money in Europe, Mr. Walker says:—"If, after the final loans caused by this last war are placed, we are to have a long period of peace, then the value of money in Europe should gradually decline, and this would have a most favorable effect not only in the ease with which money could be got for Canadian enterprises, but in the cost of the fixed charges upon the enterprises arising from such borrowings."

An admonishing paragraph on the subject of our national economy exhibits the tendency towards prodigality that sometimes comes to nations as well as individuals, after a period of successful economy: "We again show a serious loss in exports, the total falling to $203,316,000, about $10,000,000 less than in 1904, and $22,500,000 less than the high-water mark of 1903. The loss is practically all in agricultural products, other increases and decreases about off-setting each other. Doubtless in the first half of the present fiscal year the loss will have been made up. The more serious aspect of our foreign trade is on the import side. We had $10,000,000 less to pay with by way of exchanging commodities, and yet we bought $7,500,000 more than for the previous year, widening the unfavorable balance between exports and imports to $63,500,000. * * * As we said a year ago, we are spending money in public and private improvements, looking to the future for a return, but do not let us overlook the fact that we are putting a heavy mortgage on the future."

With an open mind to the really important things of the country, the speaker mentions the disasters of last year on the St. Lawrence River, and comments thus upon them:—"There is little use in spending money and energy in the development of the railway systems of this part of Canada unless we can be sure that the communication by sea is as perfect as it is humanly possible to make it. We believe great improvements are being made and are in contemplation in the way of lighting, and, if there are obstructions to navigation which can be removed, we presume that this will be done, but investigations seem to show that many of the accidents are due solely to the carelessness or incompetency of the pilots."

His references to the industries of various provinces make it plain that this banker has very good sources of information. The remarks made upon the Maritime Provinces show an intimate knowledge of their conditions. And what is said about British Columbia—admiringly, almost lovingly said, witness the first paragraph—is unusually interesting when it is recalled that the total population of that enormous and rich province is probably not greater than that of the single city of Toronto. His conclusion, after describing the silver-nickel-cobalt ores recently discovered in Ontario is that "during the coming summer there will be a considerable influx of population into the district surrounding Cobalt, and signs are not wanting that an attempt will be made to create not only a mining but a mining stock boom. Serious losses to the public have in the past resulted from attempts to capitalize mere prospects at prices which only producing mines should command, and it is to be hoped that no encouragement will now be given to any movement of the kind."

A thread of prudent suggestion runs through this address, quite plain to those who care to discover it, and here may be found a word for the land-grabber of the prairie country, who seeks to buy more land before he pays for what he has got, and before paying his store-bills, or his implement bills. A year ago, Mr. Walker dwelt upon the dangerous folly of cropping prairie land for a dozen or two of years without restoring to the soil constituents taken out of it by wheat-growing. Of these the speaker says:—"There is unfortunately no longer any room for doubt that many of the more early settled of the Manitoba farms are decreasing in productive power because the land has been allowed to deteriorate. Farmers who are careless year after year in the selection of seed, who neglect to destroy noxious weeds, who will not consider their land in changing crops from year to year, or protect their crops when being harvested, are simply enemies to the public good, and should, as far as the law permits, be treated as such." He perceives, too, how largely the prairie country bulks in the eyes of strangers who are in any way interested in Canada, for he observes:—"At the moment, Canada, to many people in the United States and Europe, means our three North-West provinces, and we who live in the East may as well become used to the fact."

A qualifying sentence marks the close of the speaker's remarks upon the prodigious business activity in the United States, accompanied as it is by excessive speculation in high-priced securities, and the inordinate rates paid for money. "One cannot," says Mr. Walker, "view without concern such an abnormal state of affairs, and it is to be hoped that the real business interests of the country will not suffer because of the volume and the pace of stock speculation."

* * *

BANK OF TORONTO.

Growth continues to characterize this bank, whose fiftieth annual meeting was held during the present week. The totals of assets and liabilities exhibit an expansion from $27,189,000 a year ago to $32,806,000 to-day. Paid capital is increased to $3,459,000—it will doubtless be at the close of next year $3,500,000, which is the amount issued—and the rest is increased from $3,300,000 to $3,859,000, partly from earnings and partly from premium on new stock. Increased capital enabled the circulation of more of the bank's bills, hence we find circulation gone up to more than three millions. More than four millions of money was deposited with the bank during last year, and the total of its deposits is now $21,367,075. Almost four millions of this is obtained without interest. The bank has now more than forty branches in four provinces, and is establishing others. The number of directors has been increased, and Mr. Nicholas Bawlf, of Winnipeg, is added to the board.

The report submitted makes reference to the many features of the year just closed favorable to the development of the country, and the increase of wealth in the community. These were still more fully dwelt upon in the address made by the president at the meeting. That gentleman warned his hearers that in such a time of expansion as the present, there is need to keep in view more than ever the virtue of conservatism, for a time must come when the present rate of rapid progress in Canada will slacken. Besides, Mr. Beatty being prominently connected with many other interests, industrial and commercial as well as financial, finds in his experience that the expenses of business are everywhere growing greater, while the profit on transactions shows a constant tendency to reduction. Thus it requires a larger volume of business to return an equal volume of profit. Such commercial truths as these need to be emphasized now and then, for many of our business men are apt to forget them.

* * *

THE FORESTRY CONVENTION.

The time has arrived when something emphatic, something absolutely constructive, has got to be done to save Canada's forests for those who are to succeed us. The forestry experts have done good work, the Canadian Forestry Association has done wonders; but the conscience and the interest of the public as a whole still need to be awakened. Forestry is *not* an academic subject; it is one upon which the very existence of the Dominion as a rich and productive country may well depend. In such a spirit as this, brimful of the surpassing importance of a matter which calls for the best brains and the most industrious talent of our land, was the great convention held in Ottawa this week, a gathering called together by Sir Wilfrid Laurier, and rendered representative by the presence of Lord Grey, and of such men as Gifford Pinchot, chief of the United States Forestry Bureau; Henri Joly de Lotbinière, President of the C.F.A.; Dr. Bell, of the Dominion Geological Survey; E. Stewart, Dominion Superintendent of Forestry; Dr. Fernow, of Cornell; and three or four hundred delegates from all parts of Canada representing the forestry, lumbering and agricultural interests of the country.

The danger looming before our boasted resources unless something is done to check the ravages of greed and carelessness, is admirably expressed in the following paragraph from the address of Mr. Stewart, Dominion Superintendent of Forestry:—

> Denude the eastern slope of the Rocky Mountains of its forest growth, and as sure as result follows cause you will destroy the great rivers that have their sources there. You will create a raging torrent for a few weeks in the spring, and after that a water famine. You will destroy the North and South Saskatchewan, the Athabasca, and the Peace Rivers, and you will make a desert of our new Western Provinces. Your irrigation canals will be raging torrents for a short time, and devoid of water when it is required. You will simply bring about a condition of affairs which anyone can see to-day in southern Europe, in northern Africa, and in Asia Minor, where large areas of country once fertile are now, owing to the denudation of the timber on the mountain sides, practically a desert.

And His Excellency was able to supply from his own experience a verification that the arid conditions of these deforested regions had not been over-drawn:

> I have myself seen in India, Asia Minor, in Greece and Italy extensive tracts of territory once inhabited by a strenuous, prosperous, numerous population, and now reduced to the misery of a barren desolation by the unregulated deforestation of their lands by a blind and selfish generation, which had no regard for posterity, nor eyes for anything but their own immediate requirements. Gentlemen, there are no more melancholy reflections than those suggested by the sight of a country once rich and equipped with all the majesty and panoply of power which has become a waste and a desert through the reckless imprudence of its own people.

These countries had no previous experience to guide them, no history to show them the results of an unsparing use of the forests beneath their eyes, and so they cut them with lavish hand. But shall we in Canada, who have this experience, and can read this history, and have had repeated warnings—shall we make the same terrible and fatal blunder?

Mr. Gifford Pinchot, after asserting that forestry was more closely involved in the prosperity of the American continent than in any other area on the face of the earth, and referring to the alarming conditions brought into view by the growing scarcity of wood, not only to the manufacturing industries, but to the very basic existence of agriculture, outlined the principles on which the Washington Forestry Bureau was doing its work, one of which was that every man, woman and child in the United States should understand that forestry means something to every home.

This is what it means to Canadians also; the future of our forests is of pressing importance, not only to lumbermen, and manufacturers, and farmers, and railroads, but it means something to every individual in our country.

* * *

MORTGAGE LENDING COMPANIES AND DEPOSITS.

The notoriety which the York County Loan Company has gained of recent days, and especially since its compulsory stoppage, has given rise to a feeling of suspicion in the minds of many as to the safety of other loan companies using like methods. Nor is this all. It has caused murmurings as to the prudence of allowing mortgage loan companies to take deposits at all. This latter doctrine is not new: it was espoused many years ago by bankers, more than one, and supported by arguments which have a certain weight if used with reference to speculative or loosely managed concerns of the kind. But these arguments have been heard and weighed before committees of Parliament in successive years, and while they have had the effect of increasing the safeguards thrown around depositors, they have not convinced the law-makers that taking deposits is a thing which should be forbidden. The latest speaker to reassert the doctrine is Mr. D. M. Stewart, before the Empire Club, of Toronto, the other day. He contends that "all companies authorized to make loans on real estate, buildings, etc., should either be prohibited from taking deposits or be required by law to maintain a certain percentage of their assets in actual cash as a reserve for the security of depositors."

If Mr. Stewart is correctly reported as above, he seems to have made his remarks too sweeping in their character. There are numerous sound and carefully managed mortgage loan companies in Canada which do maintain a certain percentage and a very large percentage of liquid assets. Take as an example the Canada Permanent, which had at the close of last year some $2,700,000 of deposits. It held at that date $354,000 in cash, $481,000 in municipal debentures, and $1,380,000 call loans on bonds and stocks, in all $2,215,000 in realizable form with which to pay depositors, or more than 82 cents for every dollar. Or take the case of the Huron & Erie, with $1,659,000 of deposits. Against these it held $971,000 in cash, debentures and bonds, say 58½ per cent. immediately available. The Ontario Loan & Debenture, having $525,000 in deposits, and keeping $225,000 liquid, equal to more than 52 per cent. And there are other companies, such as the Central Canada Loan, and the Toronto Mortgage Company, which hold, the first, three times, the other, twice as much in cash or immediately available securities as their deposits amount to. It would be manifestly unfair to prevent such companies from taking deposits when they can show such security to their depositors. Nor is it less unfair to lump sound concerns like these with the score of weak and undesirable companies which not only have no such available reserves but make pretensions and alluring promises to depositors or "members" which cannot be made good.

In his remarks Mr. Stewart has spoken as if the chartered banks were the only places for the deposits of the people. He surely does not need to be reminded that there are already more than a hundred millions of Canadian deposits outside of them. And as to the twenty millions of loan company deposits, he and others who possibly think with him will find upon examining the body of Dominion and Provincial legislation on the subject that they are very well hedged about by law. What is needed in addition to having laws on the statute book about loan companies, is the prompt administration of those laws, and the restriction of charters so that only men of known character and ability shall be allowed to conduct companies which take the money of the people.

* * *

WHY BRITISH EXPORTS TO CANADA DO NOT GROW.

British statesmen, writers and statisticians have for a long time been commenting upon the fact that Canada's imports from the Mother Country do not grow of late years in so great a ratio as her imports from other countries, such as Germany and the United States. And they have seemed to reproach Canadians because of the fact. At any rate, they appear to think that there is something unfilial, strange, almost unfriendly, in a colony buying more manufactured goods from other lands than from the mother land.

We have repeatedly shown that one reason for this is the greater accommodatingness of American and continental manufacturers and merchants, the sometimes greater attractiveness of the make or pattern of their wares, and even the enticement of superior terms. And we have even been so bold as to suggest that the fault lay quite as much with the sellers of British goods as with the purchasers of them, even more, when any one pointed to the millions of United States goods bought by Canadians and claimed that these might as well have been bought in Great Britain.

There is another phase of the matter, however, which needs to be brought to the attention of exporting manufacturers and merchants in England. Our attention has been drawn to it very pointedly, and we make no apology for devoting some space to it.

A gentleman has shown us, this very week, a report, eighteen type-written pages in length, from a canvasser who was sent to the Midlands to represent a number of Canadian journals circulating among the textile trades, the engineering trade and the paper trade in Canada, with instructions to solicit advertising among those English firms who either were doing or desired to do business in the Dominion. The canvasser an Englishman born, who has lived in Canada some years, and is of good habits and address, gives what our readers will, we think, consider an astonishing account of his reception.

He was between two and three months in England, and called upon 150 firms and companies in various lines of manufacture, being provided with letters of introduction from customers or acquaintances of theirs in Canada to a score or two of firms.

Of those he called upon, twenty-three gave (or often sent, through a clerk or office-boy) in answer to his card or letter, the answer: "We are not interested in Canadian trade."

In Manchester and district, Sheffield, Huddersfield and Leeds 41 instances are given where no satisfaction was to be had; either he could not see the principal or any one in authority, no one in the house would talk advertising, or he "could not get past the sentry." One or two had unfortunately been bitten by the rascally "Dr. Griffin," of Montreal.

An entry very common in this report is: "Called twice, but was unable to get to see any one in authority."—Or, "could not get at the principal; two visits."—Or, "called on this large firm several times, but was unable to see any one but a subordinate." They had, as several firms put it, "No time to see canvassing agents."

In many cases he was required to fill up a printed form, stating who he had come to see, what he wanted to see about, who his principals were. Generally, in such cases, he was turned over to a subordinate, or else abruptly told that there was nothing for him. Sometimes his business card was returned. Certain entries he makes are amusing: "The amount of formality to be gone through is appalling"—"This firm's ideas of the possibilities of Canadian trade are too humorous to dwell upon"—"A repetition of the form-filling and waiting performances"—"Listened attentively to me. Taciturn. Unable to consider the proposal"—"Blunt refusal to talk advertising"—"As exclusive as Buckingham Palace"—"Hazy idea of Canada's possibilities"—"Only after three times calling, and by sheer persistence, was I admitted to the counting-house."

At Sheffield he was more civilly received. But here, too, he found sentries, sometimes boxed up at a distance from the firm or company's office, and the use of forms to fill up quite common. In one or two cases he was admitted to the premises and even offered to be shown through, but as to advertising, "Could not think of it"; did not wish to extend their field, or "were not in a position to increase their appropriation." In the great majority of cases he could no more get to see a principal than an ordinary tourist visitor to the dome of St. Paul's could get to see the Dean and Chapter.

True, there were exceptions. The canvasser succeeded, indeed, in getting some advertisements, and in other instances, only a few, however, he was allowed to state his case and tell where it was probable certain merchandise could be sold in Canada. One firm, for example, were courteous and even friendly, confessed to an interest in Canadian trade, but did not believe in paper and ink publicity as a means of introducing their goods to the market. Another to whom he had a letter, returned a polite refusal to talk advertising at present; call again—but the calling again produced no effect. In a Manchester case a personal letter was presented which brought some under-clerk to say that the principal "did not make a practice of giving interviews to advertising men." At a Sheffield firm's office he was given abundant statistics about the extent of its works, the immensity of their output, and was also given a catalogue, but as for advertising! Oh, no.

In the face of the almost universal interest which we are told exists nowadays in Britain towards Canada, it is curious that such an attitude should characterize manufacturers as these incidents show. The coldness, the proud self-sufficiency, the absolute stubbornness of John Bull comes out in them, until one is tempted to agree with what was said by Peter B. Ball, the Canadian agent at Manchester: "The Englishman is the best manufacturer in the world, but he is the worst merchant." Let a Canadian canvasser go and call upon 150 manufacturers in the United States, and in at least 100 cases he will be received with civility, questioned about Canada, and shown the premises and products of his temporary hosts. Perhaps he will be "jollied along," but anyhow he will be received and his case heard. And he will get a dozen or two advertisements as well, if he knows his business. If English exporters refuse to see or listen to people who can assist them to secure a goodly share of Canada's purchases, they need not be surprised if other countries, less forbidding, carry off the trade which our indifferent and excessively formal relatives in England ought to have.

* * *

THE SCIENCE OF SALESMANSHIP.

The incompetence, ignorance, and brusqueness of a large proportion of the salespeople at our big stores are features that often strike the average customer, and the query sometimes arises: would it not result in better net profits for the merchant if he would pick and choose his assistants better, paying them if necessary higher wages for a higher class of service, and possibly for him to manage with a smaller number of them? As it is, thousands of dollars' worth of trade must be lost every year from the simple fact that salesmen and saleswomen are of absolutely no assistance to a would-be purchaser in making his selections. The latter comes to a store with the best intentions in the world to buy something he (or perhaps more often she) wants; but the exact form of this she does not fully know. A word of suggestion would do the trick, an article would be sold, and the cash received. As it commonly is, however, the one behind the counter doesn't quite know what the customer wants, and shows it; worse than that, he shows he does not care. And so the very article needed remains unsold, and the customer goes away, and without any strong temptation to return to that particular store. For the average man who wants to buy anything wants it to be sold to him; he does not want to act as his own salesman also. Yet he does not get it if he does not happen to spy it on a near-by shelf—that is what it amounts to in some of our departmental stores. Efficiency in selling, as in other things, is what merchants and the departmental stores need, even if they do have to pay high wages for it. Quite often there is a difference in the selling capacity—and customer-drawing capacity—of salesmen to the amount of two or three hundred dollars or more a week. Compared with this, of what account are a few dollars extra on the wage-bill, or even the doubling of it?

There are stores and stores. In one, the personality of a keen, obliging proprietor will make itself felt at once in the intelligent, painstaking clerks ready to wait upon a new-comer at once, and to get him exactly what he needs, or the nearest to that in their power, and the chances are that either the new-comer will go away a purchaser, or, what is the next best thing, a customer perfectly ready to go to that particular store the next time he needs anything in its line. In another store, one perhaps which draws by its extensive advertising, and adopts the "take-it or leave-it" plan, the clerks are either slow, or obtuse, or they don't like taking trouble. At any rate, they are not efficient, they do not carry out the work they are paid to do in the best possible manner: they are ill-paid, and render account in ill-service. The result is, a new customer gets what he wants—if he sees it, or if his needs are so plain as to be incapable of being misunderstood; but he goes away and, until he forgets his former treatment, he is not likely to return.

There is all the difference in the world between an efficient salesman, and the dummies one sees so often behind the store-counter. The latter are expensive, even at the low salaries they usually receive; the former are rare, and are paid accordingly. The merchant, who foots the bill in either case, should know the difference.

* * *

GROCERIES.

While the natural lull in business exists, following upon the stress of the holiday season, it is remarkable what a contrast present conditions offer compared with those of midwinter a few years ago. Then, at this time of the year, wholesale dealers looked for a rest from their labors; orders came in, but they were usually not pressing, and they certainly were in no great volume. Going back a few years earlier still, to the last generation of wholesale grocers one may say, clerks could look forward to a period of practical do-nothing between seasons—"seasons" representing the months during which navigation was open. The railroads built, and the marvellous progress of the country have changed all this, and while now we have slack periods, even they are "rushing" compared with the olden days.

The majority in the trade are firm in the belief that the autumn and the winter, so far as it has gone at present, were very satisfactory from their point of view. Payments were on the whole very good; the volume of trade was large, prices were steady, and of a profitable character.

At the moment, not much movement is being experienced in sugars, and but few features of interest present themselves. New York advices speak in a similar vein; though the delay in grinding in Cuba, owing, we believe, to heavy and protracted rains, has caused a considerably firmer feeling in raws. Last week the receipts were one-quarter of those during the corresponding week last year. For refined, also, the market is quiet. Molasses and syrups are inactive both here and in other markets, though Montreal reports speak of greater firmness prevailing this week.

As regards the trade in canned goods, sorting orders continue to come in from time to time, but on the whole, no great volume of transactions is being carried through. Prices are quite strong, however, particularly in a few lines.

Currants would seem to be becoming stronger in primary markets, partly owing to large quantities brought in by the Syndicate lessening the available supplies for export to an appreciable degree. California prunes and apricots are very strong at the high quotations laid down. Sultana and Valencia raisins are both high-priced, and the tendency is towards an advance. In nuts and other dried fruits we learn of no specially new feature having developed since our last report on the subject.

In teas not very much business has been passing, but we have now arrived at a time in the year when the demand for this commodity usually picks up materially. Advices from London state that there is generally speaking for many grades of tea a firmer tendency, especially in mediums. This statement applies particularly to Ceylons and Indians. Coffees have made no appreciable change locally. In Brazil talk is indulged in of increasing the export duty.

Rice and tapioca are selling well. The latter is meeting a strong demand, while rice made an advance last week.

* * *

CANADIAN PRODUCTS IN ITALY AND LONDON.

It has been decided to remove the larger portion of the Canadian exhibit which drew so much attention to itself during the summer at Liege, Belgium, to Milan, in Northern Italy, where an exhibition on a large scale is to be held next summer. Several additions are, it is understood, to be made to the Canadian section as exhibited at Liege. No doubt, such a showing will do a good deal toward attracting immigrants from the northern provinces of Lombardy and Piedmont, which at present do not send many people to Canada, and it is also expected to create interest among the Austrians and Swiss, the governments of which people do not allow within their borders any recognized emigration propaganda.

It is announced that a good exhibit of Canadian produce is to be installed in the Imperial Institute, London. The goods now shown there have become old and out-of-date. The Dominion Government has been talking of putting a representative display in the Canadian section of the institute. Action was delayed, however, it being thought perhaps as well to put up a permanent Canadian building in London, and maintain an all-year exhibit of Canadian goods on the Strand. It was found impossible, however, to secure a site for a reasonable figure. The erection of a building worthy of Canada and characteristic of this country would also be a very expensive matter. The Imperial Institute affords a first-class place for a permanent showing, and the order has gone forth, therefore, for the preparation of the Institute display.

* * *

THE COST OF LIVING.

Again the "London Economist's Index Figure" records an advance in the total price of the commodities which go to make up the average man's cost of living. At the end of last month, it stood at 2,342, an advance of no less than sixty-five points upon the figure reached at the end of November last, and of 206 points compared with December, 1904. At the end of December, 1901, previous to which time it may be stated it had been going up for some time, it stood at 1,948, so that the increase in four years has been no less than 394; also, it will be seen that the advance in living expenses seems to be going on in an ever-increasing ratio. Not only this, but the increase in the year just closed would appear to have been a natural one, that is to say, not a result of mere speculative manipulation.

Fortunately, however, for the ordinary householder, last year's increase was due in but comparatively small measure to further rises in the value of foodstuffs, though clothing did participate to a considerable extent. The main feature rather was a gradual upward movement in the value of raw materials, and of the goods manufactured therefrom. Most prominent among these were metals and textile materials. The pig-iron market was remarkable in that while production, (that is to say, in England), exceeded the consumptive demand, the price of warrants continued to advance. The rise in other metals was of a very pronounced character. The price of cotton was on 31st December, higher than at any previous period in the year. Wool, hemp, silk and jute were all at a high level. Sugar made a welcome decline, while wheat advanced to some extent during the last quarter of the year, and butcher's meat also stood a little higher.

* * *

A FIRE MARSHAL'S DUTIES AND DIFFICULTIES.

The State of Ohio has a department of fire enquiry, whose chief officer is the fire marshal. The fire marshal law of that State requires chiefs of fire departments, or mayors in towns having no fire chief, or township clerks in rural districts "to investigate the cause and circumstances of every fire," and especially if "such fire was the result of carelessness or design," and to make written report to the fire marshal, who shall have the right to direct such investigation. This puts the department in correspondence with 2,099 officials who report fires. To support this department fire insurance companies are taxed one-half of one per cent. on premiums they receive in Ohio business. In this respect it differs from the fire bureau of the State of Massachusetts, which is maintained by the State Government, and makes no levy on the insurance companies, recognizing that to lessen the fire waste is a duty of the State.

A word as to the powers of this Ohio department and its chief will be of interest. If suspicious circumstances attach to any fire the fire marshal, or one of his deputies, has the power of a court to take testimony, on oath, and punish for contempt. If the facts seem to warrant it he may make an arrest. The State fire marshal is required to furnish the testimony to the proper prosecuting attorney and to follow the case until it is disposed of. The State fire marshal, his deputies and assistants may order the removal of explosives or the removal of any dilapidated building which is a menace to surrounding property, a very important matter.

Mr. Davis, the fire marshal, tells us that the increase in the income of his office within two years, due to the rapid increase in the number of insurable buildings in Ohio, made it possible to almost double the number of detectives, attorneys and clerks, although at less average salary, and to add regular inspectors of buildings—all of whom are known as assistant fire marshals. These men, distributed over the State with reference to the value of buildings at risk are able soon to reach the scene of a fire of unexplained origin. The investigation of all fires reported "cause unknown" has reduced the fires whose causes were declared unknown from one in six to one in sixteen. The certainty of searching investigation of incendiary fires and speedy punishment of the guilty has acted, it appears, as a deterrent to many who desire to burn property, so that the number of incendiary fires has been reduced by one-third.

The number of convictions for arson in Ohio during 1905 was 46, while the average number for the previous four and a half years—since the office was established—was 27½. The number of arsonists, as Mr. Davis calls them, convicted in the five and one-half years since the creation of the office of marshal is greater than the number convicted in Ohio territory during the century preceding. It is stated that the office "handles at first hand the facts of more fires than any other office, company or person in the world and ten facts from each fire are tabulated."

* * *

CENTRAL CANADA LOAN & SAVINGS COMPANY.

A report which must prove very gratifying to its shareholders is made by the Central Canada Loan Company. With $5,316,000 of debenture and deposit money to handle, supplemented by $2,500,000 of shareholders' capital and reserve, there are shown the very large net earnings of $253,000. Six per cent. dividend has been paid to shareholders and two per cent. bonus, while $200,000 has been added to reserve, partly from earnings and partly from a premium of 20 per cent. on $250,000 new stock issued. According to the address of the president, an important proportion of the year's earnings "was due to the exceedingly satisfactory business transacted by the company in the purchase and sale of government, municipal, and corporation bonds, which has grown to be much the most important part of its business." The company's assets consist of $1,174,000 first mortgages on real estate, $2,276,000 loans on stocks, bonds, and debentures, $3,911,000 in stocks and bonds owned, $524,000 in real estate and cash. Its liabilities, $7,886,000 in all, consist of $4,164,737 in debentures, $1,151,333 in deposits, and $2,570,878 to shareholders.

* * *

YORK COUNTY LOAN COMPANY.

On Monday afternoon last, Joseph Phillips, president of this company was arrested for conspiracy to defraud the public by deceit, falsehood and fraudulent means. He was bailed out: his bailsmen being the solicitor of the company, W. H. Hunter, and Hon. J. R. Stratton.

The official examiner, Mr. W. H. Cross, reports that the company's books have not been written up since August last, so that an intelligent statement of assets and liabilities cannot at present be made. But he has discovered enough to cause him to make stinging comment upon the incapacity of the auditors and the ignorance of the officers. We have not room to-day to give his report in full, but the following paragraph affords an idea of its tenor:

"From the evidence it would appear that none of the officers who prepared the published statements and the Government returns were aware of their gross mis-statements. The auditors also testified that they believed them to be true, as also the members of the board of directors. This ignorance is possible, and even likely, in every case save that of the president, in whom centred the entire management of the company, and in whom the confidence of the servants and officers was singularly unlimited; even a vice-president, who, with his brother, was solicitor to the company, disclaimed any more than a casual acquaintance with the course of events."

* * *

BRITISH COLUMBIA PERMANENT LOAN COMPANY.

We regret to have made an error in respect to this company when commenting upon a correspondent's letter last week. In saying that we could not find its return in the Dominion Report, we should have said the Ontario Report. In the making returns to government in 1904 it has nothing under the head of "deposits," but has $94,000 in the shape of debentures, bearing 5 per cent., and a large sum in permanent shares, instalment shares, and various other kinds of shares. The company, which has head-quarters in Vancouver, is respectably officered and is making steady progress; but if it goes as far afield as New Brunswick and offers a higher rate for money than older and more conservative companies, it must expect to be criticized.

* * *

CONFEDERATION LIFE ASSOCIATION.

Established in the year 1871, the Confederation Life has a record of conservative management and steady growth that must prove gratifying to its many policyholders. The condensed statement of its affairs which appears in our columns to-day shows distinct gains for the year in various directions. For example: applications for insurance received in 1905 exceeded those of the preceding year by more than a million dollars; new insurance written, $6,002,122, is greater than 1904 by $984,134; insurance in force, which is three millions greater than in 1904 amounts to the large sum of $42,500,350. From the cash statement we learn that premium receipts were $1,385,520, exceeding those of 1904 by $151,000; interest and rents brought in $481,737 as against $439,754. Policyholders received more from the company than in 1904, because, though death claims were $30,000 less in the year under review, more was paid out for maturing endowments, annuities, surrendered policies, and cash profits. The total outgo for these five items was $837,875. The important result of the year's business was a cash surplus of $700,499 over all liabilities, a gain of ninety thousand dollars over 1904.

METROPOLITAN BANK.

An increased business is evident from the statement of this bank for the year ended with 30th December last. Its net profits were $120,085, which added to the $103,048 at credit of profit and loss account twelve months before made $223,133 to be dealt with. Dividend at eight per cent. absorbed $80,000; $10,000, was written off bank premises; and $133,133 carried forward. This condition of affairs ought to be satisfactory to the shareholders. The management has apparently not considered it expedient to maintain so large an amount of assets in liquid form as a year ago. Call loans, for example, are less, while current loans and discounts have gone up from $2,834,000 to $3,661,000. Deposits are nearly $700,000 greater; the circulation is maintained at about the same point.

* * *

BOOKS AND PAMPHLETS RECEIVED.

Report of the Bureau of Mines (Ontario). 1905. Vol. XIV. Part I. Printed by order of the Legislative Assembly. Toronto: L. K. Cameron, King's Printer.

Export Trade of the Port of Montreal. Showing foreign business in cheese, grain, cattle, butter, flour, sheep, lumber, apples, etc., with a commercial review for the season 1905. Compiled by the commercial department of the Gazette, Montreal. An annual pamphlet of much service to merchants.

Manual: The Toronto General Trusts Corporation. This brochure, issued by the pioneer trust company of Canada, is devoted in part to showing the advantages of appointing a corporate executor instead of a personal one. An interesting part of the pamphlet is the six pages devoted to pages extracted from the Ontario Law Reports, giving cases of breaches of trust and loss of estates occasioned by individuals.

Municipal Debt Statistics of the Principal Cities and Towns in Canada; prepared and issued by John Mackay & Co., stockbrokers, Toronto. The statements in this book are compiled from returns made by the municipalities concerned and from the published Government reports. There are from seventy-five to a hundred such reports, and they concern towns and cities all over the Dominion. An extract will show what kind of information is here given: Lindsay, Jan. 1, 1905; population, 8,000; assessment, $2,134,791; gross debenture debt, $626,407; floating debt, $40,000; waterworks debentures, $352,800; sinking funds, $13,365; net debt, $300,042. Assessment per head, $266.85; net debt per head, $37.51. The book is a handsome piece of printing, marred by an unfortunate cover. Its contents, however, are carefully compiled and of interest.

Toronto Financial Calendar and Daily Memorandum. This ingenious and serviceable calendar does something more than give the days of the month and the holidays therein. It gives a list of the stocks on which dividends are due on certain days, and bond issues as well. Banks, loan companies, railways, industrials, electrics—all these are listed and the date of annual meetings given. Revenue tables are added, and a series of suggestions upon the advantages of corporate trusteeships and executorships. The publication is presented by the National Trust Company, Limited; printed in Montreal by Desbarats & Co.; entered at Ottawa by Norman Binmore. It is a well-printed pamphlet.

TO CORRESPONDENTS.

A. H., Colchester.—Yours is one of many kind wishes for the New Year which are cordially reciprocated. We ought all to remember, however, that to obtain the happiness our friends wish us, each one should strive by well-doing to deserve that happiness. It will not answer if we simply aim to be satisfied with some such attitude as that of Uncle Eben, who is described by the Washington Star as saying: "I's gwine to turn over a new leaf on New Year's, but I specks dat as usual de readin' will be 'bout de same as what was on the page befo'."

F. R. M., City.—It is true, the sentence on page 867 of last week's issue should have read: "Queer ideas of *their* functions and responsibilities the auditors of the York Loan must have had." Thanks, for what you say; but we only did our duty in warning the public against this concern.

J. M., Montreal.—Have not heard of the proposal. Recommend you to write to the superintendent of insurance at Ottawa.

Simplicitas, Port Arthur.—Although the subject is an important one, your letter is too lengthy and too essay-like for our columns. An appropriate vehicle for it would be "Canada First," the Toronto monthly whose office is at 77 Victoria Street. Aiming to make money and a craving after what is called "style" are rife now-a-days on both sides of the Great Lakes. Simpler living would be a boon to many. In that delightful story, "Cranford," you may remember, Deborah said: "We have always lived genteelly; even if circumstances have compelled us to simplicity."

* * *

BANKING AND FINANCIAL.

The city of Three Rivers, Que., is applying to the Legislature for power to contract loans or to issue debentures for the construction of pavements and drains, improving water works, for lighting, school and other purposes.

The People's Security Company, Limited, of Hamilton, has been granted a charter by the Ontario Government. Its authorized capital stock is $40,000, and it proposes to act as an insurance and collecting agent. D. Mackenzie Scott and W. J. Southam, of Hamilton, are provisional directors.

We are informed that Mr. Robert Cassels has been appointed manager of a branch of the Canadian Bank of Commerce to be opened about 1st February next in the new building now approaching completion on Yonge Street, opposite the store of The T. Eaton Company, Limited. This branch, which is to be known as the Yonge and Queen branch, will be the tenth office of the Bank of Commerce in Toronto.

A statement has been issued by the Western Trusts Company, of London, liquidators for the Elgin Loan Company of St. Thomas showing the value of assets received to be $370,000. Of this sum, $305,000 has been realized and paid to depositors of the Elgin company. The present value of the remaining assets is stated at $65,000, and liabilities to depositors about $27,500. There is a likelihood, therefore, that something will be realizable for shareholders.

For many years such an ordinary thing, as it seems now, as giving notice that interest was allowed on money placed on deposit, was withheld by many banks for no better reason than that it was not usual to do so. Now that this has become usual, it has been accompanied by a great increase both in the deposits and in the amount of the business, and similar results would probably follow the giving fuller information as to the cash held.—London Bankers' Magazine.

Imagery is not looked for at a bank meeting. Bankers are not supposed, in either their private or public discourse, to "mingle poetic honey with trade wax," as Tom Hood tells us he did in his early days on a counting-house three-legged stool. But there seemed nothing incongruous in the metaphor used by Mr. Gill, of Ottawa, in his speech at the Bank of Commerce gathering. In fact it was a very apt figure to represent the annual meeting of proprietors thanking the staff as a visit of the owners to the ship when the came into port, first complimenting the captain and afterwards the crew—Mr. Walker, of course, being the captain, Mr. Laird, the mate, and Mr. Gill *et al.* the crew.

Extraordinary rates for call loan money in evidence of one of the most severe monetary stringencies in recent history do not seem to prevent voluminous transactions on the New York Stock Exchange. Last year broke all records in this respect, not excluding the great year of 1901. The total sales in 1905 reached $1,287,925,440. Bond sales were $1,027,365,850, compared with $1,019,768,147 in 1904. Stock sales were $260,559,590 compared with $185,215,251, a gain of $75,344,339. As each sale involves the passing of four to six checks, thereby producing, say, $5,000,000,000 of bank clearings and involving possibly $1,000,000,000 to $1,500,000,000 of cash in the transactions, it is estimated that 40 to 50 per cent. of the country's cash circulation flows through Wall Street to handle its speculative and investment business in corporation securities.

There are many who are puzzled as to the meaning of the reports that come from New York as to the meaning of "50 per cent. paid for money," or in some cases 90 to 120 per cent. This the Hartford "Courant" explains: "All this talk that comes up from New York about 90 per cent. and 100 per cent. rates for money should be accompanied with a diagram to show that it has practically no application to every day humdrum business folks. It is a select entertainment relating entirely to the speculative gentlemen who bet on the Exchange each day on the price of stocks and who have to carry over night the securities they have not got rid of during the day. The rate is per annum, but the payment is per diem. It sounds big, but it foots up small." Ninety per cent. money in such case means that a hard-up speculator will pay at the rate of $190 per annum for the loan of $100 for a single day; or that he will pay $60.70 for the use of $10,000 for twenty-four hours.

A story worthy of Andrew Lang was told at the Canadian Bank of Commerce annual meeting last Monday by a cousin of his, the well known Mr. John Lang Blaikie. It was apropos of the subject of bad debts in the accounts of banks, and the possibility of recovering them another year with a better season. A distinguished minister from Scotland was in Montreal one winter day and thought he should not return home without taking a drive upon the ice. Accordingly he hired a sleigh, and was driven out upon the St. Lawrence. Observing some cracks and other openings in the ice he said to the driver: "Is there not danger of breaking through sometimes?" and the driver assented. "And what do you do then?" "Oh, we often have to trust to the horse." The minister asked further questions, as for example, whether he had known of cases of the kind. Yes, he had. "Just over there," pointing with his whip, "a man went through." "Dear me!" said the visitor, "and was he lost?" "Oh, no," answered the driver, "we got him the next spring."

* * *

FIRE INSURANCE ITEMS.

Of the four thousand fires that took place in Chicago during 1905 the causes of 1,378 were undiscovered. "Carelessness" in various directions, principally with matches, caused 506 fires; defective flues, 240; explosion of gasoline, 280; oil lamps, 112; sparks from chimneys, 304; electric wires, 81. There were 85 supposed to be incendiary, and 164 believed to arise from spontaneous combustion.

La Compagnie d'Assurance Mutuelle contre le feu La Fonciere is applying to the Quebec Legislature for power to increase its capital stock to $1,000,000 and to become a party to contracts of insurance and re-insurance against fire, on the mutual and cash premiums systems, throughout that province, without being liable to any proportion concerning insurance risks in towns and cities. It also asks power to hold and convey immovables; to change the company's name, and to transfer the head office of the company to any place in the Province of Quebec.

Since the departure of Mr. A. B. Smith from Toronto, to take up his residence in Montreal as the superintendent of Grand Trunk Pacific telegraph construction, new arrangements have had to be made for the supervision of electrical construction in Toronto. The Canadian Fire Underwriters' Association therefore appointed Mr. Harry Strickland to the vacant post. But the work can by no means be done by one man, therefore the C.F.U.A. have appointed A. H. Bertshinger of Ottawa to the electrical inspection staff. He is to be stationed in Toronto on inspection work for some time, afterwards to take charge of electrical inspection in Ottawa.

The frequent burnings of church buildings is a subject treated in the January issue of the Norwich Union Bulletin. Eight examples of church fires in five different provinces in three late months of 1905. At Halifax and Belmont, N.S.; at Winnipeg and Carman, Man.; at Fernie, B.C.; in Montreal; and in Markdale and Fort William in Ontario. In five cases the losses were total, in three they were partial. Mr. Laidlaw quotes in this connection words of warning from the president of the Home Fire Insurance Co. of the United States:

"Of the thirty-eight losses on churches that have come under our notice and observation recently, we find that twenty have been attributed to some cause incidental and relating to the heating arrangements of the building, such as defective flues and overheated furnaces. This does not surprise us in view of the fact that the care of church buildings, as a rule, is in immediate charge of a sexton, indifferently reporting to a committee or consistory, or some similar joint body; and, in consequence, it frequently is the case that no systematic and adequate care is given to the heater pipes and smoke flues that same may be maintained in safe and proper condition. During the summer months particularly pipes will 'rust out,' and in many instances care and inspection is neglected, unsound material is not replaced with new, and trouble ensues when fires are started in the fall."

* * *

LIFE AND ACCIDENT ASSURANCE.

The record of the Mutual Life of Canada for 1905 is one of which its authorities are proud. And we do not wonder at it. The new business written by that company in the twelve months amounted to more than six millions.

First get your business on a profitable basis. To do this you must not permit the policies you wrote last month to lapse this month. Then get more business. Business begets business, and the more you have of it the easier you will find it to get still more.—Continental Agents' Record.

A successful business for the year just past is reported by the Sun Life Company of Canada. That company received applications in the twelve months for $25,591,000 worth of new business, as compared with $23,098,000 in 1904, an increase of $2,493,000, or very nearly ten per cent.

Hon. Carroll D. Wright advocates a government system of accident insurance on lines similar to those already in operation in Germany. He contends that the workman who lost a limb in the discharge of his duty has as much claim on society as the soldier who falls in defence of his country. Sickness and old age insurance, the speaker said, are also desirable, but the country is not yet ripe for them.

A dispatch from Paris states that some of the large United States insurance companies are threatening to withdraw from France as a result of the new French insurance laws, under which the insurance law becomes retroactive. The law as originally passed required foreign insurance companies to purchase and deposit French securities as a protection for French policyholders. The companies, it is said, are willing to accept this as to future business, but not on policies already written.

* * *

TRADE ENQUIRIES.

Enquiries have been recently made at the Canadian Government office in London, as follows:—By a London firm for Canadian importers of steel tubes, rails, etc.; also gas lighting plant. By a Scotch firm for a suitable agent in Montreal for the sale of their coal tar product in Canada. By a Glasgow house for the representation of a good firm of Canadian manufacturers or exporters in any hardware lines. By a Yorkshire timber agent for names of Canadian manufacturers of dimension ash. And at the city trade branch, 73 Basinghall Street, a London timber agent with a large connection desires an agency for Canadian hardwoods for building purposes. Is prepared to invest $2,500 if required in substantial agency.

—The Dominion Produce Company, Ltd., Winnipeg, which was recently granted a charter by the Dominion Government, will establish branches at various points of the Dominion. These will be at St. Thomas and Vancouver and elsewhere, as conditions warrant. The advantage looked for is in the fact that stocks can be accumulated at one point having special facilities for the same, and shipped elsewhere, such as to the West, when a heavy demand arises there.

—The English branch of the Rothschilds has become interested, largely through the representations of the Ontario provincial treasurer, Col. Matheson, in the ores of Cobalt, and it is on the boards that the above great firm, who are extensively engaged in refining, will make arrangements to smelt them. This would prove a welcome competition with the New Jersey smelting concern which now has everything its own way. At the present time the question of Government aid for smelters, or at least for a sampling plant in the Cobalt district, and perhaps elsewhere, is understood to be under consideration, but nothing has been decided upon pending the decision of private parties contemplating embarking upon the enterprise.

—We find some diagrams and statistics about Chicago in the last issue of the Argus which are interesting. Among the facts that journal gives about the wonderful western city are the following. The new buildings erected in Chicago during 1905 would, if placed together, cover an area of 4¼ miles by one-half mile. The growth of apartment house accommodation in that city has been remarkable. For example, the buildings of that kind erected in 1903 cost $7,030,300; in 1904 they increased to $14,339,600, and in 1905 reached an aggregate value of $21,809,900. Seven or eight times as much money was spent on apartment buildings last year as on private residences. The Tribune gives some illustrations of the growth of factory and warehouse construction in Chicago in 1905, as compared with 1904. In the latter year the cost of such buildings was $4,640,500, and last year it reached $11,235,000, having more than doubled. Such figures show how common is the disposition of the United States people in cities to go boarding or lodging instead of housekeeping.

—More than half the presumed crop of ninety million bushels of North-West Canada grain has been marketed. At least this is the intelligence which comes from Winnipeg under date January 5th. There has been marketed, it is stated, at points along the Canadian Pacific Railway to date 46,421,000 bushels of grain, of which 44,203,000 was wheat and the remaining 2,218,000 other grains. In the corresponding period of last season there was marketed 20,845,000 bushels of wheat and 959,000 bushels of other grains, so that the quantity sold is more than double that of 1904 to corresponding date. This makes a remarkable advertisement for our prairie provinces. And it is matter not so much for pride as for devout thankfulness and larger hope.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ending with Thursday, January 11th, 1906, as compared with those of the previous week:—

	Jan. 11th.	Jan. 4th.
Montreal	$30,348,042	$26,148,043
Toronto	26,757,075	24,520,127
Winnipeg	9,589,670	9,133,646
Halifax	2,621,141	2,164,994
Hamilton	1,494,048	1,493,662
St. John	1,367,402	1,064,951
Vancouver	2,017,880	2,063,412
Victoria	1,067,731	752,621
Quebec	1,970,026	1,743,367
Ottawa	2,336,259	2,307,993
London	1,378,999	1,282,706
Total	$80,948,273	$72,675,582

Vault doors in Bank of Montreal and Royal Trust Company, Montreal
Three times larger and heavier than any other in Canada. Doors and Vestibules weigh **60 tons**. Total weight of lining and doors **260 tons**. Accepted to be the finest piece of vault work in construction and workmanship in the Dominion. — Built by the old established firm of

J. & J. TAYLOR, Toronto Safe Works, Toronto.

Established 1855.

BLAME THE WEATHER.

A scare-head reference in the Toronto "World" to the possible effect of the mild weather upon retail merchants with heavy stocks of "cold weather goods," and a weatherwise and very scholastic editorial upon the same subject, make too much, it seems to us, out of circumstances which the average wholesaler dealer understands, and makes allowance for. In a mild season, where the stock of furs laid in by a furrier, or heavy woolens by a general storekeeper, who expected a normal winter, prove largely unsaleable, the creditors of such a man are always accustomed to be lenient if he finds difficulty in meeting his bills. Our information is that there is no such apprehension in the minds of wholesale men about retail failures that the "World" has found "among the assignees." And the prediction of such trouble does not come with a good grace from an assignee. The estate which the "World" man instances only owes $700 all told (it is a haberdasher's shop), and is entirely too small a peg on which to hang the story that "the dry goods trade has suffered to a considerable extent," and that "the smaller merchants are worried."

* * *

—Pat—"This is a great country, Mary Ann." Mary Ann—"How's that?" "Shure th' pa-pers sez yez can buy a foive-dollar money order fer three cints. Oi'm afther havin' wan now wid th' money yez give me for th' cake av soap."

THE BANK OF TORONTO.

The fiftieth annual meeting of the stockholders of the Bank of Toronto was held at their banking house on Wednesday,-10th of January, 1906.

The president, Mr. W. H. Beatty, was called to the chair; the general manager, Mr. Duncan Coulson, was appointed secretary and Messrs. Henry F. Gooderham and E. M. Chadwick were requested to act as scrutineers.

At the request of the chairman the secretary read the following report:—

Report.

The directors of the Bank of Toronto have pleasure in presenting their annual statement to the stockholders.

Owing to changes which have taken place in the date of holding the annual meeting, this statement is the fiftieth to be presented at a stockholders' meeting, although the fiftieth year of the bank operations will not be completed until next July.

STATEMENT 30th NOVEMBER, 1905.

Profit and Loss Account.

The balance at credit of profit and loss on the 30th November, 1904, was		$ 113,284 05
The net profits for the year, after making full provision for all bad and doubtful debts and deducting expenses, interest accrued on deposits and rebate on current discounts, amounted to the sum of....	$464,896 71	
Premium received on new stock..	459,585 00	
		924,481 71
		$1,037,765 76

This sum has been appropriated as follows:—

Dividend No. 98, five per cent..	$150,000 00	
Dividend No. 99, five per cent....	170,880 50	
		$ 320,880 50
Taxes paid to provincial governments		5,385 25
Transferred to officers' pension fund.........		7,500 00
Written off bank premises		35,368 74
Transferred to rest account from profit and loss account.......	$100,000 00	
Transferred to rest account from premium on new stock....	459,585 00	
		559,585 00
Carried forward to next year...............		109,046 27
		$1,037,765 76

Rest Account.

Balance as on 30th November, 1904	$3,300,000 00
Transferred from profit and loss account....	100,000 00
Premium on new stock	459,585 00
Amount at credit on 30th November, 1905...	$3,859,585 00

The year just closed has been marked by many favorable features. There have been an abundant harvest, continued increase in population, general activity in business and steady growth in the wealth of the community. In the general prosperity the bank has shared, and all departments of its business have made satisfactory progress.

In order to give greater security to the depositors, and to enable the bank to enlarge the circulation of its own notes, the directors, acting under the powers conferred upon them by previous meetings, decided to increase the capital stock of the bank and an allotment of $500,000 new stock was made on the 31st May, 1905.

At the closing of the books on 30th November, there had been subscribed $483,900 of such new stock, on which payments had been made amounting to $459,585 and from the premium thereon the sum of $459,585 was available as an addition to the rest account of the bank.

During the year new branches of the bank have opened at Brantford, Galt, Parry Sound and Welland, in the Province of Ontario, and at Winnipeg in the Province of Manitoba. Arrangements have also been made to open branches at Berlin, Ontario, and Portage la Prairie, Manitoba.

The directors have to report with deep regret the great loss the bank has sustained through the death of the late president, Mr. George Gooderham. For a period of over thirty-three years he served on the board of directors and for twenty-three years he filled the office of president and during all these years was unwearied in promoting the interests of the bank, and brought to bear upon his duties high intelligence and unbending integrity.

The vacancy thus caused was filled by the election of the vice-president, W. H. Beatty, to the office of president; W. G. Gooderham was elected vice-president, and Albert E. Gooderham was elected to a seat on the board.

All of which is respectfully submitted.

W. H. BEATTY,
President.

GENERAL STATEMENT.

30th November, 1905.

Liabilities.

Notes in circulation		$ 3,088,664 00
Deposits bearing interest $17,412,190 23	$17,412,190 23	
Deposits not bearing interest ...	3,954,884 93	
		21,367,075 16
Balances due to other banks		612,645 49

D. COULSON,
General Manager.

Toronto, 30th November, 1905.

The report was adopted, the president, vice-president and directors were thanked for their attention to the affairs of the bank, and the number of directors was increased from nine to ten.

The following named gentlemen were elected directors: William H. Beatty, William G. Gooderham, Robert Reford, John Waldie, Hon. C. S. Hyman, M.P., Robert Meighen, William Stone, John Macdonald, Albert E. Gooderham, and Nicholas Bawlf.

At a meeting of the new board William H. Beatty, Esq., was unanimously re-elected president, and William G. Gooderham, Esq., vice-president.

* * *

—For the five months ended with November 30th last the revenue of the Intercolonial Railway was $3,254,368, and the working expenses were $3,335,498. For the same period of the previous year the revenue amounted to $3,027,789, while working expenses were $3,437,777. The expenditure thus exceeds the revenue for five months in 1905 by $81,130, while in 1904 the deficit for the same period was $409,988. Comparing the five months of last year with the corresponding period of 1904 there has been a decrease of $102,279 in the working expenses and an increase of $226,579 in revenue, giving a total improvement of $328,858.

The Central Canada Loan and Savings Company.

The twenty-second annual general meeting of the shareholders of the Central Canada Loan and Savings Company was held at the company's offices, in the city of Toronto, on Wednesday, the 10th day of January, 1906, at 12 o'clock (noon).

The president, Hon. Geo. A Cox, having taken the chair, Mr. E. R. Wood, managing director, was requested to act as secretary to the meeting.

After reading the notice convening the meeting, the secretary read the twenty-second annual report and the accompanying financial statement as follows:

Report.

The directors have pleasure in submitting to the shareholders their twenty-second annual report for the year ending December 31st, 1905, as follows:

After the payment of interest on deposits and debentures, as well as all expenses of management, there remain net earnings amounting to $253,654.11. To these net earnings is added the sum of $50,000 (being 20 per cent. premium on $250,000, cash paid in by the holders of $312,500 of 20 per cent. stock paid to par), thus making a total sum available for distribution of .$303,654.11, which has been disposed of as follows:

(*a*) By payment of four quarterly dividends of 1½ per cent. each, being 6 per cent. for the year on $1,250,000 paid-up capital..	$ 75,000 00
(*b*) By dividend at the rate of 6 per cent. per annum from dates of payment to 31st December, 1905, on $250,000 new paid-up capital	2,380 57
(*c*) By bonus of two per cent. for the year on $1,250,000 paid-up capital	25,000 00
(*d*) By addition to Reserve Fund............	200,000 00
(*e*) By balance left in profit and loss account..	1,273 54
	$303,654 11

The above addition to Reserve Fund increases same to $1,000,000, making it now 66 2-3 per cent. of the present paid-up capital of $1,500,000.

The balance in profit and loss account carried forward to next year is $27,128.72.

The increase in deposits and debentures amounts to $389,279.10, and in assets to $840,552.64, the latter now amounting to $7,886,950.42.

The books and accounts of the company have, as usual, been audited, and the auditors' certificates are attached to the balance sheet.

The Inspection Committee have examined the securities and documents in connection with the company's entire body of assets, and their report is appended.

GEO. A. COX,
President.

E. R. WOOD,
Managing Director.

General Statement for the Year Ending 31st December, 1905.

Assets.

Loans, secured by first mortgages on real estate	$1,174,693 04	
Loans, secured by stocks, bonds and debentures	2,276,386 79	
		$3,451,079 83

Transfer of amount received for premium on stock	50,000 00	
		200,000 00
Balance carried forward		$1,000,000.00

In presenting the above statement to the shareholders, the president, Hon. Geo. A. Cox, called attention to the fact that the net earnings of the company were larger than in any previous year in its history, and that after the payment of 8 per cent. dividend for the year the sum of $150,000 was transferred to the Reserve Fund, which in addition to the $50,000 added to that fund from premium received on new stock, made a total addition to the fund of $200,000, thus increasing the same to $1,000,000, or 66 2-3 per cent. of the company's present paid-up capital of $1,500,000.

The president referred to the satisfactory condition of the company's loans on real estate, and on the collateral security of bonds and stocks, and also to the fact that a very important percentage of the earnings of the year was due to the exceedingly satisfactory business transacted by the company in the purchase and sale of Government, municipal and corporation bonds which has grown to be much the most important department of its business.

Reference was also made to the increase during the year of the company's paid-up capital from $1,250,000 to $1,500,000, which increase the directors deemed advisable in view of the rapid growth of the company's business.

Mr. E. R. Wood, the vice-president, seconded the adoption of the report for the year ending 31st December, 1905.

The resolutions appointing the auditors and Inspection Committee were passed, after which the following gentlemen were elected directors for the ensuing year:

President, Hon. Geo. A. Cox; vice-presidents, F. G. Cox, E. R. Wood; Sir Thomas W. Taylor, E. W. Cox, Richard Hall, J. J. Kenny, F. C. Taylor, H. C. Cox, Wm. Mackenzie, Robert Jaffray, J. H. Housser, Chester D. Massey, Rev. John Potts, D.D., G. A. Morrow.

Mercantile Summary

The hide, leather and tanning business of Chas. and G. W. Parsons in Toronto is to be taken over by a company, which has been organized under the name of C. Parsons & Sons, Limited, with a share capital of $150,000.

It is stated that the Duluth, Virginia and Rainy Lake Railway will be extended to Rainy Lake district this coming season, and an order for steel rails has been placed. The present terminus of the road is Ashawa.

A despatch from Prince Albert, Sask., says that the grading of the Canadian Northern Railway is completed as far as that growing city, and steel is now being laid. It is expected that the track will be completed by the end of January. At present the temporary bridge is still being used to cross the river. The new bridge is a substantial structure. It is ninety feet above the normal surface of the waters of the river.

The Canadian Pacific Railway is said to contemplate the building of two new trunk lines, one from near Winnipeg to Wetaskiwin, on its Calgary-Edmonton branch, and one from Lacombe, in the same vicinity, to Moosejaw. At a directors' meeting a few days ago the cost of these undertakings was estimated at $6,000,000, and the next two or three years were designated as the time in which the work would be done. Part of the scheme would be the building of the important bridge across the Saskatchewan from Strathcona to Edmonton, before referred to in these columns.

The Ontario and Huron Electric Railway Company state that they will begin the work of constructing the tramway line from Meaford to Owen Sound by next spring. It is to follow the shore route by way of Thornbury, Flesherton. Shelburne, then east to Beeton, and then to Toronto. The company also proposes to build a line from Stratford to Walkerton and thence to Owen Sound.

A bird's-eye view of the extensive varnish works of the Canada Paint Company, situated in Leslie Street, Toronto, upon the famous Ashbridge's Bay may be found in our columns to-day. These works comprise a space of two acres. If we may judge of the extent of its business by the illustrations which our pages give first of the company's works in Montreal, and now by its Toronto establishment, this company deserves to be ranked as one of the leading Canadian industries.

The Grand Trunk Railway Company has just placed orders for twenty ten-wheel passenger engines and sixty-one Richmond compound consolidated engines, mostly in New York. This represents an outlay of something like $1,398,000. The locomotives are to be placed in service wherever needed, but the latter point has not been yet decided on.

An assignment of his estate has been made by A. S. Rusland, jeweler, of Arnprior, Ont., doing business under the name of his wife, Lucy Rusland, to A. J. Campbell. He had previously been in business unsuccessfully at Renfrew, Ont.

V. Thibault, general merchant, Sayabec, Que., recently reported as insolvent, is said to be arranging a compromise on liabilities of $6,000 at the rate of 50 cents on the dollar.—J. A. Caron & Co., boot and shoe retailers at Chicoutimi, Que., are offering 40 per cent. on liabilities of $2,500.

A survey is being made for the Canadian Pacific Railway from Debec, N.B., to Bancroft, Me., in order to give the former and the Maine Central a shorter line from Aroostook county and northern New Brunswick to Boston, and to enable them the better to compete with the Bangor and Aroostook Railway.

A prospector named Anthony Blume has discovered gold deposits near Lake Manitou, in the Rainy Lake district of far-west Ontario, which are said on good authority to yield fabulous values. Blume himself, who is said to have had twenty-seven years' experience, declares that district possesses the richest gold deposits in the world. But this is the way sanguine miners sometimes talk.

A voluntary assignment has been made by Armand McGowan, general merchant, St. Ours, Richelieu county, Que., whose liabilities are figured at about $10,000. He was formerly a member of the old-established firm of James McGowan & Sons, of Ste. Martine, and started in business at his present address on his own account in the spring of 1902. He was burned out during the following year, and then compromised at 50 cents on the dollar, which left him very little margin, and he then recommenced business with some help from his mother.

A project is being talked of to mine for a large body of ore which is believed to exist under the bed of Moyie Lake, in the Kootenay district of British Columbia. The idea has occurred to the promoters that since on the east side of the lake there is the St. Eugene mine with large deposits of silver and lead. and on the opposite shore there is the "Aurora," with ore of an almost identical character, therefore the two mines are probably on the same lead. They have pre-empted the whole width of the lake a belt about 1,500 feet wide. Its depth is about 200 feet.

A Great North-Western press despatch of 8th inst. states that the Michigan, Midland and Canada Railway, which runs from St. Clair to Lenox, has defaulted on its bonds, principal and interest to the amount of one million dollars, and has been ordered to be sold by a Port Huron judge. The road has been operated for several years by the Michigan Central Railway as part of their St. Clair branch.

The failure is noted of Fairfield & Co., dealing in groceries and men's furnishings at Rockland, Ont., and the estate is to be wound up. Fairfield was formerly a clerk in the shoe department of the W. C. Edwards Co., and began business in 1903, but failed a year later, and, resuming in his wife's name, has met with no better success.

The turbine steamer "Maheno" will be placed by the C.P.R. on the Canadian-Australian service between Vancouver and Sydney. The company's new steamer "Empress of Ireland," of 14,500 tons and 18,000 horse-power, will be launched from the Fairfield Company's yards on the Clyde on the 27th inst. She is booked to make her maiden voyage to Montreal in May. It is expected that she, with her sister ship, the "Empress of Britain," will cross from port to port inside the week, even when using the longer route via Cape Race, which has been adopted for safety.

The Grand Trunk Railway Company have awarded the contract for supplying electrical power for running trains through the St. Clair tunnel to the Westinghouse Electric and Manufacturing Co. Work is to be completed on the installation as rapidly as possible. The system to be adopted will be the alternating current system, with overhead conductors, the conductors in the interior of the tunnel being placed upon the walls and in the railway yards they will be supported by steel bridges. The rails will be operated by alternating current. Locomotives capable of hauling a passenger train on the grade at the rate of twenty to twenty-five miles an hour, and a freight train of 10,000 tons at the rate of ten miles an hour will be used. The interior of the tunnel and the yards on both the United States and Canadian sides of the St. Clair will be lighted by electricity from the power generated in the extensive power house that it will be necessary to erect. The length of the tunnel proper is 6,025 feet, and of the open portal approaches 5,603 feet additional, or more than two miles in all, making it one of the longest submarine tunnels in the world.

Henry Clews & Co., New York, in a special letter dated January 6, 1906, write as follows:

The year 1906 opens under most favorable auspices. General business conditions are satisfactory, and ought to continue so, at least until the next harvest. So far as the stock market is concerned there are but two dangers, and these are rather serious ones: an over-extension of credit and the fostering of undue speculation. The money squeeze is now over, and from now until the middle of March money should remain in a comfortably easy condition; but the recent stringency in the money market is proof of the need of an elastic currency system and the rather unwelcome demonstration of the persistency of speculative demands upon our banking resources.

Meetings

THE CANADIAN BANK OF COMMERCE.

The thirty-ninth annual meeting of the shareholders of the Canadian Bank of Commerce was held in the banking-house, Toronto, on Tuesday, 9th January, 1906, at 12 o'clock.

Among those present were:—

H. P. Dwight, David Smith, N. Silverthorn, Summerville; William Cook, Carrville; F. J. D. Smith, Newtonbrook; Mrs. F. J. D. Smith, Newtonbrook; John A. Bruce, Hamilton; Robert M. Dennistoun, Peterboro'; F. C. Bruce, Hamilton; John L. Blaikie, John A. Morton, Miss Robertson, Hamilton; W. H. Lugsdin, Blenheim; Robert Gill, Ottawa; W. T. Boyd, H. B. Walker, New York: W. W. Tamblyn, Bowmanville; James Crathern, Montreal; G. A. Holland, Orangeville; E. W. Cox, H. L. Watt, H. C. Cox, R. C. Macpherson, Paris; Henry Beatty, John Pugsley, R. Harmer, Rev. Dr. Griffin, R. S. Williams, Goderich; John Catto, A. V. Delaporte, J. McE. Murray, Dresden; Wm. Spry, Dr. J. H. Carrigue, F. C. G. Minty, Waterloo; G. G. S. Lindsey, E. R. Wood, W. H. Lockhart Gordon, R. C. Carlyle, N. F. Ferris, Nanton; Hon. Mr. Justice Maclaren, John Hoskin, K.C., LL.D.; G. M. Wedd, Walkerton; George Murray, Richard Brown, J. O. Thorn, W. A. Murray, James Hedley, S. Nordheimer, A. Kingman, Montreal: T. L. Rogers, Parkhill; F. Nicholls, Hon. George A. Cox, S. J. Moore, Hon. S. H. Blake, K.C.; John A. Mackay, J. S. McMaster, Hon. L. Melvin Jones, Matthew Leggat, Hamilton; R. Kilgour, Charles Bonnick, C. D. Massey, R. Cassels, A. D. Clarke, Cawthra Mulock, Wm. Davies, Wm. Garside, Wm. Ross, John Aird, Winnipeg; George F. Hedges, Cherrywood; A. F. Rutter, R. Wickens, Mrs. E. J. Gripton, St. Catharines; W. Murray Alexander, C M. Gripton, St. Catharines; Edward Cronyn, G. F. Little, Thomas Walmsley, E. H. Bickford, A. W. Anglin, J. R. Shaw, George A. Case, A. W. Roberts, Port Arthur; W. Manson, A. D. McLean, Sarnia; S. R. Wickett, Walter Cassels, K.C.; G. A. Morrow, L. J. Cosgrave, George J. Foy, A. E. Webb, Frederick Wyld, Dickson Patterson, A. G. Verchère, Wiarton; D. Hughes Charles, Peterboro'; Major Deuer, R. Mulholland, H. G. Nicholls, Frank Darling.

The president, Hon. Geo. A. Cox, having taken the chair, Mr. F. G. Jemmett was appointed to act as secretary, and Messrs. E. Cronyn and W. M. Alexander were appointed scrutineers.

The president called upon the secretary to read the annual report of the directors, as follows:—

Report.

The directors beg to present to the shareholders the thirty-ninth annual report, covering the year ending 30th November, 1905, together with the usual statement of assets and liabilities:

The balance at credit of profit and loss account brought forward from last year, was	$28,726 39
Net profits for the year ending 30th November, after providing for all bad and doubtful debts, amounted to	1,376,167 63
Premiums on new stock	564,996 00
	$1,969,890 02

Which has been appropriated as follows:—

Dividends Nos. 76 and 77, at seven per cent. per annum	$666,784 27
Written off bank premises	219,233 99
Transferred to pension fund (annual contribution)	25,000 00
Transferred to rest account	1,000,000 00
Balance carried forward	58,871 76
	$1,969,890 02

As is usual, the entire assets of the bank have been carefully re-valued, and all bad and doubtful debts amply provided for.

In accordance with the decision advised to you at the beginning of the year, $1,300,000 of new stock has been issued, and the paid-up capital of the bank now stands at $10,000,000

Your directors are pleased to be able to report that the earnings for the year have been the most satisfactory in the history of the bank, amounting to $1,376,167.63. Adding to this the sum of $564,996, being the premium on the new stock issued during the year, we have been able, after providing for the usual dividend and for the contribution to the pension fund, to write $219,233.99 off bank premises, and to add $1,000,000 to the rest.

During the year the bank has opened new branches as follows: In British Columbia—at Penticton, Princeton and South Vancouver; in Alberta—at Claresholm, High River, Lethbridge, Macleod, Pincher Creek, Vegreville and Vermilion; in Saskatchewan—at Kinistino, Melfort, North Battleford, Saskatoon and Yellowgrass; in Manitoba—at Brandon and at Louise Bridge, Winnipeg; in Ontario, at Cobalt and Port Arthur. Since the close of the bank's year branches have been opened at Fort Rouge (Winnipeg), at Parry Sound, and on Bank Street, Ottawa. Arrangements have been made for opening almost immediately two additional branches in Toronto—one on Yonge Street, almost immediately north of Queen Street, and the other in Parkdale.

As you are aware, the provisions of the Bank Act formerly required that the number of a bank's directors should not be less than five and not more than ten. By an amendment passed in the last session of Parliament, the limit set to the maximum number has been removed, and you are now free to appoint any number of directors, not less than five, which may seem to you advisable. In view of the increase in the volume of the bank's business, of the wide extent over which it is now spread, and of the diversity of interests with which we are called upon to deal, your directors feel that some increase in their number is desirable, and an amendment to the By-laws will be submitted for your approval, fixing the number at twelve.

The various branches, agencies and departments of the bank have been inspected during the year.

The directors have again pleasure in recording their appreciation of the efficiency and zeal with which the officers of the bank have performed their respective duties.

Geo. A. Cox,
President.

Toronto, 9th January, 1906.

GENERAL STATEMENT, 30th NOVEMBER, 1905.

Liabilities.

Notes of the bank in circulation		$ 8,738,670 68
Deposits not bearing interest	$19,425,688 84	
Deposits bearing interest, including interest accrued to date	54,947,802 12	
		74,373,490 96
Balances due to other banks in Canada		128,832 92
Balances due to other banks in foreign countries		225,477 32
Dividends unpaid		429 37
Dividend No. 77, payable 1st December		349,824 61
Capital paid up	$10,000,000 00	
Rest	4,500,000 00	
Balance of profit and loss account carried forward	58,871 76	
		14,558,871 76
		$98,375,597 62

Assets.

Coin and bullion	$ 3,391,576 89	
Dominion notes	4,877,539 75	
		$ 8,269,116 64
Deposits with Dominion Government for security of note circulation		400,000 00
Notes of and cheques on other banks		3,496,517 07
Balances due by other banks in Canada		29,555 86
Balances due by agents in Great Britain		2,485,681 31
Balances due by agents of the bank and other banks in foreign countries		1,042,220 85
Government bonds, municipal and other securities		5,711,102 77
Call and short loans		11,252,325 87
		$32,686,520 37
Other current loans and discounts		64,303,041 40
Overdue debts (loss fully provided for)		101,327 86
Real estate (other than bank premises)		71,023 66
Mortgages		51,378 41
Bank premises		1,000,000 00
Other assets		162,305 92
		$98,375,597 62

B. E. Walker,
General Manager.

In moving the adoption of the report, the president said:—

President's Address.

The statements which have been laid before you will, I have no doubt, be regarded as more than usually satisfactory. A year ago we feared that we might not have a continuance of such handsome profits, but this year they are larger than ever, namely, $1,376,167. These earnings relatively to the average paid-up capital during the year are at the rate of a trifle over 14 per cent. We must point out to the shareholders that the year's transactions have been exceptionally profitable and may not be easily repeated.

During the year, in accordance with the resolution referred to in the directors' report, new stock amounting to $1,300,000 was issued. It is now clear that it was wise not to delay its issue, as the activity in business, and especially the movement of the crops in the North-West, made both the capital thus acquired and the circulation thus authorized very useful and profitable.

We are spending more money on bank premises than ever before. As we said a year ago, we believe that in times of unusual prosperity we should do all that we reasonably can to provide the bank with handsome and permanent establishments; such a course not only aids very much in building up our business, but as one of the great fixed charges in banking is rent, a policy tending towards the ownership of as many as possible of our branch buildings must in the long run add greatly to our net earnings. The large sum thus expended and written off has not prevented us from adding to the premium on new stock, amounting to $564,996, a sufficient sum to make an increase to the rest account of $1,000,000, thus bringing the total of the rest up to $4,500,000.

Our deposits show an increase of only about $4,000,000. The actual increase in ordinary deposits is, however, much greater, as at the close of the previous year we held a considerable amount of trust money awaiting early disbursement. Our loans are much larger relatively than last year, the wide-spread business activity throughout Canada, and especially the unusually large crop movement in the North-West, being a sufficient cause.

By the purchase of the Bank of British Columbia, in 1900 we acquired premises in London at 60 Lombard Street. We need not say that the situation is most excellent, but the amalgamated businesses of the two banks, together with the great growth of the last few years, have made the premises most uncomfortably small for our purposes. The premises situated alongside the Mansion House and occupied for so long a period by the ancient banking house of Smith, Payne & Smiths, lately amalgamated with the Union of London and Smiths Bank, are about to be rebuilt, and this bank has secured that part of the site which will be known as No. 2 Lombard Street, No. 1 being occupied by a branch of the Union of London and Smiths Bank. In our opinion the situation could not possibly be better, and we are very glad that we shall be able to find a permanent home in such a prominent situation, although we cannot expect to enter upon our tenancy for about two years.

The general manager then spoke as follows:

General Manager's Address.

In reviewing the business situation a year ago we found it a much more difficult task than usual because of the very varying state of the many factors which influence our progress. We began the year 1904 expecting some curtailment of a prosperity which had perhaps lasted too long without a check. But although the results from the forest, from agriculture, pasturage and fishing, were all less than we had hoped, the end of the year found us prosperous and more confident than ever. Beyond a doubt, however, we were spending money in all matters, public and private, on an unexampled scale for this usually prudent and economical country, and nothing but large results from industry for the past year would have justified our course. Throughout the whole of 1905, however, there has been no moment of national doubt, and nature seems to have furthered almost every effort we have made. This has clearly produced an optimism which is fraught with great danger, and it is to be hoped that everywhere in Canada the many who did not hesitate to incur debt because they believed in the future, will, now that partial fruition of their hopes has come, hasten to get out of debt before they consider what new expenditure the still further removed future will justify. In saying this I need not apologize for repeating what has already been said elsewhere; indeed, it can hardly be said too often.

It may be well before dealing with details, to consider the main facts which seem to influence our immediate future. So far as our interests are in common with those of the rest of the world, the end of the Russo-Japanese war seems the most important event of the year. The cost of money in the markets of Europe, owing to recent wars, has been abnormally high for many years. If, after the final loans caused by this last war are placed, we are to have a long period of peace, then the value of money in Europe should gradually decline, and this would have a most favorable effect not only in the ease with which money could be got for Canadian enterprises, but in the cost of the fixed charges upon the enterprises arising from such borrowings. Of course the present terribly disordered state of Russia must pass away before Paris and other continental money markets are restored to a normal condition. But in any event, unless China intends to resent her bad treatment by the Western nations, it seems as if we may reasonably expect peace and great industrial development in that part of Asia which looks across the ocean to our own provinces, and to those States in the American Union which have their shores on the Pacific Ocean. If so, we are reasonably certain that this bank will share largely in the trade which must come to both Canada and the United States. While the purchasing power of each individual of these Japanese and Chinese peoples may be very small—and that part of it which represents what is called foreign trade is certainly very trifling—still the aggregate, owing to the vast population, will be very large as soon as they are well enough off to buy such great staples as wheat, flour, timber, railroad supplies, etc., in any proportion to their desire to obtain these commodities.

Another great factor in the gradual restoration of the money markets to a normal condition is the rapidly increasing new gold supply. The addition in each year to the world's store of precious metals of about $350,000,000 worth of gold and about $100,0000,000 worth, at present market prices, of silver, is large enough not only to steady the money markets in the course of time, but also to give great impetus to the efforts being made in some countries to escape from a mere paper basis, and in others which are on a silver basis, to advance to a gold basis. We have entirely recovered from the decline in the volume of production caused by the South African war; indeed the output of $350,000,000 for 1904 means an increase in the annual production of $150,000,000 in nine years. So that we may soon be able to say that the world has doubled its annual new supply of gold in twelve or fifteen years.

Other important facts, but of more local and direct concern to Canada, are our good crops, the enlarged scale of our railroad building, the satisfactory inflow of immigration, the development of steel and iron making, and the tremendously enhanced interest shown regarding Canada in both Great Britain and the United States, particularly exemplified by acute discussions of tariff preference and of reciprocity.

It is hardly necessary to enter as fully into the details of our foreign trade as we did a year ago. The fiscal year covered by the Dominion Government reports ended 30th June, 1905, and the effects of the harvest of 1905 on our exports is therefore not yet evident. We again show a serious loss in exports, the total falling to $203,316,000, about $10,000,000 less than in 1904, and $22,500,000 less than the high-water mark of 1903. The loss is practically all in agricultural products, other increases and decreases about off-setting each other. Doubtless in the first half of the present fiscal year the loss will have been made up. The more serious aspect of our foreign trade is on the import side. We had $10,000,000 less to pay with by way of exchanging commodities, and yet we bought $7,500,000 more than for the previous year, widening the unfavorable balance between exports and imports to $63,500,000. From 1895 to 1901 inclusive, but deducting the small contra balance of 1899, the excess of exports over imports was $51,000,000. This has been followed by an excess of imports over exports from 1902 to 1905 inclusive, but practically for only three years, of $125,000,000. As we said a year ago, we are spending money in public and private improvements, looking to the future for a return, but do not let us overlook the fact that we are putting a heavy mortgage on the future. It is well to notice that we imported a little less from Great Britain in the year under review than in the previous year, while our imports from the United States were nearly $11,000,000 greater. Of our imports, iron and steel in all forms, including rails, account for nearly $40,000,000. This gives a concrete illustration of what it would be worth to Canada to make these articles entirely, or as nearly as possible, in our own country.

The Clearing House returns help us to understand the growth of the internal trade of Canada. In 1904 the total of the operations of eleven clearing houses was $2.735.744.235. For 1905 the total is $3.336,602,170.

The Maritime Provinces.

In view of the rather unhappy conditions we had to report last year regarding the Maritime Provinces, it is pleasant to have to deal with a much improved state of affairs this year. The Provinces experienced another unusually severe winter, and this had a somewhat adverse effect on business. For instance, it increased the cost and lessened the cut of lumber. The cut, it will be remembered, was being in any event intentionally reduced because of a sharp fall in the price of deals. The usual result of this curtailment of product has happily been obtained, and returns for all lumber products are again high, while the prices offered for the next season's cut of spruce deals are almost a record, and the demand for freight space at St. John, N. B., has very greatly increased rates. For fish, prices have been paid which have not been reached before, and results in some kinds of fishing are quite satisfactory. There are, however, details in this important industry which are worth our attention. While the bank and the bay fishing have been equal to the average of the last three seasons, with better prices, the shore fishing, except in lobsters, is nearly ruined by the so-called dog-fish, the predatory incursions of which have almost ruined for the time being the valuable mackerel and herring fisheries. The loss incurred in money is very large indeed, and it is certainly to be hoped that the experiments of the Government, looking to the material decrease of the number of dog-fish, may be successful.

The enforcement of the Newfoundland Bait Act, as it applies to United States fishing vessels, is helping the fishermen of the Maritime Provinces as well as of Newfoundland, and the importance of the matter to us makes it an additional cause for regret that Newfoundland is not in the Confederation. Is it not time for Canada to reconsider the *modus vivendi* arrived at after the rejection by the United States Senate, in 1888, of the Chamberlain-Bayard Treaty? Why should we give the United States fishing vessels the very privileges which enable them to undersell us in their markets? We realize that this is a matter which must be viewed broadly if any breadth of view is shown by our neighbors, but we have as yet seen little evidence of that. Canada and Newfoundland together own magnificent fishing areas, large enough to influence greatly the fish markets of the world. As the various countries of the world increase in wealth and purchasing power, the demand for fish, cured in one form or another, must steadily increase. The prosperity of our Atlantic and Pacific provinces depends virtually on the permanence and increased volume of our fisheries. Why should we hesitate to take every step necessary to protect and develop such a national asset? Indeed it is most pleasant to see that the Department of Marine and Fisheries, under the late Minister, has been exhibiting considerable energy in this direction.

The yield of apples was only about 60 per cent. of a normal crop, but prices are high. In hay, from the lack of which last year great loss arose, there was at least a normal, and, in some parts, a very large crop. Produce of almost all kinds has brought good prices, and while there are a few localities where progress has not been made, the general results are excellent. The completion of the Halifax and South-Western Railway should do much for some parts of Nova Scotia. We are able once more to report that the various branches of manufacturing in these provinces have been, as a rule, very profitable, and that in many cases the yearly output has again been the largest known. In some very important industries the orders in hand are particularly large, and the quantity of coal mined has somewhat increased. Perhaps the most gratifying and important industrial fact is the further improvement in the conditions surrounding the manufacture of iron and steel, and particularly the beginning or the manufacture of rails, the excellent quality of which seems to have been demonstrated at once.

Ontario.

To the people of Ontario as a whole the year has been one of very general prosperity. The industries of the province, whether on the farm or in the town, the geographical situation, and the conditions of soil and climate, are all so varied that we can hardly have years in which there are no localities which differ in prosperity from the general average. What is clear, however, is that while we have not had a year so good for the farmers as 1903, we have had a very much better year than 1904. Crops of wheat, oats, barley and other grains have varied more than usual in yield in different parts of the province, and in some grains prices have not been as good as last year, but the total result is satisfactory. These crops, except to the extent that they affect the value of cattle fed for the market, are no longer of prime importance. The crop of hay has been heavy in some parts, not so in others, but a good crop as a whole, while pasturage has been abundant almost everywhere. Roots, as a whole, have been unsatisfactory, but this does not apply to sugar beets, which are being grown more extensively each year in several parts of Ontario. Fruit crops have been variable, but shipments of apples from Montreal are larger than in any year except 1903. The total for 1905 from that port is 539,000 barrels, against 348,000 for 1904, and 732,000 for 1903. When we turn to the great farming interest, that of the dairy, the figures become very interesting. Taking, as we should, the results from cheese and butter together, the figures for the past year are almost the largest in the history of shipments from Montreal. The quantity of cheese shipped is about 10 per cent. less than in 1903, and not appreciably more than in 1897, 1902 and 1904, but the average price is so high that 1905 remains the largest in money value except 1903, when both quantity and average price were the largest ever known. It is in the more lately established export of butter that pronounced gain has been made. The total shipments were 573,449 packages, valued at $7,400,000. The price is better than last year, but not as good as for several years previous to 1904. The only year which surpasses 1905 in results is 1902, when a somewhat smaller quantity brought a larger sum of money owing to a much higher price. Taking the two articles together, the totals for the last four years, three of which exceed all other years, are as follows:—

1905	$25,426,000
1904	20,704,000
1903	26,366,000
1902	25,863,000

The other great farming interest of Ontario, that of live stock, is less satisfactory, taken as a whole, than is desirable. Shipments of cattle have been larger than for any year except 1903, when they exceeded the shipments of 1905 by 25 per cent. The business, however, has been unprofitable to both grazier and shipper. The grazier paid too much for the cattle he put on grass, and at present prices feels forced, in many cases, to feed them over the winter in the hope of better prices next spring. The home and United States markets for sheep have been good, and the prices paid in Canada for hogs particularly so. Horses also have been in good demand. The general result of all farming industry in Ontario is shown by larger purchases, and by payments on mortgages, implement notes, and other debts, indicating a most healthy and prosperous condition. In the lumber trade in Ontario there has been a reduction in the cut, as in New Brunswick, but prices for pine and hemlock are about at the highest, and the year has been a prosperous one. While there may, in the coming season, be a still further advance in the cost of production, prices are so high as to ensure a good profit, and unless there is a scarcity of water in the streams, we shall probably have an increased quantity manufactured.

Interest in mining has been stimulated by the publicity given to the discovery in Northern Ontario of rich deposits of silver-nickel-cobalt ores. So far as is yet known, the area in which these ores exists is very limited, all the discoveries of any real value being within about four miles of the new town of Cobalt, where we have recently established a branch. At present nothing definite can be said as to the extent of the deposits, or the probable life of the camp. Comparatively little development has taken place, and to what depth the veins of ore may run is uncertain, although a diamond drill has traced one rich vein to a depth of over 300 feet. But it may safely be said that from the veins already discovered several million dollars' worth of ore will be taken, while there is hardly any question but that within the small area which is known to contain the ores, further discoveries will yet be made. A large proportion of the ore produced is of a very refractory nature, and difficulty is being experienced in disposing of it at prices which will give returns for all the valuable constituents. It is to be hoped that before long a satisfactory method of treatment will be made available, and that it will be found practicable to treat the ores within the Province of Ontario.

It is probable that during the coming summer there will be a considerable influx of population into the district surrounding Cobalt, and signs are not wanting that an attempt will be made to create not only a mining but a mining stock boom. Serious losses to the public have in the past resulted from attempts to capitalize mere prospects at prices which only producing mines should command, and it is to be hoped that no encouragement will now be given to any movement of the kind.

In the manufacturing centres, large and small, there is, with scarcely an exception, but one experience, that of continued growth. Factories are still being enlarged, manufacturers in the United States are still opening branch manufacturing establishments in Canada, and in important businesses, which have an unbroken record of increased sales for several years, further increases of 20 and 25 per cent. are still not uncommon. This growth again is causing, in cities and towns, an unusual activity in building and a great increase in the saleable values of real estate. Such questions as the building of working-men's dwellings are becoming acute, and it is evident that the larger manufacturers may have to do what has already been done occasionally in Canada—build houses for their men. Manufacturers, contractors, and even the class of smaller builders, are, as a rule, behind in deliveries of goods or in work being executed. One of the specially noticeable features is the resumption, on a more stable basis, of the manufacture of steel rails at Sault Ste. Marie. While we are speaking particularly of Ontario, many of these remarks apply to Canada as a whole, and of course much of this activity is the result of the great growth of the West. Unfortunately, we cannot have prosperity, apparently, without a general increase in the cost of everything, and in this connection the cost of building and the consequent cost of house rent should be a matter of great concern. When hard times come, as come they must, there will be a sharp adjustment in some direction, because clearly the wage-earner will not be able to continue to pay such rents as are being paid now by the working-men in our larger cities, both in the East and in the West.

The province of Quebec has shared fully in the general prosperity of Canada, and the only reason for not enlarging upon this fact is the absence of branches of this bank, apart from that in Montreal, and therefore of natural sources of information regarding industrial matters.

In Ontario and Quebec, railroad building is proceeding at a pace which marks a new era in transportation in this part of Canada. The Canadian shipping on the lakes is increasing in volume most satisfactorily, while at Montreal there were increases in the number of ocean arrivals and departures, in freight and passenger traffic, in the revenue of the port, and in local canal traffic. Shipbuilding in Canada is now very active, terminal facilities at Montreal and Quebec are being gradually improved, and in almost every direction progress is evident.

We have had, however, on the St. Lawrence route, another season of heavy losses. This must be a matter of very great disappointment to most Canadians who have been indulging the hope that the condition of navigation on the St. Lawrence would, before long, be sufficiently improved to warrant the belief that it is in every way a satisfactory highway. We need not hesitate to say that this is one of the most important points in connection with the development of Canadian transportation. There is little use in spending money and energy in the development of the railway systems of this part of Canada, unless we can be sure that the communication by sea is as perfect as it is humanly possible to make it. We believe great improvements are being made and are in contemplation in the way of lighting, and, if there are obstructions to navigation which can be removed, we presume that this will be done, but investigations seem to show that many of the accidents are due solely to the carelessness or incompetency of the pilots. This is a grave charge, and if true no time should be wasted in dealing with it, as well as with any other defects which are capable of remedy. We feel sure that the people of Canada will sustain the Government in practically any expenditure that is necessary in this connection.

North-West Provinces.

At the moment, Canada, to many people in the United States and Europe, means our three North-West provinces, and we who live in the East may as well become used to the fact. Having regard to present population, few places are more talked about than Winnipeg. We waited long to come into possession of this country, guarded as it was so carefully from the settler, and in the short time during which we have controlled its destiny, we have struggled hard with the two great problems of settlement—transportation and immigration. It now looks as if we are to have our reward. Many claims have been made for this part of Canada which fail to take into account the laborious part which man must play in its development and the probability that, being inherently lazy, he will not quite do his best. On the other hand, there have been writers about the North-West whose pessimistic views are obviously the result of holding a brief which calls for the counsel of despair instead of hope. The plain statement of the truth, however, as far as it has been ascertained, is all that the country needs. It is clearly a part of the world where many millions of people may work out their material independence; may, in proportion to their industry and intelligence, become owners of property; and where a larger proportion than is often the case in the world, may become actually wealthy.

When in August many were estimating the wheat crop at 90,000,000 to 100,000,000 bushels, we sent to London the estimate of our Winnipeg manager, which was 82,540,000 bushels. For all grains together his estimate was 174,125,000 bushels. The crop has now been harvested and largely marketed, and the revised report of the North-West Grain Dealers' Association at 15th October was as follows:

		Bushels.
Wheat,	4,019,000 acres at 21.6 bushels per acre,	86,810,400
Oats,	1,423,000 acres at 46.6 bushels per acre,	66,311,800
Barley,	433,800 acres at 31.6 bushels per acre,	13,447,800
Flax,	34,900 acres at 13.7 bushels per acre,	478,130

A total of 167,048,130 bushels.

The conditions under which the crop was sown, ripened, and harvested, were all more favorable than we have the right to expect every year, and a marked contrast to those of the previous year. Perhaps the most satisfactory feature of the wheat crop is the proportion, said to be as high as 80 to 85 per cent., which is classified as high-grade milling wheat. And it is to be remembered that our wheat, when compared with the wheat similarly graded in the United States, is really so superior to the latter as to put our farmers to some disadvantage in obtaining what their wheat is really worth.

The money value, although seriously affected by the fall in the price of wheat, must, nevertheless, be from $70,000,000 to $75,000,000, and to this sum must be added that of the cattle, hogs, horses, dairy produce, etc. This is not a large sum of money when compared with agricultural figures in older parts of the world, but it is a very large sum of money for a country so young in everything which contributes to industrial success. Statistics regarding new countries have much greater significance as indications of the possibilities of the future than as illustrations of the present, and those we submit, regarded in connection with the very small proportion of the available area which has yet been settled, are enough to dispose of doubt as to our ability at some time in the not distant future to supply Great Britain with her requirements in cereals.

When nature is willing to do so much for us it is depressing to consider how badly man often does his part. There is unfortunately no longer any room for doubt that many of the more early settled of the Manitoba farms are decreasing in productive power because the land has been allowed to deteriorate. Farmers who are careless year after year in the selection of seed, who neglect to destroy noxious weeds, who will not consider their land in changing crops from year to year, or protect their crops when being harvested, are simply enemies to the public good, and should, as far as the law permits, be treated as such. If the municipal authorities would carry out the law both as to farmers who allow noxious weeds to grow on their farms, and as to their own road allowances, a change would at once result so great as to show how criminally reckless is the neglect of such a course. We are glad to hear that the Canadian Pacific and the Canadian Northern Railways, working in conjunction with the officers of the Experimental Farms, are sending over their lines special cars filled with samples of grain and of noxious weeds, and in charge of lecturers who will illustrate the advantage of good seed, the best methods of cultivating grain and of exterminating weeds, and the effect and the loss in money from diseases of wheat. By far the most interesting fact in grain-growing in the North-West at present is what might be called the discovery that we have great winter wheat areas where until lately we had not even considered that winter wheat could be grown. In 1903 we raised less than 30,000 bushels of winter wheat, while last year the quantity in Alberta is estimated at over 1,500,000 bushels. The highest authorities in the United States are most enthusiastic as to its quality, and as to the value of land which produces such an article of commerce, while in competition with winter wheat from all parts of the United States, the best of our varieties carried off the gold medal at the Lewis and Clark Exhibition recently held at Portland, Oregon. To add to the importance of the discovery, this wheat has, thus far in Alberta, been most largely grown in localities which were not by Eastern people included in the wheat but rather in the cattle country. Winter wheat has also been grown successfully in other localities, notably in the Swan River Valley in Northern Manitoba, where, for four years, erperiments have demonstrated its success. These two districts are so remote and so different geographically that it is hardly safe to venture a guess as to what we may not hope to accomplish in this very important development.

There has been a large increase in the shipments of cattle to the East, and as a whole prices were better than last year. While conditions for the profitable grazing of cattle by farmers are not as favorable as we could wish, there will doubtless be a steady increase in live-stock shipments, and in time this will be a most valuable feature in farming throughout the three provinces. There is a noticeable improvement in the character of the breeding of cattle and horses in several localities, but hogs are not increasing satisfactorily in number; nor are dairying and the smaller adjuncts of good farming, such as raising poultry, obtaining sufficient attention. Our North-Western farmers should not delay too long developing along lines which have been successful in such States as Iowa, Minnesota, and others, especially in view of the deterioration of the land to which we have referred.

In the ranching districts, the conditions under which cattle were fattened have varied, being excellent in most parts, and in others, while not bad, still not quite satisfactory. Sales have been larger than last year, prices better, and the industry has prospered. The sale of one of the largest and best known ranches in Alberta, however, to the authorities of the Mormon Church at a price which means the re-sale of the ranch for farming purposes, is only one of many indications that the future of the large ranch is at least uncertain. There are undoubtedly large areas much more suitable for ranching than for anything else, while other parts of Southern Alberta are destined to be converted into successful farms, growing among other things the best of winter wheat. And in this connection we must not forget the important enterprise of sugar making in Alberta, based entirely on beet crops grown in that province.

One wonders how many Eastern Canadians realize that there are already in Manitoba alone over 3,000 miles of railway. When we consider what railways have done for Manitoba, we may imagine the intense interest in the new provinces in the building of the Grand Trunk Pacific Railway, which will open up another great stretch of fertile lands; in the entry of the Canadian Northern into Edmonton; and in the proposal of the Canadian Pacific Railway to

DEBENTURES.

Tenders will be received by the undersigned up to 4 p.m. on Wednesday, January 31st, 1906, for the purchase of $45,000.00 Debentures of the City of Fernie. These debentures will bear interest at the rate of five (5) per cent. per annum payable yearly. Principal will be repayable as follows: $40,000.00 Sewer Debentures at the expiration of 30 years. $5,000.00 Fire Equipment Debentures at the expiration of 10 years. The highest or any tender not necessarily accepted. Tenders will be received for the whole or any part of either issues.

For further particulars address,

JOHN W. NUNN,
City Clerk,
Fernie, B.C.

build from the south-east to the same point. These new provinces, transected by main lines of transcontinental railways, will need rapidly many miles of branch lines, and we may expect great development of this kind.

Saskatchewan and Alberta are each so much larger than Manitoba, and the new settlers are to so much greater an extent going into these new provinces, that it will try our ability to the utmost to keep pace in railways and all other aids to material progress. These new provinces are not only possessed of great possibilities as producers of grain and cattle, they also contain in large quantities coal, lumber, oil and other natural resources. The fur trade of last year for that part of the Territories north of the new provinces which is tributary to Edmonton, is estimated in value at over a million dollars.

Immigration is now very large, the numbers coming from the United States being still much greater than those from Europe, while the movement of Canadians from the East to the West of Lake Superior is almost half as great as the immigration from the United States. The land sales are so large that the railway, land and colonization companies have materially advanced their prices. In this connection we again draw attention to the wide range of land speculation throughout the West. That men should invest or speculate in land where land is almost the one great asset, is inevitable; that farmers should buy and try to hold more land than they can easily cultivate, although they are dependent upon an uncertain labor market, is quite natural under the circumstances; but when an entire community—merchants, manufacturers, farmers, professional men and clerks—is engaged in the effort to increase the price of land, trouble must come sooner or later. There are, of course, many things transpiring which will legitimately advance the market value of land in town and country, but these influences are at the moment probably less powerful than the mere views of a community bent on holding for a rise in land for which many have no personal use. Some day or other an uncomfortably large number will wish to sell at the same time, and grievous loss will doubtless result.

Public improvements by municipalities and the erection of buildings of all kinds throughout the three provinces have been proceeding at a remarkable pace. The increase in building during 1904 in Winnipeg seemed to make it improbable that there would be much further increase in 1905. The buildings erected, however, in 1905, are almost twice as many as in the previous year, although the aggregate cost is not very much in excess. The supply of houses in Winnipeg seems now about equal to the demand, and it is to be hoped that this will cause some check to building of a speculative character.

The payment of debts is of course materially better than in 1904. It is abundantly evident, however, that people throughout the West have incurred heavy debts for the holding of farm and city property, and but for this and the unsatisfactory crop of 1904 the financial effect of the present crop would have been much more satisfactory. We are glad to notice that throughout the West there is a determination on the part of those extending credit to be much more rigid and careful in future.

British Columbia.

While the North-Western provinces have had more attention from Eastern Canada and from the outside world during the past year, no province in Canada has had greater prosperity relatively to its immediate possibilities than British Columbia. This huge province, destined probably some day to outstrip all others in wealth, with resources which require literally millions of people for their development, has at present but a handful, as it were, of people. It is so rich in products of both sea and river, valley and mountain—fish, fruit, grain, cattle, timber, coal, and almost all minerals, it is so lovely a country for man to live in; and it can eventually be so largely self-supporting because of its possibilities in producing varieties of food and varieties of manufactures, that no one can doubt as to the character of its industrial future. But the physical and financial problem of British Columbia is by far the most difficult of any of the provinces, and it seems desirable that the other people of Canada should appreciate what the British Columbians have to do. Individually the people of this province are well off, and the growth of the city of Vancouver is as startling as that of Winnipeg, Calgary or Edmonton, but the number of people in British Columbia is about the same as in the city of Toronto, and a large part is not of white blood. This small body is called upon to make the initial expenditures necessary to render even the earliest conditions of settlement possible. And these initial expenditures mean roads built in one of the most difficult of countries, bridges across great rivers, etc.; indeed, at every point, the first outlay is most costly, especially as compared with that of the prairie provinces. And when communication is made, the individual again has to expend unusual labor and money before he can get any return. The ultimate result of such initial expenditure, if wisely made, is not a matter of doubt, but the difficulties explain why British Columbia grows more slowly in population than we all wish.

The lumber business, depending as it still does mainly upon the prairie provinces, has been very satisfactory, as to both volume and price. In coal mining there has been a handsome increase in production of both coal and coke, and several new mines have been opened. There seems to be no reason why these staple industries should not grow steadily, especially in view of the almost unlimited raw material, until British Columbia takes its place among the great coal and lumber producers of the world. In anticipation of this several large sales of timber limits have recently taken place at good prices, and among the buyers are a good many Americans. Copper mining and smelting are now established and profitable industries. They require large capital and complete technical knowledge, but the results of such a combination seem to be as sure as in other well managed manufacturing businesses. The year's output of the Boundary Mining district is about 1,000,000 tons. There is a marked improvement in lead and silver mining, and the outlook seems better than for many years.

The cattle ranching business has been fairly good; important movements looking to the growing of fruit on a large scale are being made; irrigation in some dry districts is being successfully carried on; farming and dairying in the districts where pursued have been profitable, and, generally, all land operations have yielded a good return for labor bestowed thereon. Increase in the value of real estate and activity in building have been as marked as in other parts of Canada, and in Vancouver especially speculation in real estate has reached proportions which promise trouble for some of the investors.

This being the year for the curious quadrennial recurrence of large returns from the Fraser River, salmon fishing in British Columbia has been successful, and the fish have fortunately brought a high market price. The previous three years have been so unsatisfactory that vigorous steps for the preservation of this great industry have become plainly necessary, and we are glad to know that as one of the results from a commission appointed by the Dominion Government, we are likely to have much more attention paid hereafter to the fishing interests of the Pacific than has hitherto been the case. We cannot expect that the next three years will produce satisfactory results, but if arrangements now in contemplation can be completed, the result should be a steady prosecution of efforts at increasing the number of salmon, and, if these are successful, we may in the course of time build up the three lean years of the Fraser River to the level of the fourth year, and we may also improve all other British Columbia salmon rivers. The object is so vitally important to British Columbia that we can only hope that politics will not be allowed in any manner whatever to interfere with the desired result. Salmon fishing is, however, only a small part of the great fishing rights possessed by Canada in the Pacific Ocean, and the rivers running thereto. The supplies of halibut and herring are almost inexhaustible, and there are large quantities of other fish, such as smelts, cod, whiting, etc., but at present the business of fishing is not well organized, nor is there sufficient skill in the community to make the best use of this great natural source of wealth. It is doubtful if in Eastern Canada and in foreign countries any conception has been formed of the extent and richness of the fishing grounds owned by British Columbia. At the present time the United States fishermen are taking large quantities of halibut, using our ports for refuge in case of storm, and shipping their halibut from Vancouver in bond to the United States. We cannot, of course, interfere with any legal rights they have, but surely, as in the case of the Atlantic fisheries, we ought not positively to aid such a diversion of our natural products. In this connection we should also like to draw attention to the unfortunate effect of the exclusion of Mongolian labor. It was of most noticeable value in connection with both fishing and canning, and the lack of such labor must have a very deterrent effect upon progress in this particular industry.

There has been considerable railroad building in southern British Columbia, and sooner or later large developments must follow the building of the Grand Trunk Pacific Railway across the upper part of the province. The sale of the Esquimalt and Nanaimo Railway to the Canadian Pacific Railway should also have an important effect upon the development of Vancouver Island.

United States.

In common with most other portions of North America the Pacific Coast States of Washington, Oregon, and California, in all of which we have branches, have enjoyed unusual prosperity during the past year, exceeding in many respects any record in the past.

The wheat crop in Washington has been the largest in its history; the salmon season has been very satisfactory and profitable, both in volume and in price; the lumber business has improved over that of the previous year; the crop of hops is larger than usual, but the great fall in price has made the

business unprofitable; the trade with Alaska and the north has been better than for several years; the end of the Eastern war has been followed by a great increase in the trans-Pacific trade; preparations are evidently being made for the entrance into Seattle of new transcontinental roads; and generally the year has been one of the most prosperous in the history of Washington. It would not be wise for any one to venture upon an estimate of the probable effect on Washington of the development of Alaska which is so rapidly going on; of the trans-Pacific trade now only in its infancy; and of the development of its own vast resources in timber, and in lands suitable for wheat culture. While the gold which has reached Seattle from the Yukon shows a total of only $7,861,000, the results from Nome, Tanana, and other sources, bring the total up to $18,667,000, and it seems clear that, while there must be decreases in various camps, the total is not likely to decrease for some time to come, especially as so little territory has as yet been worked by dredges or hydraulics.

We find a similar prosperity in Oregon. The product in lumber was about the same as last year, with better prices. The state is said to have in standing timber two hundred and thirty-five billion feet occupying about 54.000 square miles. This must be one of the world's greatest timber reserves. The yield of wheat has increased, with a better outlook for the next crop than for many years past, and flour exports are larger. The results from fishing were excellent, indeed as good as in 1904. Other industries, such as dairying and wool, have done well, while hops, fruit, etc., have had varying success. The total results of all industry have given Oregon a signal year of progress.

California has had some features of an unfavorable kind, but still the year is regarded as the best in the history of the state. The wheat crop was very unsatisfactory, the yield being but about 12.000.000 bushels, against 32.000.000 in 1899. The character of farming in the state is apparently bad, and the decline can be only partially attributed to an unfavorable season. The receipts of salmon from Alaska were the largest since 1901. The manufacture of redwood lumber has increased, and the total for 1905 is about 340.000,000 feet, as against 209.000.000 in 1900. each intervening year showing a moderate but steady growth. The receipts of lumber of all kinds at San Francisco for 1905 were 759.000,000 feet, a handsome increase over 1904. The value of the crops of oranges and lemons is about $40,000,000, as compared with $30,000,000 in 1904. The crop of grapes for wine, table and raisins was about three-quarters of an average, but the quality was the best yet known. The trade in canned and green fruits was very large and profitable, stimulated particularly by the poor fruit crops of the Eastern and Middle States. California is steadily increasing in wealth and population, railroad building is proceeding rapidly, shipping is again profitable, while real estate and building, both here and in Oregon and Washington are exhibiting the same activity as elsewhere in the United States and Canada.

Considering the United States generally, the conditions are distinctly prosperous. With another great corn crop, this year exceeding two and a half billion bushels, with a wheat crop of about 700.000.000 bushels—only once exceeded before, and about 150,000,000 larger than in 1904—with other grain crops slightly larger, and with a cotton crop of about normal proportions, the basis of a great commerce is established. The exports exceeded a billion and a half of dollars, while the imports for the second time exceeded a billion dollars, these figures leaving an enormous balance of trade in favor of the United States. Their internal trade has been on a greater scale than ever. There is evidence of this in every kind of business activity, but in nothing more clearly than the usual test of expanding trade—that of iron and steel. Almost every blast furnace is in operation, the volume of ore being transported from the mines, and consequently of pig iron manufactured, exceeding all previous experience. This enormous volume of legitimate and profitable trade is unfortunately, but perhaps naturally, accompanied by excessive speculation in securities, with prices which certainly seem perilously high. The country's requirements for bank loans are very large indeed, and the rates paid for money in New York recently, although only from day to day for speculative purposes, are a sufficient indication of an over-strained condition. One cannot view without concern such an abnormal state of affairs, and it is to be hoped that the real business interests of the country will not suffer because of the volume and the pace of stock speculation.

Before sitting down I would like to remind gentlemen who are here—and I have said the same thing before—that this report, which is filled with many dry facts, and altogether too many figures, is really not prepared so much for those who are good enough to be present and listen to it, as for the 3.500 shareholders and for the customers of the bank in the various Provinces, and in the various States to which I have referred. I make this statement because it may seem curious to you that we should be interested in many facts which seem quite local. They are local so far as people in Toronto are concerned, but they are deeply interesting to people in the various sections with which I have dealt.

The motion for the adoption of the report was then put and carried. The president then said:—

As was stated in the report which has been presented to you this morning, we have concluded that it would be well to increase the number of directors from ten to twelve, and a resolution to that effect will now be proposed. The names of the two gentlemen who will be offered for election, in addition to those at present on the board, are Mr. H. D. Warren, and Mr. B. E. Walker.

It was then moved by Mr. Robert Kilgour, and seconded by Mr. Flavelle:—

That by-law No. 1, adopted by the shareholders on the 18th June, 1901, and amended by them on 14th January, 1902, be amended by substituting the word "twelve" for the word "ten" in the first line of the said by-law.

The president:— As a consequence of the increase in the number of directors which you have authorized by the resolution just passed, we now have to ask you to assent to an increase in the remuneration which the board receives. The annual appropriation at present authorized for this purpose is $20,000, and with your consent we now propose to increase that amount to $25,000. It should, however, be understood that we shall not necessarily use at once the whole of this $25,000, but we thought it well when making an increase to fix that amount as the limit of the sum which might be taken for this purpose.

It was then moved by Mr. J. L. Blaikie, and seconded by Mr. John A. Bruce:—

That by-law No. 5, adopted by the shareholders on the 18th June, 1901, be amended by substituting the words "twenty-five" for the word "twenty" in the first line of the said by-law.

In moving the resolution Mr. Blaikie said:—

Very excellent reasons are given in the report already submitted why this resolution should be adopted. If other reasons are desired, the admirable and exhaustive address to which we have listened this morning will furnish those reasons. It is most desirable that we should have this addition to the directors, and I am sure the shareholders of the bank will never grudge in the smallest measure the little addition which is proposed to be added to the amount for distribution amongst these gentlemen for their services.

Mr. Justice Maclaren: Mr. President, Ladies and Gentlemen,—The resolution which has been placed in my hands is one that I am sure will find a very hearty acknowledgment at this meeting of shareholders. The report of the directors, the address of the president, and the address to which we have just listened from the general manager will, I am sure, be well received not only by those now present, but by all the shareholders of this bank. No doubt a kind Providence is responsible for a large part of the prosperity that was so admirably portrayed in the address of the general manager, for a large part of the progress in manufactures and in various branches of commerce, and yet I think you can all look to those men who have been at the head of this institution, and say that they are responsible for a very large share of the prosperity which has attended this institution. I am sure that in view of the admirable report which has been presented, we will all join heartily in the resolution. I have therefore, much pleasure in moving:—

That the thanks of the meeting are due, and are hereby tendered to the president, vice-president and other directors for their careful attention to the interests of the bank.

The motion was seconded by Mr. N. Silverthorn and carried unanimously.

The president: On behalf of my co-directors and for myself I desire to express my thanks and appreciation of the resolution that has been so kindly moved by the Hon. Mr. Justice Maclaren, and seconded by Mr. Silverthorn. The fact that the services of the directors have been appreciated and that they are able to assist in the direction and progress of this great institution is a matter of satisfaction to them and to me.

Mr. Henry Beatty then moved:—

That the thanks of the meeting be tendered to the general manager, the assistant general manager, and other officers of the bank for the satisfactory discharge of their respective duties during the past twelve months.

The motion was seconded by Mr. S. Nordheimer, who said:—

Considering the excellent state of the bank as disclosed by the address of the general manager, I deem it a very pleasant duty to second this resolution, and not only to second the motion but to congratulate the general manager, directors and shareholders on the wonderful showing of our institution. I have the greatest confidence in the board of management of the bank.

Mr. Walker:—

This is the nineteenth time I have responded to this resolution, and yet it gives one rather increasing than diminishing pleasure to do so. Last year and this year we have invited to Toronto a great many managers of the bank

from different parts of Ontario, and it may have seemed rather an innovation last year to ask one of them to respond to this resolution. But after all they are the men who are even more deeply concerned than we are. Our staff is now almost a thousand—about 975—stationed at 133 branches, and you may be quite sure that this resolution is each year appreciated by all these men. I will not say anything further regarding it, nor does Mr. Laird wish to say anything, but we have Mr. Gill, of Ottawa, with us, and I would ask him to say a word to the resolution.

Mr. Gill:—

I esteem it a distinction not only for myself but for that district of Ontario where I am stationed to be allowed to make some acknowledgment of this very gracious vote of the shareholders. When a ship reports herself at the dock and the owners come on board, as they have done to-day, and not only congratulate the captain on the good order of the ship, but feel disposed to add, "We like the looks of her crew," it is very pleasant for the crew; and so on behalf of the crew of this good ship, the Canadian Bank of Commerce, I beg to return thanks. We have been sailing under full and favorable winds, but we stand ready to trim sails when the call comes. There is perhaps something more in the hearing of a resolution than in reading it in cold print, so that those of us who are privileged to be present here to-day will, I am sure, carry back to our respective bailiwicks an impression to spread among the staff that the efforts of each member of it are recognized by the owners as being part of the cause of the general success. I should only like to add that I am quite convinced that when the older ones amongst those present have left the ship you will have occasion still to continue this kindly vote. I think this almost follows from the fact that I know of no institution where the executive have been so thoughtful and so careful of the interests of the employees. There has always been a feeling that whatever the decision of the Head Office may be, a kindly consideration has been shown, and that in almost every case Generosity goes hand in hand with Justice. I can assure the shareholders, and they can accept my word for it, that there is every reason for the best possible feeling throughout the staff. Again we thank you for this very kindly recognition.

It was then moved by Mr. James Crathern, and seconded by Hon. Lyman M. Jones:—

That the meeting do now proceed to elect officers for the coming year, and that for this purpose the ballot-box be opened and remain open until 3 o'clock this day, the poll to be closed, however, whenever five minutes shall have elapsed without a vote being tendered, the result of the election to be reported by the scrutineers to the general manager.

The meeting then adjourned.

The scrutineers subsequently reported the following gentlemen to be elected as directors for the ensuing year: Hon. Geo. A. Cox, Robert Kilgour, W. B. Hamilton, M. Leggat, James Crathern, John Hoskin, K.C., LL.D.; J. W. Flavelle, A. Kingman, Hon. L. Melvin Jones, Frederic Nicholls, H. D. Warren, B. E. Walker.

At a meeting of the newly-elected board of directors, held subsequently, Hon. George A. Cox was re-elected president, and Mr. Robert Kilgour, vice-president.

* * *

DETROIT BOARD OF COMMERCE.

A good indication of the growth of the principal city of Michigan is to be found in recent interviews given by members of the Board of Commerce of that city to the Detroit "Free Press." The same issue of that paper which contains them reminds its readers editorially that the American "stand-pat" attitude on high tariff and no reciprocity has put the Canadians on their mettle and their resources, to the manifest lessening of Detroit's business with Canada.

"Their increased tariff rates, timber restrictions, anti-dumping regulations and bonuses on steel rail manufacture," says the "Free Press," "are beginning to have an effect on our exports. In 1903 over 77 per cent. of the exports from Detroit were consigned to the Dominion. The next year the percentage of the whole was 70 per cent., while in 1905 it was only 56.6 per cent."

Some remarkable figures appear in the journal quoted illustrating the expansion of the city's commerce during the twelve months last past. For example: "During the year three hundred and nineteen new companies were organized in Detroit with a total capital of $63.202,000. In this period sixty-seven corporations already in existence increased their capital stock $9,905.450, making a grand total of capital invested in 1905 of more than $73,000.000. At the same time building operations aggregating $10,462,100 have been undertaken in the city."

It is gratifying to find a recognition by the head of its commercial body of the duty owed by the prominent business men of a community to their fellow-citizens. That no man lives to himself alone is plainly admitted by Mr. Chas. F. Bielman, when he welcomes "the widening interest in public affairs. Our business men are more concerned than they used to be in events outside their own circle. They are beginning to realize that co-operation—united effort for the common good—really promotes individual success."

Mr. W. R. Farrand also notes a marked change in the attitude of business men toward public affairs since the Board of Commerce was organized. "The manufacturer formerly allowed himself to be absorbed almost entirely by his business. Now he is ready to give a good share of his time and thought to his city, where there is no commercial incentive or reward."

As to the growth of Detroit as a manufacturing centre, Mr. C. C. Jenks remarks the increase of nearly $30,000,000 in manufactured product over that of the last census year; an expenditure of $11,000,000 for new buildings, of which one-ninth is for manufacturing purposes; such a gain in the volume of traffic as to keep the railroad yards overcrowded; an increase of 15 per cent. and upward in the banking business. It is worthy of attention that, for example, the pharmaceutcal industry in Detroit is a notable example of rapid growth and of the concentration of business. In 1890 the census returns gave $6,660,000 as the value of the entire manufactured output for the United States. Ten years later it had increased to $23,200,000. Detroit then contributed about $5,000,000. In 1904 Detroit's product in this kind was $8,300,000 and this year it will approximate $10,000,000. It leads every other city in the country in this line, says Mr. Edwin H. Nelson.

One of the city's bankers, Mr. H. C. Potter, gives figures showing that the deposits of Detroit banks indicate an increase of over $15,500.000 in the last two years. He regards the general financial condition of Detroit institutions as exceedingly healthy and prosperous.

We are compelled to pass over the contributions of several other members of the board of direction, but the hopeful views of Mr. George M. Black deserve to be reproduced. He does not indulge in statistics, nor is he lengthily didactic, but simply says: "The coming year will excel the past. Let us all be proud of Detroit—think it, write it, talk it; let the whole world know we are on the map, and near the centre at that. We are in front; then dig hard and push all together, and stay there."
